Mr. Loeber was born in Holland twenty-six years ago and traveled in this country previous to joining Mr. Boddington's force for the Continental Bulb Company, Hillegom, and was most successful as a traveling representative. During the short time he was on the road he became quite Americanized and thoroughly acquainted with American methods. He was a very lovable man and was popular with all with whom he came in contact, bright, alert and a good friend, generous to a fault. He had no relations in this country, but many friends, who will mourn his loss and sympathize with his parents in their sad bereavement. He was laid to rest in Kensico Cemetery on Sunday last.

H. A. B.

Use for Horse Chestnuts.

Answering the inquiry of a correspondent as to the value of horse chestnut seeds the Country Gentleman has this to say of the tree, among other things:

"The trees make poor firewood, and perhaps the best thing to do with them is to burn them, as they have but one characteristic of a good shade tree—dense foliage. They are an untidy tree, have low heads, prevent air drainage, and have no appearance of grandeur and strength like the English and American elms."

Evidently the Country Gentleman has never seen the grand trees of horse chestnut as they grow about Philadelphia or the lines referring to it would never have been written. It is one of the grandest lawn trees we have, in no way an "untidy" tree. At all times, especially in Spring when its great panicles of flowers are expanded, set off as they are by the beautiful green foliage, it is the most imposing tree many lawns possess. Neither the English nor the American elm makes near the same fine display. On the old battleground of Germantown, on the Chew estate, are trees some 50 feet in height which maintain their fine appearance of foliage from early Spring until late Fall.

What horse chestnuts require is what these trees referred to have, a situation on a lawn where the soil is kept cool by the grass sod. They are not good street trees because of the great heat met with in such situations.

J. M.

AMONG THE GROWERS

At Framingham, Mass.

S. J. Goddard.

At this establishment, which is carried on by one of the younger members of the trade, everything is in apple-pie order. Carnations, which are the chief product of the place, are away ahead of former records at this season. Many of the leading varieties are grown and almost all of them receive a fair trial. Some of the finest blooms we have seen this season are here. In white varieties White Perfection is away ahead of all others. The flowers are large, well-formed and carried on good stems, Lady Bountiful is also good. For crimson, Harry Fenn still seems to hold its own, but Octoroon is here a larger and richer flower. If it continues at its present pace it will certainly supersede Harry Fenn. Helen Goddard is in grand shape, and although this variety has not done so well in some localities it is certainly a fine market pink. Winsor is not doing as well as had been expected; so far it has not been free enough and the stems are too short. Rose Pink Enchantress is a grand variety; the flowers are large, of good color and all perfect. Victory is doing well and is quite largely grown; and Beacon so far is proving all that is claimed for it. It certainly is a good producer. Britannia, which proves such a good variety in England, is being tried and so far looks well, but more time will be required to give it a

stock all looks healthy and many orders have already been received for the plants that will be sent out this season. Enchantress is the best pink of its color here, although Fair Maid is good. Rose Pink Enchantress is very good, but Winsor is not as fine as might have been expected. Winsome is doing finely and is well liked both for its color and habit of growth. Red Chief is a new scarlet variety, which is good and is proving satisfactory. Beacon is well liked and is doing well. Victory is also well liked but is a hard variety to grow well. Harry Fenn is considered the best crimson to grow in quantity. Among white varieties Governor Wolcott here continues fine. Lady Bountiful is good, and Queen is still considered one of the most profitable. Mrs. M. A. Patten and Prosperity are now only grown in limited numbers. The latter variety was always one of the specialties of this establishment. Several seedlings and new sorts are being tested and one that gives good promise is a pink seedling raised by Dailedouze Brothers, Flatbush, N. Y.

Among other staples seen in quantity were Adiantum and Whitmani ferns, Purity freesia, cyclamens, mignonette and marguerites, the latter two being always eagerly sought after on account of the fine grades here produced.

JOHN W. DUNCAN.

Growing Exhibition Chrysanthemums.

Abstract of a Paper read by William Duckham before the Chrysanthemum Society of America at New York, November 6, 1907.

In prefacing his remarks Mr. Duckham referred to the great popularity of the exhibition flowers, and

A Word as to Buds.

Now as to flowers; first, we must have the bud, and to me the bud is quite as important as to have a strong, vigorous plant. This has surprised me more the past year or two, and particularly this year, brought about somewhat in my mind by the Australian varieties. I will refer only to crown buds, for I don't know of five varieties, where terminal or even late crowns would win in fast company. The introduction of so many Australian varieties, perhaps accounts for this. My experience with varieties of Australian origin has been that the buds can be taken much earlier and develop perfectly, especially if the weather should be warm; if not, make the house a few degrees warmer by fire heat and you will find buds that it would seem impossible to open will develop perfectly, and that which appeared at one time a hard core and without the slightest semblance of a flower develops finally into a beautiful and well-finished bloom.

I have in mind a batch of Nellie Pockett, which showed buds August 1. It appeared a little early to take them, but if allowed to go on, it would, in my mind, have been a little late. A part was taken, and the result was no finer Pockett have I ever seen; the other half that was allowed to go on made only medium or second class flowers, although taken August 21 to 24. This applies to a number of varieties, and I say, do not be timid in taking an early bud, especially of varieties of Australian origin. As I said before, it is not always the strongest and most vigorous plant that produces the best and largest flowers, but just as important is the bud taken at the right time.

Doesn't Despise Other Types.

I would wish it to be distinctly understood that I am speaking of exhibition varieties only, but at the same time do not think I despise the other different types, such as decorative, or commercial, or the singles, for all are very beautiful and all have their usefulness, and are fully as attractive as the large Japanese; but as I was asked to confine my remarks to exhibition varieties, I have for that reason, done so.

Feeding chrysanthemums is too well understood for me to dwell on; you all have your own way, and it varies but little. I find the chrysanthemum is not very particular what it is fed, provided it is not fed on the same diet too long. A change is always appreciated; and the plant responds and returns many times over the best care and food one can bestow upon it.

Aster "White Waif."

The accompanying illustration represents a patch of a white aster growing on the grounds of our esteemed contributor F. W. Timme. When sending us the picture Mr. Timme wrote as follows:

"I have taken the liberty to send photograph of my aster field as it appeared on my arrival home from Europe, September 24, 1907. The variety here shown is of my own raising, is very much like the upright branching in habit but more than a week later, which I consider its chief merit. No praising it up by further description seems needful.

"I have no seeds to offer for sale, only reserving enough every season for my own use, marking the packet "W. W." to distinguish it from other seeds of white varieties that I grow, which does not stand for "Worthless White" but for "White Waif," a name I gave it because the first lone plant was found in a bed of red Victoria asters four years ago. My wife, however, persists in calling it William Waldorf, heaven knows why!"

FLOWERS CURE INSANITY.—There seems to be no end to what may be expected in the line of new treatments for various diseases. The latest is the "flower cure" for insane patients, which is being tried at one of New York's great asylums. Common or garden flowers are the medium used and experiments are being carried on to determine the psychological value of various blossoms in the treatment of patients. It has been found that flowers are of great benefit to the insane and the product of the large greenhouses which are maintained is scattered through the asylum in profusion. In some cases a single rose has been found to be more efficacious in its soothing effect than opiates and strait-jackets. The beneficial influence of flowers, while never absent, it is asserted, varies in different individuals, women as a rule being more susceptible than men. Color in various blossoms seems to be a prime factor in the new treatment, although experiments have not reached the point where a certain flower can be prescribed for a certain kind of mental affliction.

Probably this may account for the paucity of "lunatic" individuals found among those engaged in the florist business.

LAKE CITY, MINN.—At a special meeting of the stockholders of the Jewell Nursery Company, held recently, it was resolved that the highest amount of indebtedness that may be incurred by this company shall be \$100,000; also that the corporate existence of the concern be renewed for a further term of thirty years. J. M. Underwood is president, and R. D. Underwood, secretary of the firm.

Timme's Aster, "White Waif"

proper test. White Fair Maid is doing well and promises to be a useful variety. Queen is still grown and Enchantress is cultivated largely, as none yet has been found to supersede it with that pleasing color. Only a few Mrs. M. A. Patten are now grown, as a variegated seedling of Mr. Goddard's own is proving superior; this is the third year of this variety, which is to be called Priscilla. Another seedling of a pleasing pink color is doing well and promises to be heard from later.

In addition to carnations Mr. Goddard grows a general variety of plants and flowers for his retail trade which has greatly increased the past two years.

William Nicholson.

At this large establishment everything was in fine shape. W. R. Nicholson is now in full charge and the appearance of all the products speaks well for the ability of the younger generation. There is a large general variety of plants raised for the retail trade, and chrysanthemums and carnations are extensively grown for the wholesale market. Many fine chrysanthemums are to be seen, although many of the earlier sorts are past. Golden Dome, a recent yellow variety, is here done in fine shape, as is Pennsylvania, which every grower knows is hard to handle. Intensity is the best dark red, but there are many other varieties which are grown more or less as the demand requires.

Among carnations the variety this year that is the leader at this establishment is Afterglow, and it is fine indeed. Its color commends it and, better still, its free flowering qualities and size and shape of bloom. The

urged the continued growing of these to hold the popular interest in the chrysanthemum. He gave his experience in their cultivation as follows:

Propagation.

I have tried early, medium and late propagating and am frank to say generally the medium early propagation toward the end of February or early March has given me the best results. It is needless for me to go into detail; the method employed you all know. But I do claim that as soon as plants are rooted and potted, no neglect can be made up. The plants require all the attention it is possible to bestow.

Some of you may say you can produce the very finest flowers from much later propagation. This I am free to admit; so have I produced good flowers from late struck cuttings. In fact, some of the best flowers not only in finish, color, etc., but the largest, were from plants propagated in April, but for general acceptance I would prefer the first week of March.

Opposed to Large Pots or Spaces.

I shall omit the general cultivation; suffice it to say it is impossible to give the young plants too much care and attention in the growing season.

I have grown plants in boxes, in benches and pots; all with about the same result. The best flowers perhaps were grown in the bench divided with strips between each plant confining the roots to a small space, and I found the stronger the grower the better the flowers, especially when the roots were confined to the smallest area. I have always been opposed to large pots or spaces, and after all I have observed, I am convinced more than ever of my contention, for when feeding time comes you have all live and growing roots where, on the other hand, if too much space and soil are given a lot of roots die and the plants consequently suffer.

The Chicago Flower Show, General View from Southeast Balcony

Heredity in Carnation Seedlings.

By J. B. Norton, U. S. Department of Agriculture, Washington, D. C., before the American Breeders' Association.

In 1904, at the request of Dr. H. J. Webber, the writer began taking notes on an extensive series of seedlings of the American carnation grown by E. M. Byrnes of Department of Agriculture. These were the results of crosses between several standard clonal varieties, but in all cases showed no uniformity of type in regard to doubling, singles appearing in every series. The percentage of singles appeared to be rather constant for the different lots, the general average for the whole lot being about 23 per cent. of singles to 77 per cent. of doubles. The doubles varied in the amount of doubling but could be roughly divided into two groups, standards and "bursters" or full doubles, the latter making up about one-fourth of all the seedlings. These percentages agreed so closely with the second generation results of a Mendelian hybrid that the writer at the 1904 meeting of the Society for the Promotion of Horticultural Science, at Philadelphia, ventured the opinion that the standard greenhouse carnation of this country was the unfixed hybrid of a cross between a single and a full double and that 100 per cent. of standard doubles could be raised from a cross between a single and a full double carnation.

Several crosses of this kind were made in the Winter of 1905-6 and so far the 250 seedlings that have bloomed, with one exception, are standard doubles. In all cases the crosses were made on single seedlings using pollen from the full doubles. No protection from outside pollen was used and the presence of flies and bees in the house would easily account for the one single seedling.

This method of crossing is not recommended as superior to the old method, but is advanced as a suggestion to aid carnation breeders in their work. Single and very double seedlings heretofore have been thrown away no

New Rose Mrs. Potter Palmer

Originators, Poehlmann Bros. Co., Chicago

matter how desirable their other characters might be. By pollinating a good single with the pollen of a "buster" that has some new desirable quality, a complete series of standard double seedlings can be obtained, thus giving twice the ordinary possibilities of success in fixing the new character since very little over 50 per cent. of standard double forms are obtained when two standards are crossed. The seedlings produced by this method that have bloomed thus far give quite as much promise as any produced in the Department houses from standard varieties or from standard double seedlings.

While this work does not prove that the carnation is following Mendel's law in regard to doubling, it offers evidence that any one familiar with Mendelian hybrids would accept as satisfactory proof. Another practical application of this method would be in the production of double-flowered garden pinks. At present many of the varieties on the market produce about 20 per cent. or more of singles. If these single plants were pollinated with the pollen of full doubles, a high grade of commercial seed would be produced that could be guaranteed to produce 100 per cent. of double flowers. It is possible that this method of seed production can be applied to other double flowers outside of the genus *Dianthus*.

THE ELBERON (N. J.) HORTICULTURAL SOCIETY held its regular meeting on November 4, President W. D. Robertson in the chair. This being the general meeting of the year, the various officers read their reports, which showed the society to be in a flourishing condition. In the competition for points at the meetings held during the year, Peter Murray was awarded the gold medal with an average of 89, A. Bauer, the silver medal with an average of 88; and J. Kennedy, third, with an average of 86. In the class for those without greenhouses, A. Grieb was first with an average of 81. Rickards Brothers of New York were present and offered a silver cup to be competed for at the meetings during the next year. A. Grieb donated a silver cup for a similar contest. A. Rickards installed the newly elected officers. GEORGE MASSON, Secretary.

DIRECTORY OF RELIABLE RETAIL HOUSES

The retail florist firms advertising under this heading will accept and fill orders for flowers and floral designs forwarded them by mail, telegraph or telephone, the usual commission of 25 per cent. being allowed.

\$25.00, payable quarterly in advance, will entitle the advertiser to a four-line card, under this heading, for one year, 52 insertions. For every line additional to four, \$5.00 will be charged. Four lines will average 32 words; each additional line, 9 words. Each advertiser receives one copy, free, of our Florists' Telegraph Code.

New York.

YOUNG & NUENT, 42 West 28th St. We are in the theatre district and also have exceptional facilities for delivering flowers on outgoing steamers. Wire us your orders; they will receive prompt and careful attention.

MYER, 611 Madison Ave. My facilities for delivering flowers for any and all occasions are unexcelled. Can give prompt service to steamer and theatre trade. Telegraphic orders solicited. Telephone, 6297 Plaza.

Kansas City, Mo.

SAMUEL MURRAY, 1017 Broadway. I will deliver orders for flowers in Kansas City and vicinity promptly. A first-class stock of seasonal varieties of flowers always on hand. Wire me your orders.

Detroit, Mich.

JOHN BREITMEYER'S SONS, Broadway and Gratiot Avenue. We cover all Michigan points and large sections of Ohio, Indiana and Canada. Retail orders placed with us will receive careful attention.

Denver, Colo.

THE PARK FLORAL CO., 1706 Broadway, J. A. Valentins, Prest. Orders by wire or mail carefully filled; usual discounts allowed. Colorado, Utah, Western Nebraska and Wyoming points reached by express.

Cincinnati, O.

HARDESTY & CO., 150 East Fourth, sell the best grade of flowers grown. Retail orders from distant points for delivery in Cincinnati or surrounding territory will receive prompt attention. Telegraph us.

Dayton, O.

W. G. MATTHEWS, FLORIST, 16 West Third Street. Flowers in any arrangement for all occasions for Dayton and vicinity. Personal attention given to all orders. Long distance telephones.

Dallas, Texas.

LANG, THE FLOEIST, the largest flower store in the South. Floral designs and all flowers in season; personal supervision and prompt service in Oklahoma, Texas, Louisiana. Mail and telegraphic orders solicited.

Louisville, Ky.

JACOB SCHULZ, 644 4th Avenue. Personal attention given to out-of-town orders for Louisville and surrounding territory. Have a choice line of seasonal flowers always in stock; delivery facilities perfect.

Indianapolis, Ind.

BERTERMANN BROS. CO. Our facilities for executing orders in an efficient manner are unexcelled. Our shipping territory includes the surrounding states. High grade flowers; expert workmanship.

Albany, N. Y.

EYES, 11 North Pearl Street, cut flowers or floral designs delivered to any part of Albany and vicinity on telegraphic order. Personal attention given and satisfaction guaranteed.

Chicago, Ill.

HAUSWIRTH, The Auditorium Florist, 232 Michigan Avenue. The quality of our work is of National repute, and we are prepared to execute commissions in first-class style in Chicago and its environs.

Retailers desiring a share of out of town trade should be represented by a card in this column.

FOR THE RETAILER

For reproduction on this page, we solicit from our readers engaged in the Retail Trade, good, clear photographs of subjects that are of general interest, such as store interiors, designs of different classes, new delivery wagons, etc.

The "Japana" Cut Flower Holder.

This device, which is being placed on the market by M. V. Garnsey, Lagrange, Ill., is a very serviceable adjunct to the retail florist trade. It can be used for arranging cut flowers with stems of any length, naturally in open bowls of glass, china, pottery, silver, metal, etc. The "Japana" cut flower holder is made of the best quality brilliant glass. They are round in form, of solid glass, perforated with holes in which the stems of the flowers are placed. They are constructed with a narrow flange at the outer rim of the base, making a space for water in the base of the holder, and by notches in the flange a circulation of water is given to the stem.

In the absence of an effectual means of support, arrangements of such favorites as the rose, daffodil, chrysanthemums, dahlia, etc., have been hitherto limited to narrow and trumpet shaped vases, their full beauty being greatly marred by the overcrowding and bunching together of the stems; by using the "Japana" flower holder, however, these flowers may be placed in any open shallow vessel as though growing in perfect freedom.

The holders are made in sizes of 2½, 3½ and 4½ inches diameter.

ORNAMENTAL LEAVES—GRASSES.—In the protests of Decorative Plant Company against the assessment of duty by the collector of customs at the port of New York, before Board 1, October 31, 1907, the merchandise, which was classified under paragraph 425, tariff act of 1897, relating to ornamental leaves and grasses, is claimed to be dutiable under paragraph 449 as manufactures of grass or palm leaf, or under section 6 as an unenumerated manufactured article. McClelland, General Appraiser, renders the following opinion: The special reports of the appraiser on these protests state: The merchandise in question marked A on the invoice consists of natural grasses, dyed and prepared, suitable and used for ornamental and decorative purposes. * * *

The only witness called on behalf of the importing company was its manager. It appears from his testimony that the merchandise in question consists of "agrostis," a natural grass dyed; palm leaves split and dyed to imitate "isolepis grass," and "papyrus flowers," a name applied by the shipper to designate this particular article. It appears from the record that the articles under consideration are subject to no further treatment after importation to make them more ornamental, but are assembled with other materials and used in the condition imported for decorative or ornamental purposes. From the evidence presented we can see no reason for departing from the former rulings of the Board covering merchandise imported by the same company similar in character and use to that here involved. We therefore overrule the protests and affirm the decision of the collector in each case.

The National Flower Show.

At the Auditorium hotel in Chicago on Friday, November 8, 1907, the wheels were set in motion, which are expected to roll on to the realization of the greatest horticultural exhibition the world has ever seen, when the National Flower Show, under the auspices of the S. A. F. O. H., is to be held in that city for the extended period of ten days from November 6 to 15 inclusive, 1908.

At the meeting in the green room of the hotel in the afternoon, W. F. Kasting of Buffalo occupied the chair, and twelve other members of the committee of fifty were in attendance. After considerable preliminary argument it was decided to hold the show in the Fall of 1908, for which over \$11,000 had already been subscribed; and it was also deemed important that a number of the committees should be at work. The meeting then adjourned to reconvene in the evening when the chairman would announce the committees.

At eight o'clock the members again assembled with about twenty in attendance, and the following chairmen of committees were appointed: American exhibits, P. Breitmeyer, Detroit, Mich.; foreign exhibits, E. G. Hill, Richmond, Ind.; premiums, W. N. Rudd, Chicago; general advertising and publicity, P. J. Hauswirth, Chicago; local management, privileges and concessions, J. C. Vaughan, Chicago; special feature committee, Otto G. König, St. Louis, Mo.; reception committee August Pöhlmann, Chicago; auditing committee, J. A. Valentine, Denver, Col. The above eight chairmen with the general chairmen are to constitute a committee to be known as a general working and executive committee, and chairman Kasting stated that four of them

had been selected from Chicago so that little difficulty might be experienced in obtaining a working quorum at any time. These eight chairmen were also authorized to appoint their own committees and so far as feasible to confine themselves to the names in the committee of fifty.

It was voted to mail direct and to print in the trade papers at the same time a formal invitation to every horticultural body in the country to participate in the national show both by personal attendance and exhibits, this invitation to be extended under the auspices of the S. A. F. O. H. It was later decided to ask the American Rose Society, American Carnation Society and Chrysanthemum Society of America to join the national society in the committee work of the show and to attach their names to the above invitation.

The secretary was instructed to cast one ballot for Irwin Bertermann of Indianapolis for treasurer, and it was voted that a call be sent out to all subscribers for twenty per cent. of their guaranteed fund, the same to be due on or before December 10.

After considerable discussion as to the best time and duration of the show, November 6-15, including two Saturdays and Sundays, was decided upon as the most practical, it being left with the committee to arrange a schedule containing a succession of exhibits for the ten days.

W. K. W.

The Henry F. Michell Company's Trophy.

We picture in this issue the Henry F. Michell Company's vase offered for the best one hundred blooms of carnations, four varieties, to be exhibited at the American Carnation Society's exhibition at Washington, D. C., in 1908. The vase is made of green glass and silver, and reflects credit on the makers, Maxwell and Berlet, Inc., of Philadelphia. The silver is electrically deposited on the glass body of the vase, and has on the back and sides a series of conventional carnations and leaves, which make it thoroughly appropriate as a prize for this exhibition. On the front is a silver shield, on which is engraved: "Presented by Henry F. Michell Company, Seedsmen, Philadelphia, Penna., to"

Below this is left a blank space in which is to be engraved the name of the winner.

On the base of the vase is the inscription: "For best 100 blooms of carnations, in four varieties. Exhibited at the National Carnation Exhibition in Washington, D. C., 1908."

The general style is l'art nouveau, and it is so entirely original and so valuable a prize that it again attracts attention to the generosity of the donors, the well-known seedsmen, the Henry F. Michell Company, 1018 Market street, Philadelphia, who have presented several decidedly unusual prizes within the last few months.

THE SCOTCH FARMER AS GARDENER.—A pathetic interest attaches to an article in the "Windsor" by the late Ian Maclaren, on the subject of "The Scots Farmer," since it is one of the last subjects with which his pen was busy. Recalling a visit he paid to one farmer, he says:—"The farmer was not a good gardener, to tell the truth, and I do not remember a single one who did his own garden properly. He might dig and plant his potatoes, and his wife would pay a little attention to the flowers, but the final touches were given by some odd man who wandered around the district doing such jobs and being paid slightly in silver but substantially in food and gifts, especially the retired garments of the farmer. The pruning of the bushes would be worth a pair of trousers patched at the seat and a waistcoat reinforced at various places, while the planting of a new strawberry bed would add a coat which had seen many harvests."

H. F. Michell Co. A.C.S. Trophy

The Fall Flower Shows

Full accounts of the Principal Exhibitions throughout the country.

Boston.

The annual chrysanthemum exhibition of the Massachusetts Horticultural Society, held Friday, Saturday and Sunday last, did not in any way compare with former similar shows held in this city. The fine large specimen plants of the Queen of Autumn, so often spoken of as being the leading feature of the Boston show, were conspicuous by their absence this year. That the private gardeners in the vicinity of Boston have given up growing chrysanthemums is evident; and, in fact, they seem to have lost interest in the flower show, for at this exhibition had not the commercial brethren taken hold Horticultural Hall would have looked bare indeed. After all, there was a nice exhibition, though it was not a chrysanthemum show but rather a combination of chrysanthemums, carnations, palms and foliage plants, fruits and vegetables.

The main hall was devoted mostly to groups of foliage plants mixed with chrysanthemums and a few chrysanthemum specimen (?) plants, with a section in the farther end devoted to large chrysanthemum blooms. The small side hall was filled with carnations and the carnation men were right on deck with as fine vases of blooms as were ever seen in Boston. The lecture hall was filled mainly with tables decorated with chrysanthemums and with fruit, a feature which if not educational seemed to be quite a drawing card. The basement was given up to vegetables and there were very fine specimens of these shown.

Among special exhibits was a fine vase of the new rose Mrs. Jardine shown by Robert Scott & Son, Sharon Hill, Pa. This rose created a fine impression among the visitors and was awarded a silver medal by the judges. First-class certificates were awarded to F. R. Pierson Company, Tarrytown, N. Y., for new fern *Nephrolepis superbissima*; to W. A. Manda, for *Dracæna Mandiana*; to R. Vincent, Jr. & Sons Company, White Marsh, Md., for pompon chrysanthemums and to Dr. C. G. Weld (Wm. Rust, gardener), for cultivation of *Odontoglossum grande*. Honorable mentions were given Julius Roehrs Company, Rutherford, N. J., for *Cyclanthus bipartitus* and for *Ludovia crenifolia*; to M. A. Patton for seedling *crenifolia*; to J. Goddard for carnation *Priscilla*; to Wa-No-Ka Greenhouses for new carnation *Apple-blossom*; to Mrs. J. M. Sears (Wm. Ritchie, gardener), for single chrysanthemums, and to Philip Dexter for seedling *anemone chrysanthemum*.

The special prizes offered at this exhibition were awarded as follows: For the best arranged table of cut chrysanthemums all classes—first, Sidney Hoffman; second, Mr. E. M. Gill; third, Edward MacMulkin. For the best decorative arrangement of cut chrysanthemums with Autumn foliage or other suitable material—first, Sidney Hoffman; second, Edward MacMulkin. For the best vase of 100 chrysanthemum blooms one or more varieties—first, Wm. W. Edgar with Major Bonaffon; second, same exhibitor with Wm. Duckham; third, Edward MacMulkin with Major Bonaffon. Fifty roses of any one variety—first, Waban Conservatories with American Beauty; second, Carl Jurgens, with American Beauty; third, W. H. Elliott, with Kaiserin Augusta Victoria.

For the best six vases carnations of 50 blooms each—first, Peter Flsher with Beacon, Enchantress, White Perfection, Mrs. C. W. Ward, Rose Pink Enchantress and Mrs. Tom Harvey; second, S. J. Goddard with Octoroon,

White Perfection, Rose Pink Enchantress, Helen Goddard, Victory and Enchantress; third, Backer & Company, with Fair Maid, Golden Glow, Rose Pink Enchantress, Harry Penn, Puritana and Firefly; fourth, F. R. Pierson Company, with Winsor, Melody, White Perfection, Victory, White Enchantress and Beacon. The Gardeners and Florists' Club prize, for the best table centerpiece of growing plants, Sidney Hoffman was first; F. Heeremans, second; and Edward MacMulkin, third.

The R. & J. Farquhar & Company silver cup, for vegetables, was won by Edward Jenkins, gardener to Girard Foster, Esq., with superb specimens.

In the regular classes for group of foliage and flowering plants, Edward MacMulkin was first; Wm. Whitman

The William Graham Company had a double arch of Autumn leaves and pompon chrysanthemums, illuminated with Japanese lanterns, in the center of the main hall.

The Henry F. Michell Company made a very extensive exhibit of everything found in a fully equipped seed store—bulbs, seeds, implements, insecticides, etc.; also a collection of pompon chrysanthemums numbering over fifty varieties.

Thomas Meehan's Sons, Germantown, Pa., showed evergreens in variety and pompon chrysanthemums.

The Overbrook Gardens, Overbrook, Pa., exhibited pompon chrysanthemums.

Charles Zimmer, of West Collingwood, N. J., was also an exhibitor of pompon chrysanthemums. The W. H. Moon Company made an exhibit of *Ilex crenata*.

Lager & Hurrell, Summit, N. J., staged a collection of orchids, among which were *Cattleya Dowiana*, *C. labiata alba*, *C. superba elegans*; *Dendrobium Phalenopsis hololeana* and *Cypripedium Fairleanum*.

F. R. Pierson Company, Tarrytown, N. Y., exhibited a nice specimen of the new fern, *Nephrolepis superbissima*.

The various collections of specimen ferns, marantas and caladiums were all worth going a long distance to see. Competition in these classes in Philadelphia is always very close, with the result that it makes these decorative plants of more than passing interest even when they are competing for public applause

Annie Thompson—J. Hurley, first; no second awarded. Four plants dissimilar—J. Hurley, first; G. Smirl, second. Three plants of new varieties introduced in 1906—G. Smirl, first, his winning varieties being *Rathella*, pink; Mrs. D. Willis James, bronze; Mrs. C. N. Paig, white. Six plants, Merza—J. Whittaker, first; J. McCleary, second. Six plants, Morton F. Plant—J. McCleary, first. Six plants, Golden Age—William Robertson, gardener to J. W. Pepper, first; J. McCleary, second. Four plants dissimilar, in 10-inch pots—J. Hurley, first; J. McCleary, second.

William Kleinheinz seemed to be the principal winner in the cut flower classes. He obtained firsts for six blooms of Mrs. Frank Thompson, four vases dissimilar, six blooms of T. D. M. Cardeza, six blooms of the variety Robert H. Foerderer, for a vase of 25 blooms arranged for effect; six blooms pink, six blooms crimson and first for a collection of twenty varieties; he also received second prize for three vases, 12 blooms each, William Robertson being first in that class. Mr. Robertson also captured first for six blooms white; G. Bustard, gardener to C. Stoddard, being second. W. Robertson was second in the vase of six blooms; Thomas Gaynor, gardener to J. B. Stetson, took second for 25 blooms arranged for effect; E. Smith, gardener to E. N. Benson, was second for six blooms pink and for six blooms crimson; J. Crowthers, gardener to S. E. Brown, took second for the collection of 20 varieties. In the class

Vases of 25 Chrysanthemum Blooms.

Exhibitors from Left to Right, Buckbee, Hill, Smith & Son

Chicago Flower Show

(Martin Sullivan, gardener), second; and Sidney Hoffman, third. Display of orchids, Edward MacMulkin, first. Twenty-five plants of chrysanthemums, commercial specimens, W. H. Elliott, first.

The Hunnewell prize for display of hardy coniferous trees in pots was won by Joseph Breck & Son. Other prize winners included Mrs. Frederick Ayer, Mrs. Lester Leland, E. D. Jordan, Peter B. Robb, W. A. Riggs, A. F. Whitten and James Nicol. JOHN W. DUNCAN.

Philadelphia.

The annual exhibition of the Pennsylvania Horticultural Society opened on Tuesday, November 12, and lasted four days. There seems to be no waning of interest among the Philadelphia growers, and the exhibition this year was up to all previous records. The lower hall and the grand staircase were, as usual, beautifully adorned with specimen ferns, ficus and vases of large chrysanthemums. A notable feature this year was the competition in the groups of decorative plants. As is well known at this show, while chrysanthemums are the main feature, a great deal of interest is always taken in the classes for groups of flowering and other decorative plants.

The Henry A. Dreer Company made an extremely large showing, not only in the plant department, but also in seeds, bulbs, implements, etc. They occupied the stage in the main hall with a collection of new and rare plants; also showing a separate group of the newer forms of *nephrolepis*. Among these were: *N. robusta*, *N. Amerpohll*, *N. todæoides*, *N. Barrowsii gracillima* and an unnamed sport. Among their decorative plants were specimens of *Coccoloba pubescens*, *chamaedorea*, *marantas* in many varieties, and *heliconias*.

against the large-flowered and varicolored chrysanthemums.

Of course, it is the chrysanthemums that are supposed to be of supreme interest at these Fall exhibitions. Instead of giving the winner's names in the individual classes, we may say, that the chief winning kinds among the bush plants were: Golden Age, yellow; W. R. Church, crimson; Dr. Enguehard, pink; T. Carrington, pink; A. J. Balfour, pink; Miss Georgiana Pitcher, yellow; Miss Clay Frick, white; G. W. Childs, crimson; Mrs. H. Weeks, white.

The winners in the classes for cut flowers were chiefly of the following kinds: Mrs. W. Duckman, yellow; Cheltoni, yellow; Beatrice May, white; Colonel D. Appleton; Nellie Pockett, white; Mdlle. Marie Liger, pink; General Hutton, orange yellow; Lynwood Hall, white; Merza, white; Glen View, orange; Morton F. Plant, pink; Dr. Enguehard, pink; Timothy Eaton, white, and W. Duckham, pink.

The judges on plants were J. W. Colfesh, James Verner, Chester Davis and William Graham; on flowers, A. E. Cartledge, A. B. Scott, S. S. Pennock, C. Eisele and H. B. Surman.

Awards for the first day were: Chrysanthemums, six plants and six varieties, J. Hurley, gardener to J. W. Paul, first; Gordon Smirl, gardener to J. F. Sinnot, second; J. McCleary, gardener to Mrs. W. J. Walker, third. Three plants, dissimilar—J. Hurley, first; Gordon Smirl, second.

Six plants, yellow—William Kleinheinz, gardener to P. A. B. Widener, first; J. T. Whittaker, gardener to Robert Le Boutillier, second. Six plants, red—W. Kleinheinz, first; S. E. Batchelor, gardener to C. E. Newbold, second. Six plants, white—S. E. Batchelor, first; J. Hurley, second. Six plants, pink—S. E. Batchelor, first; W. Kleinheinz, second. Twelve plants, two colors—W. Kleinheinz, first; S. E. Batchelor, second. Six plants, any color—S. E. Batchelor, first; J. McCleary, second. Twelve plants, dissimilar—W. Kleinheinz, first; S. E. Batchelor, second. Four plants, Japanese—G. Smirl, first; J. Hurley, second. Three plants, in three varieties—G. Smirl, first; J. Hurley, second. Single specimen plant—G. Smirl, first; J. McCleary, second. Specimen plant of Miss

for 60 blooms, 12 varieties, W. Robertson was first; W. Kleinheinz second; S. E. Batchelor, third.

In the miscellaneous exhibits J. Hurley captured the prize for the best foliage plant with a splendid specimen of *Dracæna Sanderiana*; he was also first for specimen palm and for six palms; J. McCleary being second in the latter class. For twelve ferns in 12 varieties, Thomas Long, gardener to G. W. Childs-Drexel, was first and S. E. Batchelor, second. For display of ten crotons, J. Hobson, gardener to E. A. Schmidt, was first. T. Long captured the first prize for the best six dracenæ, first for display of foliage plants, also first for display of foliage plants in 8-inch pots; J. McCleary being second in the latter class; William Robertson, third. In Mr. Long's collection were fine specimens of *Coccoloba pubescens*, *alocasias*, crotons, and *Adiantum Farleyense*. For display of marantas William Robertson was first; J. McCleary, second. Twelve decorative plants in twelve varieties, J. McCleary, first; J. Hurley, second.

Charles H. Totty, Madison, N. J., showed a nice collection of single chrysanthemums. G. Smirl submitted two seedling chrysanthemums, the two purchased by Mr. Totty, a white and a pink, both incurred sorts.

John McIntyre staged single violets, Princess of Wales and California.

The Robert Craig Company were easily the winners in the class for 50 plants of 50 varieties of crotons; J. McCleary was first for twelve specimen crotons in twelve varieties and William Robertson first for eight varieties of marantas, J. McCleary second.

In the groups of foliage plants, J. H. Dodds, gardener to John Wanamaker, was first; William Robertson, second; J. Hobson, third. For best foliage plant, new or rare, and not previously exhibited, J. McCleary was first, with a plant of *Heliconia Edwardus Rex*. For a collection of fancy-leaved caladiums, J. Hurley took first, J. McCleary, second. For collection of nepenthes, J. McCleary was first; no second awarded. For group of foliage and flowering plants arranged for effect, J. H. Dodds was first; S. E. Batchelor, second, and William Kleinheinz, third.

THE FLORISTS' EXCHANGE

Chicago.

(Concluded.)

As a preamble to the national show to be held in Chicago next year, the exhibition which closed on Tuesday evening last was, to use a common expression, "A howling success." From every vantage point the onlooker expressed the idea that "progress" could not have been better exemplified.

A pleasing feature from the manager's point of view was the fact that every day's receipts, with one exception, were in advance of the corresponding day of last year, which is also an encouraging point of the outlook for the show of next year, on which all interest now seems to center.

To sum up the points of the last week's show, probably the sodding of the floor for the exhibits was the greatest innovation which American exhibition arrangement has seen in many years. There were many other special features which were attractive and specially valuable as advertising cards, and helped a great deal towards the financial success of the show.

The opening day, chrysanthemum day, was reported in last week's issue in full, and Thursday was a treat to the rose branch of the business. From a trade point of view the vase of Cardinal (Cook) exhibited by the Poehlmann Brothers Company; the vase of Princess by E. G. Hill Company; the vase of Rhea Reid by the same concern, and the vase of Kaiserin Augusta Victoria, by the Poehlmann Brothers Company, were the most interesting. The Countess showed up well; Mrs. Jardine made a good appearance, and No. 83 of the E. G. Hill Company list gives promise of a future.

Friday was carnation day and in a way was a disappointment as not as many exhibitors appeared as last year and the products as a whole showed slight if any improvement. The interest

attention, particularly the Lincoln Park and Harry G. Selfridge collections of orchids, which were placed in front of the entrance on Saturday morning.

The judges had a hard allotment for the first two days of the show, and owing to the scattered arrangement of the exhibits, walked many miles to reach their final decisions.

Uncle John Thorpe was a busy man during the week, and was seen every day securing notes and aiding exhibitors and between times imparting facts from his valuable store of information to investigating visitors.

The judges were: W. W. Coles, Kokomo, Ind.; John T. Temple, Davenport, Ia., and John H. Dunlop, Toronto, Ont.

In addition to the awards announced for Wednesday, the opening day, the following were carried over to Thursday, owing to the inability of the judges to complete the rounds.

Most interesting grafted specimen plant of any kind, first, Vaughan's Seed Store on a chrysanthemum plant, on which were grafted thirty-six varieties.

Best collection of orchids, Edward G. Uihlein (H. L. Skjoldager, gardener) was the only exhibitor. He showed a choice collection of some forty varieties in a large glass case, included among which were Vanda Batemanni, the first time flowered in America, Catasetum species, Epidendrum cuspidatum, Phalenopsis Reinstadiana, and a number of other rare specimens.

For the best ten palms, George Wittbold Company and E. G. Uihlein received first and second prizes, respectively.

One palm—Vaughan's Seed Store first, on Rhaps humilis.

Specimen Boston fern or sport—Frank Oechslein, first; Vaughan's Seed Store, second.

Basket Asparagus Sprengeri—Vaughan's Seed Store.

Ten aurocarias—Vaughan's Seed Store on an assorted collection.

Specimen Ficus pandurata—J. J. Mitchell (Geo. Woodward, gardener), first; Vaughan's Seed Store, second.

Six palms, six varieties, in 5 to 7-inch pots—Vaughan's Seed Store, first; J. J. Mitchell, second.

Twelve Begonia rex, 6 varieties—Martin Ryerson (John Riordon, gardener).

Cut Orchids and Roses.

Thursday was scheduled for cut orchids and rose day, and was one of the most interesting of the whole show. The weather and the attendance continued good and great interest centered in the awards on the roses. The exhibits throughout were more than creditable and in many cases it was a close decision that settled a preference.

In cut orchids there were but two entries—C. W. McKellar and Edward G. Uihlein—who took first and second premiums, respectively, on good, though not extensive, exhibits.

Then on the list came twenty-five American Beauty roses and classes of forty each of Liberty or Richmond, in which Richmond only was shown, Mme. Abel Chalenay, Bride, Bridesmaid, Killarney, and any other variety followed and by classes duplicating the above list with one hundred flowers of each. Many beautiful vases of handsome well-grown stock were included in the entries for these prizes.

There were five vases competing for honors in the class of one hundred American Beauty, which formed a superb semi-circle in front of the Lincoln Park palm collection, but it was on the class for one hundred of any other sort that all eyes were centered, owing to the fact that society, the public and everybody who has read the local papers had become a partisan to the battle of roses named after Mrs. Potter Palmer and Mrs. Marshall Field, and which were here entered, winning first

mann Brothers Company, first; Peter Reinberg, second.

Forty Bride—Poehlmann Brothers Company, first; Weiland & Olinger, New Castle, Ind., second.

Forty Bridesmaid—Poehlmann Brothers Company, first; Weiland & Olinger, New Castle, Ind., second.

Forty Killarney—Poehlmann Brothers Company, first; Peter Reinberg, second.

Forty any other variety—Poehlmann Brothers Company, first, with Cardinal; Peter Reinberg, second, with Kate Moulton.

One hundred American Beauty—Poehlmann Brothers Company, first; Peter Reinberg, second; Bassett & Washburn, third.

One hundred Liberty or Richmond—Poehlmann Brothers Company, first; Peter Reinberg, second; Wiator Brothers, third.

One hundred Killarney—Poehlmann Brothers Company, first; Bassett & Washburn, second; Peter Reinberg, third.

One hundred Bride—Weiland & Olinger, first; Wiator Brothers, second.

One hundred Bridesmaid—Poehlmann Brothers Company, first; Wiator Brothers, second.

One hundred Mme. Abel Chalenay—Poehlmann Brothers Company, first; Wiator Brothers, second.

One hundred any other variety—Peter Reinberg, first, with Mrs. Marshall Field; Poehlmann Brothers Company, second, with Mrs. Potter Palmer; Wiator Brothers, third, with Uncle John.

Twelve blooms of a new rose never exhibited in this country previous to this season—E. G. Hill Company, with Princess.

Twenty-five blooms any variety not in commerce—E. G. Hill Company, with Rhea Reid.

Carnations.

There was, as usual, a magnificent display of carnations. The awards follow: THE FIFTY CLASSES.

White.

White Lawson—First, Anton Then; second, Poehlmann Brothers Company.

White Enchantress—First, E. G. Hill Company; second, Chicago Carnation Company.

White Perfection—First, Poehlmann Brothers Company; second, Chicago Carnation Company.

Lady Bountiful—First, Jensen & Dekema; second, H. W. Buckbee.

Red.

Victory—First, Poehlmann Brothers Company; second, H. W. Buckbee.

Robert Craig—First, Poehlmann Brothers Company.

Cardinal—First, Weiland & Olinger; second, H. W. Buckbee.

Red Lawson—First, Poehlmann Brothers Company; second, H. W. Buckbee.

Any other red—First, Poehlmann Brothers Company.

Winsor—First, Poehlmann Brothers Company; second, Chicago Carnation Company.

Enchantress—First, Fritz Bahr; second, Poehlmann Brothers Company.

Pink.

Mrs. Thomas W. Lawson—First Poehlmann Brothers Company; second, Anton Then.

Rose Pink Enchantress—First, Poehlmann Brothers Company; second, E. G. Hill Company.

Any other pink (flesh pink)—H. W. Buckbee.

Any other pink (dark pink)—First, Chicago Carnation Company; second, S. Garland.

Striped or Stained.

Mrs. M. A. Patten—Weiland & Olinger.

NEW VARIETIES.

White, Introduction of 1907—Chicago Carnation Company.

Pink, Introduction of 1907 (flesh pink)—First, Poehlmann Brothers Company; second, Chicago Carnation Company.

Pink, Introduction of 1907 (dark pink)—First, Chicago Carnation Company; second, Poehlmann Brothers Company.

Red, Introduction of 1907—First, Chicago Carnation Company; second, Poehlmann Brothers Company.

CLASSES FOR 100 BLOOMS.

White—First, Poehlmann Brothers Company; second, Chicago Carnation Company; third, Weiland & Olinger.

Flesh Pink—First, Poehlmann Brothers Company; second, H. W. Buckbee.

Light Pink—First, Poehlmann Brothers Company; second, Jensen & Dekema; third, H. W. Buckbee.

Dark Pink—First, Chicago Carnation Company; second, E. G. Hill Company; third, H. W. Buckbee.

Red—First, Bassett & Washburn; second, Poehlmann Brothers Company; third, Jensen & Dekema.

Violets.

Best display 800 blooms—First, R. Jahn; second, Buttler Floral Company.

Part of American Beauty Rose Exhibit, Vases of 100 Blooms

Chicago Flower Show

in the scarlet class centered in the contest between the O. P. Bassett and De-fiance. The excellent showing of the Poehlmann Brothers Company, who took twelve firsts and five seconds out of seventeen vases, the fine exhibit of the Chicago Carnation Company, the vase of White Lawson by Anton Then and the vase of Enchantress by Fritz Bahr were the features of the day.

Saturday was seedling day, and the exhibits which in many classes were closely contested showed advancement, though the consensus of opinion was that it was not what was expected, the critics of past years failing to find the ideal which is supposed to surpass anything that is now known to the trade. Rudd's white and some of Dorner's and Hill's productions, both in carnations and chrysanthemums, are promising and scored well.

The climax occurred on Tuesday night when probably the most successful show that had ever been held in the United States closed the doors at 11 o'clock. The trade points which were particularly interesting were Klein's, Vaughan's, Nelson's and Peterson's, who made the snow scene in the annex very attractive. Coming from the trade features which have been more prominent this year than ever before, The Foley Manufacturing Company's exhibit of a ready-made greenhouse was filled with Uihlein's orchids, and the greenhouse of the John C. Moninger Company, which was occupied for educational purposes, showing the principle of handling cuttings. W. P. Craig, Philadelphia, was on hand with an excellent exhibit of Ficus pandurata. Edward Amerphol had a fine exhibition of N. Amerphol, Lincoln Park and South Park exhibits, competition, attracted a great deal of

Ten Gloire de Lorraine begonias or its types—First, J. A. Peterson, Cincinnati, O., who showed a fine exhibit for this season of the year; Vaughan's Seed Store, second.

Flowering plant, chrysanthemums and Begonia Gloire de Lorraine excluded—Park Floral Company, Denver, Colo., first, on cyclamen.

Six Boston ferns or sports, ten-inch pots or over—First, J. J. Mitchell (A. J. Smith, gardener), on N. Whitmani; Frank Oechslein, assorted, second.

Six Cibotium Schiedei—Vaughan's Seed Store.

Group of 100 foliage plants 100 square feet of space—First, Vaughan's Seed Store; second, J. J. Mitchell (Geo. Woodward, gardener), both handsome collections.

Group of palms and decorative plants, 100 square feet—Frank Oechslein, first, on a fine arrangement of assorted medium sized stock; Geo. Wittbold Company, second.

Collection of ferns—E. G. Uihlein, first, on a fine collection of one hundred varieties embracing many specimen plants; J. J. Mitchell (Geo. Woodward, gardener), second, on a choice collection of large well-grown specimens.

Best-filled fern dish—George Wittbold Company and E. G. Uihlein, first and second, respectively.

Basket or hamper of plants—George Wittbold Company, first; E. G. Uihlein, second.

Display of cut greens—A. F. Amling Company, Maywood, first, on fine display of Asparagus plumosus.

Group of dracenas, 6 varieties—First and second to Vaughan's Seed Store and E. G. Uihlein, respectively.

and second premiums, respectively, the committee's scores being as follows:

	Mrs. Marshall Mrs. Potter	Field.	Palmer.
Size	8	7	
Color	15	18	
Stem	15	12	
Form	12	13	
Substance	10	8	
Foliage	12	10	
Fragrance	5	3	
Distinctiveness	10	8	
	87	79	

In this contest Wiator Brothers were awarded third on a fine vase of Uncle John, and there were several other handsome vases of one hundred roses not entered for competition, including Mrs. Jardine, Princess and Rhea Reid and a distinctively choice lot of Kaiserin Augusta Victoria by Poehlmann Brothers Company, which the committee recommended worthy of a special prize, which was awarded.

In class 66, for the best rose never before exhibited in America, there were four entries—Princess, No. 83, and The Countess, by the E. G. Hill Company, and Mrs. Jardine (Dickson), by Robert Scott & Son, the Princess receiving the coveted honor.

Thursday's awards were as follows: Collection cut orchids—C. W. McKellar, first; E. G. Uihlein, second.

Twenty-five American Beauty—Poehlmann Brothers Company, first; Peter Reinberg, second; H. W. Buckbee, Rockford, Ill., third.

Forty Liberty or Richmond—H. W. Buckbee, first; Poehlmann Brothers Company, second.

Forty Mme. Abel Chalenay—Poehl-

Lily of the Valley.

Best display 500 blooms—First, A. Jurgens; second, Pochmann Brothers Company.

Classes for 12 Cut Chrysanthemums.

White—First, H. W. Buckbee, Yellow—First, R. T. Crane (R. Johnson, gardener); second, H. W. Buckbee. Pink—First, H. W. Buckbee; second, R. T. Crane.

Roses.

One hundred American Beauty, arranged for effect—First, Julius Schnapp; second, C. Frauenfelder.

Carnations—Seedlings or Sports.

Twenty white—First, Mount Greenwood Cemetery Association with 1605 A, scored 89 points. Twenty flesh pink—First, B. K. & B. Floral Company, Richmond, Ind., with Mrs. Chas. Knopf; scored 85 points. Twenty any other color—First, Mount Greenwood Cemetery Association, with No. 11004; scored 87 points.

Sweepstakes.

Best Seedling Carnation—First, Mount Greenwood Cemetery Association, with No. 1605 A; scored 89 points.

Chrysanthemum Sports or Seedlings.

Six white, one variety—First, E. G. Hill Company, with Leon Truelle, \$5 points. Six yellow, lighter than Major Bonaffon—First, F. Dorner & Sons Company, Lafayette, Ind., with No. 24-03, \$6 points.

Six yellow, darker than Bonaffon—First, Nathan Smith & Son, with 95-3-06, \$6 points. Six, any other color—First, E. G. Hill Company, with John Lemon, 89 points.

Sweepstakes.

Best seedling—First, E. G. Hill Company, with John Lemon, 89 points.

Floral Arrangements.

Basket, any other flowers—First, Butler Floral Company; second, R. Jahn; third, Julius Schnapp. Basket chrysanthemums (not to exceed 3 inches diameter)—First, Butler Floral Company; second, Julius Schnapp; third, R. Jahn. Basket of Orchids—First, E. G. Uihlein (H. Skjoldager, gardener). Basket Roses—First, R. Jahn; second, Butler Floral Company. Basket Carnations—Same exhibitors won in order as above.

Retailers' Booths.

For best booths maintained by retailers during the show, from November 6-12, prizes were awarded as follows: First, George Wittbold Company, \$250 and silver medal; second, Schiller, \$200; third, Julius Schnapp, \$150; fourth, C. Frauenfelder Company, \$100.

CHRYSANthemUMS**Notes for Week Ending November 9.****MIDSEASON, AND PLANTS ON IN FULL CROP.**

Alice Byron is still one of the most valuable standards; anything prettier than this finely formed, pure snow white incurved would be hard to find; Timothy Eaton is like a horse of Morgan blood, absolutely dependable and always in good form. For late white, W. H. Chadwick; and for latest the grand Jeannie Nonin still hold place; one can be sure of good returns, with ordinary care, from all these sorts.

Of last year's new ones Moncymaker is finishing up nicely and is one of the white grandes, stiff stems, and of substance and build that are very impressive—much better than we had expected from appearances two weeks ago. Annie Hamilton is an exhibition beauty, fully upholding its past year's promise, a reflexing and mammoth white of great purity, and much easier done than most of its class.

In pink varieties, Mlle Chabanne is bound to have become a standard; its one drawback being straggly foliage of the Carnot type, but it is an easy doer, with big incurving blooms of splendid

Exhibit of George Wittbold Company
Chicago Flower Show

Chrysanthemums at Missouri Botanical Garden.

In contrast with the sleety, cold weather of last fall, the Shaw's Garden free flower show at St. Louis has this year had the benefit of continuous pleasant weather through its first week, with the result that already more people have enjoyed it than in any earlier year; and reserve fresh plants, including some superb large specimens grown in spreading lush form, have enabled it to start on its second week even more beautiful than when it opened.

The plants, which are displayed under a circular tent nearly 100 feet in diameter, are about 4000 in number, all grown in the Garden, and comprise an even 400 named varieties. Of the 300 or so varieties shown last year, a couple of dozen of the less desirable have been dropped, and over 100 others added, among them the principal prize-winners of last fall's flower shows over the country. The display is located in the sunken garden that is used for tulips in early Spring and for choice bedders through the Summer, and the employment of a tent roofed in buff and lined on the sides with dark green brings out soft tints in the daytime that most admirers of this favorite autumnal flower are not familiar with, while the evening lighting with bluish arc-lights intensifies all that is brilliant in their coloration. In the week just ended, nearly 25,000 visitors were recorded.

substance, and of unusually beautiful color.

M. Loiseau-Ronsseau is proving a fine exhibition pink; the color might be better, but the size, form, and general make-up are really wonderful. And for latest pink we have Mlle Jeanne Rosette, a perfect sister in pink for Jeannie Nonin in white, and coming in at the same time. The nearest to their standard and date in yellow is Golden Chadwick, still the best of its class and good enough for anybody. The color in this grand variety is much deeper and brighter than in the Yellow Chadwick, which was the first to sport from the parent. The additions to the yellows of the year that are likely to prove permanent are not large in number. Comoleta we consider good for pots and for early commercial cutting; as a pot plant for midseason Souv. de Scalarandis is grand, foliage perfect, stem strong and the flower very large and bright. Golden Dome, the rounded sport from Yellow Eaton, is fine in form as predicted. Through this section of country Yellow Eaton "does" so well that it leaves very little room for criticism, and a number of growers with whom it is a favorite object to the long neck of Golden Dome, which they consider a defect. However, it has strong points when it comes to scoring the finished product.

Bronzes have only a limited value commercially, yet they are beautiful beyond words when in harmony with their surroundings. Dakota and Ongawa are two extraordinarily fine additions in this

color, totally unlike, the color beautiful in both, the size of each magnificent. These twin Americans are up with the very best; and Mme. L. Roussel, quite distinct from either, is perfection as a golden bronze. They make a fine exhibition trio.

In reds, Intensity is always popular; Matchless is good when well done and when color is not sacrificed to size. One of the newer reds is Professor Tillier, a wonderfully constant variety, not varying much from year to year in finish, and of the easiest possible management. An excellent companion for it is Amateur Conseil, half dwarf and early, with a lovely color shown to the best advantage by the beautifully reflexing form of the flower.

An ideally beautiful epitome of the chrysanthemum season is a mixed arrangement of these fine reds, bronzes, brilliant yellows, and plenty of pure whites; an artist must surely revel in their gorgeous tints and harmonies.

The line of demarcation between the exhibition and the commercial classes is pretty broadly marked, and yet there is an intermediate class which might be called the "Retailer's Commercial"—gorgeous blooms of immense size, and wonderful forms and odd colorings, that a wholesale store man could not be hired to handle, but which would delight the trade of any retailer who grows for his own customer. It seems to me that those florists who retail their own products or growers who cater to a fancy store trade must experience great pleasure in handling and selling these aristocrats of the chrysanthemum family. To be able to break away from the conventional close-reefed, clipper sorts that must be able to travel thousands of miles to a market, and with a shake of their foliage (the petals too closely set and formal to shake!) find themselves ready for business, like the irrepressible drummer of the day. These have their place to be sure, and an important one; we could not get on without them, any more than the ordinary man could get on without his business suit. But there are times when a Prince Albert, or a full dress coat have their places and are more in keeping with the occasion, and so there are ornamental forms and delicate tints when combined with good texture and stem, that ought to share places with the Eatons and Bonaffons and Chadwicks and Nonins. Beatrice May, Guy Hamilton, Mrs. West, General Hutton, Ethel Fitzroy, Mrs. Duckham, Sunburst, Mlle. Chabanne, Lily Mountford, Dubuisson-Fonbert, are all examples of this rather informal but substantial class, which delight the lover of the cut chrysanthemum.

This idea should broaden, and permeate the minds of our judges, also, at the shows. In judging a vase of blooms in a hall the effectiveness and the decorative value of the vase should be taken into account even more than the commercial value latent in the variety, for, after all, our exhibitions cater to the pleasure and the enjoyment of the public rather than to the advantage of the trade, except indirectly. The various committees of the C. S. A. are the places where commercial values are measured. In open competition it seems to me that a compact, round, stiff, formal variety should never be able to score above a showier, looser flower of greater beauty, if the texture and keeping qualities are equally good. No one values the true commercial more highly than the writer; a new variety winning a place in this class is a "find" of real and inestimable value, but they should be kept in a class by themselves.

At Chicago on Saturday in the seedling classes, M. Calvat's Leon Truelle was awarded a certificate. It is a beautiful and finely built white on a good stem. The sweepstakes was won by our John Lemon, a scarlet and gold variety, seedling from Lord Flopetou; this color has always been a great favorite with Richmond, Ind. S. A. HILL.

Syracuse, N. Y.

News Notes.

It is a source of great gratification to me to announce to the many friends of L. E. Marquisee that he is making satisfactory progress toward recovery, and that no internal injury has been sustained. He had planned to attend the Utica Florists' Club banquet and feels keen disappointment at not being able to do so; it will be several weeks before he can leave the house. H. Y.

St. Louis.

News Notes.

We have had quite a number of trade visitors the past week; among them were Henry Johan, Collinsville, Ill.; J. F. Ammann, Edwardsville, Ill.; R. H. Mandeville, New York; A. S. Halstead and E. W. Guy, Belleville, Ill.

Park Commissioner Philip Scanlan, in company with George Kessler, the landscape gardener, left the past week on an inspecting tour to Kansas City, Chicago, Detroit and Eastern cities, to learn more of park systems at these places. Mr. Kessler has been engaged to lay out the new Yeatman Park in this city. Superintendent Ostertag reports that all the parks are now on a winter basis, and he will be in charge of the department during Mr. Scanlan's absence.

The first Fall flower show given by the St. Louis Horticultural Society opened at noon Tuesday, in the large Music Hall of the United Railway Company at Park and Grand avenues, and continues four days. Monday, the executive committee were hard at work deco-

rating and allotting space for the opening. All are much enthused at the outcome of the show and predict a financial success, regardless of the fact that the Shaw Garden is running a free show the same week. A great many entries have been made, and the exhibition will be complete in every way. The executive committee has appointed Philip J. Hauswirth, Chicago; Walter W. Coles, Kokomo, Ind.; and Andrew Meyer, Sr., St. Louis, as judges.

O. G. Koenig, F. H. Meinhardt, Theo. Miller and Fred. Weber, Jr., of the executive committee visited the Chicago show last week, returning home on Saturday. A full report of the awards will appear in the next issue of The Florists' Exchange.

At the funeral of Mrs. H. C. Ostertag, last Tuesday, the officers of the St. Louis Florists' Club, of which Mr. Ostertag is a member, attended in a body. A great number of floral designs were sent by the many friends of the family, among which was a large wreath from the Florists' Club, made of Lady Bountiful carnations and Mme. Abel Chatenay roses.

Fred. Ammann, Edwardsville, Ill., is cutting a few fine blooms of Alice Roosevelt rose, sport of Mme. Abel Chatenay; the color is dark pink, with same habit as Chatenay; it is also a good keeper.

Mrs. Sanders, wife of Carew Sanders,

was painfully hurt, recently by falling down a flight of stairs at her home on Vernon avenue, breaking her hip. From last reports she is doing nicely, and we hope for a speedy and complete recovery. Carew Sanders himself has recovered from a recent illness.

Mr. Keller, of the well-known firm of Reed & Keller, New York, called on the trade the past week, taking the place of H. L. Barnett, who is still among the missing in Chicago. Mr. Keller will go from here to Chicago and try to clear up the affair of their missing salesman. Adolph Brix opened his tenth anniversary free flower show on last Thursday afternoon in the Y. M. C. A. hall at Nineteenth and St. Louis avenues and closed Saturday night. The attendance tested the capacity of the hall, both day and night, during the three days. The hall was artistically decorated with wild smilax and decorative plants, also fine specimens of Amerpohli and Whitmani ferns. The displays of orchids and artificial fruits were great attractions. The opening display of made-up designs were

fore the P. C. O. Club the past week at the residence of Mrs. A. R. Morgan on Blaine avenue, using stereopticon views. His lecture was based on "What Shaw's Garden Means to St. Louis," and in his remarks he said the institution belonged to the whole world. Its beautiful trees and the excellent opportunity for students are unequalled in any other city of the country. At the chrysanthemum exhibition at the Garden, the attendance averaged 5,000 daily throughout the week, and was voted the best display ever given by the directors of the Garden. A number of the members of the Florists' Club visited the Garden and were shown through by Superintendent Irish and Max Schiller, the grower of the plants on exhibition. The show will last throughout this week. G. Fulgraf and G. H. Pring, two members of the club employed at the Garden, were on hand, as usual, to explain to the visitors the merits of the plants.

ST. PATRICK.

Kalamazoo.

Trade Notes.

At the present time the chrysanthemums are about the whole thing and may be said to fully maintain their popularity equal to any previous year. The quality of the stock offered is high, and prices moderate.

Indications point to a scarcity in cut flowers immediately after the chrysanthemums are done, as the carnations are coming along slower and later than usual, and roses, especially teas, will not make the deficiency good. By the holidays, though, we expect to be well in crop again. Prices show no change and remain as at last reported.

That the financial stringency is not expected to interfere with the florists' business in these parts is the opinion of the growers and retailers alike, as the crop conditions are more essential to our prosperity than stock exchange prices.

John Van Rochove, who has been on the sick list for a few weeks past, has regained his health and is back again at his post.

The first snow of the season fell on the morning of the 10th, which is rather later than usual for us. The weather so far in November has been very good, and is a great help to the growing stock. S. B.

Detroit.

Trade Notes.

Business has been considerably smaller in volume this week compared with the week previous. Chrysanthemums reign supreme and cause an over supply of roses. Violets are coming in of better quality and are more plentiful, retailing at \$2 per 100.

There will be 16 debutantes to be taken care of this season; one firm has already booked four decorations, the lowest price \$500, and the highest, \$1200.

Phil. Breitmeyer and J. Carey returned from Chicago Saturday morning enthusiastic over the great show there.

The show expected to be given by the Detroit Florists' Club at Harmonie hall should not be overlooked by growers of novelties. November 19 will see another successful evening for the local club.

FRANK DANZER.

CANADIAN NEWS

MONTREAL.—The weather here has been very inclement for about two weeks—raining the whole time. Notwithstanding this business has been very good. Chrysanthemums are plentiful and in good demand. American Beauty roses are scarce and growers are charging number one price for number two stock, which has driven the storemen to importing the flowers. Violets are not very good and there is not much demand for them. We have two wholesale men here now and storemen find the new order of things very convenient.

Our chrysanthemum show opens Wednesday next and so far entries are not very numerous. The committee experienced the same difficulty in finding a suitable hall; they eventually decided on the Vic. Armory, Cathcart street. While some of our best chrysanthemums will go to Toronto, we shall still have a few big blooms to stage here.

W. C. H.

Vaughan's Seed Store Rustic Scene—Chicago Flower Show

artistic in every detail. They consisted of a floral vase, basket of carnations and two modern funeral designs. The displays on Friday (florists' day) were bridal table decoration, bridal bouquet, presentation bouquet, presentation design, basket of chrysanthemums, basket of carnations and roses and a minor decoration. On this day the members of the Florists' Club were invited to attend, and fully fifty took advantage of seeing the fine exhibits, complimenting Mr. Brix upon the show and thanking him for the opportunity to view it. On Saturday, the last day, there were more new displays of design work and a table decoration. On this night the hall would not hold the crowds of people who wanted to gain admission. Taking it as a whole, it was a great treat to the North St. Louis public. Next year Mr. Brix says he will have to secure a larger hall for his show, which he says will be given by him each year, owing to the great success of this one. Among the florists seen by your correspondent at the show, were Mr. and Mrs. Chas. Kuehn and daughter, Mr. and Mrs. J. J. Beneke, Mr. and Mrs. Chas. Schoenle, Mr. and Mrs. H. C. Irish, Mr. and Mrs. G. H. Augermuller, the Misses Meinhardt, W. C. Smith, W. C. Young, D. Bova, Will Ossie, A. J. Bentzen, Alex. Siegel, Fred Aloes, Ed. Gerlach, C. W. Wors and Ed. Kalish.

Professor William Trelease, director of Shaw's Garden, delivered a lecture be-

THE EXHIBITIONS

Glen Cove, N. Y.

The third annual exhibition of the Nassau County Horticultural Society opened at Pembroke Hall on the afternoon of Tuesday, November 3. The display was by far the finest ever made at these exhibitions. The Pratt estate won for the second time the Troy cup for the best collection of roses; the cup must be won three times to become the permanent property of the holder. The Paul Danna estate (J. F. Johnston, gardener) took the first prize for best group of chrysanthemums and foliage plants. In the class for ornamental and flowering plants Felix Mense of Glen Cove was first. F. S. Smithers won in several of the chrysanthemum classes, and R. L. Beekman, A. Lothian and F. S. Smithers were the principal prize-takers in the rose classes. The Adolph Jaenicke prize for the best Phoenix Roebeleni was won by the Henry Maxwell estate, and Mr. Johnston of the Dana estate won Mrs. Dana's prize of horticultural books with his exhibit. The Ladew cup for the best 24 roses was won by the Sheldon exhibit. In the floral decoration classes, F. G. Boulon won the prize for the best floral design, and L. J. Bushy for the best bridal bouquet. Messrs. Beekman, Sheldon, Smithers and Schiff divided the honors in the carnation classes. There was a fine collection of fruits and vegetables.

Bay Shore, N. Y.

The sixth annual exhibition of the United Bay Shore Horticultural Societies opened October 30 with an unmatched display of chrysanthemums, fruits and vegetables. While the number of chrysanthemums was possibly not quite as large as last year, the display was really better, inasmuch as the blooms surpassed anything yet shown.

S. T. Peters and Louis Bossert had the finest display of chrysanthemums.

The show, which continued until Saturday, was held in the Carleton Opera House. The chrysanthemums, orchids, carnations and other flowered plants and shrubs were arranged tastefully on the stage and in the pit, while the vegetables were carefully arranged in the gallery. The leading competitors were Louis Bossert, Mrs. C. A. Schieren, H. G. Timmerman, W. B. Cutting, William Dick, F. H. Kalbfleisch, J. Kempster and Mrs. J. Gibb. The judges were: Peter Duff, Orange, N. J.; William Turner and N. Butterbach, Oceanic, N. J., and Robert Angus, Tarrytown. Lager & Hurrell of Summit, N. J., as usual, made a fine display of orchids.

The officers of the association are: President, Eugene P. Strong; vice-president, John J. Rogers; recording secretary, Charles Dumper; treasurer, David MacIntosh; corresponding secretary, William McCollom.

Exhibition Committee—John R. Howell, manager; Mathias Yezek, William Cameron, A. Rochane, George Hall, David MacIntosh and Charles Dumper.

Orange, N. J.

The thirteenth annual flower show of the New Jersey Floricultural Society was held on November 7 and 8, 1907, in the auditorium of the Woman's Club in East Orange. Between fifteen and twenty exhibitors contributed to its artistic and horticultural success, and many visitors came long distances to

won out with *Polypodium aureum*. For specimen palm, Stewart Hartshorne (A. T. Caparn, gardener) was first with *Phoenix Roebeleni*.

In the classes for cut chrysanthemums, J. Crosby Brown took first for 12 distinct varieties, which included Beatrice May, Mrs. Henry Partridge, Morton F. Plant, T. Richardson, Mrs. Wm. Duckham, A. J. Miller, Miriam Hankey, Mrs. T. W. Pockett, President Viger, Nellie Pockett, Mrs. John E. Dunn and Glen View. Mr. A. B. Jenkins (George von Qualen, gardener), was second in this class. For six white chrysanthemums J. Crosby Brown was the winner with Beatrice May, also for six yellow with Mrs. Wm. Duckham. For six pink chrysanthemums Mr. Charles Hathaway (Max Schneider, gardener), won out with Brighthurst; second, S. M. & A. Colgate. J. Crosby Brown was the winner for six bronze with Glen View, and for six crimson with Mrs. Henry Partridge, A. B. Jenkins being second. In the class for pompons, four varieties, the first prize was captured by Stewart Hartshorne with Black Douglas, Sidonia, Mrs. Cabitt and La Vogue. The Peter Henderson & Company prize for the best 12 roses was won by Mr. A. C. Van Gassbeck (John J. Derwin, gardener). The same exhibitor captured the prize for 25 carnations with Enchantress. The F. R. Pierson premium for 25 Winsor carnations was won by S. M. & A. Colgate. For the best 50 violets, double, J. Crosby Brown was the winner with Imperial. For the best 50 violets, single, Charles Hathaway was the winner with Governor Herrick. George Smith won the first premium for the best arrangement of Autumn leaves, orchids, ferns and palms. A. B. Jenkins was first for 25 cut chrysanthemums, any one variety, with Merza. The J. M. Thorburn & Company prize for display of vegetables grown from the firm's seeds was won by J. Crosby Brown.

The judges were John N. May, Charles H. Atkins and Anthony J. Manda.

J. B. DAVIS.

Madison, N. J.

The twelfth annual exhibition of the Morris County Gardeners and Florists' Society, which closed on Friday, November 1, was a noted one in the history of the society so far as quality of the flowers exhibited goes. A more perfect collection of superlative chrysanthemum blooms will not be seen probably at any other show in the country this year. The competition in several of the classes was very close indeed, and it must have been a trying task for the judges to select the winners. Neither Mr. Herrington nor Mr. Duckham were exhibitors in the competitive classes, yet each of these gentlemen donated liberally flowers and plants shown for exhibition purposes only. Mr. Herrington occupied the stage with a splendid collection of decorative plants interspersed with chrysanthemums; and Mr. Duckham occupied the center of the hall with a superb mound of single chrysanthemums, among which were tastefully arranged decorative plants, the whole being surmounted by a kenta of noble proportions reaching almost to the ceiling.

The chrysanthemum blooms form, of course, the principal feature of a Fall show like this, and to give an idea of the varieties that are in the foreground for exhibition purposes, we may say that among the winning classes the following sorts always stood out prominently. In the class for the best six varieties, six flowers of each, the winners were Loisse Rousseau, pink; Col. D. Appleton, F. S. Vallis, yellow; Reginald Vallis, a color hard to describe, but what we would call a light wine color; Hetheridge, a light pink, and Nellie Pockett. The best twelve varieties consisted of Miss Clay Frick, white; Mrs. H. Partridge, red; Merza, white; Mrs. J. E. Dunne, Col. D. Appleton, Rival, bronze; W. Duckham, Morton F. Plant, pink; Beatrice May, Loveliness, a beautiful yellow sort; D. V. West, white, and Nellie Pockett.

Peter Reinberg's Rose Booth
Chicago Flower Show

Rose Mrs. Marshall Field
Prize-Winning Vase
Exhibited by Peter Reinberg

New Haven, Conn.

The Fall exhibition of the New Haven Horticultural Society opened in Music Hall, November 6, 1907. There were about 200 entries.

The quality of the exhibits sent in was the best that has been seen for many years, and keen competition prevailed in most of the classes. The prize list contained the names of many former winners. In the professional class are well-known growers, such as Carlson of Fairfield, Cliff of the same place, Sorenson of Stamford, Jenkins of Lenox, Mass., Angus of Chappenville, Burns of New Canaan, William F. Lyons of Morristown, N. J.; David Kydd, Robert Paton of New Haven, and others. The challenge cup was won this year by E. Jenkins.

The officers of the society are: William Ferrier, president; Hubert Grove, vice-president; David Kydd, treasurer; Walter Koella, secretary. Board of managers, Hubert Grove, William Ferrier, Robert Paton, James Moore, Donald Brown, James Bruce, William H. Beattie, A. J. Thompson, Walter Koella and David Kydd.

enjoy the beauty for which it has long been famous. The center of the hall was covered by three pyramidal groups for artistic effect, while the proscenium was occupied by a bank of orchids with a background of palms and served as a screen for the musicians. A mantel decoration designed by George Smith occupied one side of the stage and was formed of Autumn foliage and palms, which made an effective setting for some orchids; while at the extreme ends were groups of chrysanthemums. The whole was staged by Malcolm MacRorie, who served as manager. Two hundred dollars were awarded in cash prizes, Peter Duff bearing off sixteen out of about sixty, and thereby winning the premium offered by George Smith for the winner of the largest number of firsts. The awards were as follows:

For best group of chrysanthemums, first, Mr. William Runkle (D. Klindgrab, gardener); second, S. M. & A. Colgate (William Reid, gardener). J. Crosby Brown (Peter Duff, gardener), was first for display of orchids, best orchid in flower, and first for best 12 chrysanthemum plants in four varieties, consisting of Glen View, Merza, Brutus and Mrs. Wm. Duckham. He was also first for six chrysanthemum plants with Merza, for bush chrysanthemum plant with Lady Lydia, and for best flowering plant other than chrysanthemum with a specimen *Cattleya labiata*. For best foliage plant, William Runkle took first with *Phyllotanthum Lindeni*. In the class for specimen fern, J. Crosby Brown

Poughkeepsie, N. Y.

The flower show of the Dutchess County Horticultural Society, which was held in the State Armory commencing November 6, was conceded the best ever held by the organization. Among the principal exhibits were round tables of ornamental and flowering plants arranged for effect, prizes being won by Archibald Rogers and the Saltford Flower Shop. For group of ornamental flowering plants arranged for effect, the Saltford Flower Shop was first; Archibald Rogers, second. Among the prize winners for cut flowers of chrysanthemums were William Rockefeller of Tarrytown, W. P. Clyde, Thomas Newbold, Winthrop Sargent, F. W. Vanderbilt and Alexander Thompson. The Saltford Flower Shop won the prize for the best 12 roses, also several premiums in the carnation classes. This concern was also the winner of the best decorated dinner table; the centerpiece of this was of violets, and tiny bunches of violets tied with violet satin cord formed the bouquets. The Henry A. Dreer Company made a fine exhibit of palms, ferns and other plants, in which was included Peris Wilsoni; they were awarded a certificate of merit. The Sunnyfield Nursery Company had a large collection of hardy plants and trees, not for competition, but which added greatly to the general effect and completeness of the show. The Saltford Flower Shop captured first prize for the best 100 violets, the second going to F. W. Vanderbilt.

In the classes for plants carrying single blooms, the winning varieties were Brighthurst, light pink; F. S. Vallis, yellow; Viviani-Morel, Glen View, bronze; Merza, M. F. Plant, Miss Clay Frick, Beatrice May, Mrs. Duckham, yellow, and Lady Hopetoun, red.

Cultural Directions

Are leaflets written by practical men especially for the use of amateur customers.

If you have a counter trade, either in plants, seeds, flowers or bulbs, you should have a supply of these leaflets on hand to present to your customers when they seek cultural information about their purchases.

(The leaflets embrace over forty subjects.)

We can supply them at \$2.50 per 1000, or 500 for \$1.50, and can make a reduction of those prices on large quantities.

At a small extra cost we can put your imprint on each leaflet.

Try a thousand and see what a help they are in selling goods.

The following "Culturals" are particularly seasonable for your customers at the present time:

Chrysanthemums, Dahlias, Hyacinths, Lawns, Lily Culture, Tulips, Freesia, Vegetables.

GARDENIA PLANTS

SCOTTII FERNs

AND A GENERAL LINE OF

Decorative Stock

JOHN SCOTT

Rutland Rd. and E. 45th St., Brooklyn, N. Y.

Among Mr. Totty's novelties were several of merit that deserve special mention, particularly **Mary Donnellan**, a large yellow variety of a very pleasing shade; **Loissee Rousseau**, rose pink with silver reverse; **Mrs. Norman Davis**, white; **Mary Mason**, cerise; **O. H. Broomhead**, a dark pink shade with silver reverse; **Mrs. J. C. Neill**, yellow, and **President Loubet**, a white. The last mentioned is one of last year's introductions, but it is a very fine white and must be classed among the best in the novelties.

Among the specimen plants the best seen in the exhibition was a plant of **J. H. Troy**, shown by **J. Downing**, a superb specimen, beautifully trained, and without exception the finest plant in the show. Mr. Downing also staged some very well trained specimens of **chrysanthemums**—one in the form of a basket, another of a ship and another of a turkey. These were all exceedingly well done and very much admired.

Among the miscellaneous exhibits was one of **carnation Afterglow** from **Dalldouze Brothers**, **Brooklyn, N. Y.**, which received a certificate of merit; also a beautiful collection of orchids from **Lager & Hurrell**, **Summit, N. J.** awarded a certificate of merit; a few plants of **Cattleya labiata** from **A. R. Kennedy**, awarded a cultural certificate, a similar award going to **H. B. Vyse** for grapes. **H. Turner** received a certificate of merit for an exhibit of his new celosia, **Pride of Castle Gould**; **Wm. Herzog** of **Morris Plains, N. J.**, honorable mention for violets. **James Fraser**, **Morristown**, was awarded a certificate of merit for an exhibit of coleus, a special certificate being granted for the variety **Lucania**, a dark colored, fancy-leaved sort. **Arthur T. Boddington**, seedsman, **New York**, was granted a certificate of merit for his new cosmos, **Lady Lenox**, a similar award going to **Charles H. Totty** for a superb collection of single **chrysanthemum** plants, also for a plant of **hamanthus**.

The judges were **Wm. Hastings**, **Tuxedo Park, N. Y.**; **E. Dalldouze**, **Brooklyn, N. Y.**; and **Alexander McKenzie**, **Glen Cove, N. Y.**

The general list of prize winners follows:

For thirty-six flowers of six varieties **chrysanthemum**, **Charles H. Totty**, first; **W. F. Lyons**, **Morristown**, second. Eighteen flowers in six varieties, **J. Downing**, **Morris Plains**, first; **J. Fraser**, **Morristown**, second. Twelve flowers, dissimilar, **J. Fraser** first; **J. Downing**, second. Ten flowers yellow, **Charles H. Totty** first, with **Colonel D. Appleton**; **W. F. Lyons**, second. Ten flowers of any white variety, **J. Fraser**, first, with **Miss Clay Frick**; **H. B. Vyse**, **Morristown**, second. For the best ten flowers of any pink variety, **J. Fraser**, first, with **William Duckham**; **C. H. Totty**, second. Twenty-four flowers, dissimilar, shown on twelve-inch stems, **Charles H. Totty**, first; **Wm. Turner**, **Oceanic, N. J.**, second; **W. F. Lyons**, third. Six pink and six white, **J. Downing**, first, no second being awarded. Twelve varieties on short stems, **J. Downing**, first; **J. Fraser**, second. Six varieties on short stems, **Peter Duff** of **Orange, N. J.**, first; **A. R. Kennedy** of **Madison**, second. Six flowers, pink, **J. Fraser**, first; **A. R. Kennedy**, second. Six white, **J. Fraser**, first; **R. Herms**, **Morristown**, second. Six yellow, **A. R. Kennedy**, first; **J. Fraser**, second. Six any color, **Peter Duff**, first; **J. Fraser**, second. Six flowers, introductions of 1906, **J. Fraser**, first; **H. B. Vyse**, second. Six flowers of 1907 introduction, **H. B. Vyse**, first; no second awarded.

In the class for the special prizes offered by **Benjamin Hammond** for vase of flowers with other foliage, **J. Downing** took first; **J. Fraser**, second. Mr. Totty took the first prize for pompon **chrysanthemums**, the second going to **John N. May**. Mr. Totty was also the winner for the best vase of single flowers with other foliage for effect.

There were eleven classes devoted to roses, and considering that this is the rose center of the State, the exhibits were not so numerous as one would have expected. **L. A. Noe** was the winner for eighteen **American Beauty**, **L. B. Codding** taking second. Mr. Noe was also first for twenty-five **Bridesmaid** and twenty-five **Bride**, **S. W. Wyatt** second for the twenty-five **Bridesmaid**. **W. G. Badgley** took first for twelve **Bridesmaid**; no second awarded. **F. L. Moore** took first for twelve **Bride**, and for twenty-five **Richmond**; **L. A. Noe** being second in the latter class. **W. G. Badgley** was the winner for twelve **Richmond**, **F. L. Moore**, second.

For the special prizes offered by **W. E. Marshall & Company**, **New York**, **A. R. Kennedy** was first for six **American Beauty**; no second. **Peter Duff** took first for six teas, **A. R. Kennedy** second. **E. Reagan**, first for six **Richmond**, **A. R. Kennedy**, second.

In the carnation class, **E. Reagan** was the winner of the prize offered by **R. & J. Farquhar & Company** for three vases, twelve blooms in each, **J. Fraser** being second. **A. R. Kennedy** captured the prize offered by **Vaughan's Seed Store** for the best twenty-five blooms of any variety, **Phillip Cox**, **Montclair, N. J.**, second; **E. Reagan**, third. The prizes offered by

F. R. Pierson of Tarrytown, N. Y., for the best twenty-five blooms of the variety Winsor, were won by J. Downing, first; J. Fraser, second; W. Inglis, Patchogue, N. Y., was the winner in the class for two varieties, Charles H. Totty being second; P. Cox, third. For a vase of twelve blooms, one variety, the first prize winner was Mr. Totty; second, W. Inglis.

Bunch of double violets, W. S. Herzog, Morris Plains, first; Peter Duff, second. Best bunch of single violets, Mr. Duff was again first; Mr. Herzog, second.

The prizes offered by the Pierson U-Bar Company, for group of chrysanthemum plants in flower with foliage plants, were captured by J. Downing, first; H. R. Vyse, second; J. Jones of Convent, third. Three specimen chrysanthemum plants, Peter Duff, first; J. Downing, second. Single specimen chrysanthemum plant, Peter Duff was first; Mr. Duff was also first for the best twelve plants, dissimilar, with single stems, J. Downing, second. Six plants in flower, dissimilar, W. F. Lyons, first; H. R. Vyse, second.

The exhibits of fruits and vegetables were not as large as seen here in former years, though everything shown was of excellent quality. J. Fraser captured the prize offered by A. T. Boddington for the best display of vegetables, twelve kinds. H. B. Vyse won the Peter Henderson & Company prize for display of twelve kinds of vegetables. J. Fraser carried off the prize offered by Burnett Brothers for the best collection of six distinct kinds of vegetables. W. F. Lyons was the winner for six heads of celery. A. T. Caparn capturing the prize for the best collection of apples.

Tarrytown, N. Y.

The annual chrysanthemum exhibition of the Tarrytown Horticultural Society, held on Wednesday, Thursday and Friday, November 6, 7 and 8, 1907, was one of the most successful in the history of that society's shows. The patronage accorded this exhibition seems to grow year by year, the attendance being so large at times that the hall was practically crowded. During the forenoon of each day the doors were thrown open to the school children of the village and vicinity, and every scholar in the many schools in that neighborhood visited and enjoyed a view of the plants and flowers. One of the interesting features of this exhibition is the competition for a dinner table decoration; for this class a valuable silver cup was offered by one of the lady patronesses, and there were no fewer than seven competitors, all of the tables being very artistic and well done. The winner of the cup was Edwin Jenkins, who made up a beautiful table of cattleyas and orchids, with cattleyas for the ladies' corsage bouquets.

The many chrysanthemums in the competing classes were all of superior quality, and we are perfectly safe in saying that the flowers shown this season were equal to those seen anywhere else. Wm. C. Roberts, gardener to Mr. Frederick Potter, was the winner for 18 blooms in six varieties, being also first for six white and six yellow, the second prizes going to Wm. J. Buckley, gardener to Mrs. Stuyvesant Fish, and Francis Milne, gardener to Mr. E. H. Weatherbee.

The winners in the classes for chrysanthemum pot plants were David McFarlane, gardener to Mr. Emil Berolzheimer, who took first for bush plant, pink; also first for bush plant, any other color, the second prize in the latter class going to H. Nichols, gardener to Mr. Theodore Trevillian. For 12 plants grown to single stem, W. C. Roberts was first; for six standard chrysanthemums, W. H. Waite, gardener to Mr. Samuel Untermyer, was the winner. For the most effectively arranged group of flowering and foliage plants, David McFarlane was first with a splendid group of stove and greenhouse plants with chrysanthemums and orchids interspersed; W. H. Waite, second. For specimen palm, F. Milne was the winner, and for the best foliage plant other than a palm, D. McFarlane took first and W. H. Waite, second. The first prize for the best flowering plant went to D. McFarlane and the second to Wm. J. Buckley. James Stuart, gardener to Mrs. F. A. Constable, was first for six plants suitable for table decoration; W. H. Waite, second. H. Nichols, gardener to Mrs. J. B. Trevor, took first for six ferns suitable for table decoration; John S. Wahlquist, gardener to Mr. J. D. Archbold, second. The first prize for the best specimen fern went to Howard Nichols; the second to James Stuart. Mr. Nichols was also the winner for the best adiantum other than Farleyense, also for the best specimen Adiantum Farleyense. In the class for Begonia Gloire de Lorraine, James Stuart was the winner. Six cyclamen plants, Wm. J. Buckley, first; David McFarlane, second.

The society's prize and silver medal for the best decorative plant not now in commerce went to F. R. Pierson Company for their new fern, Nephrolepis superbiissima. The F. R. Pierson silver

cup, for three vases of carnations, was won by Wm. C. Roberts; W. H. Waite, second.

In the class for 12 blooms of chrysanthemums in distinct varieties, David McFarlane was first; George Middleton, gardener to Mr. Wm. Rockefeller, second. McFarlane was also the winner of the silver cup for 24 blooms of chrysanthemums in distinct varieties, the second prize going to George Middleton and the third to Robert Angus, gardener to Mr. Joseph Eastman.

The Pierson U-Bar Company's prize for the most effectively arranged table of decorative plants was captured by David McFarlane; Robert Angus, second. Oscar Carlson, gardener to Mrs. O. B. Jennings, took first for collection of pompon chrysanthemums grown outdoors, Francis Milne, second. Twelve blooms Miss Clay Frick chrysanthemum, Edward Jenkins, gardener to Giraud Foster, took first; David McFarlane, second; Thomas A. Lee, gardener to Mrs. M. E. Sands, third. Six blooms chrysanthemums, distinct varieties, prizes offered by Vaughan's Seed Store, W. C. Roberts, first; W. H. Waite, second; H. J. Thompson, gardener to Mr. Alfred Marshall, third.

Table of orchids and ferns in pots, prizes offered by the Julius Roehrs Company, W. H. Waite. For the largest chrysanthemum bloom in the exhibition, David McFarlane won out. The Henry A. Dreer prize for collection of stove plants, not including ferns or palms, went to W. H. Waite and Robert Angus, respectively. In the class for 36 chrysanthemums in six varieties, D. McFarlane was the winner. Table of flowering plants and ferns, not including chrysanthemums, W. H. Waite. Six plants of Begonia Gloire de Lorraine, Wm. J. Buckley, first; James Stuart, second. Best arranged vase of 25 blooms of chrysanthemums, W. H. Buckley.

For 36 roses in three varieties, Wm. Inglis, gardener to Mr. John J. Riker, was first; E. Lundberg, gardener to Mr. Henry Coon, second. Twenty-four Killarney, Wm. J. Buckley, first; Wm. Lyons, gardener at Spring Brook Farms, second.

The Wm. F. McCord prize, for miniature flower garden, went to George Begg, assistant to David McFarlane, the second prize to Albert Hopper, assistant to Robert Angus. Twenty-four blooms Richmond roses, Wm. Lyons, first; Wm. J. Buckley, second.

The prize for the best arranged basket of cut flowers was won by W. H. Waite. Howard Nichols was the winner in the class for the best centerpiece for table. For 36 blooms of carnations in six varieties, George Middleton was first; W. H. Waite, second.

For bunch of fifty double violets, Albert Weisenberger, gardener to Mr. Howard Willets, was the winner; bunch of fifty single violets, Howard Willets, first; Howard Nichols, second.

Twelve American Beauty roses, George Middleton, first; H. Nichols, second. Wm. Lyons was first in the class for 12 white roses; W. C. Roberts, second. In the class for 12 yellow, W. C. Roberts took first, H. Nichols, second. H. J. Thompson was the winner of the first prize for twelve crimson, W. H. Cooper, second. For 12 varieties, any other color, Wm. Inglis was first; H. Nichols, second; twelve pink, Wm. Inglis, first; James Stuart, second.

In the class for the best 18 carnation blooms, three varieties, W. C. Roberts won first; Wm. J. Buckley, second; twelve white, Wm. Inglis, first; James Bell, gardener to the Osborn estate, second; twelve scarlet, Wm. Lyons, first; H. J. Thompson, second; twelve dark pink, George Middleton, first; W. C. Roberts, second; 12 light pink, Wm. Inglis, first; George Middleton, second; twelve streaked, R. Angus, first; W. H. Waite, second; twelve crimson, George Middleton, first; R. Angus, second.

Certificates of merit were awarded as follows: James Stuart for display of single chrysanthemums; Lager & Hurrell, Summit, N. J., for display of orchids; J. S. Wahlquist, for display of gardenias; Mrs. I. N. Seligman, for lily of the valley; F. R. Pierson Company, for group of chrysanthemums and ferns; also for display of carnation plants consisting of such varieties as Melody, Winsor, White Enchantress and Beacon.

Henry A. Dreer Inc., Philadelphia, received honorable mention for their exhibit of ferns, palms and decorative plants.

Scott Brothers, Elmsford, N. Y., were granted a certificate for a seedling rose. One of the parents of this rose is General MacArthur, which variety it resembles a great deal in foliage and stem, the color being a shade lighter if anything.

The judges of the exhibition were Wm. Eccles and W. McCollom, Islip, N. Y.; J. Grant, Stamford, Conn.; J. McCollom, Paterson, N. J.; A. Loveless, A. H. Wingett and Mr. Gage, Lenox, N. Y.

Toledo, O.

Toledocans in Detroit.

That 13 is an unlucky number and Friday an unlucky day was again proven when 13 members of the Toledo Florists' Club accepted the invitation of the Detroit Florists' Club to join them on their annual outing to Mt. Clemens on November 1. We arrived all right in Detroit, were met by the delegation of the home club and were safely settled in the special trolley car, when the accident occurred, a working car running into our special, smashing the footboard and several windows, but fortunately not injuring any one of us. After things had settled down we started off, picking up a number of Detroit florists as the car went along.

Going out to Mt. Clemens, J. F. Sullivan's greenhouses came in view, where the first stop was scheduled. Here refreshments were partaken of and an inspection began, after a group picture of the participating members had been taken. The houses were in good shape; the stock looked well—roses, carnations, chrysanthemums and miscellaneous stock. There was a fine lot of lilies which promised to come just right for Christmas. In roses Killarney is principally grown, and the plants look splendid. In chrysanthemum such good standard varieties as Major Bonaffon, Alice Byron, Clementine Touse, Golden Chad-

the club presented him a set of drawing instruments for landscape gardening. J. F. Sullivan was presented, for his faithful services for the club, a fine gold watch, and the treasurer, G. Taepke, received a fountain pen. The heartiness with which the gifts were made and received proved the good fellowship existing.

At Robert Klagge's place the principal features are roses, carnations, chrysanthemums and bulbs. Of roses La Detroit and Killarney are leaders and are well grown. In carnations Mr. Klagge cultivates White Perfection, Lady Bountiful, Victory, Enchantress, Rose Pink Enchantress, Mrs. Lawson. In chrysanthemums we found all the good commercial varieties; also some violets and plenty of cosmos in a long lean-to connecting house. A bed of callas was coming on in great shape. A. L. Stevens grows carnations as his specialty; Morning Glory, Mrs. Lawson, White Lawson, Lady Bountiful and Flamingo being the main varieties. J. Taylor's place was the next on the list, carnations and sweet peas being here specialties and all looked well. At J. Carey's we saw good roses, chrysanthemums and carnations.

The next stop, and the last, was Von Boeselager's establishment, which has a beautiful ornamental entrance seldom seen in commercial places. Carnations are the feature here, and if

Detroit and Toledo Florists at Mt. Clemens, Mich.

wick and Dr. Enguehard were in good shape, and a pink sport of Arline promises to make a very fine commercial variety and is highly thought of by Mr. Sullivan.

Our special took us from here to Mt. Clemens and on the way to Breitmeyer Brothers' place we stopped at Leopold Mallast's and looked at his carnations, which were in the best of condition.

An elaborate lunch was served at Breitmeyer's. The houses here were a revelation to us from Toledo; it is needless to comment on the cleanliness of them. The roses were elegant, several houses being planted with American Beauty, which did not show a single leaf with spots and were just right to come in for Christmas. The Killarney, of which immense numbers are grown, were also fine and the same can be said of Richmond and La Detroit. Several houses were planted with violets and the carnations could not be any better; the principal varieties were Robert Craig, Victory, Mrs. T. W. Lawson, White Lawson, Enchantress and Rose Pink Enchantress. Several houses were filled with chrysanthemums in all the best commercial varieties, also some pompons.

We gathered again in the packing shed and speechmaking was in order. Mr. Scribner was toastmaster, and this outing proved to be of special significance to several of the local members. It appeared that Mr. Diller had been criticized by the Detroit press for irregular shapes in his circular beds in the parks, and to help him avoid such mistakes in the future

we may make predictions, from the looks of his White Enchantress it is to be one of the best varieties and will be largely grown. Other varieties were Moonlight, Beacon, Rose Pink Enchantress, Enchantress, and Mrs. Lawson.

It was dark, when our special took us back to Detroit, where Breitmeyer's store received close inspection. We think it the most perfect and elaborate store we have ever seen. The ornamentation is rich and in good taste. The Cut Flower Exchange was also visited. This concern is equipped with all facilities for handling stock in a hurry; a full line of florists' supplies is carried.

We Toledo florists are certainly most thankful to the Detroit brethren for their hospitality. It seems to us that such gatherings are a splendid way of promoting good fellowship; they are instructive and will help the business in the end. We hope sincerely that in the near future we shall have the Detroit brothers here once a year. Of course, we cannot show them as much as we saw, but we would like to have them, anyhow.

SCHILLER.

COLUMBUS, O.—The Livingston Seed Company gave its annual flower show from November 5 to 9, and in connection therewith distributed a neat folder giving an interesting history of the chrysanthemum.

ROCKLAND, ME.—The greenhouse which was established on Park street some years ago by J. H. Willson is being demolished.

HAVING for the last five years worked a large greenhouse plant on shares, advertisement will soon be open for similar proposition. Address, G. M., care The Florists' Exchange.

MUNICIPAL CIVIL SERVICE COMMISSION.

New York, November 1, 1907.
PUBLIC NOTICE IS HEREBY GIVEN that applications will be received from FRIDAY, NOVEMBER 1, UNTIL 4 P. M. FRIDAY, NOVEMBER 29, 1907, for the position of GARDENER.

The examination will be held on Monday, December 23, 1907, at 10 A. M. The subjects and weights are: Special, 6; Experience, 4. The percentage required is 70. There are five vacancies in the Department of Parks, Boroughs of Manhattan and Richmond. The salary is \$2 to \$3 per day. The provision of clause 12 of Rule VII, to the effect that "no person who has entered any examination for appointment to a competitive position and failed therein or who has withdrawn therefrom, shall be admitted within nine months from the date of such examination to a new examination for the same position," is waived so far as it applies to this examination.

For further information apply to the Secretary.

FRANK A. SPENCER, Secretary.

GROW MUSHROOMS

If you do not know how, procure that simple but complete and practical book called "How to Grow Mushrooms." The price is ten cents and it can be secured from this office.

Special rates will be made to the trade who wish to supply their customers.

THE FLORISTS' EXCHANGE
2 Duane St., New York

Thirty cents is the minimum charge for advertisements on this page.

METROPOLITAN MATERIAL CO.
Greenhouse Wreckers
1398-1408 Metropolitan Avenue, BROOKLYN, N. Y.

Peabody, Mass.

J. M. Ward & Company have at this place a number of well-filled greenhouses. Tidiness is a general order, so that the entire greenhouses and other buildings present a pleasing appearance. One house, 100x12 feet, is devoted to a fine lot of cyclamens. This house contains about 1,500 plants in from 6 to 8-inch pans, all of which were raised from seed sown one year ago last September. These are as handsome a lot as could be found anywhere; Mr. Ward is justly proud of them. He says a man cannot go off on many excursions during the Summer months and be successful with cyclamens. The house has to be shaded on all bright days and the shading removed at sundown. A light, permanent shade, Mr. Ward believes, would not produce as good results as by shading only as conditions demand. He prefers a moderately firm soil. While there is

Fair Haven, Mass.

Peter Murray has just finished a new range of greenhouses that are an ornament to the locality in which they are placed. The old houses have been abandoned this Fall, and business will go on without interruption at the new stand, which is on Washington street, some distance farther out than the old location.

Mr. Murray purchased six acres on which he has erected his new range. In connection with the greenhouses he has constructed a handsome building that answers many desirable purposes. The basement is used for boiler room and coal storage; it is fireproof, being built out of railroad iron and concrete. A portion of this basement is partitioned off and is used for cold storage for plants and cut blooms of all kinds. On the first floor is a handsome office building with all the necessary appurtenances and

**Chrysanthemum Mrs. W. H. Moir**

Winner of Lord & Burnham Company's Gold Medal at New York Show

Grower and Introducer, C. H. Totty, Madison, N. J.

plenty of leaf mold available, so much used in cyclamen culture on the other side, Mr. Ward does not care especially for it. The plants are grown from seedlings without interruption or rest of any kind, as it is in this way only they can be had in bloom for Christmas, when they are in greatest demand. The large dormant cyclamen bulbs offered by the trade in the Summer make good plants for the Spring shows, but they cannot be had in bloom for Christmas, from the fact the bulbs do not ripen soon enough in the Spring to get them started again and grown into flower by Christmas. Mr. Ward says the price at which cyclamens is sold is not remunerative enough on account of the close attention required to bring the plants to the best state of perfection. Where a man is on hand all the time to attend to all the details in person the case is a little better. On the other hand, if he had to hire a man by the hour for every hour's work required on these plants, the culture of the cyclamen would be very unprofitable.

In addition to cyclamens, Begonia Gloire de Lorraine are well and extensively grown. Poinsettias, Euphorbia Jacquiniflora, moschosma and other stock, including a full line of carnations and roses, were all looking well.

The office building at this place is one of the best in the country; plenty of room, a place for everything, and everything in its place. J. M.

Boston.

At the annual meeting of the Boston Co-operative Flower Market last week these officers were re-elected: Edward Wood, president; D. Carmichael, treasurer, and Wilfred Wheeler, clerk.

Penn the florist on Bromfield street is out with a new style delivery wagon which is up-to-date in every way.

Committees of the two flower markets are making arrangements for the holding of a cut flower exhibition about Midwinter, similar to that formerly held when there was only one market.

J. W. DUNCAN.

Variety, Chrysanthemiste Montigny

Grower, Thomas Proctor, Lenox, Mass.

so that in severe weather there would be no necessity to go outdoors for anything. These buildings face the street car line, with ample ground in front for a fine landscape effect that will be developed by next Summer. The buildings cost Mr. Murray about \$18,000. Mr. Murray was the originator of the Winsor carnation; this will in a measure account for his handsome improvements and apparent prosperity. J. M.

Montello, Mass.

The Crawford greenhouses at Montello have undergone some extensive improvements and extensions this past Summer. Mr. Crawford is connected with the Osmic Chemical Company. The greenhouses are on his property and managed by F. J. Dodd, grower and superintendent. A large rose house, 162x52 feet, was completed this past season; it is a handsome building and of the most durable material. The ridge of the house is 20 feet high, giving it a very imposing and elaborate appearance. This height, it was stated, was necessary to get the rays of the sun. In addition to roses, carnations and smilax are grown for local trade, as well as for the wholesale market. J. M.

SCRANTON, PA.—At the annual meeting of the Florists' Club, held November 7, 1907, the following officers were elected: President, Edgar McConnell; vice-president, William Clark; secretary, T. B. McClintock; assistant secretary, Mrs. T. B. McClintock; treasurer, William McDonald; trustees, D. D. Schultheis, Jonathan Rodham, J. L. Hill, William McDonald and B. E. Cokely.

Nathan Smith & Son, Adrian, Mich.; J. D. Cockroft, Northport, L. I., and John E. Haines, South Bethlehem, Pa., received special commendation for exhibits of chrysanthemums and carnations sent to the meeting.

T. B. McClintock scored high in points upon a floral centerpiece, gates ajar, and floral chariot design. J. L. Dillon of Bloomsburg had upon exhibition a floral basket of neat design and of variety of color.

Chrysanthemums from William McDonald of Moosic were well shown, and Ira G. Marvin of Wilkes-Barre received an almost perfect mark on his exhibit of new seedling carnations.

Following the announcement of the judges Mrs. McClintock, assistant secretary, was presented a set of silver knives and forks as a token of appreciation of valuable services during her three years of representing the club in an official capacity.

GROWERS OF CHRYSANTHEMUMS WHO HAVE MORE STOCK PLANTS THAN THEY NEED, WILL FIND A READY SALE FOR THEM BY PLACING AN ADVERTISEMENT IN THE FLORISTS' EXCHANGE.

Commercial Violet Culture \$1.50

The Florists' Exchange, 2 to 8 Duane St., N. Y.

Springfield, Mass.

Walter Mott, who some months ago went into business with M. I. O'Brien at Sharon, Pa., has returned with his family to Springfield. Frank Barritt, who recently sold out here to go into a business partnership with Mr. Mott at Sharon, has returned also.

J. W. Adams & Company on North Main street continue the business of both nurserymen and florists. In the future they are to give more attention to the florist branch and for this reason have just completed a new house for carnations. The house is 42 x 100 feet and of the most approved method of construction. A propagating house is also in the course of construction. Steam heat is to be used and for this purpose a new 40-horsepower boiler has just been placed in the working quarters. The benches in these new houses are composed of cement slabs. The bench supports and 2 x 4 crosspieces are all of concrete.

The greenhouses of William Schlatter & Sons are quite attractive with good stock in all popular lines. A new house of carnations is particularly promising. This house is 40 x 125 feet and all the plants are grown on raised benches. Mr. Schlatter would have no other, as he considers the space under the benches of great value in the raising of many plants, bulbous stock especially. This house contains five benches that are supported by iron posts running up to the roof; there are fourteen posts to a bench; around each post is a nice little bench of sweet peas. Mr. Schlatter says he cut enough sweet peas from this house last Winter to pay for the coal consumed in heating it. The plants are all grown in the field and plauted on the benches at the proper season. The practice of growing carnations in the houses during the Summer months, it was said, was an unprofitable one to a grower with only a limited amount of glass, for the reason that the usefulness of the house for Summer was lost when the plants could be growing in the field just as well. Where field-grown plants are used the old stock in the houses can remain much longer on the benches and yield some valuable Summer flowers. An interval of a couple of weeks is all the time required to dispose of the old stock, clear the benches and put in the new soil and plants. The idea of getting a good cut of flowers from the old plants in the house, while the young stock is growing in the field Mr. Schlatter believed was worthy of the consideration of all growers that might be considering the advisability of early Summer planting on the greenhouse benches.

Mark Aitken was busy shipping berry howls to the florists in various parts of the country. This idea originated with Mr. Aitken four or five years ago and has each season grown more in popular favor. It is entirely a New England product and is composed as follows: Fish globes of various sizes are used, the flat ones generally. These are filled about one-third full of ordinary green sheet moss which is well moistened. Into this are inserted small branches of the partridge berry. This is found in the New England woods and is remarkably pretty. It is of trailing habit, with bright green foliage and vivid red berries as large as a holly berry. It has wonderful lasting qualities. A globe prettily arranged with these berries makes a desirable ornament and holds its beauty for several months. A piece of glass is used to cover the opening in the top of the globe to prevent the drying out of the moss and berries. A piece of red cord, with tassels, is usually tied around the neck of the globes. The smaller globes that usually sell for \$1 each seemed to be in greatest demand. At Christmas they are reported to be great sellers; at that season Mr. Aitken ships them to the florists in the principal cities of the West.

L. E. Robinson, Jr., is an extensive grower of bulbs and azaleas as well as of a good general line of other stock.

N. F. Higgins has an attractive store on State street and is also handling a large number of the partridge berry bowls.

VICTORIA, B. C.—The Colonist recently gave an extended illustrated description of the establishment of the Fairview-Esquimalt Greenhouses Ltd. The concern operates 7½ acres, 2½ acres being under glass. An outlet is found for the products raised in British Columbia and the Puget Sound cities, Seattle and Tacoma, especially.

Trade Notes.

Despite the fact that we are in the throes of a municipal election campaign, business goes merrily on, hampered only by the arrival of heavy Fall rains. When these occur seemingly on Saturday for choice, much cut material is left over, this being especially true of carnations and roses. The Autumn queen is in great popularity here, and sincere regret is felt by all that for some unknown reason, really first-class flowers, home grown, are very scarce. Whether this is on account of the season or not, opinions differ, but owing to the late season last Spring, when small plants of chrysanthemums in 2½-inch pots needed attention by shifting or planting, neither of which was given on account of houses still being full of bedding and other plants, no room being available, the plants perhaps received a check from which they never fully recovered.

At the greenhouses of Salter Brothers the chrysanthemums are later than usual. Among those grown may be mentioned, for early, Polly Rose, Glory of the Pacific, John H. Lager, Pink and White Ivory, Midseason, Maud Dean, pink; Colonel D. Appleton, yellow; Alice Byron, white. Later ones include Major Bonaffon, of which a large number are grown; Amorita, late deep pink incurved; Mrs. Buckbee, Gold Mine, Golden Age, Kimberley, Cullingfordii, Wm. Duckham, W. B. Chamberlain and a few small lots of other varieties. This firm has also part of bench of snapdragon planted, which promises well, also Schizanthus Wisetonensis, which when given room and time to develop, should prove a valuable addition in plants during the Winter months.

At J. B. Keller Sons' place only the midseason and later chrysanthemums were seen, as the early house had been cleaned and filled with cyclamen plants, in 10-inch pots—really a sight to see. This firm grows only the standard sorts, among which were: Philadelphia and its running mate Pennsylvania, Colonel D. Appleton, which by the way is to be discarded on account of its weak neck, Wm. Duckham, Maud Dean, White Mystery, Timothy Eaton, Cullingfordii, and Silver Wedding.

That a large number of novel ideas is possible in working out designs for wedding decorations was seen last week, where the thinking one used cornstalks, pumpkins, and Autumn foliage, in decorating for the affair in a large tent in rear of the house. The pumpkins were cut to resemble faces, and candles were placed inside, making it as it was supposed to be, a Halloween wedding.

CARNATIONS
IMPERIAL and
PINK IMPERIAL

The Wonders of 1907

Have proven to be all that was claimed for them. They took prizes at the great show at Toronto, Canada, last year, besides prizes, certificates and diplomas at various other places.

The **IMPERIAL** is a variegation of delicate pink, similar to the shade in **ENCHANTRESS**, a splendid keeper and fine shipper.The **PINK IMPERIAL** is a most pleasing shade of pink, one that has long been wanted in the market.The stems of both these varieties run from three to four feet in length, are extra strong and have no equal in the **CARNATIONS** of to-day. The calyxes are good and strong, and are practically non-bursters. The flowers are well-formed, from 3 to 4 in. in diameter and are very fragrant. They are early, free and continuous bloomers from October until late in July. Strong growers, every shoot making a flower. No extra grass.

Have shown both at November shows with 30 in. stems.

JOHN E. HAINES, a leading scarlet, has also proven to be satisfactory. It is noted for its splendid color, good stems and productiveness.

MY OWN ORIGATION

PRICES: For selected cuttings, delivery commencing December, 1907, \$6.00 per 100; \$50.00 per 1000.

Place your order early. Come and see them growing.

Prices Advertised in these Columns are for THE TRADE ONLY—When Writing Please Mention THE FLORISTS' EXCHANGE.

THE FLORISTS' EXCHANGE

New Carnation **DEFIANCE** Brilliant Scarlet

This sterling novelty is the result of a cross between ESTELLE and a seedling with MACEO and DAYBREAK blood in it, and was originated by W. N. Rudd, Mount Greenwood, Ill.

The color is a most beautiful scarlet, brighter than anything seen in carnations heretofore; size, three inches and over; habit and form ideal. It is a very rapid grower, and has no tendency to produce surplus grass, every shoot advancing rapidly and producing a perfect flower. If you did not place your order already, we would advise you to do so without delay, so as to insure early delivery. **\$12.00 per 100, \$100.00 per 1000.** Usual discounts on larger orders.

There may be other red carnations, but there is only one scarlet, and that is DEFIANCE. Come and see it growing and be convinced.

REVIEW OF THE MARKET

NEW YORK.—It would seem by the cut flower market just now that the chrysanthemum tide is at its flood; every commission man and every dealer seems to have unlimited numbers of these blooms, and, unfortunately, not much money is realized on any of them. In fact, it is a difficult matter to get rid of each day's consignments at any price. Compared with values of a year ago, the prices received must be very disappointing to the growers. Roses, also, are coming in very plentifully, but the demand is so light that no fixed prices obtain; where a buyer is willing to take slips or job lots, he can get them almost at his own figures. The same remarks apply to carnations; there are plenty of them coming in, but prices are going downward. Violets also are cheaper than they were last week. For lily of the valley there is very little demand and plenty of it is in sight. Gardenias are coming in heavily. Prices range anywhere from \$4 downward; many flowers coming in have stems but two or three inches long.

Longiflorum lilies, *Lilium rubrum* and pompon chrysanthemums are all in quantity. Business is such that there is very little demand for any of these. The stress in the money market is evidently having quite an effect upon the flower trade just now. All throughout the wholesale district every dealer who has been in the business for any length of time is free to admit that the situation was never quite so bad at this time of the year as it is at present. Thanksgiving Day is approaching, however, and it is to be hoped that some little spurt will come in between now and then so as to clear up the heavy supply of chrysanthemums at reasonable figures.

CHICAGO.—The market this week has generally held its own, with the exception of carnations, which for some unexplained reason fell off on the cheaper grades. Stock is good all around and plentiful in all lines, lilies and small chrysanthemums being abundant yet holding their own on price.

Show week is noted among the wholesalers as a poor business week, and this year was no exception, from the fact that there is much less shipping. Local business is active.

PITTSBURG.—Trade the past two weeks has been satisfactory, society affairs were numerous, and there have been a number of important weddings. The opening of the orchestra season was brilliant and the second annual horse show all helped to create an extra demand for cut flowers. There is an abundance of stock of all sorts, at times rather an overabundance, so that prices have fluctuated considerably. Chrysanthemums are in heavy supply at low prices—from 3c. up; the best in lots did not bring much over 10c. Roses were offered from the East at \$20 in thousand lots, but not being in great demand few were ordered. American Beauty were sold on the street stands for all prices. Carnations are quoted at from 3c. to 4c.; occasionally lots are offered at \$15 per thousand. Harrisii lilies are coming in well, but there is no great demand for them. Violets are somewhat improved in quality, but are not selling fast.

There was much planting of trees and shrubs the past week, although the weather was most unfavorable—there was too much rain. Bulb sales, particularly for outdoor planting, have increased greatly the past few years, and so far this season trade in these has been good, with orders still coming in.

E. C. R.

BOSTON.—The market has remained dull during the past week and an abundance of stock is on hand. Prices are somewhat firmer, but quicker sales are hoped for in the near future. Chrysanthemums are yet very plentiful and values vary much according to quality of blooms; the fancy flowers bring about \$3 per dozen in quantities, while smaller blooms may be bought at \$3 per 100 up.

American Beauty roses are now very fine, and prices are firmer, the best grades bringing \$3 per dozen. Richmond, Killarney and other fancy roses realize \$2 per dozen for the fancy grades, while the general run of roses varies in prices from \$1 to \$6 per 100.

Carnations are of excellent quality and sell at from \$1 to \$3, while a few fancy varieties may bring more. Lilies are more plentiful, and callas are in ample supply. Lily of the valley is selling slowly. Paper White narcissus are getting more plentiful; they bring \$3 per 100. Violets sell fairly well at 50c. There is a fairly good demand for asparagus and adiantum at the usual prices.

J. W. D.

NEW BEDFORD, MASS.—Trade has been very fair the past week; funeral work has been quite plentiful, using up lots of stock; carnations are in good supply, with the demand about equal; these bring from 35c. to 50c. per dozen retail. A few nice Winsor are coming in, which realize 50c. per dozen retail. Roses are of very good quality; the best bring \$1.50 and \$2 per dozen retail. Violets are rather a drug on the market just now; one grower is selling them right along at 50c. per hundred, the general price being \$1. Late chrysanthemums are now making their appearance. R. H. Woodhouse has a nice batch of Jeannie Nonin, which will be fine for Thanksgiving. E. H. Chamberlin had some fine Dr. Enguehard last week.

S. S. Peckham, carnation specialist, will be the firm sign of this concern from now on. Mr. Peckham is growing nothing but carnations now; he is going in heavy on Winsor, and will embark in the rooted cutting business. One of the big features here is the 10,000-gallon tank for water storage; water is pumped by a gasoline engine from a spring 15 feet deep on the property.

The regular meeting of the Horticultural Society was held Monday evening, November 11. Topic for discussion, "Chrysanthemums; Indoors and Outdoors."

HORTICO.

ST. LOUIS.—The trade in cut flowers is still dragging among the retailers. The florists, generally speaking, say that funeral work alone keeps them busy. The wholesalers report a fairly good week. Chrysanthemums, of course, sell well, especially the fancy blooms, which command as high as \$5 per dozen. In this class are Major Bonaffon, Golden Wedding, Timothy Eaton and Viviani Morel. Next choice in these run from \$3 per dozen. Ivory, when large, brings \$2, and small, \$1 per dozen.

The flower show which opens tomorrow, Tuesday, will cause a scarcity of fancy blooms in the market, as the growers will exhibit them. In roses there is an oversupply, and prices are very low on all grades. Ivory, Richmond, Mme. Abel Chateau, Souvenir du President Carnot and Uncle John are of fine quality. Killarney of late has a very pale color, which, of course, hurts its sale. The price hardly runs over \$6 per 100 for the best, and from \$2 to \$4 for firsts. Plenty of Eride and Bridesmaid are in the market at \$4 per 100 for choice and \$1 to \$2 for seconds.

Chrysanthemum Stock Plants

Following Varieties at \$4.00 per 100:

Col. Appleton, yellow; Carrington, red; Dr. Enguehard, pink; Wm. Duckham, pink; Polly Rose, white; Mrs. Wm. Duckham, yellow; Maud Dean, pink; Eureka, white; Navins, white; Pacific, pink.

Following varieties at \$3.00 per 100: Cullingfordi, red; Matchless; Merstham, red; Ben Wills, white; J. K. Shaw, pink; White Shaw; T. W. Pockett, yellow.

The ELIZABETH NURSERY CO., ELIZABETH, N. J.

ROSE GROWING ESTABLISHMENT TO LEASE DEC. 1

CENTRALLY located in Massachusetts. This is the chance of a lifetime to get into the rose growing business. Present proprietor about to build a new plant in another State. 8,000 roses in full crop and in first-class condition. Address, M. R., care The Florists' Exchange

Carnations are having a big run, with price up to \$4 and \$5 for extra fancy. Enchantress, White Perfection, Mrs. T. W. Lawson, Lady Bountiful and Robert Craig bring \$3 to \$4 per 100; short-stemmed stock, \$1.50 to \$2. Extra good lily of the valley still holds at \$4. Paper White narcissus and Roman hyacinths are looked for next week.

There is a good demand for wild smilax, also for all kinds of other greens, of which the commission men have plenty, at usual prices.

ST. PATRICK.

CINCINNATI, O.—Business is holding up remarkably well considering the close money market. Chrysanthemums are around in goodly quantity and sell well, not at fancy but at good fair prices. Roses are not much called for. Carnations sell at slight and only about one-half enough are available to fill orders. Violets find poor sales now. Greens are going fairly well.

Julius Baer, Mr. Olinger and J. A. Peterson were in Chicago during the week.

George F. Moore & Son, Rushville, Ind., were recent callers, and Mr. Moore tells me he has increased his glass and the shipments of chrysanthemums received from him demonstrate he is growing good stock.

The retail trade is complaining about business.

E. G. G.

INDIANAPOLIS, IND.—The general tone of the flower business has improved much since last week; confidence is being restored in the money centers, which fact means much to the dealers in luxuries. Growers are enabled to dispose of their stock more readily; fancy grades of chrysanthemums are in constant demand at \$1.50 to \$3 per dozen. Smaller grades, too, such as Ivory, are acceptable at \$5 to \$7.50 per hundred. The increased sales of pompons has caused several growers to make greater preparations for these next season. Cold weather has shortened the carnation supply so that outside markets are depended upon; the local flowers bring \$2 to \$3 per hundred.

Violets are having a generous sale, at 75c. to \$1 per hundred. The rose supply is no longer burdensome. American Beauty are bringing \$5 to \$35 a hundred; the best stock is received from Illinois. Eride and Bridesmaid of good color and stem wholesale at \$6 to \$7. Green goods are still scarce, especially smilax at \$12.50 to \$15 per hundred strings. Several decorations demand quantities of asparagus from outside growers.

I. B.

WASHINGTON, D. C.—A sluggishness prevailed in the market last week, funeral work constituting the chief demand. The city is pretty well stocked with chrysanthemums. On Saturday the country people brought in many bunches of outside chrysanthemums; buyers seemed content with these, while the more handsome varieties were not disposed of so liberally.

CHANGES IN BUSINESS.

WINCHESTER, O.—C. R. Elsea and his son-in-law, A. L. Gossett, have formed a partnership in the nursery business at Lithopolis.

BERLIN, N. Y.—K. E. Kaulbach has rented his florist establishment in Madison, N. J., to Ordenez Brothers, orchid growers and importers, and is now working for Sambrook Brothers & Company of this town.

MASON CITY, IA.—I. O. Kemble has purchased the plant and florist business so long conducted by Mr. and Mrs. A. L. Wheeler at Fourth and Adams streets and will operate it in conjunction with his big plant at Marshalltown.

FLUSHING, N. Y.—A meeting of the stockholders of Parsons & Sons Company, Limited, has been called for Friday, December 6, 1907, for the purpose of dissolving the corporation and the transaction of such other business as may come before the meeting.

BATTLE CREEK, MICH.—C. C. Warburton has opened a city store at the Monument square corner. Mr. Warburton heretofore has conducted his business at the greenhouses, but the growing demand for his products necessitated the establishing of a downtown store.

BEDEVIERE, ILL.—At a recent meeting of the stockholders, the name of the J. W. Lyon Company was changed to that of the Belvidere Plant and Floral Company. All the stock was represented and the vote was unanimous. The president of the company is E. Eldredge and the secretary and treasurer W. H. Moore. The superintendent of the plant is Wm. P. Williams. The greenhouses are located at Fairview.

NEWPORT NEWS, VA.—F. T. Covey & Company, in order to supply the demands of their increasing trade, are adding to their plant five new greenhouses, each 20x100 feet. This will make 13 houses at this place. The firm has also completed two new greenhouses at its Fredericksburg plant, making a total of 7 houses there, each 20x75 feet, all heated by steam.

Pittsburg.
News Notes.
Chrysanthemum shows are everywhere and the people certainly appreciate them; about 20,000 visited the exhibition in the Phipps conservatories last Sunday. The display is one of the best ever seen—good blooms in great quantities effectively grouped, and all labeled so that people are learning names readily and know what they want when they buy the flowers, sometimes better than the average salesman in the stores.
At the last Florists' Club meeting there was a good show of chrysanthemums from growers outside the city and at home. The attendance was the best of the year. H. L. Blind Brothers exhibited a galvanized iron hotbed sash which attracted some attention.
J. W. Ludwig has been serving on the jury the past two weeks. J. Bader spent a few days in Reading, Pa., visiting relations. De Forest Ludwig, son of E. C. Ludwig, is at Los Angeles, Cal., where he will remain for some months.
The florists feel uneasy about the uncertainty of trade on account of the financial troubles. Money is tight no doubt; clearing house checks are all right as long as they come, but it is awfully hard to collect bills. The retailer is expected to pay his bills monthly and it keeps him hustling to do so, as he has accounts which are not collected for months and the bulk of trade is not "cash" by any means.
E. C. REINEMAN.

Boston.

News Items.

Only the regular nominees are up for election at the annual meeting of the Massachusetts Horticultural Society so that there will be no excitement over the contest as was the case last year. The meeting of the Gardeners and Florists' Club on Tuesday next promises to be a rather exciting one; it is the annual meeting for election of officers and as there are several candidates in the field every member ought to be present and cast his vote. Several of the members have been visiting the various shows in neighboring cities and they will tell what they have seen in the flower line. Henry M. Robinson & Company have received a consignment of bronze galax, the first of the season. The quality is much better than has been seen here for many a day.

H. W. Vose of Hyde Park was first on hand this year with Paper White narcissus.

Peter Fisher, Ellis, and Seddon & Son, Framingham, are the latest to acquire stalls in the Park street flower market for the disposal of their goods.

Welch Brothers have had on exhibition this week a fine vase of the new carnation, White Fair Maid, grown by R. E. Moir, Brockton. They will be selling agents for this variety.

Among visitors the past week we noted, Patrick O'Mara, New York; Daniel E. Gorman, Williamsport, Pa.; George E. Philp, Albany, N. Y.; John Gibson, Newport, R. I.; George Struck, Summit, N. J.; Thos. Knight, Rutherford, N. J.; and D. MacRorie, South Orange, N. J.

Welch Brothers shipped 75,000 violets to New Haven, on Friday, for the occasion of the Yale-Princeton football game. J. W. D.

Buffalo, N. Y.

News Notes.

Wm. A. Adams was elected supervisor in his ward by a handsome majority. He is the first in the craft to be successful in politics.

W. F. Kasting was defeated as candidate for city treasurer on the Democratic ticket. However, he made a splendid run, his opponent receiving only a very small majority. His popularity is shown by the fact that he ran about 4,000 votes ahead of the rest of the Democratic ticket.

John Schweichler, who is foreman for D. Newlands & Company, was unfortunately in losing his brother the past week, who was overcome by gas in a furnace which he was trying to repair where he was employed. The local florists extend their sympathy to the bereaved family.

W. J. Palmer is around again after being confined to his home a fortnight with an attack of bronchitis.

Business the past week or so has not been up to the standard; doubtless election had something to do with the condition of trade. Stock is plentiful; good chrysanthemums are coming in in large numbers. W. H. G.

SEDALIA, Mo.—Charles A. Pfeiffer has added a substantial concrete packing and potting building the past Summer. He reports a heavy business in vegetable and house plants. The weather here is very pleasant and propitious for trade.

JACKSON, MICH.—Mrs. Joseph B. Blessing, florist, died at her home on October 29, from an attack of apoplexy. Mr. and Mrs. Blessing have engaged in the florist business for about twenty-five years in this city. Mrs. Blessing was about 47 years of age. A daughter, Josephine, and a son, Frank, besides the husband, survive her. Mrs. Blessing was generally beloved and respected by a large acquaintance, and her departure will be mourned by people not only in the city but throughout the whole district adjacent to Jackson.

new greenhouses for experimental work were submitted and generally approved. These houses will be erected on the campus of the University of Illinois at Champaign and will be for floricultural investigations exclusively.

The Flower Show Banquet.
The banquet held in one of the large halls devoted to those purposes known as the Old American dining-room was on Saturday evening one of the most pleasant social gatherings, remarkable perhaps for the number of guests of horticultural prominence from distant and local points, including the present and several former presidents of the Society of American Florists. The decorations though not excessive were appropriate and after being seated the party was invited to turn their features together toward the camera, after which President Bruns gave the secret sign to "set to."

- The menu was as follows:
Blue Points
Potage a la Reine
Relishes
Fried Lake Trout, Tartar Sauce
Tenderloin of Beef, Bordelaise
Potatoes Risssolee French Peas
Siberian Punch
Roast Philadelphia Squab
Salade
Napolitaine Ice Cream
Cakes Coffee Cheese

On President Bruns' right sat President-elect Traendly of the S. A. F. O. H., former presidents Kasting and Vaughan and on his left were former president Rudd and Dean Davenport. Following the table to the right sat J. C. Blair, P. J. Hauswirth, W. P. Craig, George Asmus, H. H. Ritter and George M. Kellogg. Following the table to the left sat J. A. Valentine, Albert T. Hey, John H. Dunlop, John T. Temple, Ernst Wienhoeber, F. L. Washburn, R. Witterstaetter, H. G. Berning, Walter W. Coles and J. F. Ammann.

The menu having been fairly discussed, Toastmaster Rudd called upon President-elect Traendly, who spoke for the convention of the S. A. F. next year where he hoped to meet all those present and all their friends.

William F. Kasting followed with an explicit explanation of the work of the committees appointed in connection with the National Flower Show of 1908. The suggestion that each man he had appointed as a chairman say a few words was received with applause, and it was with regret that the gentlemen were allowed to leave for an early train for the East.

Dean Davenport of the College of Agriculture of the State of Illinois followed with a succinct description of the work that has been done within the past few years and the prospects for the future, making an especial point of the fact that in the nineties, when he first became associated with the department, the State of Illinois stood eighteenth among the States in the appropriations for agricultural purposes. To-day the State has the most expensive agricultural station in the world.

J. A. Valentine spoke particularly of what the State institutions are doing for each and every florist, and what each man could do if he would start now and do one thing well for the next year's show.

Albert T. Hey, president of the State Florists' Association of Illinois, spoke of the work that had been done by the organization during its short existence, and prophesied that within a short time the Kew Gardens would be outdone here by the work of the society, ending with an appeal to the representatives of the trade to help and to attend the coming meeting at Springfield.

Professor Blair of the University of Illinois spoke as a public servant and said they were there to do what they were told to do, and depended upon the florists and the different branches of floriculture to state what was wanted and the university stood ready to do it, adding that the prospects of the immediate future would be revelations unthought of at present.

J. C. Vaughan, after a felicitous presentation by the toastmaster as the one man who made us get up or go to bed against our will, was in an after thought found to be right, spoke particularly on the point of every man East and West, local and elsewhere, doing his own share of every committee position and every part of the work local and national.

John H. Dunlop, asked to offer suggestions as to the possible improvement of our shows, said without anything to

Washington, D. C.

Club News.

There was good attendance at the regular monthly meeting of the Washington Florists' Club on the evening of November 5. The committee in charge of the chrysanthemum show to be held November 12, 13 and 14, of which George H. Cooke is chairman, reported excellent progress, and look for a very successful exhibition. It was voted by the club that the city of Baltimore be invited to send judges for the show.

Mrs. Roosevelt has accepted an invitation to visit the exhibition. Henry A. Dreer, Philadelphia, has promised a collection of plants to be sold and the proceeds given for the good of the cause. The Associated Charities of the District of Columbia are to receive receipts, less actual expenses. A fine advertising card in embossed type with flower of chrysanthemum has been prepared to hang in the different stores.

James J. Harty, who on November 11 opened Washington's first commission house for the sale of flowers, was elected to membership in the club. Z. D. Blackstone made a pleasant address in which he was quite complimentary to Mr. Harty. He stated that it was with regret that he would dispense with his services as clerk, in which capacity Mr. Harty has acted for the past eight years.

The committee appointed at the last meeting to look into the matter of the police regulation forbidding the placing of bay trees on the sidewalks reported having fully investigated, and that the order would not be rescinded at present; the matter was dropped.

President Bissett had at the meeting several of his new seedling roses which attracted considerable attention. The Washington Florists' Club bowling team quickly disposed of all tickets remaining unsold for the \$15 cash prize, or bowling ball. Captain George H. Cooke held the 90-cent lucky number corresponding to the one drawn from the hat. The idea as originated some time ago by Secretary McCanley is to defray the expenses of the bowling team to the S. A. F. convention at Niagara Falls in 1908.

News Notes.

Z. D. Blackstone has put up two splendid high power lights on the Fourteenth street side of his store.

The Industrial Home School on Wisconsin avenue is turning out some of the finest chrysanthemums the institution ever sent to the Washington stores. J. L. C.

New York.

News of the Week.

A. M. Rennie of Vaughan's Seed Store, who has been ill in the hospital at his home town, Providence, R. I., has recovered sufficiently to be removed to his residence, and expects to resume his duties in a few weeks.

Spalding & Hodgson is the name of a new firm, incorporated with a capital of \$10,000, to deal in flowers and plants at 315 West Fifty-eighth street. The incorporators are F. Spalding, A. Warren Spalding and Charles F. Hodgson.

In our notes last week about the flower show of the American Institute we omitted to mention a beautiful vase of the new cosmos, Lady Lenox, which was exhibited by A. H. Wingett and was suitably awarded.

The Holly Steam Engineering Company, manufacturers of the hot water circulation apparatus that has found so much favor by those greenhouse men who have tried it, are now located in New York at 135 East Fifteenth street. E. P. Holly is president of the company and Wm. H. Spencer treasurer.

Benjamin Hammond, Fishkill-on-Hudson, N. Y., was elected town auditor by a majority of 118 votes over his opponent.

The manufacturers of artificial flowers are reaching a perfection in their art hitherto undreamed of. A store recently opened on Broadway, between Twenty-seventh and Twenty-eighth street, which is devoted to the artificial flower business, has made up a window display that, to the casual observer, would

never be taken for anything but an exhibition of the real thing.

Twenty-eighth street has long been noted as the center of the universe for flowers and rag-time music. All the popular songs seem to come from this short block between Sixth avenue and Broadway, and facetious writers in the daily press christened this block the "tin pan alley" a long time ago. A very important addition has been made to the block within the last few days. The Volunteers of America, a branch of the Salvation Army, have secured a five-story building in the center of the block, and it would seem now that so far as attractions go the wholesale flower district is complete in every particular.

Among those who attended the Chicago show from this vicinity were F. H. Traendly, and Edward Roehrs.

Joseph Fenrich, wholesale florist at 110 West Twenty-eighth street, is again handing cigars to his friends. His wife presented him another boy (the second) last week.

The eagerness to procure orders for funeral flowers by some retail store men is leading them to adopt the plan of sending a nice box of flowers, with their card enclosed, to the homes of well-to-do people where a death in the family has occurred. This might be a refined form of crape chasing, but it is crape chasing nevertheless.

John Condon, the Brooklyn florist, is liberally advertising a chrysanthemum show which he is holding at his greenhouses on Fort Hamilton avenue. Mr. Condon's grower, Fred Wiltshire, is very successful with chrysanthemums; he always does them well, and a visit to the greenhouses at this season will well repay anyone who is interested in the Queen of Autumn. Chrysanthemum exhibitions are being held both in the Prospect Park greenhouses and the Central Park greenhouses. Many thousand plants are grown in each of these institutions.

Major Richard F. Butt, superintendent of Cypress Hills cemetery, Brooklyn, N. Y., died suddenly on Wednesday morning, November 13, 1907. Apoplexy was the cause of death. Deceased, who was a veteran of the Civil War, was greatly interested in military matters, and was Past Commander of U. S. Grant Post No. 327, G. A. R. He leaves a widow and one daughter.

Recent visitors in town were Mr. and Mrs. A. H. Whittle of Albany, N. Y., Elmer D. Smith, Adrian, Mich., and E. G. Hill, Richmond, Ind.

GROWERS OF CHRYSANTHEMUMS WHO HAVE MORE STOCK PLANTS THAN THEY NEED, WILL FIND A READY SALE FOR THEM BY PLACING AN ADVERTISEMENT IN THE FLORISTS' EXCHANGE.

WHY WE DELAYED

You may have a dim recollection that a week or so ago we promised to start off the first of November with the first number of a series of construction Ads. which were to tell you exactly all the vital details of our houses and show each detail by a good-sized illustration. No, we have not forgotten, nor gone to sleep, but the fact is, our construction expert at the factory recently got very wide awake and made some mighty interesting changes. We are bound to show you the very latest things, so it will probably take another week to get the illustrations ready. But don't you wait for our Ad. man; order your house now and it will have all the latest improvements just the same.

CARNATIONS

Excursion to Joliet, Ill.

A party consisting of forty well-known florists took in the Chicago Carnation Company's excursion to Joliet on Saturday, November 9. They found the carnations in first class condition in every house; as one party remarked, he "did not see even a single plant that did not look the picture of health." The twenty thousand Aristocrat in full bloom is a sight that will not be forgotten; it goes to show that this variety has come to stay, and we believe that florists in general will be able to do this variety as well as they ever did Mrs. T. W. Lawson in its time. Andrew Carnegie shows up in fine shape. Owing to the lateness in getting the stock from the originator, Mrs. Snow, few blooms were to be seen, but a heavy crop is just coming on and it could be easily seen from the few flowers showing color that Andrew Carnegie is a rich velvety scarlet, and anyone will, surely, be able to handle this variety, as its parent, Harlowarden, has always done well universally.

Here the pure white sport of Enchantress can be seen in heavy crop and shows up in grand style; not a trace of pink can be found in the entire stock of ten thousand plants that are blooming here. White Perfection looked very much like a snow hawk; it stands up straight with its large four-inch flowers and creates a favorable impression. Beacon has made a fine showing; although the color is not what we would call a good scarlet, still it is very pleasing, and with its large flowers and good stiff stems we believe it will hold its own for some time. Winsor as seen here has a fine stem; the plants show an enormous crop of buds coming on, proving that it is a wonderful bloomer. Rose Pink Enchantress is in excellent shape as is Enchantress. Welcome, of the same color as Winsor or Rose Pink Enchantress, bids fair to outclass many of the others in this color; it shows up to good advantage with a stem between those of Winsor and Rose Pink Enchantress, and the flower is all that one could desire. Day-break, Lawson, Victory, Lady Bonafant, White Lawson, Cardinal and other standard varieties and a great many promising seedlings make up the list of varieties that can be seen growing here.

Every one enjoyed the trip immensely and were pleased to find everything looking so well; every square foot of space seemed to be utilized and every house was a mass of bud and bloom, so that the plants will be in heavy crop for Thanksgiving and Christmas and throughout the season.

The party returned to Chicago in plenty of time to attend the banquet at the Auditorium in the evening.

The party was accompanied by A. T. Pyfer, manager, and Peter Olsem, superintendent of the Chicago Carnation Company, who are to be congratulated on having everything looking so well.

THE NEW DUNNING BOILER

The simplest, most easily cared for, most economical, most reliable and satisfactory,
that was ever made for use

IN GREENHOUSES.

With the "New Dunning" you can regulate
the heat in any part of the Greenhouse, and
keep an even temperature all through the
season, with perfect accuracy, and with the
least fuel and work.

It is made of fine steel (not cast iron) and
will never crack.

It has no packed, screwed or pushed con-
nections. All joints are plate to plate, with
hot driven rivets, and absolutely tight.

It has no tubes, horizontal or vertical. The
fire surfaces are vertical. No nooks or
crevices for soot.

Inside boiler surface perfectly smooth. No
lodgment of mud, sediment or scale.

Two fire-boxes, and thin water chamber
between them. Two shells, and thin water
chamber between them. Fire travels twice
the length of boiler, and is all used in heating
the water.

Water drains off to last drop.

The "New Dunning" burns hard coal, soft
coal or wood.

It lasts longer, and costs less to maintain,
and does better work, than any other boiler.

It is used by U. S. Government in many
departments.

Sash Sense

What do you know about cold frame sash made the right way? When you buy sash because they are "well made" is that all there is to know about them—isn't there a right way they should be constructed? Even if the workmanship is good, the sash may not be planned so as to be durable.

We will leave it to you if most growers are not inclined to regard their cold frame sash as sort of secondary affairs and although they are keen enough on the right thing for the greenhouse, let the sash question slide, and buy cheap ones simply because they seem cheap. Now, nothing around the place receives half the rough usage sash do—they have to be made solid as a rock or they don't stand the racket. A twisty sash breaks the glass; it will not lay tight and is all kinds of trouble to slide. You can test an L. & B. sash by taking hold of one corner, jamming it down on the opposite diagonal corner, and there will be no perceptible give. Or two strong men can get hold of opposite ends and try twisting them loose by racking the joints, with no better success. And it is not because they are great heavy things, but that they are made right, and actually weigh but 40 lbs. each. If you are interested, send at once for our Sash Circular and get special prices.

We make every part of a greenhouse but the glass. We sell any part.

Seed Trade Report

AMERICAN SEED TRADE ASSOCIATION

George S. Green, Chicago, Ill., president; M. H. Durvea, New York, first vice-president; F. W. Bolgiano, Washington, D. C., second vice-president; C. E. Kendel, Cleveland, O., secretary and treasurer; Leonard H. Vaughan, Chicago, assistant secretary.

NEW YORK.—Henry Nungesser & Company report all grass and clover seeds higher in price this season than usual, also that really high grade qualities are scarce.

Seed Trade Notes.

Early last week a couple of snowy days in some of the more Western and Northern States, with flurries and cold Fall rains throughout the East, seemed most plainly to give us notice that the end of both bulb planting and seed sowing is at hand, so far as outdoor operations for the closing season of 1907 are concerned. But a most welcome and money-making surprise awaited us, for after a few bad days the weather again turned into the most beautiful Indian Summer, with the result that the retail bulb trade in an over the counter way for cash has been the best of the whole season. Especially has this been true of the sales of the Boston, Philadelphia, and New York houses. So pleasant has the weather in New York become that several of the larger firms have started in again afresh to advertise hyacinths, tulips, and daffodils in the daily papers. Of course the wholesale jobbing bulb trade is about over; still a large number of filling in orders yet carry off daily large quantities. As regards prices at both wholesale and retail they have been well maintained all the season; but stocks, as a rule, have sold so well that it has not been deemed necessary to dispose of any bulbs as yet at sacrifice rates. In fact, on the whole very few bulbs are left.

During the week both Lily of the valley clumps and pips have come to hand, and all the advance orders for these have been filled. Prices for both items are very firmly maintained, and it certainly looks now as if an advance was much more probable than any lower quotations, as both Berlin and Hamburg pips are a shorter crop than the average. At present Berlin pips are most in demand, as florists want the bloom just as soon as it is possible to get it, even if not quite as large in size of flowers; but for later cutting and the largest spikes, the Hamburg pips always have a great run.

A word regarding the sale of Lily of the valley to our over the counter trade. Prevail upon all customers, wherever possible, to buy clumps, as they will return to them so much more satisfactory results than pips; but tell them to plant them wide apart in making the beds. At this writing either Berlin or Hamburg pips are worth in a large way \$9 to \$10 per thousand, and clumps \$15 per hundred.

The advance orders for seeds from the Southern trade have started already toward the larger wholesalers in quite a goodly number the last few days, and many inquiries are also being received for the lists of the preliminary wholesale rates for the coming season of 1908. But as regards this matter of prices I will postpone some thoughts and a few facts about it until next week.

Quite lately several inquiries have reached me asking for information regarding good, and what will prove salable seed novelties for next season. It

is always a very difficult matter to say what novelties in the way of seeds, bulbs, or plants will sell in large volume; but as a rule the great horticultural buying public give a very decided preference to so-called easy growers. I will illustrate my meaning by saying that sweet peas always sell in large quantities, and I am sure that the two new Burpee varieties, Primrose and White Spencer, will be no exception; it will not be necessary for me to say more regarding these Burpee sweet peas as they have already been fully advertised and described in these columns.

Another flower seed novelty that would seem destined to have a good run is the new gigantic orchid-flowering Cosmos Lady Lenox. This variety, I am sure, will sell, and for these reasons: In the first place, cosmos of late years has become very popular, in fact, it is extremely seldom that a mail order or over the counter request for even fifty cents' worth of seeds does not include a packet of cosmos, and a dollar order practically always does. Again, the Lady Lenox cosmos is of a color that will be very popular; its beautiful soft shell pink blooms, of the largest size yet attained in this flower, make a combination that will please your most exacting customers. I am speaking after having critically examined this cosmos at several shows where it was certainly a leading feature. As yet I have not seen it growing, but the introducer describes it as reaching a height of from six to seven feet, and growing very bushy and strong. Another good feature seems to me to be its great length of stem; you can cut them with strong stems up to four or five feet in length. As the introducer (Arthur T. Boddington) wishes the catalogue trade all to maintain a uniform rate, he has established the retail price at twenty-five cents per packet, or five packets for one dollar; and trusts that no seedsman will cut this rate. Lady Lenox has received already many prizes and first-class certificates of merit at the shows, where it has been exhibited both this Autumn and previously.

In the vegetable line, Livingston's new Coreless tomato will be a very prominent introduction the coming season. In shape this latest sort is of the Globe type, the new shape that is preferred by many growers to the old wrinkled and flat varieties; it is almost round, being about the same diameter each way. There is little or no depression at the stem end, making it very economical for all uses. It is most productive, clusters of six or more fruits being produced at close intervals all along the stems. In size this sort averages large, the individual tomatoes weighing twelve ounces or more each. Green core it is almost free from. Fine for slicing, the seed cells being surrounded by bright red, heavy, meaty and delicious flesh, which is slightly more acid than some varieties. Its color is a very brilliant and rich red. It is a good long-distance shipper on account of its superior solidity. The introducers truly claim that it ripens most evenly and all through, which is a sterling feature in a tomato. In season this tomato is a main crop variety; a strong and most luxuriant grower, and excessively productive. This candidate for popular favor will retail for twenty cents per packet of forty seeds, or three packets for fifty cents. Twenty cents has come to be an established introductory price of all the Livingston new tomatoes; you will remember that this was their retail rate when distributing Livingston's Hummer last year.

All the novelties that I have mentioned have already been sufficiently largely sold by their introducers in a wholesale way to insure their being catalogued most prominently in the leading seed books of 1908.

There do not seem to be as many seed novelties as usually offered for the coming season's sales, but what there are do certainly seem to possess exceptional merit.

And now I must bring this letter to an end, but I cannot without asking you to sit silently with me and for a few moments seriously and earnestly reflect upon the great and lasting good to the American seed trade for all time the splendid life work of our departed associate has accomplished. Dexter Mason Ferry of Detroit, Mich., had for over fifty years exemplified by works, what fearless honesty and unquestioned integrity will do for any business. He made the commission method of selling seeds in America a recognized legitimate and respectable part of the seed business.

Meyer, 277 cases lily of the valley pips; H. Frank Darrow, 538 packages seed; H. Nungesser & Company, 200 packages seed; A. H. Post & Company, 67 packages seed; Vaughan's Seed Store, 135 packages seed; Silva, Bussehus & Company, four bushels seed; United States Department of Agriculture, one box seed. November 15.—H. Frank Darrow, three cases lily of the valley pips, 70 cases lily of the valley pips, four cases live plants; McHutchinson & Company, 66 cases lily of the valley pips; J. Scheepers & Company, 20 cases lily of the valley pips; R. M. Ward & Company, eight cases lily of the valley pips. November 16 and 17.—A. Murphy & Company, 13 packages trees.

European Notes.

The order of the day from Dame Nature is *Festina lente* and her subjects have no choice but to obey and—grumble. In the meantime the steamship companies are making hay, rain or shine, and have raised their rates and in some cases curtailed their sailings without any reasonable justification. In a normal season complete shipments can rarely be made before the middle of December, while in an abnormal season like the present it is possible that the New Year may find orders still incomplete. In the face of these facts the action of the steamship companies in stopping Summer rates for goods shipped after November 12 instead of December 31 is a gross injustice.

As is customary the lines sailing to Philadelphia are the chief offenders and the arbitrary action of the Philadelphia Trans-Atlantic Line in raising rates without notice and allowing a three weeks' interval between the sailings must cause a good deal of heartburning on the part of those who have arranged for their shipments to be made by this service.

Referring to the remarks in last week's notes respecting lucerne (alfalfa) the price of this article has advanced more than \$1 per 100 pounds during the past seven days. Even at this advance holders do not care to sell. The great value of this plant for feeding ostriches has caused a considerably increased demand from Africa, so that there is no probability of the price falling. It is rumored that there is a fair supply of South American seed, but the almost invariable presence of wild melilotus deters any but the cheapest and most careless buyers.

As regards red clover, some good parcels of new Welsh seed have recently

ASTER Lady Roosevelt

The Accompanying Photo represents the type of our Special Improved Chrysanthemum Aster of Unsurpassed beauty. Its present state of perfection has been the result of six years' careful study.

THE INTRODUCTION of our Lady Roosevelt Aster, which has this past season been marketed at wholesale at \$1.00 per dozen net, being more than double the price an aster was ever before sold at, and the demand for them from a dozen or more large cities outside of Chicago was twenty-fold greater than we were able to supply demonstrates the fact that there is a very large demand for a far better class of asters than has heretofore been produced. Consequently, this special aster is destined to revolutionize the aster culture business. Having a limited quantity of this Lady Roosevelt Aster seed to spare we hereby offer same for sale, with our aster culture instructions which is set forth in our illustrated folder which will be sent upon application.

FLORISTS
Have a splendid opportunity of raising Mushrooms by utilizing the waste space under the benches, and then utilizing the waste material of expended mushroom beds in growing flowers. Now is the time to make your beds.

Lambert's Pure Culture, MUSHROOM SPAWN, the best Mushroom Spawn in the market, is sold by all leading seedsman. A fresh sample brick, enough for a small trial bed, together with large illustrated book on "MUSHROOM CULTURE," will be mailed postpaid on receipt of 40c in postage stamps. Address American Spawn Company, St. Paul, Minn.

been sold at prices nearly 50 per cent. above the retail prices four or five years ago.

Mustard and rape, on account of the high prices realized, still find their way to our markets in spite of the unfavorable weather, and nearly all are out of condition.

On the point of condition it is right to urge upon our friends to keep a watchful eye on all seeds arriving just now and to see that they are not packed too closely for the present.

EUROPEAN SEEDS.

WATKINS & SIMPSON'S 1908 NOVELTIES.—The following novelties for 1908 are listed by Watkins & Simpson, seedsmen, London, England.—Aster Mammoth Mauve Queen, color a rich pearl gray, nearly approaching that of Countess of Radnor sweet pea; Chrysanthemum coronarium Tom Thumb Primrose Gem, double flowers of a rich primrose color, adapted either for borders or pot culture; Godetia Dwarf Compact Crimson Glow, flowers of the most dazzling intense crimson; Nasturtium Queen of Tom Thumb, yellow spotted, flowers of yellow shades, beautifully blotched and stained, with silver variegated foliage; Nemesis hybrida Blue Gem and White Gem, the former of a beautiful myosotis blue, the latter pure white; Sunflower Starlight, flowers of a beautiful canary yellow, with long stems, fine for cutting purposes; Alyssum compactum Little Dorrit, an improvement on Little Gem, white flowers; Antirrhinum Tom Thumb Snowflake, a pure white selection of the true Tom Thumb habit; Calliopsis Tom Thumb Beauty, blooms a golden yellow, with crimson center; Chrysanthemum coronarium Tom Thumb Golden Gem, dwarf and compact, with double yellow flowers; Chrysanthemum inodorum Snowball, flowers large, double, pure white; Dianthus superbissimus Queen Alexandra, a very fine pure white variety; Dianthus superbissimus, a new strain, flowers of various colors, with crested surface to petals and white throated; Eschscholtzia erecta compacta Intus Rosea, beautiful rose color petals on the inside and outside being of same color; Marigold Dwarf French striped Grandiflora, Nasturtium Queen of Tom Thumb mixed, with variegated foliage; and Queen of Tom Thumb Scarlet, also with variegated leaves; Pyrethrum aureum excelsum, an improved strain of the Golden Feather; Wallflower, annual, Blood Red, sown in March can be had in bloom the following July; also four new annual varieties of wallflower—Golden Gem, pure yellow; Primrose Gem, light yellow; White Gem, cream white; Belvoir Castle, golden yellow, with dark bud. They also list several novelties and specialties in vegetables, together with new things in sweet peas. The firm's novelty and specialty list has been distributed; it is profusely illustrated, and will be found an interesting enumeration.

CATALOGUES RECEIVED.

HENRY NUNGESSER & COMPANY, New York.—Wholesale Price List of Grass and Clover Seed.

W. ATLEE BURPEE & COMPANY, Philadelphia, Pa.—Advance Wholesale Price List of Vegetable and Sweet Pea Seeds.

REED & KELLER, New York.—Illustrated Catalogue of Florists' Supplies. The immense proportions which this industry has assumed, so far as the firm named is concerned, is well exemplified by this beautiful catalogue, which comprises some 152 pages, contained in which is an enumeration of one would think, everything, that could possibly be required or is obtainable in this line of business. Many of the specialties pictured and described are of the firm's own designing, and have been manufactured to meet the demands of its extensive trade. Particularly comprehensive is the wire design department, and no less so those of the basket, metal, porcelain and bisque materials. Glass and wire decorative designs are likewise very numerous and exceedingly beautiful.

The firm of Reed & Keller was established in 1872, and the business has reached large dimensions; the entire building at 122 and the adjoining one at 120 West Twenty-fifth street, being now occupied by the concern for its purposes. The gratifying increase in trade which is being annually met with is the result of honorable and liberal business methods, combined with ability to turn out and supply what the trade calls for, and that of the best manufacture. The catalogue before us is a splendid testimonial to the firm's enterprise, and its general make-up and workmanship reflect great credit alike on the concern distributing it and on the printer who produced such a high-class document.

California Plant Notes.
 The beautiful vine *Thunbergia* Har-
 risii, or as some growers choose to call
 it grandiflora, which latter is, in the
 opinion of the writer, a more appropri-
 ate appellation because of the wonder-
 ful beauty of its large light blue flow-
 ers borne in great profusion during our
 rainy season from November to May,
 does best planted in a heavy clay soil
 in a Southern exposure. If during the
 Summer months it is kept on the dry
 side of cultivation, it seems to do bet-
 ter and make a more luxuriant growth
 during Winter. It is a rapid grower,
 and if well fed is furnished with very
 dark green elliptical foliage from the
 ground to the extreme end of the vine.
 The protection afforded by a building is
 sufficient to carry it safely through a
 night of three or four degrees of freez-
 ing. It is easily propagated, hence may
 be sold at a low price at a profit, and
 all residents of the coast section of Cal-
 ifornia south of San Francisco should
 give this magnificent vine a fair trial.

At the recent flower show two types of
 red bougainvillea were on exhibition, one
 a bright fiery red, the flowers very large,
 closely set on terminal umbels; the
 other with smaller blooms produced in
 the axils of the leaves on peduncles two
 inches long on short pedicels. The for-
 mer is the more attractive of the two.
 It would be interesting to know the his-
 tory of these two types of this much
 sought after climber, which has not yet
 been produced in sufficient quantities to
 supply the demand, though the price has
 been steadily maintained at \$5 for spec-
 imens 20 to 24 inches high.

Plumeria tricolor is a plant that is
 not difficult to grow, and should be in
 every collection of plants in Southern
 California at least. A muslin covered
 frame is sufficient protection to bring
 it through our mild Winters and guard
 it against our arid Summer climate. The
 delightfully fragrant flowers are borne in
 umbels of 6 or 8 on short pedicels. In
 bud they are a beautiful pink color;
 when open, pure white, with a shade of
 cream, and are about an inch in dia-
 meter. The pink shade remains on the
 edge of the petals, and the tube re-
 maining the same color gives the cluster
 of bloom a pretty appearance. They last
 in perfection for weeks. The plant is a
 denuded one; the leaves are sparingly
 produced on the ends of the branches.
 Because of this lack of foliage the thick
 stemmed shrub is not an attractive one.

NURSERY DEPARTMENT.

Conducted by Joseph Meehan.

AMERICAN ASSOCIATION OF NURSERYMEN.

J. W. Hill, Des Moines, Ia., president; C. M. Hobbs, Bridgeport, Ind., vice-president; George C. Seager, Rochester, N. Y., secretary; C. L. Yates, Rochester, N. Y., treasurer.

A NORTH CAROLINA NURSERY PLANT.—A recent issue of the News and Observer devotes considerable space to an illustrated history of the development of the Pomona Nurseries of J. Van Lindley. These nurseries were established in 1866 and incorporated in 1899, and comprise 1,000 acres of land. For the 1907-8 trade there are being cultivated 400,000 peaches, 400,000 apples, 50,000 pears, 50,000 plums, 100,000 grape vines, besides 200,000 assorted trees, vines, plants, roses, etc. Thirty-five thousand feet of glass are devoted to the cultivation of plants for cut flower purposes.

J. Van Lindley, who is now 68 years of age, belongs to an old Southern family of English ancestry, one branch of which claims the botanist and horticulturist, John Lindley. The family first settled in North Carolina in 1748. J. Van Lindley was born in Monrovia, Morgan County, Pa., his parents going to the present location when the boy was three years of age. His father, Joshua Lindley, was a well-known fruit grower and nurseryman, and the son received his early training on the establishment. When the Civil War broke out, Mr. Lindley joined the Northern forces, serving with the regular cavalry of Missouri. At the close of hostilities he returned home, re-established the firm of John Lindley & Son, in 1866, and carried on the business as the New Garden Nursery. In 1877 Mr. Lindley became sole proprietor of the Pomona Nurseries, which under his able management have developed to their present extensive dimensions.

COLUMBIA, O.—C. W. Mally, who during the past year has served as chief orchard and nursery inspector for the Ohio State Board of Agriculture, has resigned that position and will go to South Africa on scientific work for the British Government, he having been in the employ of that government for several years in that country. In preparation for this he will go to the Pacific Coast where he will make a collection of insects which will be of especial value to the horticultural interests in his new field. B.

Flowering Moss. *Pyxidanthera*.

When Winter is retreating and the Spring flowers from the Southern States are appearing in the hands of those returning from the South, one of the plants that always interests and pleases is the "pyxie," *Pyxidanthera barbulata*, the flowering moss. It is a beautiful trailing or low-growing evergreen, not unlike the moss pink, *Phlox subulata*, in appearance, and forms a mat of green close to the ground. It is found in the pine barrens of the South, and in New Jersey in similar situations as well as in other sandy places there. Its pretty, white flowers come very early in Spring, and many persons from nearly more Northern States journey into New Jersey at the proper season to get a bunch of flowers and a plant or two for potting.

The plants rarely succeed outside the hands of expert florists. It is difficult to get enough roots to maintain the top, the sandy soil not holding together when digging the plants. Florists succeed with it by treating the dug up plants as cuttings, potting them in light sandy soil when well rooted, and in Winter keeping them in a cool house or frame near the glass where light and air are abundant.

Rhododendron Catawbiense.

Our rhododendrons, laurels and azaleas have made our country famous among the horticulturists of Europe, and have formed the basis of the "American Plant Department" of nurseries and private grounds there. Not the least in merit is the *Rhododendron catawbiense*, the one used more than any other of our species in the production of hybrid seedlings. Many of the hardiest and best of the named hybrids of to-day owe their hardy nature to the *catawbiense* part of their parentage. The plant inhabits the summits of the highest mountains in North Carolina, extending to some extent into Virginia. In some respects it is preferred to the other well-known native sort, maximum, because of its flowering earlier, when all rhododendrons are in bloom, the maximum not flowering until July. Again, the *catawbiense* has pretty, large pink flowers and shorter and broader leaves, and flowering before the plant begins to grow, the flower heads stand out boldly above the foliage.

Both this and maximum are most desirable for planting in masses on properties, their handsome evergreen character adding so much to the charm of a place; and they do so well when in the shade of trees that on many estates open woods have been planted with them. As aforesaid, *R. maximum* blooms in July, not until the young shoots have made some headway, and this rather detracts from a good display of the heads of flowers;

but then there is to be considered that all other rhododendrons have done flowering when this one commences.

Destroying the Codlin Moth.

A correspondent in California writing of the beauty of the golden oak, *Quercus chrysolepis*, has this to say of worm-eaten acorns and an anticipated remedy for the evil: "Worms have eaten all acorns again this year. The horticultural commission have and will provide orchardists with an insect, *calcephantes*, which feeds upon the larvae of the codlin moth. We find them doing good work among the apples, and as these worms among the oaks resemble closely these apple worms, I am in hopes the new insect will be able, in the course of time, to help us with our acorns."

This will be interesting news to both the nurseryman and the fruit grower. Nurserymen already experience difficulty in collecting sound acorns, and as to apples, between the codlin moth and the San José scale, this fruit is becoming scarce and high priced.

If this insect proves satisfactory on the Pacific Coast and our climate would suit it, it would be a Godsend to us to have it.

Hardiness of English Ivy.

Time was when an erroneous impression prevailed herabouts that English ivy was not hardy, but that opinion is no longer entertained; there are too many

Blooms of *Rhododendron Catawbiense* Var.

Photo by J. R. Johnston

flourishing plants running up walls of houses and to be seen in all sorts of positions to permit of anyone doubting this ivy's hardiness. So far as Philadelphia is concerned, the plant may be considered hardy in any situation, from a trailing one on the ground to the covering of a wall, but, like many other evergreens, the best color of its foliage is maintained when it is in the shade. It is a treat to see how well it answers the use for covering graves. Our florists sell a large number of plants for this purpose, and after a year or two's growth there is a sheet of dense, bright green leaves, and no protection is really needed when the plant is used in this way. When in the full sun in Winter the leaves will lose their bright green hue of Autumn, but new growth in Spring quickly takes its place. If one wished to preserve the intense green color of Autumn the graves could be covered with forest leaves, but, as the plants when not covered are not injured any more than the loss of color to some extent, very few cover them.

There are many houses in this vicinity with their walls covered with ivy from ground to the roof, lots of low walls likewise, and, in fact, for all purposes we deem the English ivy a hardy plant.

Florists who grow it should feed the ivy well. In rich soil the leaves are large and of a shiny green and the growth very strong and rapid. When in pots, if there is room under a greenhouse stage for them, it is a good place. The moisture and the shade suit the plants; and growth is made there too, which is not the case when they are in a cold frame or in any other cold place. But florists and nurserymen find the English ivy among the most salable stock they have.

Viburnum Plicatum for Forcing.

Time was when the lilac was considered the shrub of shrubs, and a deal of affection exists for it to-day; but if one were called on to name the popular shrub of the present the choice would be between the *Viburnum plicatum* and *Hydrangea paniculata grandiflora*, and these two well deserve the consideration. With florists, the *viburnum* leads when it is a matter of forcing them for flowering, but when for outdoor work it is more nearly a tie as to which is the favorite. The *viburnum* comes in nicely for Memorial Day uses, the

hydrangea for all sorts of floral uses in late Summer, when white flowers are scarce.

Just now, considering the plants to secure for forcing for Easter and before, the *Viburnum plicatum* almost heads the list in some establishments; it sells so well as a pot plant, and its hardy character admits of its planting out when its use indoors is over.

Plants grown in pots a year in advance are the best to force, but where such cannot be had those freshly dug will answer if care be taken to secure all the roots they have. It is better to pot them at once and set them in a cool shed, just above freezing, where they will become well settled before the time comes to place them in heat. No pruning should be done now, or, at least, but little, as it is the shoots made the past season that give the flowers this year.

It seems hardly to matter how small a plant be, for it will bloom if it has a young shoot to it. Little plants of not over a foot in height will often be seen with a dozen flowers on them.

When wanted for Memorial Day, the plants should be placed in moderate heat about the 15th of April. About the same date in May a higher temperature can be given, according to the stage of growth of the plants.

JOSEPH MEEHAN.

A Grand Bedding Rose.

Editor Florists' Exchange:

We have given the new pink Baby Rambler rose, *Amny Müller*, a thorough trial the past unfavorable season, and as a bedding rose we are well pleased with it. We think it surpasses about all other varieties we are acquainted with for this purpose. The past season here was not a successful one, owing to the dry weather at planting time which continued the entire season, the few showers we had merely wetting the surface, quickly evaporating when the sun came out.

We made our first planting of this variety, also the White Baby Rambler, out of pots June 5, and again on June 20. The soil was too dry to encourage us, but we hoped to get rain soon, and were kept disappointed, as it did not come in sufficient quantity to do much good. The young plants, however, began gradually to make a start, and, of course, with the new growths they began to flower nicely, which they kept up the entire season. It was only after the good rain of September 28 that they began to show, in earnest, what they could do, throwing up stout shoots which were covered with great clusters of their attractive flowers, these same flowering shoots producing a second, and third shoot covered with flowers also.

Its behavior in the house did not give us as high an opinion of it as we have now; but as soon as it was planted outdoors, it began to make amends that were satisfactory. Its bright pink color is enchanting, and its flowers, which are very persistent, are borne in prodigious numbers, more so, we think, than in any other variety we have yet grown, and we have been growing roses many years.

We are speaking soberly of it, but do not mean, Mr. Editor, to go into rhapsodies over it as we might do; but we think that on September 10 we had more flowers on our 5,000 plants growing in our nurseries (barring this and Baby Rambler), than could be found on all the rose plants growing in the State of New York put together at that time. This is a bold assertion to make, but the circumstance warrants it.

We have had killing frosts here, which have affected roses as well as other plants. We are, however, mailing you a few flowering shoots to show the variety's blooming qualities, the plants being yet covered with blooms. Our friends in Holland were very enthusiastic over its transcendent qualities, of which we were at first somewhat sceptical, but not so now; we agree with all Mr. Elbinge has said about it, and we conclude by saying, it is a magnificent bedding variety, unequalled in its color and very persistent in holding its flowers. It has attracted more attention from passers-by in the street than anything else we have grown for a long time.

JOHN CHARLTON & SONS.

Rochester, N. Y.

[The shoots came duly to hand, bearing heavy clusters of flowers half open and in tight bud. The color is a bright rose pink, the blooms measuring from 1½ to 2 inches; the foliage is small and bathery, and should be quite free from mildew. Considering the date, the number of blossoms demonstrate that the variety is one of the most floriferous roses of its class. The flowers are double and of heavy substance.—Ed. F. E.]

Our English exchanges to hand this week record the death of John Asbee, who had been superintendent of Covent Garden market, London, for the past quarter of a century. He was 68 years of age.

FALL SPECIALTIES

We have large blocks of the following plants, valuable to every florist:

CANTERBURY BELLS. (*Campanula Media*)—Grand for Winter and Spring flowering in pots. Strong, field grown plants in Blue, Rose or White—\$5.00 per 100.

BOUGAINVILLEA GLABRA SANDERIANA. One of the grandest market plants, much in demand again. Compact, well trained specimens, sure to bloom, 4 inch pots, \$2.75 per doz., \$20.00 per 100. 5 inch pots, \$3.50 per doz.

CELESTIAL PEPPERS. 4 inch pot-plants full of young fruit. \$8.00 per 100.

ASPARAGUS PLUMOSUS. 2 1/2 inch at \$3.00 per 100.

ASPARAGUS SPRENGERI. 2 1/2 inch at \$2.50 per 100.

BOSTON FERN. 2 1/2 inch, strong, \$1.00 per 100. \$30.00 per 1000.

SHASTA DAISIES. Field-grown, named varieties, mixed, at \$5.00 per 100.

HARDY PINKS. Field-grown in variety, \$5.00 per 100.

GENISTA RACEMOSA. Strong 1 inch pots, \$15.00 per 100, 5 inch \$20.00 per 100.

PEONIES. Send for special Peony circular, if interested.

AZALEA INDICA. Best market varieties only. No assorted case lots. Let us know your wants.

FERNs for dishes, fine little plants of good varieties, \$2.50 per 100.

BOSTON FERNS. 5 in. pot, \$35.00 per 100, 6 in. pot \$50.00 per 100.

NEPHROLEPSIS ELEGANTISSIMA and WHITMANI. Fine short stock, 6 in. pots, at \$50.00 per 100, 6 in. pots at \$75.00 per 100.

Send for catalogue No. 6, describing full list of Florists' Bulbs, Seeds, Plants, Etc.

THE STORRS & HARRISON CO., Painesville, Ohio

SPECIAL

Mr. Advertiser:

Our Christmas
Number will be
issued December 14

¶ To those who desire to reach buyers of holiday necessities, whether of plants, flowers, evergreens, supplies or any other commodity connected with the trade, the securing of advertising space in that issue will accomplish the desired end.

¶ OUR CHRISTMAS NUMBER presents an excellent opportunity for clearing out not only surplus stock, but everything else that a florist uses in his business.

¶ The money spent for advertising at this time is not an investment; it is an actual purchase of holiday customers.

¶ Send your advertising copy early; we can receive until Wednesday noon, December 11. The earlier it reaches us, however, the better our opportunity to make a good display of it.

Florists' Club Meeting.

Special effort was made by the officers of the club to have a large attendance present to welcome the visitors who were here attending the flower show, and half of the membership came out. President W. C. Young, who is making great efforts to double the membership during his term, welcomed the visitors.

Henry Juenemann was elected, and A. S. Halsted and Chas. Joban made application for membership. The question box contained a number of important queries; quite a discussion followed the one on "How to Advertise and Run a Financial Flower Show." This will again come up at the December meeting. After calling upon a number of visitors, the party adjourned to the café downstairs and forty members, including our visitors, sat down to a turkey lunch and liquid refreshments. After the cigars were passed around, Toastmaster Young called on the visitors for a talk. Those called upon were W. W. Coles, Kokomo, Ind.; Phil. J. Hauswirth and George Asmus, Chicago; S. S. Skidelsky and J. J. Karins, Philadelphia; Herbert Heller, New Castle, Ind.; A. F. Longren, Des Plaines, Ill.; J. F. Ammann, Edwardsville, Ill., and A. S. Halsted, Belleville, Ill. Among the local members who spoke were Emil Schray, Treasurer F. H. Weber, Secretary A. J. Rentzen and President W. C. Young. All talked on present, past and future flower shows. The next meeting of the club in December will be a social affair with moving pictures pertaining to our trade by G. H. Pring of the Missouri Botanical Garden.

News Notes.

The members of the St. Louis Horticultural Society tendered a banquet to the visiting florists upstairs in the hall in which the show was held. F. W. Borkman was toastmaster, and he called upon the visitors for speeches. Those who attended were James S. Wilson, Phil. J. Hauswirth, L. Kill and August Poehlmann, Chicago; W. W. Coles, Kokomo, Ind.; E. H. Mann, Richmond, Ind.; H. W. Buckbee, Rockford, Ind.; W. A. Manda, S. S. Skidelsky, Philadelphia; J. J. Karins, Riverton, N. J.; A. F. Longren, Des Plaines, Ill., and A. T. Pyfer, Joliet, Ill. Among the local florists who were called upon for a few remarks were Harry Young, O. G. Koenig, Fred. H. Meinhardt and H. Meyer, Sr. The affair passed off with good feeling and was enjoyed by all. The local lady florists entertained the

visiting ladies to a theater party on Wednesday night, which was greatly enjoyed. The play was quite in calling with the visit—"The Orchid." Those in the party were Mrs. M. S. Vesey, Fort Wayne, Ind.; Mrs. J. A. Peterson, Cincinnati, O.; Mrs. Leonard Kill, Chicago, Ill.; Mrs. J. S. Wilson, Western Springs, Ill. Those of St. Louis were Mrs. Theo. Miller, Mrs. E. C. Weber, Mrs. J. J. Bencke, Mrs. H. G. Berning, Mrs. John Steidle, Mrs. E. Rotenhofer, Misses Tillie, Lena and Maggie Meinhardt. After the theater Mr. and Mrs. Kill of Chicago entertained a party of friends at the Jefferson Hotel at supper.

Visitors to the flower show held here the past week were greatly impressed with the exhibits of the St. Louis Seed Company, F. C. Weber, A. G. Greiner and F. H. Weber. All these were in a special class. There were quite a few rose, carnation and chrysanthemum growers present, who enjoyed the new varieties on exhibition. The new roses on display were Rhea Reid by E. G. Hill Company; W. R. Smith by Heller Brothers; Princess by Hill; Mrs. Marshall Field by Reinberg, also the Cardinal. Among the new carnations were Orland P. Bassett by Bassett & Washburn; Snowdrift by Witterstaetter; Sarah A. Hill by B. K. & B. Floral Company. In chrysanthemums were Golden Eagle by the Chicago Carnation Company; Fidelity and Metcalfe's Sadie May Stremler.

J. Gallagher of the Gallagher Floral Company has sold his entire interest to James W. Dunford of Clayton, Mo., who will continue the business. Mrs. T. Osetertag will be in charge of the place.

The branch store operated by the Eggleston Floral Company on King's Highway and Delmar has been sold to Kelley & Petschonek. Both of these gentlemen were in the employ of the Eggleston Floral Company, have a full knowledge of the business and should do well.

Robert F. Tesson and his bride left last week for a trip to Jacksonville, Fla., and will return January 1 to be at home to their friends at Sunny Point, Forest Park.

ST. PATRICK.

THE FLORISTS' EXCHANGE

Forcing Ramblers and Hybrid Roses for Immediate Shipment

The right time to buy roses is when they are fresh and well ripened. Roses potted up in the fall or the winter become better established and force better, and are far more satisfactory in every way, and you can retard and force at your leisure. We recommend American-grown "Ramblers." Don't attempt to force imported Ramblers; the general experience is that they are a failure.

We offer exceptionally strong two-year-old dormant, low-budded stock (on Manetti), in the following varieties true to name:

Prices: 65c. for bundle 6, \$12 per 100, \$110 per 1,000. 25 at 100 rate, 250 at 1000 rate.

ANNE DE DIESBACH. Bright carmine.

BALL OF SNOW. Pure white.

BARON DE BONSTETTIN. Dark crimson shaded.

BARONESS ROTHSCHILD. Satiny pink; extra.

CAPTAIN CHRISTY. Delicate flesh-color.

DUKE OF EDINBURGH. Bright vermillion; fine.

FISHER HOLMES. Dark rich scarlet.

FRAU KARL DRUSCHKI. The finest white in existence.

GENERAL JACQUEMINOT. Rich velvety crimson.

GENERAL WASHINGTON. Beautiful red, shaded carmine.

JOHN HOPPER. Beautiful rose pink.

LA FRANCE. The finest light pink.

MARGARET DICKSON. White, pale flesh center.

MAGNA CHARTA. Clear rosy pink.

MME. GABRIEL LUIZET. Light, satiny pink.

MME. PLANTIER. White.

MRS. JOHN LAING. Soft pink; most desirable variety.

PAUL NEYRON. Beautiful dark pink.

PRINCE CAMILLE DE ROHAN. Velvety crimson.

ULRICH BRUNNER. Cherry-red.

AMERICAN GROWN CRIMSON RAMBLERS

The only stock for forcing.

Large plants, 2 to 3 feet, \$1.25 for 10, \$12.00 per 100.

Large heavy plants, two years old, 3 to 5 feet, \$1.75 for 10, \$15 per 100.

Extra heavy plants, 4 to 6 feet, \$2.00 for 10, \$18.00 per 100.

THE BABY RAMBLER

MME. NORBERT LEVAVASSEUR. Strong field-grown plants, \$1.25 for 10, \$12.00 per 100.

THE NEW BABY RAMBLER ROSE

CATHERINE ZEIMET. A very important novelty. A white Baby Rambler rose, larger and better flowers than the type. White with yellowish center. An important fact is that it has the true rose perfume in a high degree. One of the best polyantha types to date, fine forcer. 50c. each, \$5 per doz., \$40 per 100. Extra heavy 75c. each, \$7.50 per doz., \$60 per 100.

THE TREE BABY RAMBLER

Grown as a standard.

The popularity of the Baby Rambler has suggested the growing of it as a tree or standard. The variety is too well known for description; enough to say, it retains all its characteristics of free blooming qualities, etc. 35c. each, \$3.50 per doz., \$25 per 100.

DEUTZIA

GRACILIS. Pot-grown for forcing, \$2 per doz., \$15 per 100.

LEMOINEL. Pot-grown for forcing, \$2.50 per doz., \$18 per 100.

Arthur T. Boddington, Seedsman
342 West 14th St., New York City

NEW BABY DOROTHY ROSE

The greatest pot rose for florists extant. A superb forcing variety. We have proved it. Color a deep pink. Price, \$3.50 per 10; \$30.00 per 100.
WHITE BABY RAMBLER (Catherine Zeimet), with double white perfect flowers; fragrant; a good forcer, \$3.50 per 10; \$30.00 per 100.
PINK BABY RAMBLER (Anny Muller), a perfect bedding rose; as such there is nothing to equal it. Its color is charming. \$3.00 per 10; \$25.00 per 100. Above all in field-grown plants.

JOHN CHARLTON & SONS, University Ave. Nurseries, Rochester, N. Y.

GRAFTED ROSES

From 3 in. pots

RICHMOND \$2.60 per doz.;
LA FRANCE \$16.00 per 100.
KILLARNEY }
JOE HILL } \$3.00 per doz.;
KAISERIN } \$18.00 per 100.
PRES. CARNOT }

BRIDES, BRIDESMAIDS, and GOLDEN GATE, \$2.00 per doz.; \$16.00 per 100.

Asparagus

SPRENGER, 2 1/2 in. pots, \$3.00 per 100
" 3 in. pots, 6.00

ENGLISH IVY, from 3 1/4 in. pots, \$2.00 per 100.

Carnations

THE WEEK'S WORK

Timme's Timely Teachings

Poinsettias.

Of all the kinds of stock especially grown for Christmas none stands in greater need of close attention just now than the poinsettia. Under careful treatment the poinsettia becomes the brightest and most profitable of holiday subjects; any sort of serious neglect results in the making of a thing that which there is none half so shabby in appearance or coming nearer to being practically worthless. The truth of this has been demonstrated pretty convincingly in late seasons; the lessons taught poinsettia growers last Christmas in particular are not likely to be soon forgotten.

The great amount of unsightly rubbish in this line of holiday plants, intended to be worked off in all manner of ways, as compared with what may justly be regarded excellent stock, should not furnish a reason for believing that poinsettias are particularly hard to grow. But the fact stands that they more than most plants resent heedlessness or inattention. Somewhat more than ordinary caretaking in these days of diminishing sunlight and spasmodic weather conditions is all there is in what is commonly termed good culture. Insufficient nourishment, frequent shifting or anything interrupting or merely interfering with steadily progressing root action, is promptly followed by a loss of leaves or by their turning from green to yellow, which amounts to the same. Allowing the soil to dry out occasionally or to become soggy and eventually sour come under the head of interfering causes and have the same effect; and too high as well as too low a temperature indirectly contribute toward making matters worse.

Single specimens in large-sized, well-drained pots, now but sparingly raised or called for, give little trouble to the grower, least of all the bench grown poinsettias intended for cutting. These latter may be brought to perfection in a temperature not higher than 58 or 60 degrees, steadily held until the bracts are fully developed and then slowly lowered to about 52. A product with firm texture and not likely to wilt right after being cut is the result not to be obtained in a house much warmer. Feeding with liquid is not necessary if the bench soil is a liberally enriched compost; a mulch of two inches, using the same kind of compost, will do more good. When a fine grade of cut poinsettias is to be the issue, luxuriant growth, long stems and large bracts are considered points that count, then bench treatment gives best results.

But these attributes essentially of value in the cut product are not exactly what constitutes high quality in poinsettias as now so largely grown for effective plant arrangements in all sorts of receptacles. Here unusual vigor and great length of branches would hardly render them the most serviceable stock for the purpose for which such stock is now mainly raised, and great size of bracts does not enhance beauty or materially increase their value as filling material. Healthy, deep green foliage with not a leaf missing from base to crown, spotless, brightly colored bracts and sturdy, short-jointed growth is the sum total of good points to be looked for in this the most useful of holiday stock—a degree of excellence easy to attain but hard to hold. Plenty of water without overdoing in this particular, liquid feeding twice a week, the destruction of every mealy bug as soon as discovered, all the light possible and an even temperature of 65 degrees will keep this sort of stock in presentable condition.

Begonia Gloire de Lorraine.

find, when comparing net returns, that Begonia Gloire de Lorraine is not the most profitable, nor yet the easiest to handle either in its raising or in its preparation for delivery or shipment when finally disposed of. It is a frail gem of the hothouse and emphatically protests against any kind of hardening off, will invariably lose its sheen of fine appearance in the process, but none of its fragility. This, therefore, must not be attempted at any time, especially not when the plants are expanding their blossoms. So also would, at that time, tobacco fumigation or overhead sprinkling prove most injurious. A light shading, on the other hand, is a means of keeping the flowering plants in perfect condition for a considerable length of time without having recourse to any perceptible lowering of temperature. In a house proof against a cooling down to anything below 60 degrees at night or not likely to run up to much over 70 degrees under the influence of sunlight, unless excessive ventilation is resorted to, it is never difficult to bring this begonia to a perfect finish, when afforded the necessary room on benches not far from the glass and when properly taken care of as to watering, cleanliness, staking and tying.

Though this begonia is, in no sense, a cheap plant, it has never failed to prove its great value. Aside from its incomparable beauty, it shows a number of good points in its favor possessed by no other Winter-flowering plant. It can be grown in comparatively small and shallow pots or pans, can be used in all sizes, is effective wherever put, fine as a single specimen as well as a companion plant in any and all made-up arrangements and the best material for the filling of baskets.

Azaleas.

Not many more than about a half dozen of the many varieties to be found in Chinese azaleas can with any degree of certainty be forced into bloom for Christmas, and of these the very earliest and easiest are white, but are closely followed by the brightest of colored varieties, such as Simon Mardner, Firefly and a little later by Vervaneana, Apollo and Mme. Van der Cruyssen. It is nothing unusual, though, especially when the stock has been obtained at different times or from several sources of supply, to see some of the earliest sorts hang back and be overtaken by some one or other of those requiring a much longer period or higher temperature to be forced into bloom. All of these early flowering azaleas, planted when received and stood in a light and cool house at first, should now be given the maximum degree of heat employed in the forcing of early azaleas, which is from 55 to 65 degrees, according to headway so far made or the time when put into heat. Several times a day they should be sprinkled overhead, and it is well to direct the stream from syringe or hose from below up through the branches occasionally. If the planting was done properly and some provision made for effectual drainage, there will be little danger from ever souring the soil by too much moisture in the pots during the short term of actual forcing. It more often happens that in watering the outer shell of new soil, this may receive enough and plenty while the old ball of roots is kept on starvation allowances. Such a state of things is disastrous to any plant, especially when a fast progressing crown growth must depend on proper root action for perfect development. If there is any ground for suspicion on this score, it is best to stand the plant up to the rim of the pot in a tub of water and leave it there until air bubbles cease to rise, which will be about for two or three minutes.

In potting up the later kinds of azaleas, not yet too late if wanted for Easter, the grower, after having trimmed down the ball of roots to a convenient size for the pots to be used, should always make sure, by having it well soaked by dipping into water, that none of the inner roots remain dry when put into the new soil. This should be rammed down firmly all around the sides of the pot so as not to allow the water to run through too freely. These azaleas until six or seven weeks before Easter or the time when wanted in bloom had better be placed in one of the coolest houses, not depriving them of either light or air, but shielding them from frost and keeping the soil moderately moist. This intermediate keeping place is not a better but a safer one than outdoor frames, no matter how

carefully watched, as many a grower has found out to his cost. Gradually subjected to greater heat until the highest point deemed right for forcing is reached, the plants will then require the same treatment as those now under forcing. In the lengthening days and increasing sunlight of early Spring the late varieties may oftentimes be brought into bloom without fire heat, except during cold nights. Those not driven too fast in artificial heat will invariably prove the finest plants and their bloom will last longest. Forcing in about 55 degrees of heat takes, according to variety, from five to six weeks.

FRED. W. TIMME.

PREPARE FOR
THANKSGIVING
and the Holidays

Watch Prosperity Look

Election is now over. Money stringencies are of the past, the country settled and the outlook is good. The wise florist knows that a dollar invested in a good stock of plants is safe and brings more returns than one hundred dollars invested in banks, which are unsafe.

Great prosperity is in sight. Everybody wants to invest their money. Why not you? Don't consider long. A little fortune lies before your door. Grab it quick while the market is low and while there is a chance for you. Waiting means suicide.

LOOK!

We have Araucarias to beat the hand. Why? Because we are specialists in importing, growing and shipping Araucaria excelsa, robusta, compacta and glauca for the last fifteen years from the Atlantic to the Pacific ocean, Cuba, Canada and Mexico. Our Araucarias go and are well known everywhere. Where do you think you will buy them for the holidays? From a man who imports a few hundred, or from a specialist who imports them yearly in numbers of 10,000? Surely from a man who can give you bargains.

FIFTY CASES of plants just arrived per steamer Manitau from Belgium, October 27. Amongst them are several thousand Araucaria excelsa in smaller sizes, fine bushy little plants, which we offer at a bargain. 3 tiers, 5 in. pots, only 40c.

Last Spring's Importation
ARAUCARIA EXCELSA, 3 year old, 5 1/2 to 6 1/2 in. pots, 10-12-14 in. high, 3 tiers, 60c.

ARAUCARIA EXCELSA, 3 year old, 6 1/2 in. pots, 15-16-17 in. high, 3-4 tiers, 60c.

ARAUCARIA EXCELSA, 4 year old, 6 in. pots, 20-22 in. high, 4-5 tiers, 75c.

ARAUCARIA EXCELSA, 5 year old, 6 in. pots, 22-26 in. high, 5 tiers, \$1.00.

ARAUCARIA EXCELSA, Specimen plants, 6-7 in. pots, \$1.25-\$1.50 each.

ARAUCARIA EXCELSA GLAUCA.

This variety, on account of its beautiful bluish foliage, dwarf habit and fine compact shape gives it a striking appearance. Anybody seeing them must undoubtedly fall in love with them at sight. They are all in the finest shape you ever saw. 4 year old, 6 in. pots, 16 in. high, same in width, 3-4 tiers, \$1.25. 4 year old, 6 in. pots, 17 to 23 in. high, same in width, 4 tiers, \$1.50 to \$1.75. 5 year old, 7 in. pots, 25-30 in. high, same in width, 4 tiers, \$2.00. 5 year old, 7 in. pots, 30 to 36 in. high, same in width, 4 tiers, \$2.50. 5 year old, 7-8 in. specimen plants, \$3.00-\$4.00.

ARAUCARIA ROBUSTA COMPACTA.

This is the King of the Araucaria Family. It is of a beautiful green, fine in shape (width), compact habit, and highly admired by everyone. I have a house full of them; can meet all wants. 4 year old, 6 in. pots, 22-25 in. high, same in width, 4 tiers, \$1.50-\$1.75. 4 year old, 6-7 in. pots, 25-30 in. high, same in width, 4 tiers, \$2.00-\$2.50. 6 year old, 7 in. pots, 30 in. and above, 4-5 tiers, specimen plants, \$3.00-\$3.50.

LANTANA Borbonica, 25c. each.

KENTIA Forsteriana and Belmoreana, 6 in. pots, 5 to 6 leaves, about 25 inches high \$1.00. 5 1/2 and 6 in. pots, 5 leaves, 20 to 25 inches high 75c. 5 to 5 1/2 in. pots, 5 to 6 leaves, strong bushy plants, 50c. to 60c. 4 in. 18 to 20 inches high 35c. each.

COCOS Weddelliana, 3 in. pots, 10-12-16 in. high, 15c.

ARECA Lutescens, 4 in. pots made up, three plants in a pot, 18-20-22 inch high 20c. each.

FICUS ELASTICA or RUBBER PLANTS, home grown and Belgium stock, 5-6 1/2 to 6 in. pots, 25c.-35c.-40c.-50c. and 60c. each; 7 in. pots, 75c.; 8 in. pots, \$1.25 to \$1.50.

FERNS Boston, 4 in. 20c., 5 in. 35c., 6 in. 50c. each, 7 in. 75c. to \$1.00 each. Elegantissima, 4 in. 25c., 6 in. 50c. each; 7 in. pots, 75c.; 8 in. pots, \$1.25 to \$1.50.

Whitmanni, 6 in. single plants, strong, 50c., 75c., \$1.00 each; 7 in. as big as a bushel basket, made up 3 plants in a pot, \$1.25 to \$1.50 each.

Pteroni 4 in. 20c. to 25c., 6 in. 50c. each.

Scotth, 4 in. 20c. to 25c., 6 in. 50c., 8 and 6 1/2 in. 35c. and 40c., 7 in. very heavy 75c. to \$1.00 each.

Ferns for Dishes. A large assortment in 2 1/2 in. pots, \$5.00 per 100.

ADIANTUM Hybridum, the best adiantum for cut purposes, large plants in 6 in. pots, 30c., 35c. and 40c. each.

ASPARAGUS plumeus anons, 3 in. pots, \$6.00 to \$7.00 per 100; 4 in. \$10.00 per 100; all bushy plants.

CYCAS REVOLUTA (Sago Palm), plants from 5 to 15 leaves 10c. per leaf.

PRIMULA ORONICA, in bud and bloom, best strain, 3 in. \$7.00 per 100; 4 in. \$10.00 per 100. 5 1/2 in. \$2.00 per dozen.

CHINESE PRIMROSES, Jno. F. Rupp strain, 5 in. \$2.00 per dozen.

HYDRANGEA OTAKSA, pot grown, 6 in. to 7 in., 25c., 35c. to 50c. each.

BEGONIA, Gloire de Lorraine, 6 in., 50c., 75c., and \$1.00 each. Also new improved Erford, 4 in., strong, 20c., and B. Flambeau, sells at sight, 5 1/2 in., 25c. each; 4 in., 35c.; 3 in., 25c.; 2 1/2 in., 20c., in bloom and bud.

SOLANUM (Jerusalem Cherries) full of berries 5 in. and 7 in. pots, 25c., 30c., 40c., and 50c. each.

DRACENA BICUNTI, 6 in., full of leaves from bottom to top, 24 in. high, 40c. each.

AZALEA INDICA, 6000 just arrived from Belgium, grown under contract for us, and never in my life have I received them in such a good condition as this time—well budded and with all their foliage on them. Have only well-known leading varieties, such as Deutsche Perle, Simon Mardner, Vervaneana, Apollo, Mme. Von der Cruyssen, Empress of India, and a few early varieties that can be forced for Christmas.

Prof. Wolfers, Bernard Andrew Allen, Niebe, John Livelyn, Talisman, etc., price, 40c., 50c., 60c., 75c., \$1.00, \$1.25, \$1.50, \$1.75 to \$2.00 each.

Iowa State College, Dept. of Horticulture and Forestry.

Ames, Ia., October 24, 1907.

Mr. Godfrey Aschmann, 1012 West Ontario St., Philadelphia, Pa.

My dear Sir: The shipment of plants recently ordered from you came to hand in good condition.

Kindly accept our thanks for your prompt attention.

Yours very truly,

A. T. ERVIN, Associate Professor.

Oakmont, Pa., October 22, 1907.

A Correction.

Editor Florists' Exchange:

In the report of the Dutchess County Horticultural Society's exhibition, published in last week's issue of your paper, the Saltford Flower Shop is credited with being the winner in the class for best decorated dinner table, but such was not the case. The first prize was awarded to Winthrop Sargent, and second to the Saltford Flower Shop. FRANK E. WITNEY.

THE DELINEATOR, acknowledged the leading fashion authority in the world, whose offices are in the Butterick Building, New York, has started what it designates a "Child-Rescue Campaign," the object of which is to bring the child without a home and the home without a child together. Portraits of babies are published in the magazine, with short stories concerning them. It is a noble and most commendable work which the editors of this well-known periodical have undertaken, and everyone within whose bosom beats the heart of a man or of a woman will wish the Delineator god-speed in its Christ-like endeavor to ameliorate, on the one hand, the condition of the helpless little ones thrown on a hard, unsympathetic world, and on the other, to carry into otherwise childless homes the joy which the music of toddling little feet and the laughter of inno-cent babyhood alone can bring.

Field Mice.

Had the Scottish bard, Robert Burns, lived in these days, and had he read the newly published illustrated bulletin (Number 31—Biological Survey) of the Department of Agriculture, written by Davis E. Lantz, on "An Economic Study of Field Mice (*Geus Microtus*)," we doubt if the immortal ode to the "wee, sleekit, cowrin', timorous beastie" would ever have seen the light. Mr. Lantz says the average loss to farmers, through the depredations of these pests, is not less than three millions of dollars annually, and in some years is much greater. He asserts that the major portion of this loss is preventable, and the object of the bulletin is to acquaint farmers, orchardists, nurserymen and others, with the most practical preventive methods. It is a most interesting and instructive document of 64 pages, well worthy of perusal by all concerned.

There are three typical species of these pests—the common meadow mouse, the prairie mouse, and the pine mouse. Full descriptions of each of these are furnished, together with their habits. Investigations have demonstrated that the character of their food is varied and quite comprehensive:

In Summer the principal food of these mice is green vegetation and unripe seeds of grain and grasses. As the season advances, ripe grain and seeds take the place of the immature; and in Winter bulbous and other roots, are in part substituted for stems and leaves. When convenient, and green vegetation is lacking, the bark of trees and shrubs becomes a staple food. It is mainly in Winter that apple orchards and young forest trees suffer from attacks of mice. It is generally supposed that such attacks are due to the absence of ordinary food; but this is not always the case, for depredations often occur during mild, open Winters when food abounds. Instances also of Summer girdling of trees are well attested.

Examinations of stomachs of field mice show that, besides stems, leaves, and seeds of grasses and sedges, the animals eat nearly all kinds of bulbs, tubers, and roots, and occasionally animal food such as snails and crayfish. Outside the list of grains, vegetables, grasses, roots, and barks, which are generally known as staple food of field mice, they have been found eating strawberries and other fruits; roots of wild morning-glory (*Convolvulus sepium*), sweet clover (*Mellilotus alba*), and cat-tails (*Typha latifolia*); seeds of iris and primrose (*Primula Parryi*); bulbs of tulip, hyacinth, and wild onion; and the tubers of the Jerusalem artichoke (*Helianthus tuberosus*).

The quantity of green vegetation eaten by a single adult field mouse in the course of a year has been calculated at from 24 to 36 pounds. When one considers in connection with this estimate the great numbers of these animals in our meadows, swamps, and forests, the total quantity of food consumed by them appears so enormous as apparently to exceed the productive capacity of the soil. A thousand mice in a meadow would require at least 12 tons of grass or other green vegetation to maintain them for a year.

Field mice do much injury in market and other gardens, attacking planted seeds in the open garden, hothed or cold frame. Pine mice are the chief offenders in inclosures, sometimes working their way even into greenhouses, where they attack bulbs and tender growing plants, as well as all kinds of seeds.

Blackberries, raspberries, grapes, currants, gooseberries, and strawberries are often badly damaged by field mice, and when the animals are abundant whole plantations are ruined. Strawberries are especially liable to injury because of Winter mulching and also because the plants themselves furnish excellent food and shelter for the animals.

Fallen leaves in Autumn and snow in Winter drift and collect along rows of blackberry, raspberry, gooseberry, and currant bushes and furnish cover for mice, which work along the rows and girdle the green stems; and when dead canes are left uncut and weeds are permitted to grow up among them, the resulting tangle adds much to the liability of attack. Winter mulching of small fruits also increases the danger, and if practiced the utmost care should be taken to clean surrounding areas.

The damage occasioned by field mice to nursery stock is also very extensive. It was estimated during the Winter of 1901-2, that nurserymen in the vicinity of Rochester, N. Y., sustained losses amounting to \$100,000. Damage to standing nursery stock is done usually under cover of snow, hence is greatest in deep snows that remain long upon the ground.

Experienced nurserymen prevent serious injury to standing stock by clean cultivation. Stock that has been taken up in the Fall and "heeled in" or kept in storage pits is, however, liable to attack, especially if covered by straw, leaves, or other litter. Hence for protection from freezing a loose covering of soil is better than litter. Winter seed beds of conifers, oaks, and nut-bearing trees are often attacked by field mice and need to be carefully protected from them as well as from white-footed mice (*Peromyscus*). Small pine trees in the nursery also are liable to injury, since their low branches usually furnish cover for mice.

Among the nursery stock injured by field mice are apple, pear, quince, plum, peach, cherry, crab apple, sugar and Norway maple, chestnut, black locust, Osage orange, sassafras, alder, white ash, mountain ash, various oaks, cottonwood, willow, pine, and wild cherry trees; also blackberry, raspberry, rose, currant, and barberry bushes, as well as grape vines. In the Arnold Arboretum, Jamaica Plain, Mass., during the Winter of 1903-4, meadow mice destroyed thousands of trees and shrubs, including apple, maple, sumac, barberry, buckthorn, dwarf cherry, snowball, bush honeysuckle, juniper, blueberry, dogwood, beech and larch. Plants in nursery beds and acorns and cuttings in boxes especially were harmed.

The list of natural enemies of the field mouse is a long one, and includes other animals, birds and reptiles,

most of which, unfortunately, are more or less destroyed by man on appearance.

For the artificial repression of the pests, trapping is recommended, as are clean cultivation, and poisoning. For the latter purpose strychnine is the most satisfactory, but great precaution is necessary in handling it. The strychnine salt most used commercially is strychnia sulphate. This is the best for poisoning purposes, since it is soluble in boiling water, while the alkaloid requires the presence of an acid for its solution. To disguise the bitterness of the poison when employed for rodents, sugar is used, or the strychnine may be mixed with its own bulk of commercial saccharine.

For poisoning field mice various baits may be recommended, such as wheat, oatmeal, and corn, among the grains, and seeds of various plants, as the tomato, dandelion, sunflower, and others. The bait should be soaked over night in a poisoned sirup, which may be prepared as follows:

Dissolve an ounce of strychnia sulphate in a pint of boiling water; add a pint of thick sugar sirup and stir thoroughly. The prepared sirup may be scented by a few drops of oil of anise or rhodium, but this is not essential. A half ounce of borax is said to keep the mixture from molding.

The above quantity (a quart) of sirup is enough to poison a half bushel of wheat or corn, but smaller proportional quantities of grain and sirup may be mixed as needed. If after thorough mixing the solution is not sufficient to wet all the grain, add a little water. After standing over night, if the grain is too wet, a little dry corn meal will take up the excess of moisture. If oatmeal is used as a bait, when the mass is wet throughout with the sirup, it may be used immediately.

Because of the danger of destroying native birds, such as quail, sparrows, and others, the poisoned bait should not be placed in exposed situations, but under shelters which will admit mice but exclude birds. Wide boards lying upon thin cross-pieces of wood are excellent for the purpose. For pine mice baits may be placed in the underground tunnels without endangering birds. For other mice pieces of drain tile about 1½ inches in diameter may be laid along the trails, and the baits inserted into the tiles with a long knife or spoon. Tiles are recommended by the French Minister of Agriculture, but old tin cans with flattened ends or small openings are excellent substitutes.

In Winter the following plan is especially recommended for orchards and nurseries:

Cut small twigs from branches of apple trees (suckers are excellent for the purpose) and either dip them in the strychnine sirup or apply the sirup to them with a brush. Scatter the poisoned twigs near the trees to be protected. This plan is excellent for either field mice or rabbits, and it entirely obviates the danger of poisoning birds or domestic animals.

Among other poisons that have been recommended for the destruction of field mice are phosphorus, potassium cyanide, and various mineral poisons, including arsenic. The mineral poisons as a rule are less virulent than the others.

For the prevention of injury by mice to nurseries, clean tillage and the destruction of all grass and weeds in fence corners and waste lands near the nurseries are recommended.

Unfortunately, nurserymen cannot control the lands which environ their trees, and when snow falls to a considerable depth prompt measures are sometimes necessary to keep mice from destroying them. This can be accomplished most readily by dragging a heavy log or stick of timber several times around each block of trees, packing the snow so firmly that mice can not tunnel under it. If this precaution is taken promptly after the first snowfall, subsequent falls will require but little attention. Some nurserymen plow furrows on both sides of the trees, throwing up the soil in a ridge along the rows; but the expedient is of doubtful utility.

Reports recently received by the Biological Survey seem to indicate that the ordinary lime-and-sulphur wash, recommended for the Winter spraying of trees to destroy the San José scale, is an effective preventive of the attacks of both mice and rabbits. Personal observations during the Winter of 1906-7 indicate that this claim is well founded. Several correspondents state that they have tried the wash successfully, and the matter is worth further investigation.

The bulletin, which as the foregoing extracts show, is a most useful one, closes with providing a number of remedies for injured trees.

T. A. Weston, so well known in England by his work for, and his writings about sweet peas, has taken up a position in the famous firm of Henry Eckford of Wem, Shropshire, and not a little satisfaction is expressed in trade circles. Mr. Weston is quite a young man, bubbling over with energy and enthusiasm, and, owing to his style, not a few imagine him to be an American. He is, however, a pure Britisher, with a very warm spot in his heart for all the good things that hail from America, from W. Atlee Burpee down to a Pennsylvania lawn mower.

The Hon. Secretary of the National Sweet Pea Society writing of Mr. Weston early in this year said, "He is a perfect terror to all who would stray from the straightest of sweet pea paths. He is very much of a scribe these days, but, thank goodness, there is little of the Pharisee about him."

BOOKS RECEIVED

THE PERPETUAL FLOWERING CARNATION. By Montagu C. Allwood, F. R. H. S. Publishers, Hugh Low & Company, Royal Nurseries, Bush Hill Park, England. Paper: Illustrated.

This practical little volume is an evidence of the hold which the perpetual flowering carnation—a name given by our English brethren to the American varieties—has taken on carnation specialists across the Atlantic. The author of the book has had a long experience in the cultivation of carnations secured from the United States, dating back to the variety Lizzie McGowan, imported into England in 1890 by the defunct firm of Messrs. Pitcher & Manda, Swanley, Kent. When this firm gave up its English branch and had an auction sale, the carnation in question was sold, being purchased by local nurserymen, and grown by them for the Covent Garden market, London. The wonderful productiveness of Lizzie McGowan, when compared to that of the English varieties at that time, the cut being in the ratio of three to one, directed the attention of British cultivators to the value of American carnations. Since that time the interest of the English growers in these products has continued unabated, and the book before us is the outcome of a necessity demanding practical instructions on the best methods of their culture.

In the historical part of the volume Mr. Allwood has drawn largely from Ward's work "The American Carnation." It is, however, interesting to note that the British tree carnation was, like our present American race, originally imported from France, about 1856; the cult in England receiving its stimulus from the productions of Alegatière. The variety L'Alegatière was grown extensively about 1865 as cut bloom for Covent Garden market.

It is pretty well understood that our British cousins prefer a smooth petal in the carnation flower, so when Mrs. Thomas W. Lawson was first exhibited in England, it was rejected by the R. H. S. on account of its "unkempt" bloom. "All this," says the author, "is difficult to understand at the present age, now that their full worth is being realized." Mr. Allwood is optimistic regarding the future of this class of carnations in Great Britain, and adds: "Perhaps we may yet turn the table upon our American cousins, on account of being able to blend into our seedlings some of the best American blood."

The method of cultivation practiced in England is fully gone into, the American system being also briefly outlined. There are also chapters on the raising of new varieties, pests and diseases, with remedies therefor; manures, etc. A calendar of operations is furnished, likewise a review of varieties, and a chapter on the cultivation of the Malmaison carnation.

In his remarks on "A Perfect Carnation" the author says: "If you were to ask any carnation grower at the present time what was the best variety, he would say Enchantress, and undoubtedly he would be right, but I am not quite sure but that its center is a little too full, and compared with that fine new variety, White Perfection, it seems to be inferior in this one respect. Then again, the guard petals of the Lady Bountiful seem almost to be an improvement upon those of Enchantress, yet in habit it is harder to beat. The Lawson family is more productive, and White Perfection also grows quicker, so it is clear that a carnation containing all these advantages would be of greater commercial value than Enchantress, which has rightly been called the 'money-maker.'" The foregoing quotation gives a general idea of the fair judgment passed upon the different varieties by the author. It is also interesting to learn that Mr. Allwood has "never heard of a single district (in England) where Enchantress would not flourish or where Mrs. T. W. Lawson would not thrive."

To the American carnation grower the book, except for purposes of comparison of cultural methods, and information as to the behavior of our varieties in Britain, has no especial value, the subject of growing carnations having been so thoroughly threshed out in this country. The climatic conditions existing here are radically different from those on the other side of the Atlantic.

By the English method many diseases will be avoided, owing to lower temperatures being used and less frequent spraying. It is claimed that the bloom on the carnation foliage is a protection against fungous diseases, and if forcible and frequent syringing is resorted to, the "bloom" is destroyed and the plant becomes more liable to attack, all of which the practical plant growers here will readily admit.

However, the book can be safely recommended to all those who desire to keep posted on what is doing in carnation culture in Great Britain with respect to the productions of our own specialists, as well as those of English raisers of the Divine Flower.

OUR READERS' VIEWS

After the Show is Over!

Editor Florists' Exchange:

Descriptions and glimpses of the Chicago show just passed assure the reader that at last we have reached strength and courage enough to step before the public with one, in this country, new system of displaying our horticultural triumphs. True, the conditions of our trade ten years ago were probably not such as to justify flower shows of the style just seen in Chicago, still it is an open question why we waited until now to put present plans into practice.

The source of our greatest progress is in elaborating and perfecting the schemes developed across the ocean. Many of us remember the flower shows as arranged in Germany, France and Belgium; all these exhibitions are a great attraction and are impatiently looked forward to by the general public.

Almost every show is arranged in a large hall, which is probably hard to secure in this country. The system

A. A. Hixon
Secretary and Librarian Worcester County (Mass.)
Horticultural Society, and His Two Grandchildren

employed at the annual Spring flower show in the Crystal Palace at Munich is typical of all. This building, constructed of glass and iron, covers nearly four acres. The first work for this show was always the drawing of a plan, as the landscape gardener designs his park. There being a 25 foot high ornamental fountain in the center of the building, we generally used that as parterre, as if it were in front of a large palace, planted with roses. Either side was laid out as a park, one side being of the free English park style, with irregular walks, water flowing from some cliff, from the top of which an excellent view of the whole park was afforded. The other side was arranged typical of an old Roman garden, with uras and other antiques; or it imitated the French style under Louis XIV, and so on, with something different every year.

After the plan was accepted the premium list was consulted and the various exhibits assigned to places in this garden, with natural grass and gravel walks wherever most suitable.

A good beginning has been made in Chicago; let some club in another city follow this up and improve on it by placing competitive cut flower exhibits harmoniously in the landscape instead of in bottles on tables. In this way we will have done, as regards flower exhibitions and everything else—copied Europe, but improved thereon to such an extent that Europe will come back to us for advice.

FRANK DANZER.

The veteran William R. Smith, superintendent of the U. S. Botanic Garden, has served the Government as a Federal employee longer than any other man on the civil service list in Washington, D. C. He has been 55 years in his present position, and although 80 years of age is still hale and hearty, and seems good for many years more.

L. M. Underwood.

Lurien M. Underwood, Professor of Botany at Columbia University, New York, and chairman of the Board of Scientific Directors of the New York Botanical Garden, committed suicide by cutting his throat at his country home near Reading, Conn., on Saturday, November 16, 1907, after severely cutting his wife's throat and attempting to kill their daughter. It is supposed that he had become temporarily deranged on account of worry over large losses in Wall street recently.

Professor Underwood was born at New Woodstock, Madison County, N. Y., October 26, 1853. He was educated at Cazenovia Seminary, and was graduated from Syracuse University, where he later took a post-graduate course. He was appointed Professor of Botany and Geology in the Illinois Wesleyan University in 1880. He resigned in 1883 to become Professor of Biology at his Alma Mater, and from 1891 to 1895 was Professor of Botany at De Pauw University. The following year he was at the Alabama Polytechnic Institute, and from there was appointed Professor of Botany at Columbia, succeeding Dr. N. L. Britton, where he had remained.

Professor Underwood contributed to many botanical and other scientific periodicals. Ferns and mushrooms were special hobbies in the line of his more general work. He published "Our Native Ferns and Their Allies," and "Moulds, Mildews, and Mushrooms."

He was a delegate to the International Botanical Congress in Genoa in 1892; editor of the Bulletin and Memoirs of the Torrey Botanical Club since 1898. He was a Fellow of the American Association for the Advancement of Science, corresponding member of the Philadelphia Academy of Science, member of the Botanical Society of America, of which he was president in 1900, and a councillor of the New York Academy of Sciences. For some time he was president of the New York Mycological Club, an organization not now in existence.

Of him Professor Britton says: "In his work Professor Underwood stood at the very head of his profession in the United States, and was one of the best-known men in his line in the entire world. For several years he had been working on a classification of ferns, the work taking in all the species between the arctic regions of North America and the Isthmus of Panama."

"Recently he returned from a trip to Cuba, Porto Rico and Jamaica, where he went to study the ferns of those islands. He had also visited a large part of the United States with the same object in view. It was his life-work besides being a work of love. The work he planned was so exhaustive that it can be said he left it only fairly begun."

"Professor Underwood always impressed me as a man of the happiest disposition, as jolly a fellow as you would care to meet, a delightful companion, and a man who was popular with every one that knew him. So far as I know, his married life was ideal. I cannot figure out how such a man could have committed the act that he did. Years ago he suffered from nervous prostration, but that affliction was long ago overcome."

Mailing Photographs.

Quite a number of photographs have recently been received at this office in a condition rendering them unfit for reproduction, because of their being handled improperly for mailing. NEVER ROLL A PHOTOGRAPH; but always place it flat between pieces of stout cardboard. This latter method will insure the package traveling through the mails and arriving at destination without injury. We can do nothing, so far as reproduction is concerned, with a crushed or mutilated picture.

Adin A. Hixon.

At the last meeting of the Worcester County (Mass.) Horticultural Society A. A. Hixon was elected librarian for the eighteenth and secretary for the eleventh time. He has been a member of the society for twenty-six years and interested in horticultural pursuits for about forty years. As a lecturer, Mr. Hixon is widely known, having lectured in all the New England States, excepting Vermont. He was judge of fruit in Providence, R. I., for two years, and in connection with the coming chrysanthemum show there will also act as judge. In lecturing Mr. Hixon uses no notes and makes no previous preparation.

The accompanying illustration shows Mr. Hixon and his two grandchildren, sons of A. W. Hixon, who has been associated with his father in the florists' business for seventeen years.

CAROLUS.

Aster Lady Roosevelt.

Among recent endeavors in the improvement of the ever popular and valuable commercial floral product, the aster, the Lady Roosevelt variety stands out ap-

parently in a class by itself. This beautiful acquisition, which seems destined to become of ultra importance to the commercial florist as well as the private gardener, is the result of several years of uninterrupted effort on the part of the manager of the Scientific Special Crop Intense Culture Ranch of Elmhurst, Ill., who some six or seven years ago, while a resident of Buffalo, N. Y., made a selection of five varieties of asters from eighty-four sorts of the best he could purchase, later adding two varieties he produced by hybridization, and he has by selection, improved methods of culture, and application of certain grades of fertilizers been continuously at work to improve them. While all of these, with the one exception, have failed to respond permanently to the careful aims of the specialist, the Lady Roosevelt has annually shown a marked improvement until it has reached its present high standard of excellence.

This variety, which is appropriately termed a chrysanthemum aster, was originally a selection made from the Burbank strain, brilliant dark rose pink in color, and when first obtained was a flower of striking beauty. It stood so far superior to its kindred that in Buffalo, six years ago, when the plants did not exceed twenty-two inches in height and the flower stems eighteen inches in length, the unusually large handsome blossoms wholesaled at an average of fifty per cent. more than any asters had previously brought in that market.

By careful selection of the most vigorous plants and the largest and most perfect blooms for seed, by experimenting with various classes of fertilizers and special modes of culture, and by the protection of the seed flowers with mosquito netting from contamination by insects, this variety now produces an unusually beautiful, well-colored flower with absolutely no variation in shade, with stems reaching from 33 to 37 inches in length on plants averaging in excess of four feet in height. The stems are wiry and stiff, fully capable of sustaining the large flowers and standing the winds and storms of the Illinois prairies in commendable shape, even when unsupported. Every flower on the plant, running from three to seven and not infrequently eight to ten with a conservative average of six, develops perfectly.

The flowers sold readily in the Chicago market last year, 1906, at \$4 per hundred, the entire cut being booked several days in advance of delivery, and the past Summer orders were received from several large cities outside of Chicago for more flowers than could be supplied at \$1 per dozen, wholesale, for the choicest and 75c. per dozen for the second quality.

Kibbe's Field of Aster Lady Roosevelt

The firm also have three other superior varieties which now show promise of holding their fine qualities and in the future of which they have great confidence, one of these being a white sort, maturing a flower measuring 5½ inches in diameter.

But with the perfection of the Lady Roosevelt the grower feels perfectly satisfied, and as he complacently remarks, "Yes, I have done what I set out to do and am correspondingly pleased."

In addition to asters this concern is making a specialty of ginseng plant culture, endeavoring to improve and perfect this important product by the same methods of culture, and on which they have been at work for several years. Fancy pheasants in variety, of the choicest selection, and the artificial propagation and raising of brook trout complete the commercial enterprises which are carried on at the Elmhurst Ranch.

W.

Bates's Success with Sweet Peas.

The picture shown herewith was taken October 10, 1907, and represents our Sugar Hill sweet peas. The plants bloomed continuously from August 1 to October 18; at that date there was a heavy freeze and it caught the vines in fullest vigor and loaded with thousands of buds. In spite of the very unfavorable season they have done well. We find the Frank Dolby and Nora Unwyn exceptionally fine. We are hoping for a better season next year, and expect to plant about 200 rods of sweet peas.

Asters in this section were almost a failure with us, as seven-eighths of our planting amounted to nothing. Watkins, N. Y.

LOUIS J. BATES.

American Rose Society.

The American Rose Society has issued certificates of life membership which are very handsome documents, worthy of being framed and preserved; also, certificates for roses exhibited as novelties not receiving the society's gold medal, but worthy of special notice. To make these certificates more interesting a new seal has been prepared, which in design is distinct and original.

The society has now begun to make ready for the exhibition to be held in Chicago. The show of Rambler roses from the West is expected to outshine anything which has been given to the public. New roses from two or three growers in the East are expected to be of interest to all who are working along this line.

The list of life members is increasing. The society is not very rich, but it is likely to become the head and front of the special associations devoted to the development of cultivated flowers in America.

BENJAMIN HAMMOND, Secretary.

Utilizing Space.

Florists as a rule, at this time of the year, require every bit of room available. I have seen Adiantum Croweanum grown in benches, in pots and in solid beds, but I have never before seen the wall plate of a palm house used for its cultivation. The palms mostly used for decorative purposes were stood on a cement floor about 4½ feet lower than the wall plate, the plate being about 4 inches wider than the wall inside. Boxes of various lengths and six inches deep were wired to the bars and resting on the plate, and planted in the boxes were Croweanum ferns, and looking better than I have ever seen them growing in any other way; some of the fronds measured 24¼ inches in length. R.

English Horticultural Notes.

The new editor of "The Gardeners' Chronicle," London, in succession to the late Dr. M. T. Masters, F. R. S., is Professor J. B. Farmer, D. S. C., M. A., F. R. S. Dr. Farmer has had a distinguished university career, and was Professor of Botany at the Royal College of Science, London, prior to assuming his present duties. He is one of the best known botanists in England, and made a great name over his discoveries in the cytology of ferns.

Another new editor has been appointed to "The Gardener," a weekly newspaper for amateur gardeners, published by Cassell & Company, Ltd., London. Walter P. Wright, author of numerous shilling gardening books—the Pictorial Practical Gardening series—resigned, and H. H. Thomas, a son of the late Queen Victoria's last gardener, is succeeding him. The change takes place at the beginning of December.

It may interest some of your readers to know that a revival is taking place in favor of formal gardening design in England. With the death of Henry Milner, the landscape gardening school appears to have lost its chief exponent, and Thos. H. Mawson (who was in the United States, laying out, a little while back), who is a "garden-architect," is as busy as he can be; most of his work, of course, bearing the stamp of architectural dignity. I find, also, that Messrs. Cheal & Sons of Crawley, nurserymen and designers, are keen on the formal-garden style. They tell me that there is also, and has been, quite an active demand for clipped trees and shrubs—examples of topiary. At first, some eight years ago, they had to import all such clipped figures from Holland, but the Dutchmen put up their prices, and so the Cheals set about training and making their own. They now have a couple of hundred figures, large and small, and are adding to them.

From remarks made to me by L. R. Russell of the Richmond Nurseries, Richmond, Surrey, who grows berried shrubs better than most other nurserymen; there is also a phenomenal demand for bushy plants, well-berried, of pernettyas, skimmias, and aucubas. Plants from three to six years old, in pots, forming nicely fruited bushes of 1½ feet high, are what he sells in large numbers; but he has had such a run that only young stock remains.

The chrysanthemum season has opened with a shower of novelties, some good and a number that appear to me to be only middling. I will send my usual list of these in tabular form in good time before the cuttings need be ordered, and will only say here that some magnificent blooms are being shown.

It is not often that I allude to fruit cultivation, and only do so now to observe that just as the United States and Canada are requiring more and more of their own wheat, so we in Britain expect you to consume more and more of your own apple supplies, and on that supposition, we are planting orchards more largely. Are our suppositions likely to be right? We are growing the Canadian apple, Ontario, and like it.

The exhibition of Winter-flowering (American) carnations takes place at the Royal Botanic Garden, Regents Park, London, on December 11. Hayward Mathias, is secretary, and would doubtless welcome any American novelties for that event.

Our London Letter.

BY A. HEMSLEY.

This has been a busy week with chrysanthemum fairs. The National Society's show, held on November 6, 7 and 8 at the Crystal Palace, attracted large numbers of visitors and was one of the finest exhibitions the society has had for some years. The worst feature was the pot plants, which were very poor. The trade groups were the greatest attraction. Norman Davis fully sustained his reputation with large numbers of such varieties as Madame Rivol, Mrs. Norman Davis, Mrs. Hygate, a new pure white incurved of

Chrysanthemum Lynnwood Hall

Grower, Wm. Kleinheinz, Ogontz, Pa.

size, Algernon Davis, British Empire, W. Ring, other Japs of the finest types. Felton's Favorite, a medium-sized white of good substance, received a first-class certificate; B. Ladds purchased the whole of the stock and it is probable that he will not put it into commerce for some years, but will grow it extensively cut bloom. This is a practice which is being followed by several growers. Messrs. Lowe & Shawyer, raise a good many seedlings, throw away all surplus stock of the best varieties rather than put them in commerce. They have some of the most useful varieties seen in the market, but do not exhibit except for certificates.

Chrysanthemum Dorothy Goldsmith

Grower and introducer, C. H. Totty.

H. J. Jones put up an imposing group at the Palace, but owing to the weather some of his best white varieties were passed. Mrs. A. T. Miller, which he introduced last year, was well shown in many classes. H. J. Jones, golden yellow incurved Japanese, will make a grand variety for exhibition and it should also make a good market sort as it is so free. Mrs. Wakefield will make a good pot plant and one of the best for cut bloom. Mr. Jones also had some fine seedlings which will be further tested before offering them in commerce.

W. J. Godfrey, another noted grower, was also well to the front. Of useful sorts noted on his stand were Market Yellow, Mary Donellan, Brightness and Romance. Singles are also a great feature with Mr. Godfrey.

Messrs. Wells & Company continue to make headway, and in their large exhibit some good new varieties were noted; of these Freda Bedford, a Japanese of a peculiar amber or apricot, with a bronzy shade, gained a first-class certificate. Mrs. W. P. Bound, Clara Varnum, rich crimson, a good decorative variety, Mrs. C. H. Totty, a large pink Japanese, and Ch. Beckett, also Clara Wells, a fine incurved.

B. Ladds made a grand showing of useful sorts in bunches of twelve blooms as supplied in the market, the flowers of leading varieties being of high quality. I may note that he grows Ivory and the pink variety, and I find that other growers still favor these American varieties. For many purposes the medium-sized blooms are most appreciated, yet for show the large Japanese take the lead and we have much improved varieties of these. It used to be thought that Madame Carnot would be hard to beat, but I did not see a single bloom of it at the last show. Taking the shows all round they appear to have been well patronized and exhibits numerous and of good quality. At the Royal Horticultural hall we have had some grand groups staged.

THE DAHLIA SEASON is lasting out well; some fine exhibits of the peony-flowered varieties have recently been made, and growers report that they have been booking orders for them freely. They are more useful for late flowering than the heavier blooms, and we now have further improved varieties.

THE NEW PINK SPIRÆA PEACH BLOSSOM.—I recently noted some well-flowered plants of this in Messrs. T. Rochford & Sons' store, and I find they are booking orders for dormant clumps to be delivered later on. It will be sure to have a good run as soon as it can be put on the market at a reasonable price.

ZONAL PELARGONIUMS.—In a recent exhibit from Messrs. Cannell & Sons I noted some good things which should be worth looking after. Corona, Sir E. Cassel, St. Louis, Civic, Arabic, Bowood, and Manretonia were very fine.

CELOSIA PYRAMIDALIS has done well the past season. I have noted it in the parks and in private gardens. We get a much better strain now than was procurable a few years ago. The crimson and golden yellow mixed together make a very effective bed, but to get them to stand well the seed must be sown early in the season and strong plants established before planting out.

THE AMERICAN CARNATIONS Winsor, Beacon, and Rose Pink Enchantress were honored with awards of merit at the last meeting of the R. H. S. committee. Winsor is evidently one of the best; I have blooms before me which were cut ten days ago and they only just begin to show signs of going off. Melody, Aristocrat, and White Enchantress were submitted but failed to satisfy the committee. We are likely to have a big show of carnations at the Royal Botanic Society's gardens on December 11. The newly established Winter-flowering Carnation Society continues to increase its roll of membership, and I find that among growers there is great activity and we may expect to have large numbers of home-raised seedlings before us in the near future.

J. R. Fotheringham, from Messrs. Pierson's of Tarrytown, N. Y., favored our committee with a visit and gave us some interesting particulars regarding carnations and carnation growing in America, and in conversation expressed his surprise to find them so well grown in pots here in England. He said that they would compare very favorably with any that he had seen in the United States at the same season of the year.

New Chrysanthemums.

O. H. BROOMHEAD is a reflexed plant that should be very favorably received. It is an English seedling of dwarf robust growth, an easy variety to handle, as most any bud comes good. It has received favorable endorsement wherever shown and won first for six any new pink at the American Institute show. The color is warm and clear and the flower is a wonderful keeper, on or off the plant.

MARY MASON is a Japanese reflexed variety of Australian origin, one of the famed Wells-Pockett varieties. The flower sets down on the foliage and the stem is stiff enough for anything. It is an exhibition variety and as such will be hard to beat. It will be a serious rival to Mrs. John Dunne, as it is of much the same style and shape and is brighter in color, which is the latter's only weak spot. Mary Mason attracted attention in the winning class for 30 varieties at the New York show and will be largely grown by Eastern exhibitors next year.

Chrysanthemum O. H. Broomhead

Grower and introducer, C. H. Totty, Madison, N. J.

LYNNWOOD HALL is an American seedling raised by the veteran, Robert G. Carey. The color is white and in stem, foliage and shape of flower it conforms to the commercial type of bloom as recognized among growers. It was exhibited by Wm. Kleinheinz and won the Smith prize for best American seedling at New York, and was exhibited in several winning classes at Philadelphia. Stock will be distributed by the E. G. Hill Company this coming season.

DOROTHY GOLDSMITH shows promise of being a monster exhibition variety with petals hanging down almost a foot in length. It is too long in the neck, but will find a place in the short vase classes with such indispensable neighbors as F. S. Vallis and Mrs. D. V. West. The color is a bronzy yellow and the size of the flower is very impressive.

C. H. TOTTY.

Madison, N. J.

Chrysanthemum Mary Mason

Grower and introducer, C. H. Totty.

DIRECTORY OF RELIABLE RETAIL HOUSES

The retail florist firms advertising under this heading will accept and fill orders for flowers and floral designs forwarded them by mail, telegraph or telephone, the usual commission of 25 per cent. being allowed.

\$25.00, payable quarterly in advance, will entitle the advertiser to a four-line card, under this heading, for one year, 52 insertions. For every line additional to four, \$5.00 will be charged. Four lines will average 32 words; each additional line, 9 words. Each advertiser receives one copy, free, of our Florists' Telegraph Code.

New York.

YOUNG & NUGENT, 42 West 28th St. We are in the theatre district and also have exceptional facilities for delivering flowers on outgoing steamers. Wire us your orders; they will receive prompt and careful attention.

MYER, 611 Madison Ave. My facilities for delivering flowers for any and all occasions are unexcelled. Can give prompt service to steamer and theatre trade. Telegraphic orders solicited. Telephone, 5297 Plaza.

Kansas City, Mo.

SAMUEL MUBBAY, 1017 Broadway. I will deliver orders for flowers in Kansas City and vicinity promptly. A first-class stock of seasonable varieties of flowers always on hand. Wire me your orders.

Detroit, Mich.

JOHN BREITMEYER'S SONS, Broadway and Gratiot Avenue. We cover all Michigan points and large sections of Ohio, Indiana and Canada. Retail orders placed with us will receive careful attention.

Denver, Colo.

THE PARK FLORAL CO., 1706 Broadway, J. A. Valentine, Pres. Orders by wire or mail carefully filled; usual discounts allowed. Colorado, Utah, Western Nebraska and Wyoming points reached by express.

Cincinnati, O.

HADESTY & CO., 150 East Fourth, sell the best grade of flowers grown. Retail orders from distant points for delivery in Cincinnati or surrounding territory will receive prompt attention. Telegraph us.

Dayton, O.

W. G. MATTHEWS, FLORIST, 16 West Third Street. Flowers in any arrangement for all occasions for Dayton and vicinity. Personal attention given to all orders. Long distance telephones.

Dallas, Texas.

LANG, THE FLOEIST, the largest flower store in the South. Floral designs and all flowers in season; personal supervision and prompt service in Oklahoma, Texas, Louisiana. Mail and telegraphic orders solicited.

Louisville, Ky.

JACOB SCHULZ, 644 4th Avenue. Personal attention given to out-of-town orders for Louisville and surrounding territory. Have a choice line of seasonable flowers always in stock; delivery facilities perfect.

Indianapolis, Ind.

BERTERMANN BROS. CO. Our facilities for executing orders in an efficient manner are unexcelled. Our shipping territory includes the surrounding states. High grade flowers; expert workmanship.

Albany, N. Y.

EYLES, 11 North Pearl Street, cut flowers or floral designs delivered to any part of Albany and vicinity on telegraphic order. Personal attention given and satisfaction guaranteed.

Chicago, Ill.

HAUSWIRTH, The Auditorium Florist, 232 Michigan Avenue. The quality of our work is of National repute, and we are prepared to execute commissions in first-class style in Chicago and its environs.

Retailers desiring a share of out of town trade should be represented by a card in this column.

FOR THE RETAILER

For reproduction on this page, we solicit from our readers engaged in the Retail Trade, good, clear photographs of subjects that are of general interest, such as store interiors, designs of different classes, new delivery wagons, etc.

Unbreakable Plant Tubs.

The use of growing plants for indoor decoration is constantly increasing, and offers a most attractive field to the florist. When plants are used for this purpose, and equally when exhibited in store or greenhouse, the pot or tub becomes an item of considerable importance. Among the most durable and economical parlor plant tubs made are the Indurated Fibre tubs, sold under the "Fibrotta" trade mark. Indurated Fibre is a wood pulp product, subjected to a process which gives it great hardness and renders it waterproof. Indurated Fibre, while hard, is not brittle, therefore a blow that would destroy an earthen pot has no effect upon it whatever. The peculiar fitness of Indurated Fibre as a material for plant tubs was noted long ago, and since the introduction of the Fibrotta tubs, the demand for them has grown to very large proportions.

Partial View of Private Flower Show of Adolph Brix, South St. Louis

In appearance these tubs are much more attractive than either wood or earthenware. The plain mahogany finish has a smooth clean surface; mahogany in appearance, as indicated, which is readily cleaned, and this is the most durable and serviceable style of finish. They are also finished with a smooth green enameled surface, which matches well with the foliage of growing plants. The tubs all have drainage and ventilating holes, and in every way are suited to the requirements of growing plants.

Fibrotta parlor plant tubs are made by Cordley & Hayes, 173 Duane street, New York, who also carry a variety of Indurated Fibre florists' specialties, including a very neat and simple rolling stand for holding potted plants. These stands roll easily about the floor, and permit of growing plants being shifted without injury to floor or carpets, or risk to the plant.

New York's Cut Flower Supply.

It is superfluous to mention the tremendous influx of cut flowers into this market at the present time; suffice it to state that there are more flowers and less business than it has been the misfortune of any one connected with the business to see before, and I am sure than they ever are likely to see again. But it may be of interest to out of town florists to know the kind of stock and the great variety that we are receiving. Chrysanthemums, of course, have the floor for the time being, and the supply has been tremendous. But to my way of thinking really good blooms are not so much in evidence as they have been in former seasons, and there have been very few additions in the way of new varieties of merit, most of the old standard varieties being in the field again. There is one variety named Wakely Smith that has come under my notice that I believe to be a coming sort. The flowers are of the Japanese type, the color a beautiful rich orange; the bloom itself, although of a good size, is not heavy, as the petals are well distributed, and the rather light stem holds the flower well up. Its lasting qualities are of the best.

Pompon chrysanthemums, both cut and as pot plants are good sellers and command a great deal of attention. The single varieties have been particularly good this season; they are undoubtedly beautiful and at another time would bring good prices.

Roses as a continuous supply flower next claim attention. American Beauty at present are superlative. Richmond, Killarney, Sarah Nesbitt and Mme. Al Chatenay have almost attained the height of their perfection with some growers. Killarney is without doubt the most popular all-around rose, both with the retailer and the customer. It is especially useful to the retailer when business is poor, as it is practically good sold. Bridesmaid is entirely overlooked when side by side with Killarney, but under improved business conditions will doubtless come into its own again. Simpson's seedling is another good sort and a quick selling variety. The color is its greatest recommendation, though it has good lasting qualities. Richmond is as good as ever and will be hard to improve on. The same may be said of Mme. Abel Chatenay. White Killarney is seen here in small quantities; I believe it will be a good addition to the white varieties and especially serviceable for bouquet work.

Carnations are good but have not reached their limit as the stems of many are still a little short. Al Ward is probably the finest carnation in the market at present, although the supply of this superb carnation is somewhat limited as yet. Enchantress retains

popularity and seems as good as ever in this market and is the most generally grown variety.

Orchids are somewhat scarce, which may or may not be a blessing; they are the only flowers, with the slight exception of good gardenias, that are holding a figure. Cattleya Trianae is the staple sort at present. A few flowers of the superb variety Cattleya Dowiana are to be obtained. For white orchids about all we have just now are Dendrobium formosum. Yellow orchids are very scarce; only a few sprays of Oncidium formosum are seen. There has been no orchid glut this season so far, and it is exceedingly doubtful if there will be sufficient stock to supply the demand.

The supply of lily of the valley has become as regular in this city as galax leaves; any demand, no matter how large the order, can always be taken care of. The higher grades, however, could be in better supply. Lilium speciosum form a regular feature in this market and are most useful; they last well, and have a pleasing fragrance and good color. Bouvardia Humboldtii is about over. This beautiful flower should be grown more extensively. The other varieties are at their best. They lack the perfume of Humboldtii but they are pleasing small flowers.

Star jasmine is grown extensively and the demand at present far exceeds the supply. Wallflower also proves a good seller and can be had regularly; its fragrance and old associations make it a favorite with many.

Among the latest arrivals in the New York market are variegated stevia, Paper White narcissus and white sweet peas, pansies and an occasional stock of blue centaurea.

Horse show week is so evidently a thing of the past as far as the florist is concerned, that very few are going to the trouble of making any special display for the occasion. A few horse shoes, and here and there a whip and a bit are to be seen. An attractive display consisted of a horse shoe with the center filled in with green; on this were fastened three horses' heads, made with ruscus, the whole design being tastefully festooned with blue and yellow ribbons.

D. RAYBU

THE EXHIBITIONS

St. Lo is.

The St. Louis Horticultural Society opened its first Fall flower show on Tuesday afternoon of last week in the United Railways' new music hall, at the corner of Park and Grand avenues. The weather was all that could have been asked for, and the exhibition was a good one. Every class in the schedule was competed for by local and outside florists. The hall was nicely decorated with flags, and well lighted; concerts were given only in the evenings by the Railway brass band. The attendance throughout the four days was not as large as was expected, the hall being too far south. The show might be called a social success, but not a financial one.

Many trade visitors were in attendance, including J. S. Wilson, of Vaughan's Seed Store, Chicago; J. J. Karins, of Henry A. Dreer, Riverton, N. J.; George Asmus, P. J. Hauswirth, G. L. Washburn, Leonard Kill and August Poehlmann, Chicago; W. W. Coles, Kokomo, Ind.; J. A. Peterson, Cincinnati, O.; S. S. Skidelsky, Philadelphia; P. Olsem and A. F. Pyfer, Joliet, Ill.; A. F. Longren, Des Plaines, Ill.; H. W. Buckbee, Rockford, Ill.; J. E. Ammann, Edwardsville, Ill.; A. C. Canfield, Springfield, Ill.; E. H. Mann, Richmond, Ind.; Herbert Heller, Mrs. M. S. Vesey, and W. A. Manda, South Orange, N. J.

The guests were entertained on Wednesday evening by the members of the society, and the St. Louis ladies entertained the visiting sisters to a theater party the same night, to hear Eddie Foy in his new play, "The Orchid."

The awards were as follows:

FIRST DAY.

Cut Chrysanthemums.

Forty-eight blooms, 8 varieties, 6 blooms in each vase—First, E. G. Hill Company, Richmond, Ind., with Yellow Eaton, Guy Hamilton, Prefect Tillier, Timothy Eaton, Colonel D. Appleton, A. J. Balfour, Angele Laurent, and Mary Mann; second, H. W. Buckbee, Rockford, Ill., with A. J. Balfour, Miss May Seddon, Yellow Eaton, T. Carrington, Mrs. Jerome Jones, Dr. Enguehard, Brutus, and Merstham Red; third, Poehlmann Brothers Company, Morton Grove, Ill., with Timothy Eaton, Dr. Enguehard, White Bonaffon, Yellow Eaton, Golden Wedding, Colonel D. Appleton, W. H. Chadwick, and Maud Dean.

Fifty blooms arranged for effect—First, H. W. Buckbee, with Guy Hamilton; second, Poehlmann Brothers Company, with Yellow Eaton; third, Himmer Brothers, St. Louis, with Major Bonaffon.

Cut Carnations.

One hundred blooms, any one variety—First, E. G. Hill Company, with Afterglow; second, Poehlmann Brothers Company, with White Perfection; third, Chicago Carnation Company, with Aristocrat.

Ten vases, 10 varieties, 25 blooms in each vase—First, Chicago Carnation Company, with Enchantress, Winsor Daybreak, Mrs. Lawson, White Perfection, Aristocrat, Rose Pink Enchantress, Beacon, Red Chief, White Enchantress, and Welcome; second, H. W. Buckbee, with Melody, Beacon, White Lawson, White Enchantress, Lady Bountiful, Rose Pink Enchantress, Winsor, Red Lawson, Enchantress and Mrs. T. W. Lawson; third, Poehlmann Brothers Company, with Winsor, Robert Craik, Enchantress, White Perfection, Rose Pink Enchantress, Mrs. T. W. Lawson, White Lawson, Victory, Aristocrat and Beacon.

Cut Roses.

Six vases, 6 varieties, 25 blooms in each vase, American Beauty excluded—First, Poehlmann Brothers Company, with Bridesmaid, Bride, Killarney, Perle des Jardins, Cardinal, and Mme. Abel Chateau; second, Peter Reinberg, Chicago, with Uncle John, Ivory, Killarney, Mrs. Marshall Field, Richmond and Mme. Abel Chateau.

Fifty American Beauty—First, Poehlmann Brothers Company; second, Peter Reinberg; third, F. H. Weber.

Shaw Premiums.

These prizes are offered by permission of the trustees of the Missouri Botanical Garden under provision of the will of the late Henry Shaw, and amount to \$500, including a \$25 gold medal.

Two plants of each araucaria, pandanus, areca, kentia, latania, rhaps, nephrolepis and phoenix—First, William Schray's Sons; second, Sanders Nursery; third, C. Young & Sons Company.

Eighteen Begonias—First, J. A. Peterson, Cincinnati; second, Bentzen Floral Company.

Fifteen berried plants—First, Koenig Floral Company; second, Vaughan's Seed Store, Chicago; third, Wm. Schray's Sons.

Group of cacti—A. G. Greiner, St. Louis.

Twenty-five blooming plants, 8 or more varieties, chrysanthemums excluded—First, Wm. Schray's Sons; second, Bentzen Floral Company.

Twelve geraniums in bloom, not over 10-inch pots—First, Wm. Boucker; second, Koenig Floral Company; third, Bentzen Floral Company.

Best palm, fern or decorative plant—First, Sanders Nursery; second, Koenig Floral Company; third, C. Young & Sons Company.

Best blooming plant, chrysanthemums excluded—First, J. A. Peterson, with Begonia Agatha; second, Koenig Floral Company, with red salvia.

Group of variegated foliage plants—First, Wm. Schray's Sons; second, Sanders Nursery.

Group of chrysanthemum plants to occupy 50 square feet—First, Koenig Floral Company; second, Wm. Boucker; third, Sanders Nursery.

Twenty-five chrysanthemum plants grown to single stem—First, Vaughan's

A. Manda, South Orange, N. J., with Dracena Mandaiana.

The S. A. F. O. H. silver medal, for the best plant or flower novelty of American origin, was captured by E. G. Hill Company, Richmond, Ind., with the new rose Rhea Reid.

SECOND DAY.

Cut Roses.

One hundred Richmond, arranged for effect—Fred C. Weber, first; Poehlmann Brothers Company, second; Fred H. Weber, third.

Floral Work.

Handle basket of roses—Fred C. Weber, first, with a basket very finely arranged and composed of Mme. Abel Chateau, with ribbon; C. Young & Sons Company, second, basket made of Killarney roses with ribbon to match; Theo. Miller, third, with a very tasteful basket of Bride and white ribbon.

Table decoration, made up of chrys-

Cut Chrysanthemums.

Twenty-five white—E. G. Hill Company, first, with Timothy Eaton; Poehlmann Brothers Company, second, with same variety; H. W. Buckbee, third, with Mrs. Jerome Jones.

Twenty-five yellow—E. G. Hill Company, first, with Yellow Eaton; Nathan Smith & Son, second, with Colonel D. Appleton; H. W. Buckbee, third, also with Appleton.

Twenty-five pink—H. W. Buckbee, first, with Dr. Enguehard; E. G. Hill Company, second, with A. J. Balfour; N. Smith & Son, third, with Dr. Enguehard.

Twenty-five any other color—E. G. Hill Company, first, with Amateur Concell; Nathan Smith & Son, second, with T. Carrington; H. W. Buckbee, third, with Wm. R. Church.

Fifty blooms, not less than 20 varieties on short stems—E. G. Hill Company, first; H. W. Buckbee, second; Nathan Smith & Son, third.

Display of pompons—E. G. Hill Company, first; Koenig Floral Company, second.

The Chicago Carnation Company showed its new yellow chrysanthemum, Golden Eagle, and F. S. Metcalfe, Hopkinsville, Ky., a vase of the new chrysanthemum, Sadie May Stremler, a sport from Queen, with yellow center. Both looked good and attracted attention from the visitors. The new red carnation, Orland P. Bassett, from Bassett & Washburn, Chicago, was on exhibition and made a good showing. It was not entered for competition.

On Thursday, the third day of the show, the judges placed the awards on cut roses and floral displays as follows:

Floral Displays.

Bridal Bouquet.—There were two entries in this class, both made up of lily of the valley with ribbon effect. Fred C. Weber was awarded first prize and C. Young & Sons Company, second.

The display of violets was not as large as was expected. C. Young & Sons Company was first in this class and Fred C. Weber, second.

Cut Roses.

The exhibition in this class was large, the quality shown extraordinarily good, and the judges had a hard time in picking the winners:

Fifty Richmond—Peter Reinberg, first; Fifty Bride—Weiland & Olinger, New Castle, Ind., first; Peter Reinberg, second.

Fifty Bridesmaid—Weiland & Olinger, first; Peter Reinberg, second.

Fifty any other variety, American Beauty excluded—Peter Reinberg, first, with Mrs. Marshall Field; Weiland & Olinger, second, with Mme. Abel Chateau.

Fifty American Beauty, arranged for effect, accessories admissible—Fred C. Weber, first; Fred H. Meinhardt, second.

On Friday exhibition blooms were staged by Heller Brothers, New Castle, Ind.; B. K. & B. Floral Company, Richmond, Ind., and R. Witterstaetter, Cincinnati, O. The carnations staged by B. K. & B. Floral Company were Sarah A. Hill, Mrs. Lawson and Enchantress. Mr. Witterstaetter sent Afterglow and Snowdrift. Heller Brothers exhibited their new rose, W. R. Smith, and Killarney, American Beauty and Bride.

The quality of the stock exhibited throughout was the best ever shown here, especially in chrysanthemum blooms. Roses and carnations were also of extra good quality. The floral displays of the local florists were in fine taste and of good workmanship. The show was the first held by this society when an admission fee was charged; the attendance as a whole was not what was expected, though in everything else the affair was a great success.

ST. PATRICK.

Washington, D. C.

The Florists' Club of Washington opened a three-day exhibition—its annual Fall flower show—in National Rifles' Armory, No. 918 G street, at 2 p. m. November 12. Never before has it been the good fortune of the National Capital to record such a floral exhibition. Two spacious floors of the Armory were entirely filled by the displays of the best in cut flowers and growing plants, with the addition of a large stage filled with one private exhibit alone, and an ante-room of goodly proportions filled by a local grower. The stage scene constituted one of the most strikingly beautiful effects; the curtain composing the background was a full moon in a cloudless sky. Immediately before this the orchestra of seven pieces was arranged, while the remaining space was taken up with a miscellaneous collection of magnificent plants and cut flowers, the private exhibit of Mrs. Gardiner G. Hubbard, of Woodley Lane, D. C., Peter Bisset, gardener.

Gude Brothers & Company occupied

Floral Design Exhibited at Private Show of Adolph Brix, South St. Louis

Seed Store; second, C. Young & Sons Company.

Collection of odd chrysanthemum varieties in plants—First, Koenig Floral Company; second, Sanders Nursery.

Chrysanthemum grown in standard form—First, Vaughan's Seed Store; second, Sanders Nursery; third, H. W. Buckbee.

Chrysanthemum plant, white—First, Vaughan; second, Buckbee; third, Koenig.

Chrysanthemum plant, yellow—First, Vaughan; second, Koenig; third, Buckbee.

Chrysanthemum plant, any other color—First, Vaughan; second, Buckbee; third, Koenig.

Oddest variety chrysanthemum plant—First, Vaughan; second, Koenig.

Largest made up plant chrysanthemum—First, Vaughan; second, Koenig.

The Henry Shaw medal, for the best plant of decided merit for cultivation not previously an article of North American commerce and introduced to such commerce by the exhibitor during the year in which said award is made, value of medal \$25, was won by W.

anthemums. These attracted a great deal of attention, especially from the ladies. All the tables were decorated with yellow chrysanthemums—Fred C. Weber took first; Fred H. Weber, second, and C. C. Sanders, third.

Cut Carnations.

Fifty white—Poehlmann Brothers Company, first, with White Perfection; E. G. Hill Company, second, with White Enchantress; Peter Weiland, third, with White Perfection.

Fifty light pink—H. W. Buckbee, first, with Enchantress; E. G. Hill Company, second; Poehlmann Brothers Company, third, both with Rose Pink Enchantress.

Fifty dark pink—E. G. Hill Company, first, with Afterglow; Chicago Carnation Company, second, with Aristocrat; H. W. Buckbee, third, with Mrs. T. W. Lawson.

Fifty red—Poehlmann Brothers Company, first, with Beacon; H. W. Buckbee, second, with Red Lawson; Chicago Carnation Company, third, with Beacon.

Fifty variegated—Peter Weiland, first, with Mrs. M. A. Patten.

the central floor space with a large Chinese pagoda, which reached to the ceiling. The interior of the pagoda was filled with many varieties of magnificent chrysanthemums, while on the outside, at each corner, was suspended a handsome Chinese lantern, and extending upward were many vari-colored electric lights.

F. H. Kramer used an entire room, separated from the main exhibition halls, with a display of Queen Beatrice rose, and many handsome chrysanthemums.

Other special features embracing decorative art, were three table and mantel decorations, by George H. Cooke, Z. D. Blackstone and George C. Shaffer, each most artistically arranged, but not in competition. Mr. Cooke had his round table decorated with yellow pompon chrysanthemums and ferns, with yellow candelabra, overhung by an umbrella made of the same flowers, and tied with a streamer bow of green ribbon. The mantel was dressed in palms, ferns, large and small chrysanthemums, etc., and over all hung wild smilax.

Mr. Shaffer's square table contained on the first day a large centerpiece of Killarney roses, while the mantel was decorated with white roses, white chrysanthemums, and orchids. On the second day, Killarney roses and lily of the valley, in a large centerpiece, graced the table, and orchids and valley completed the mantel. The third day there was a well-designed re-arrangement of his second day exhibit. On each corner of Mr. Shaffer's table were bunches of roses tied with handsome fancy silk cord, and stuck with large pins, while loosely scattered on the table

the first time. Red, pink and white were the colors. Peter Bisset staged four of his new seedling roses, which were also highly praised, but numerically weak. P. A. B. Wildener, Ogontz, Pa., sent 12 flowers of the new white chrysanthemum, Lynnwood Hall. David Grillbortzer, Alexandria, Va., showed vases of 25 Bride, Bridesmaid and Golden Gate, respectively, and one vase of a hundred Killarney. C. A. Shaffer & Company, Alexandria, Va., staged 25 Golden Gate, Bride, and Richmond, respectively, and a vase of Enchantress carnation. A. B. Garden, Anacostia, D. C., had 25 Ivory roses. J. A. Magruder, Brookland, D. C., a vase of Enchantress carnations.

John E. Haines, Bethlehem, Pa., sent Pink Imperial, Imperial, and his new red seedling carnation No. 6. H. Weber & Sons Company, Oakland, Md., had Toreador carnation, and Weber's Chadwick, a fine yellow chrysanthemum, not in competition. David Bisset, Garrett Park, Md., exhibited several fine vases of single violets. Theo. Deitrich, Anacostia, D. C., named violets including Dorsett, Marie Louise, Princess of Wales, and Governor Herrick.

R. Vincent, Jr., & Sons Company, White Marsh, Md., had an excellent collection of cut pompon chrysanthemums in many pleasing colors.

E. G. Hill Co., Richmond, Ind., had a table of magnificent chrysanthemums, large and small. Of the larger type, Sunburst, Yellow Eaton, Emile David, Mme. Chabanne, Alice Roosevelt and Angele Laurent were most excellent, while among the pompons, Acto was meritorious, and the entire collection was a marvel of its kind.

each plant, were especially creditable. In addition to these, 50 feet or more of table space was filled by the Department with growing plants, embracing crotons, dracaenas, palms, etc.

The Botanic Gardens sent one of the rarest collections of tropical plants which appealed to every one. Anthurium var. rosea was fine; other notable plants among the collection were Curmeria costata, and Platycerium alciorne major, and a pan of Dionaea muscipula, also a collection of single chrysanthemums.

In addition to the table and mantel displays of Messrs. Blackstone, Cooke and Shaffer, each had several separate exhibits. Mr. Blackstone showed an exquisite bride's shower bouquet, made of Bride roses and white bouvardia; a large Autumn basket of mixed fancy chrysanthemums topped out on one side with a hornet's nest and ribbon; a basket of Bridesmaid roses and adiantum, and a splendid collection of crotons, ferns, palms, etc., in bank effect.

Mr. Shaffer had an additional exhibit of two splendid shower bouquets, one for a bride, the other for a maid of honor. The first was made of lily of the valley and orchids, the other of Bridesmaid roses; a large vase of Timothy Eaton chrysanthemums with 6-foot stems was another feature. On the second floor he had miscellaneous plants in bank.

Mr. Cooke exhibited many fine chrysanthemums in a huge bank of ferns, large palms, etc., among Autumn boughs, a large bunch of American Beauty roses, banked by hardy chrysanthemums, ferns, Autumn leaves, etc.

J. R. Freeman had four separate and

fine collection, mostly of tropical plants, including dracaenas, crotons, pandanus, adiantums and begonias.

Edward S. Schmid, 712 Twelfth street, N. W., added a most attractive feature to the exhibition in the form of a large number of his excellent singing canaries in fancy cages. The birds sang continuously both day and night.

The outside judges were: Isaac H. Moss, Charles A. Seybold, F. C. Bauer; the local awards committee consisted of George Field, chairman, Joseph Freeman, Jr., W. Clark, Charles McCauley and John Robertson.

Among the visitors from out of town were S. S. Pennock, Philadelphia; E. G. Hill, Richmond, Ind.; Elmer D. Smith, Adrian, Mich.; and Benjamin Dorrance.

THE AWARDS.

Cut Flowers—Chrysanthemums.

Twenty-five, white—First, Nathan Smith & Son, with Fidelity.

Twenty-five pink—First, Nathan Smith & Son, with Dr. Enguehard.

Twenty-five yellow—First, E. G. Hill Company, with Sunburst.

Twenty-five any other color—First, Nathan Smith & Son, with Dakoma.

Twelve white—First, Nathan Smith & Son, with Merza.

Twelve not darker than Major Bonnafon—First, E. G. Hill Company, with Yellow Eaton.

Twelve darker than Major Bonnafon—First, Nathan Smith & Son, with Modesto.

Twelve pink, lighter than Vivian-Morel—First, Nathan Smith & Son, with President Roosevelt.

Twelve pink, not lighter than Vivian-Morel—First, Nathan Smith & Son, with Vivian-Morel.

Twelve bronze—First, Nathan Smith & Son, with Dakoma.

Twelve any other color—First, Nathan Smith & Son.

Ten varieties pompons—First, E. G. Hill Company; second, R. Vincent, Jr. & Sons Company; third, Nathan Smith & Son.

Roses.

Twenty-five Richmond—First, C. A. Shaffer. Twenty-five Bride—First, D. G. Grillbortzer. Twenty-five Bridesmaid—First, D. G. Grillbortzer. Twenty-five Killarney—First, Mrs. Hubbard. Special prize for 100 Killarney, D. G. Grillbortzer. Twenty-five any other variety—First, D. G. Grillbortzer, with Golden Gate; second, A. B. Garden, with Ivory; third, C. A. Shaffer, with Golden Gate.

Carnations.

Fifty Enchantress—First, C. A. Shaffer.

Fifty striped or variegated, except those with yellow ground—First, John E. Haines, with Imperial.

Fifty dark pink, introduction of 1907—First, John E. Haines, with Pink Imperial.

Twenty-five flesh pink—First, Mrs. Hubbard, with Enchantress.

Twenty-five light pink—First, J. A. Magruder, with Enchantress.

Twenty-five dark pink—First, Mrs. Hubbard, with Pink Lawson.

Twenty-five crimson—First, Mrs. Hubbard, with Robert Craig.

Twenty-five red—First, Mrs. Hubbard, with Harlowarden.

A certificate of merit was awarded John E. Haines for his red seedling No. 6.

Orchids.

Collection of cut blooms—First, George Field, also receiving certificate of merit.

Best 300 violets—David Bisset, first, with Farquhar; Theo. Deitrich, second, with Dorsett.

Plants.

Best palm—Mrs. Hubbard, first.

Best decorative plant—Mrs. Hubbard, first, with Alsophila australis.

Collection of Gloire de Lorraine begonias—Mrs. L. Z. Leiter, first.

Collection of ferns—Mrs. Leiter, first.

Collection of rex begonias—Mrs. Leiter, first.

Special Prizes.

Department of Agriculture, special certificate for group of pompon chrysanthemums, and special mention for group of decorative plants.

Mrs. Hubbard first prize for group of palms.

Miscellaneous group—Wm. R. Smith, U. S. Botanic Garden, first, on collection of single chrysanthemums; Mrs. Hubbard, special mention.

Best six blooms of a new rose never exhibited in this country previous to this season—John Cook, first, no scoring.

Best 25 blooms any variety not in commerce—John Cook's seedling, scored 86 points; Robert Scott & Son's Mrs. Jardine, 81 points; E. G. Hill Co.'s Princess, 79 points.

J. L. CARBERY.

Recent Dahlia Display at Establishment of R. Vincent, Jr. & Sons Company, White Marsh, Md.

were shapely rose buds and ferns. Pink candelabra of feather effect added a charm to the display.

Mr. Blackstone on the first day of the show had his finely decorated table and mantel in rustic effect, with Killarney roses, and on the second, among the palms, ferns, etc., which nearly hid from view the mantel and mirror, were freely scattered Richmond roses and White Ivory chrysanthemums, with wild smilax above all. The table was also decorated with white chrysanthemums and Richmond roses, in a flat mossed bank, with fern. The same scheme was adhered to on the third day, but arranged in a flat basket. Red candelabra finished out the effect.

The three tables, ware, linen, etc., all complete, were supplied by Chas. Rauscher, the well known caterer.

In the general exhibit the Robert Craig Company, Philadelphia, showed a specimen plant of Ficus pandurata. Wm. P. Craig, Philadelphia, specimen plant of Nephrolepis Amerpohli. E. G. Hill Company, Richmond, Ind., exhibited for the first time in Washington their new pink seedling rose Princess, also their new red rose, Rhea Reid, of which only a few blossoms were shown at the rose show in March. Robert Scott & Son, Sharon Hill, Pa., showed a vase of Mrs. Jardine. John Cook, Baltimore, Md., had several of his new seedling roses on exhibition, some for

A. N. Pierson, Cromwell, Conn., staged two vases of chrysanthemums, one of lily of the valley, and one of Killarney roses, not in competition.

S. S. Pennock-Meehan Company, Philadelphia had a most liberal as well as an excellent assortment of mixed chrysanthemums, carnations, etc., and a vase of 100 long stemmed American Beauty roses, none of which was in competition.

J. A. Peterson, Cincinnati, sent specimen plants of begonias and adiantums. Nathan Smith & Son, Adrian, Mich., a large collection of magnificent chrysanthemums, in long stem singles and pompons. The former collection contained vases of Fidelity, Col. D. Appleton, Dr. Enguehard, Crocus, Modesto, Vivian-Morel and a special vase of new mixed varieties, Dakoma, Merza, Modesto, President Roosevelt; also a splendid collection of mixed pompons.

Ley & Bickings, Good Hope Hill, Anacostia, D. C., made an excellent showing with their display of Adiantum hybridum which Mr. Ley's father originated about 10 years ago; they also showed splendid fronds of cut N. Whitman, and Adiantum hybridum.

The Department of Agriculture took considerable floor space with a magnificent collection of pot grown chrysanthemums of the large and small varieties. Two pots of Mrs. Clay Frick, with about 50 or more fine flowers to

very praiseworthy exhibits; including a large table of mixed flowers and pot plants, cut chrysanthemums, lilies, araucarias, carnations, Killarney and other roses, L. longiflorum, cyclamen, etc. One of Mr. Freeman's groups contained as a central figure a plant of Kentia Forsteriana, which he purchased in 1881; it is now a grand specimen, 16 feet tall, and has a spread of 14 feet.

F. H. Kramer had in addition to his display filling a whole room, several collections of very excellent single stem chrysanthemum plants, and cut roses.

George Field, Brightwood avenue, D. C., showed a group of the best orchids; his Vanda coerulea was particularly commendable and was pronounced by experts to be the best of its kind ever seen.

H. A. Dreer, Philadelphia, sent a mixed collection of plants to be sold at the close of the show for the benefit of the Associated Charities.

A. Gude & Brothers Company, in addition to the large Chinese pagoda, had an excellent vase of home-grown American Beauty.

J. H. Small & Sons had two displays of ferns, etc., chief among which was Nephrolepis Whitman, Scottii, and Boston fern.

Mrs. Gardiner G. Hubbard, and Mrs. L. Z. Leiter scored high as private exhibitors. Mrs. Leiter, for whom Mr. Siddons is grower, staged an especially

November 23, 1907

Indianapolis.

The three flower shows held at Henry Riemann's, A. Wiegand & Sons' and Bertermann Brothers Company respectively, proved to be very successful from all standpoints. Henry Riemann, at his conservatory, East and Morris streets, showed the throngs of visitors numerous houses of well-grown chrysanthemums, roses and miscellaneous stock. His display of cut flowers, including the various new roses and carnations, brought forth much favorable comment from the public as well as the trade. Mr. Riemann states that he will be ready for the large flower shows next season, with a number of seedling chrysanthemums selected from those to be seen at his place last week.

Bertermann Brothers Company's flower show, with its many features, enabled the masses visiting their place to view the flowers in excellent arrangement. All the attractions of a large show were on hand—table decorations, displays of orchids, violets, pompons, baskets and wreaths in generous numbers. A rose table of fifty vases, including Mrs. Marshall Field, the Princess, Rhea Reid and others of the new roses, received much attention from the public. A fine selection of orchids from Lager & Hurrell, Summit, N. J., staged in an effective manner was a study for the visitors. Bassett & Washburn's new carnation, Orlando P. Bassett, carried off the honors in the carnation display. Thomas Knipe of Kokomo, Ind., showed several vases of fine Princess of Wales violets.

A dining table decorated with Killarney roses and ribbons to match, also favors of the same rose, was a feature with its electric centerpiece in the form of fruits and flowers emitting a soft white light. The table accessories were valued at \$750.

The Indiana State Florists' Association held its regular Autumn exhibit at the conservatories of A. Wiegand & Sons. The display was a uniformly good one and drew many visitors. A. Wiegand & Sons, in honor of the occasion, decorated their store in a suitable manner, also taking occasion to make a good wedding and table display. A vase five feet in height with the body entirely of chrysanthemums and containing a large bunch of American Beauty roses, was one of the attractions. The judges, S. A. Baur and Carl Sonnenschmidt, gave entire satisfaction. The premiums were awarded as follows:

Cut Chrysanthemums.

Twenty-five blooms, any one variety—First, E. G. Hill Company, with Angele Laurent; second, T. O. Tauer, Lebanon, with Marion Newell; third, Baur & Smith, with the same variety.

Ten, blooms white, one variety—First, E. G. Hill Company, with Timothy Eaton. Ten blooms pink, one variety—First, W. Bitler, Kokomo, with Dr. Enguehard; second, E. G. Hill Company, with A. J. Balfour.

Ten blooms yellow, one variety—First, E. G. Hill Company, with Yellow Eaton; second, Bitler, with Colonel D. Appleton.

Ten blooms any other color, one variety—First, E. G. Hill Company, with Amateur Council; second, Baur & Smith, with Matchless.

Ten blooms in 10 varieties—First, E. G. Hill Company.

Twenty-five sprays pompons in variety—First, E. G. Hill Company; second, Baur & Smith.

Roses.

Twelve Bride—First, Heller Brothers; second, Weiland & Olinger. Twelve Bridesmaid—First, Heller Brothers; second, Weiland & Olinger. Twelve American Beauty—First, Weiland & Olinger. Twelve any variety not named above—First, Heller Brothers; second, Weiland & Olinger.

Carnations.

Twenty-five white—First, B. K. & E. Floral Company, with White Perfection; second, Baur & Smith, with the same variety.

Twenty-five pink, lighter than Lawson—First, B. K. & E. Floral Company, with Charles Knopf; second, Baur & Smith, with Rose Pink Enchantress.

Twenty-five, Lawson or darker—First, R. Witterstaetter, with Afterglow; second, Stuart & Haugh, with Mrs. Lawson.

Twenty-five scarlet—First, B. K. & E. Floral Company, with Victory; second, E. G. Hill Company, with the same variety.

Twenty-five any other color—First, Stuart & Haugh, with Harry Penn.

Violets.

For 100 double—First, Smith & Young; second, A. Wiegand & Sons.

For 100 single—First, A. Wiegand & Sons.

Plants.

Three plants Begonia Gloire de Lorraine—First, J. A. Peterson; second, A. Wiegand & Sons.

Three plants cyclamen—Second, A. Wiegand & Sons.

Visitors to the flower shows included: J. A. E. Haugh, Anderson, Ind.; Herbert Heller, New Castle, Ind.; Thomas Knipe, Kokomo, Ind.; Charles Knopf, Richmond, Ind.; S. A. Baur, Los Angeles, Cal.; J. S. Stuart, Anderson, Ind.; William Elverson, New Brighton, Pa.; T. O. Tauer, Lebanon, Ind.; William Walker, Louisville, Ky.; J. R. Gauze, Richmond, Ind.; E. F. Hensley, Knightstown, Ind.; John Shepard, Richmond, Ind.; William Hyatt, Anderson, Ind.; Mr. Salzman, Princeton, Ind.; A. S. Pitt, Crawfordsville, Ind.; Henry Riemann, Connersville, Ind. I. B.

Providence, R. I.

The annual Fall exhibition of the Rhode Island Horticultural Society was held November 14 and 15 in the Churchill House on Angell street, and was one of the finest shows ever given by the organization. The attendance was unusually large. The display of preserved jellies and canned fruits has proven a departure that has appealed directly to the women and was an attractive feature.

One of the principal attractions was a vase of carnation Afterglow, exhibited by William Nicholson, Framingham, Mass., for which the society awarded its gold medal.

Other premiums awarded were as follows:

Chrysanthemums: Cut flowers, 25 blooms—Col. Appleton, first, Seth A. Borden, Fall River, Mass. Golden Dome, first, John A. Macrae, Providence. Jerome Jones, first, John A. Macrae; second, Elmer E. King, Attleboro, Mass. Timothy Eaton, first, Elmer E. King; second, John A. Macrae. Any new variety introduced in 1907—First, John A. Macrae. Display of cut blooms, filling 50 bottles—First, Seth A. Borden.

Twelve cut blooms, distinct varieties—First, Seth A. Borden. Six cut blooms, distinct varieties—First, Seth A. Borden; second, E. E. King.

Best single, white flower—First, Seth A. Borden; second, E. E. King. Best single bloom, pink—First, Seth A. Borden; second, E. E. King. Best single bloom, yellow—First, E. E. King; second, Seth A. Borden. Best single bloom, any variety—First, Seth A. Borden. Best six vases, 10 blooms each, on long stems, in variety, all named—First, E. E. King; second, John A. Macrae; third, Seth A. Borden. Best collection of cut blooms—First, L. A. Bloomer, Pawtuxet, R. I.

Carnations: Display of cut blooms, with foliage, not less than six varieties—First, J. H. Cushing, Quindnick, R. I.

Twenty-five named, crimson variety—First, John A. Macrae; second, Mrs. H. A. Jahn, New Bedford, Mass. Twenty-five dark pink—First, John A. Macrae; second, same exhibitor. Twenty-five light pink—First, John A. Macrae; second, J. H. Cushing. Twenty-five scarlet—First, J. H. Cushing; second, John A. Macrae. Twenty-five white—First, John A. Macrae; second, Mrs. H. A. Jahn. Twenty-five any other color—First, John A. Macrae; second, J. H. Cushing. Twenty-five any new variety introduced in 1907—First, J. H. Cushing; second, Mrs. H. A. Jahn. Vase of 50 Enchantress—First, J. H. Cushing; second, John A. Macrae.

Orchids: Best display, Seth A. Borden; second, L. R. Peck, West Barrington, R. I. Best single specimen—First, Seth A. Borden.

Most artistically arranged group of chrysanthemums, palms, ferns and foliage plants—First, William Appleton, Providence; second, William Hill; third, Nathan D. Pierce, Norwood, R. I.

Violets: Best 100 Princess of Wales—First, Albert Holscher, Johnston; second, L. A. Bloomer; third, Timothy P. Dodge. Best 100 of any other variety—First, Albert Holscher; second, Timothy P. Dodge; third, George H. Walker.

Gratuities were given as follows: Nine vases of carnations, special first premium, S. J. Goddard; special first premium on violets, George H. Walker; for collection of hardy chrysanthemums, George H. Walker; vase of white carnations, Mrs. H. A. Jahn; collection of ferns, F. E. Luther; vase of roses, F. Macrae & Son; vase of chrysanthemums, White Bonafon, E. E. King; 25 blooms, Gold Mine, Charles Faust, Cranston.

William Appleton was superintendent of the hall, and carried out all the details of arrangement in a satisfactory manner. A. A. Hixon, Worcester, Mass., was judge.

CHRISTMAS Invitation Cards

Every retailer in the land makes special effort at Christmastide to draw the attention of customers and others to the choice stock of plants, flowers, etc., which he has provided for that festive occasion.

To facilitate the efforts of the dealer, the A. T. De La Mare Ptg. & Pub. Co., proprietors of The Florists' Exchange, have prepared a set of four invitation cards, each one printed in four colors, as follows:

A wreath of Holly tied with red ribbon and showing holly foliage and berries in their natural colors.

A wreath of Boxwood tied with red ribbon and finished off with sprays of the Pussy Willow; all in their natural colors.

A bunch of Mistletoe showing foliage, berries and stem; all in their natural colors; the cut is vignette and very attractive.

A cluster of Christmas Bells pendent on a spray of Holly; all in their natural colors.

The cards are on the finest stock (size 4x5 ins.) and the printing is most excellent. Baronial envelopes of fine quality, unprinted, are furnished with each order. In addition, to make the work complete, we furnish any wording you wish on the invitation, which latter will be printed in black ink, unless otherwise ordered.

Delivery F. O. B. New York at the following prices:

100 Cards and Envelopes,	\$5.00	500 Cards and Envelopes,	\$15.00
250 " " "	10.00	1000 " " "	30.00

Each Additional 1000, \$25.00

On orders of 100, 250 or 500 we furnish your selection of any one design out of the four; additional designs, however, can be selected at an extra charge of One Dollar each. On orders for 1000 or over we furnish your choice of any two designs.

If interested, send at once for a set of sample Invitation Cards. They are the finest designs and the best money-makers that have ever been provided for the trade and, at the prices quoted, are very cheap.

We expect to be deluged with orders for these cards; therefore, would advise you to act promptly. Address

Los Angeles, Cal.

The semi-annual exhibition of the Southern California Horticultural Society was held in Blanchard Hall, November 7, 8 and 9, and was a great success. There were no floral pieces of any sort, nor were there any decorated tables; nothing but flowers and plants as they grow here in a natural way in the open air.

Roses grown by the California Rose Company, Pomona; Howard & Smith and The Arapahoe Nursery of this town, were equal to the best the writer has ever seen anywhere. The first named took first prize.

The carnations of the Oceanside Floral Company and those of the Whittles Flower Gardens were perfection in form, color, and length of stem.

There were but two entries of chrysanthemums—Dr. Barlow, an amateur of Sierra Mabra, and the Oceanside Floral Company. Both were fine, the doctor taking first prize.

Sturtevant of Hollywood, our aquatic plant grower, had a finer display of nymphaea blooms than ever before. His Victoria regia foliage was not as large (though quite as interesting) as in other seasons, because of our cool summer. He showed very fine Schubertia grandiflora flowers, also.

C. P. Taft was there with lemon guavas the size of a hen's egg and of the same shape, thoroughly ripe, alligator pears—Persia gratissima—of good size, and the new delicious fruit, Feijoa (pronounced as though spelled Fa-e-ho-a) Sellowiana, also thoroughly ripe, though of a bright green color.

The botanic exhibit of the writer occupied one side of the hall and proved of great interest to the student of plant life as it grows in this part of the country, to the professors of botany in our educational institutions, and to those who have homes and want to plant them with ornamental stock, yet do not know the names of such things as they desire for their purpose.

Howard & Smith were there in all their originality of display. They make a specialty of bedding stock. Their Ger-

2 Duane Street, New York

bera Jamesoni were the great attraction of the show because of the brilliant colored flowers. They also had some fine perennial phlox; the heads of bloom were immense. A strange thing about this plant is that no one else about here seems to be able to grow it to the same degree of perfection as this firm does.

The Palm Nurseries of South Pasadena exhibited a fine lot of ornamental stock, none of which was especially grown for the occasion, being only samples of what may be seen at any time in large quantities at the nursery. The most striking plant in their exhibit was a Ficus pandurata. As a decorative foliage plant it certainly is superior to anything grown in these parts.

That the readers of The Florists' Exchange who live in less favored climes may know of the wide range of plant life on exhibition collected from our parks and gardens I mention a few: Acalypha marginata, Alpina nutans, Hedychium coronarium, Schubertia grandiflora, Gynura aurantiaca, Thunbergia Harrisii, or grandiflora, Dombeya natalensis (these two last named just now coming into flower), Jasminum grandiflorum, Gerbera Jamesoni, Passiflora princeps and the large flowering Clematis.

The vases used at this show were of a different pattern and decidedly superior to any receptacle the writer has ever before seen for holding cut flowers for exhibition purposes—no tipping over, spilling the water, and spreading the exhibits over the tables.

Club Meeting.

The annual meeting of the Gardeners and Florists' Club, held on Tuesday evening last, was one of the best attended of the season, nearly 150 members being present. The chief attraction was the election of officers. A regular wrangle took place as to the proper interpretation of the by-laws; the nominating committee having brought in only one name for some of the offices was the main cause of this. The following officers were finally elected: President, Thos. H. Westwood; vice-president, Wm. Downs; secretary, W. N. Craig; treasurer, Ed. Hatch, executive committee, Peter Miller, J. K. M. L. Farquhar, Emil Johansson and Robert Cameron. With the exception of Messrs. Downs, Farquhar and Johansson all were re-elected. Several new members were added, and there were some fine exhibits on the tables, including a vase of new violet Boston from William Sim, which was awarded a report of superior merit. M. A. Patten showed some seedling carnations, receiving honorable mention for two crimson varieties—No. 133 and No. 50-24.

It was announced that the landscape gardening class would start December 3, and a number of members have signified their intention of attending.

William Sim is having good success with his new violet Boston, which is much superior to any of the older varieties. It is his intention to introduce this novelty soon.

Daniel Cliffe is building a new greenhouse for C. A. Stone, Plymouth.

J. W. D.

Leominster, Mass.

Joseph Fuller has a fine greenhouse establishment at this place, as well as one at West Leominster. He has been in business for over 24 years and owns considerable property around this town. At Fitchburg he has a nice store in addition to his Leominster business. This year he has built two new houses at his place in the suburbs, where he has an asparagus farm. Mr. Fuller reports stock in good shape and business brisk.

Scarlet

There are seven reasons why you should grow DEFIANCE and they are:

- 1st. It is by far the best color ever seen in a scarlet Carnation; it is the true velvety scarlet and not red; it will average 3 inches in diameter throughout the season.
- 2nd. It is unexcelled for productiveness by any Carnation in commerce to-day.
- 3rd. It is a clean and upright grower, producing an abundance of high grade flowers without any special treatment.
- 4th. It is in perfect health, and not subject to rust or any other disease, which is very prevalent among scarlet varieties.

- 5th. It is of perfect form; blooms are very symmetrical, center nicely built up and very full, but not so as to appear crowded; stems are very stiff and wiry, holding the flowers perfectly erect.
- 6th. It is a scarlet for the entire season; it comes into crop in October and continues through the entire season; it does not lose its color in bright sunlight, in fact, it improves in bright sun when other reds fade.
- 7th. It is the only scarlet to-day, and by growing DEFIANCE you will be satisfied, as it has no faults, is full of vigor and will do the work where other scarlets fail.

Strong, well-rooted cuttings, every one guaranteed, \$12.00 per 100, \$100.00 per 1,000

ROOTED CUTTINGS \$12.00 per 100, \$100.00 per 1,000. FAUST, "A brilliant scarlet, very prolific, many plants last Christmas having 20 buds and blooms to the plant. Best of its color for commercial use." ROOTED CUTTINGS \$6.00 per 100, \$50.00 per 1,000. REMEMBER WE GUARANTEE SATISFACTION Address all orders to JAMES D. COCKCROFT, NORTHPORT, LONG ISLAND, N. Y.

KEEP TO THE FRONT

By getting varieties you know have all the good qualities. ANDREW CARNEGIE (Scarlet Harlowarden) Is the one you know is good from the past record of the parent. The color is the most desirable shade—the ideal scarlet. Clean, healthy stock for early delivery. \$12.00 per 100; \$100.00 per 1000 CHICAGO CARNATION CO., A. T. PYFER, Mgr., JOLIET, ILL.

Columbus, O.

The annual chrysanthemum show of the Columbus Florists' Club, which was held on Tuesday evening, November 12, by far surpassed that of last year in attendance, as well as in number and quality of the exhibits, although there were many prominent firms of the city who, it would seem, ought to have been represented, but were not. There were over 30 vases of magnificent blooms staged, among them being two fine collections from the Franklin Park Floral Company not entered in competition. The varieties principally were such old standbys as Colonel D. Appleton and W. H. Chadwick, with a few Timothy Eaton and other sorts thrown in. Quite a little stir was caused among the professional florists when it was found that an amateur grower, C. P. Torrey, had carried off the two first prizes in section A.

The members were so much encouraged by the interest taken and results that they are already beginning to figure on holding a public show on a much larger scale next year. Following is a list of the awards:

Exhibition—Six cut blooms in three varieties—First, C. P. Torrey; second, The Munk Floral Company.

Three blooms in three varieties—First, C. P. Torrey; second, J. H. Williams.

Commercial scale—Six blooms, six varieties—First, Sherman Stephens; second, J. H. Williams.

Three blooms, three varieties—First, The Munk Floral Company; second, S. Stephens.

Nine blooms, three varieties—First, The Munk Floral Company; second, Emil Metzmaier.

Three blooms, one variety—First, The Fifth Avenue Floral Company; second, The Munk Floral Company.

Six cut blooms—Munk Floral Company.

Twelve cut blooms—Same exhibitor.

No More Split Pinks

The Problem is Solved by
The M. & D. ARTIFICIAL CALYX

Is simple to apply and remove. The grower can select the buds which are liable to split and apply the Calyx, thus enabling him to harvest his entire crop.

Is constructed of spring brass that will last forever—the first cost the only cost.

Is capable of repeated use during the same season and as a business proposition you cannot afford to do without it.

CARNATIONS

Rooted Cuttings
All leading varieties, for delivery after January 1, 1908. Fine Stock.
SMITH & GANNETT, - Geneva, N. Y.

(72) **Plant for Name.**—I enclose some leaves of a plant which is said to be the Transvaal daisy; kindly give me the proper name, as I would like to get some plants of it. A. W. South Carolina.

—The correct name of the plant, leaf of which was sent for examination, is *Gerbera Jamesoni*.

(73) **Paint for Greenhouse Pipes.**—Please inform me what is the best coating (paint) for the heating pipes in a greenhouse as a preventive against rust and which does not hinder the radiation of heat from the pipes? New York. C. P. C.

—Lamp black and boiled linseed oil mixed to the consistency of paint and put on the pipes will prevent rust.

(74) **Tuition in Floral Design Work.**—Where can I learn to be a skilled designer? I have done some simple work, but wish to become an expert. Penna. M. C.

—The best way to become skilled in design work would be to spend some time in a first-class retail store where such work is done, so as to get a practical knowledge of the business.

(75) **Early White Chrysanthemum.**—What is the best early white chrysanthemum other than Polly Rose? M. C.

—Of the white varieties there does not seem to be as yet any sort the superior of Polly Rose for quality and earliness. There are two new ones in the field, however, that we think might be worth trying; these are October Frost and Early Snow.

(76) **Differences in Ivory Chrysanthemum.**—I have been growing a good many Ivory this year propagated from stock I had last year, and note a great difference in the form of flower, some being the usual incurved, some almost like Polly Rose and others reflexed; some also show open centers. Can you give reason for this? I am saving best ones for stock. M. C.

—We cannot account for the variability in the character of the Ivory referred to, unless it be that through propagation of the same stock year after year the variety has deteriorated. Perhaps it would be a good plan to procure stock from some other source for another season's supply.

(77) **Carnations in Chrysanthemum House.**—Kindly inform me if it would be advisable to plant carnations in my chrysanthemum house, using the same soil? We used liquid sheep manure and nitrate of soda as fertilizers for the chrysanthemums. J. A. T. Kentucky.

—It would not be advisable to plant carnations in the same soil as that in which chrysanthemums have been grown. There might be plenty of food in the chrysanthemum soil, but the soil would be in an unfit state mechanically, however rich it might be, for carnations, and we would advise putting in new soil, by all means, in which to plant the carnations.

(78) **Dracenas for Propagating Purposes.**—Please give me a list of the most desirable dracenas to raise for canes for propagating. I have *D. terminalis* in large numbers and wish to add as many other kinds as can be disposed of in quantity. W. H. H. Porto Rico.

—While we do not know just what success is to be had from raising dracenas for canes for propagating, we may say that the varieties mostly used for decorative purposes at the present time are Lord Wolsley, Sandereana, Lindeni, Massangeana, fragrans, australis and amabilis.

(79) **Carnations.**—I send you carnation leaf; kindly state what disease it is affected with and the remedy. Also leaf with small white fly; what are they, and how may I exterminate them? New York. S. M. F.

—The carnation leaf is badly affected with rust. This disease is not considered dangerous any more, and can be kept in control by picking off all affected

leaves and doing no more syringing than is absolutely necessary. The white fly is rather a hard problem to solve. We would recommend the use of some good tobacco extract, properly diluted, and to syringe the plants with it every two or three days, keeping up the syringing indefinitely until the flies are checked.

Kindly let me know how much a carnation brings in the way of cut flowers and how far apart the plants are supposed to be set. E. R. New York.

—Carnation plants differ in their productiveness according to the variety and quality of blooms. Some of the smaller-flowered kinds will bear many more flowers than will plants of the fancy varieties. For instance, Prosperity will not throw more than half as many flowers as will some of the smaller-flowered sorts. Of the medium-sized kinds anywhere from 15 to 25 flowers per plant can be cut when grown carefully. Of course, much depends upon the skill of the cultivator. About ten by twelve inches apart is the right distance for most carnations; twelve inches between the rows and ten inches in the rows.

(80) **Daphne odorata.**—Could you give me any information as to the proper treatment of *Daphne odorata*? I have been trying for the past three years to grow it, but have failed completely. The plants are kept in a cool house, and have been potted in a mixture of leaf mold, sand and loam, with additions of a little well-rotted cow manure. Most of the plants are in a very bad condition and have made practically no root at all. What can be done to save them, and what treatment should the plants have? R. Conn.

—*Daphne odorata* is not a very easy subject to handle, and the best way would be to give treatment somewhat along the lines of that given azaleas. Keep the plants in a cool house; by cool we mean about 45 degrees until the middle of January; then give them a slightly warmer house. Do not repot them unless the pots are filled with roots, and do not let the house be any warmer than 50 degrees at night. Avoid over-watering, but give regular syringings on bright days. By the first of June plunge them outdoors in some sheltered place where they may remain all Summer, and if they are growing luxuriantly, a watering with weak liquid manure once a week will be beneficial.

(81) **Wallflowers for Christmas.**—I have a lot of wallflowers in 4-inch pots, nicely rooted. Please tell me what treatment I should give them in order to have them in flower for Christmas? New York. A. L.

—The best thing to do with the wallflowers would be to put them in a light greenhouse where the temperature does not go above 50 degrees at night, giving air freely in the daytime whenever the temperature reaches 60 degrees. In growing wallflowers under glass, care must be taken that they are never over-watered. If they are anywhere near the heating pipes, they must be sprayed regularly every day to keep them from the attacks of red spider. Plenty of light, as much fresh air as possible and a temperature at night not exceeding 50 degrees is about what suits wallflowers best. If they do not come in for Christmas under these conditions, they will come in shortly after, anyway. It would not pay to attempt to force them, as the wallflower will not stand forcing to any extent.

WIETOR BROS.

CHICAGO

THE LARGEST GROWERS OF CHRYSANTHEMUMS IN AMERICA

And this year our List of Varieties and Quality of Stock was never surpassed. As to Quantity, our crop is estimated at 125,000 High Grade Blooms. All Colors. Prices Right.

We had plenty of Early. We have Plenty of Mid-Season. We shall have Plenty of Late.

Chrysanthemum Stock Plants Now Ready

Our Stock of Roses and Carnations is fully up to its usual Standard of Perfection.

WIETOR BROS. No. 51 Wabash Ave. CHICAGO

CHRYSANTHEMUMS

Late November.

The shows over, all blooms harvested except the very late sorts, and we are ready to take stock for another year, for it is absolutely necessary for every chrysanthemum grower to know "where he is at," and to know it now, so that his knowledge may be of value and ready for use early in 1908.

Going over our commercial list in whites we shall retain Polly Rose, Clementine Touse, Alice Byron, Timothy Eaton, W. H. Chadwick and Jeanne Nonin. To these we shall add in large quantity, Miss Clay Frick, Mlle. Angele Laurent, October Frost and Money-maker. These ten cover the season nicely, and, without an exception, are profitable varieties. If Polly Rose could be induced to lengthen its stem, it would stand on a par with the very best.

In yellows we shall still grow Monrovia, Crocus, Colonel D. Appleton, Sunburst, Yellow Eaton, Golden Chadwick, Golden Wedding, and Mrs. Buettner. We shall add Glitter and Polypheme to this list, believing that they have won positions among permanent commercials.

For pink we shall again grow Glory of the Pacific, Roserie, Mary Mann, Mlle. Chabanne, Mlle. Rosette, and shall add M. F. Plant and Miriam Hankey.

We have grown Matchless as best red for several years, but the bud that gives the best stem does not give the best color, so that next year we shall divide between Amateur Conseil and Prefet Tillier.

The class of commercial bronzes has been so enriched that we only wish that they were needed in greater quantity. There is a delicious richness in their tints that is bound to make them increasingly popular. There are Ethel Fitzroy and Dakoma, two of the most brilliant; Ongawa and Mme. L. Roussel, two of the grandest in build and in rounded form of petal, and Incandescence, a wonderfully easy doer in scarlet and bronze, of Viviani-Morel form, with foliage like the old Eugene Daille-douze.

A review of the exhibition sorts is hardly needed here, as the majority of exhibitors have been to the shows and made lists of the winning collections. Annie Hamilton, Miss Clay Frick, President Loubet, Mme. Armand Detroyat, Mme. G. Montigny, M. Loiseau-Rousseau, Miriam Hankey, all of last year, besides the new bronzes named above, are splendid show varieties and should be in all collections, as well as the few surprises of the year in the Wells-Pockett set with a few of the French sorts previously described.

In planning for next year's commercial cutting don't discount the really good pompons, for they are growing in

popularity each year. Who can fail to surrender to their charm? They are so riotously profuse in quantity, so durable in texture, so clear and brilliant in color; they are truly artistic, and in their season are bound to be as popular as the carnation.

The singles, too, should be grown and experimented with, for careful culture will give these a high place of their own in popular favor, when something less pretentious than the big commercials is needed. Their simplicity of form, combined with great clearness of color, renders them extremely artistic in effect.

It comes to one with a shock that the new year is so close at hand, and a lesson learned in the chrysanthemum houses is that many of our showiest varieties must have an early start to bring character blooms; so give your stock their well-earned rest during the short days of the year, so that you may get good, strong dark cuttings in February. Make your lists approximately of the kinds and numbers of each that you will grow and work toward it. The day of hap-hazard has gone by for the successful grower.

S. A. HILL.
Richmond, Ind.

CHRYSANTHEMUM

STOCK PLANTS

10c. each, \$1.00 per doz., \$6.00 per 100.

REVIEW OF THE MARKET

NEW YORK.—It has never been our lot to record a more demoralized condition of affairs in the cut flower market than obtains at the present time. There is absolutely nothing in the way of commercial flowers that is bringing a fairly decent price. What makes the present dull period so particularly incomprehensible is the fact that this has been Horse Show week, it has seen the commencement of the Grand Opera season, and we are so close to Thanksgiving Day that one would think the flower business would be in full swing at this time. There is still coming in a heavy supply of chrysanthemums, and to give an idea of market conditions, we saw splendid blooms of the variety Gold Mine offered at 15c. each, flowers that were fully equal in quality sent in by the same growers last year, for which 40c. and 50c. each were realized. This comparison will serve to illustrate conditions not only for chrysanthemums, but roses, carnations and other flowers. There is a plentiful supply of all commercial varieties of roses, and from the number of the variety Ivory coming in from the Madison, N. J., district, it would appear that many growers there have discarded the Bride in favor of Ivory. In order to make clearances on roses, slips and job lots are being moved at any figure almost that buyers and speculators will offer, so that our prices in the regular table do not give any adequate idea of what general averages may be.

Carnations are no better off in the way of values than roses. There is a splendid supply coming in, but the flowers are bringing much less per 100 than has been noticed for quite a few years during November. Lilies, callas, lily of the valley and orchids are all too plentiful for the demand, and the same may be said of violets. On Monday night, the opening of the Horse Show, probably not one-fifth of the flowers that reached the market were disposed of, and the following morning they were freely offered at from 40c. to 50c. per 100. Without a doubt the retail florists are feeling a diminution of trade through the lack of ready money among the public at large, and it is to be hoped for the good of our business that these clouds of distrust and lack of confidence in business circles will fly away and that the flower trade will resume its normal condition in the very near future.

CHICAGO.—The market for the past week though healthy has not been very strong, with the possible exception of long stemmed American Beauty roses which seemed to be off crop, with a good demand.

Carnations, longiflorum lilies, lily of the valley, violets and all the other roses are in full supply, and chrysanthemums a trifle overdone. W. K. W.

NEWPORT, R. I.—Business has been quite satisfactory, more so perhaps than we feared it would be considering the many adverse circumstances buyers were up against. Stock of every kind is coming in in sufficient quantity and of good quality. Roses have been, in many instances, of only fair quality in the recent past, but lately there is a noticeable improvement. Carnations of good quality are coming into market from some local growers.

By reason of the flooding of the city with palms from the outpouring of the Hodgson greenhouses, plant sales of other than these have been but few during the past week. We have seen the best of the chrysanthemums for another season, but they were good while they lasted. D. M.

BOSTON.—Flowers are yet very plentiful, but the market is firmer and the wholesalers are doing a business which compares favorably with that of any former year. While trade among the retailers in the city has been very dull yet in the surrounding New England towns and cities there has been a fairly good demand for flowers from this wholesale market. Chrysanthemums are yet to be seen in large numbers, but the close of the season is drawing nearer and by the end of the week the quantities will have considerably diminished.

American Beauty roses are very good and prices have advanced somewhat over those of a week ago. Other roses

are plentiful and there are fine stocks of Richmond, Killarney and Wellesley coming in.

Carnations are very fine in quality, some of the newer varieties especially. Violets are very good. Sweet peas are seen only in small lots. Lilies are plentiful enough. Paper White narcissus are more plentiful than last week. J. W. D.

NEW BEDFORD, MASS.—Trade is very slow at present, with plenty of flowers to draw from. Some nice carnations are now coming in; these retail at from 35c. to 60c. per dozen. Peter Murray is cutting some fine Winsor; this variety has come to stay. Roses are of good quality; \$1.50 and \$2 per dozen is the retail price for extra nice stock. Violets have been rather a drug on the market; they are now selling at from 75c. to \$1 per 100. Jeannie Nonin, the late white chrysanthemum, is now in full swing. Some American Beauty are to be seen around here.

INDIANAPOLIS, IND.—The high tension in the general business world on account of financial stress affects the flower business. Funeral work and decorating are on hand in the usual quantities, but counter trade is not what it generally is at this period. Stock, particularly chrysanthemums, is offered in amazing quantities. Prices as a rule are not up to the quotations received from other markets. Violets are the only flowers not equal to the demand; 75c. to \$1 per hundred is always obtainable for them.

The sale of callas, Harrisil, and rubrum lilies suffers at the hand of more seasonable stock. The market is not always cleared of carnations at \$2 to \$3 per hundred; 75c. per dozen is obtained by the retailers.

American Beauty sell better than the other roses at \$5 to \$35 per hundred. Killarney is the best pink at \$6 to \$8. A large portion of the Bridesmaid and Bride are shipped elsewhere.

Chrysanthemum plants when they are choice sell better than the cut blooms; 50c. to \$2 is asked for them.

Tomlinson Hall Market is doing a fair business. The store men are not buying as expected, but the retail trade remains up to the standard. I. B.

ST. LOUIS.—There is very little to say regarding the market the past week. The wholesalers had all their space taken up with consignments of stock of all kinds, and a glut in roses was fairly on. Everybody was looking for chrysanthemums and carnations, and only the fancy grades in these. Business should be better this week, as most of the banks have announced a relaxation, and conditions in the money market will be easier. Some fairly large funeral designs were made up last week, but social work in weddings, dinners and receptions is scarce. The market opened up with a big lot of cut stock coming in in all grades, but buyers were not numerous and prices on job lots took a drop. In roses \$5 per 1000 for second grade was asked; firsts went for \$7.50 per 1000; extra fancy not over \$5 per 100; long American Beauty for \$4 extra fancy; others for from \$3 down to \$1 per dozen.

Chrysanthemums are still keeping up well, going at \$15 for the best; these have the call in this market at present. Carnations sell well, with fancy at \$4; firsts, \$3; others at from \$1.50 to \$2 per 100. Lily of the valley and Paper White narcissus sell at \$4 per 100 for choice.

Of greens the market has a good supply at usual prices.

ST. PATRICK.

Recent Fires.

LANSING, MICH.—On November 6, fire in the greenhouse plant of J. A. Bissinger, Saginaw street and Capital avenue, did damage to the extent of between \$200 and \$300, fully covered by insurance.

SPRINGFIELD, O.—Tramps, sleeping in the barn at the Mellen greenhouses, set fire to it on the night of November 7, destroying the building and contents, entailing a loss of \$2,000. Three horses were burned.

KINGSTON, N. Y.—The greenhouses of D. Stow were, on November 2, damaged by fire entailing a loss of \$1,000, which is fully covered by insurance.

CARNATIONS A SPECIALTY

CHRYSANTHEMUMS, ROSES
VIOLETS, VALLEY.
GEO. B. HART, Wholesale Florist, 24 Stone St., ROCHESTER, N. Y.
Mr. Hart's Handy Handle.

CHANGES IN BUSINESS.

LOUISVILLE, KY.—Henry Fuchs has opened a new store in the Hopkins Theater building.

HOWELL, MICH.—The Howell Greenhouses have been incorporated with a capital of \$10,000.

COEUR D'ALENE, IDAHO.—A. D. Guild has opened a nursery here and will grow roses, shade and fruit trees.

GREENWICH, N. Y.—John N. Cooke, who has conducted a florist business for a number of years on Lake avenue, is to retire.

FINDLAY, O.—E. J. Foster & Company has opened a cut flower stand at 533 South Main street, with Miss Emma Barnd in charge.

MERIDEN, CONN.—Adolph Greenbacker, the South Colony road florist, has transferred to his son, Joseph, the greenhouses near Walnut Grove cemetery. The elder Mr. Greenbacker will devote most of his time to the Owen farm, which he recently purchased, and Joseph Greenbacker will have control of the greenhouses. The new proprietor of the greenhouses has had a long experience in the business and his friends wish him every success in his new capacity.

FIRMS WHO ARE BUILDING.

WINTHROP, ME.—Clarence Pearley is erecting a new greenhouse.

ST. STEPHEN, N. B.—J. Ross Sederquist is making a 40-foot addition to his greenhouse plant.

WAUSAU, WIS.—Chris. Lund has commenced work on a large addition to his greenhouse establishment.

PRINCETON, MINN.—Mr. Middleton has added to his greenhouse establishment and enlarged his heating plant.

NORTH ABINGTON, MASS.—Arthur B. Reed has completed a new greenhouse on his premises on Adams street.

DANIELSON, CONN.—The greenhouse building by Franklin & Crosby on Academy street is nearing completion.

ROYERSFORD, PA.—R. E. Nace has added 600 square feet to his plant, to meet the demands of his increasing trade.

WATERTOWN, S. D.—W. M. Nicol has purchased two acres of land adjoining his premises, and will erect thereon two additional greenhouses.

GIRARD, KAN.—Soudry Brothers are adding 17,000 square feet of glass to their plant; a new boiler will also be installed.

BUSINESS DIFFICULTIES.

YOUNGSTOWN, O.—On November 13 C. Edwin Oyster was appointed receiver of the Templin Company, florists and seedsmen, operating large nurseries at Calla, this county, and a store here. The assets are about \$90,000, with liabilities about the same, not including the capital stock. The First National Bank of Leetonia, which closed its doors several weeks ago, is the heaviest creditor. The business will be continued.

PHILADELPHIA, PA.—David Rust, secretary of the Pennsylvania Horticultural Society, has been appointed receiver by Judge Wiltbank for the William Graham Company and Hugh Graham Company, florists, at 104 South Thirteenth street, and at Logan. While the assets of both, which are under one management, were shown to be in excess of liabilities it was said that the concerns were temporarily embarrassed for the want of ready money.

The receivership proceedings were brought by Leo Belmont, counsel for petitioning creditors, and showed the assets of the William Graham Company to be \$29,000 and the liabilities \$23,000, and the Hugh Graham Company, assets \$35,000 and pressing claims amounting to \$25,000. William Graham is president and George M. Bainbridge secretary and treasurer of both companies.

In asking for the appointment of Mr. Rust, counsel pointed out that if a peremptory sale of the property should take place the creditors would not receive as much as they would if the business were to be carefully continued. The security of the receiver was fixed at \$35,000.

CANADIAN NEWS

OTTAWA.—Bright weather has a beneficial effect on the roses, and the cut is very fair, with good prospects of a big supply at Christmas. The same may be said of carnations, although some of the field-grown plants will be rather late for Christmas unless we have plenty of sun. There is a good picking of violets and the quality is extra fine; they sell at \$1.50 per 100. Chrysanthemums have sold well, good ones bringing \$2 per dozen, and the rest \$1 and \$1.50.

In plants there has been a large sale of Boston ferns, and there is a fine stock all around for Christmas. There will be lots of cyclamen for the holidays and some very fine ones. Gloire de Lorraine begonias are also in good condition with all. There is also a large stock of poinsettias.

The shipping of azaleas has not been very satisfactory; some came in early and in good shape, but a lot arrived November 9 in very bad condition, mostly Christmas ones. They were shipped on September 25.

EDMONTON, ALBERTA.—Considering the financial stringency prevailing all over the Canadian West, trade is favorable. Flowers are good, thanks to the splendid weather the last couple of months—quite a contrast to the same time last year. Of the different lines probably carnations are the best; there are indications of a bumper crop for Christmas. Chrysanthemums are late, owing to the depredations of the tarnished plant bug during the Summer. The earlier kinds, such as Monrovia, G. S. Kalb and Amorita, had the terminal buds completely destroyed, but made new breaks and came along fairly satisfactorily. The later kinds will be fine as usual.

Roses are all doing nicely, especially General MacArthur and Richmond. Killarney is growing well, but was not planted as early as it should have been, owing to the non-completion of the house.

In the new and newer carnations we were a bit disappointed. Beacon is certainly a great flowering variety, but for color it cannot compare with Estelle. White Perfection is correctly named. Rose Pink Enchantress and Excelsior seem to be about the same thing; quite a few of the weaker ones went off with stem-rot in the field, but only a few since the plants were housed. White Enchantress and Winsor we procured from a very reliable firm, but through some mix-up the plants are all Mrs. T. W. and Red Lawson.

Sweet peas are in and the flowers—white only at present—are very fine.

The Ramsey Greenhouses had their annual opening Thanksgiving Day, October 31. It is estimated that 2,000 people visited the greenhouses during the afternoon.

Professor Fletcher of the Dominion Experimental Farm at Ottawa was a visitor lately; he seemed surprised at the ravages of the tarnished bug among the chrysanthemums and gave several suggestions for its control.

Mr. Marriott, manager of the Saskatoon (Saskatchewan) Nursery Company, was a visitor Thanksgiving Day. He has three big King construction houses in operation at present and more going up in the Spring, and has this year planted out 40 acres of perennials and shrubs. This with others starting up on a large scale in all the new cities of the West is conclusive proof that whatever else the West may lack it won't be plants and flowers.

FRED. BENNETT.

South Hadley Falls, Mass.

Joseph Beach has finished a new house, 25x200 feet, for carnations. He has had it planted several weeks; the plants are looking well and the addition to the glass area gives Mr. Beach a nice block of houses. Business is reported good in all lines. J. M.

Clue Show and Banquet.

The sixth annual banquet and flower show of the Utica Florists' Club was held on November 12 at the Elks Hall, and was the most successful affair of its kind given by the club. About one hundred people attended the banquet including many ladies.

Among the exhibits were some fine carnations from Dr. W. A. Rowlands Whitesboro, including Victory, Enchantress, Mrs. Lawsou, Mrs. Patten, White Perfection and Rose Pink Enchantress from the Wa-No-Ka Greenhouses, Barnveld, N. Y., carnations, Apple Blossom and Climax, both new seedlings. George H. Benedict, Yorkville, N. Y., had fine vase of Enchantress and one c mixed roses, also White Eaton and Yellow Eaton chrysanthemums, the largest flowers in the hall. E. J. Bryan Rome, N. Y., exhibited carnation Enchantress, Red Lawson, White and Yellow Eaton chrysanthemums and violets, which were very good. C. F. Seitzer, Utica, N. Y., showed Enchantress and Rose Pink Enchantress carnations, and Golden Gate and Ivory roses in good condition. Frank McGowan, Utica, N. Y., had Mrs. Lawsou carnations, Yellow Eaton, Golden Chadwick, White Chadwick and a sport of Yellow Eaton chrysanthemums; C. F. Baker & Son, Winsor carnations. Two large vases of Bride and Bridesmaid roses came from the Plantadendron Rose Growers, Utica, N. Y., and were first class in every respect. L. F. Goodwin Clarks Mills, N. Y., staged Enchantress carnations and Whitmani ferns; A. & J. Williams of Utica, mixed chrysanthemums.

L. E. Marquisee, Syracuse, N. Y. favored us with a vase of his new carnation Marchioness. This was a grand bunch of flowers, very much admired, its fragrance being especially commented upon.

We were disappointed to receive, the day after the show, a box of roses from the E. G. Hill Company, but we wish to thank Mr. Hill for sending them.

Some of the guests from out of town were P. R. Quinlan, Syracuse; Jo Traudt, Canajoharie; Mr. and Mrs. Seward Hakes, Ilion; Mr. and Mrs. The Schesch, Ilion; Mr. and Mrs. John O. Graham, Little Falls; Mr. and Mrs. Taylor, Canastota; Mr. and Mrs. E. J. Byam, Rome; Mr. Kilbourn, Clinton Mr. and Mrs. Fred Wagner, Cooperstown; Mr. and Mrs. Geo. H. Benedict daughter and son, Yorkville; Misses Humphreys, Rome; L. F. Goodwin and lady, Clarks Mills; E. Henlin, Oneida Wm. Death, Rome; Mr. and Mrs. Watkins, Whitesboro; Mr. and Mrs. John Owen, Whitesboro; Mr. and Mrs. J. R. Auld, New Hartford; W. A. Rowlands Whitesboro. Regret was expressed at the absence of Mr. and Mrs. Marquisee on account of an accident to that gentleman.

Trade Notes.

Trade is not what we all wish it was. The money scare has reached us and is felt, but we hope it will soon be over. Chrysanthemums and carnations are plentiful and cheap. Roses are fairly good, but there is not much call for them. It is hard to tell what the trade will be for Thanksgiving under the conditions of the money market.

Arthur Davis, we are sorry to hear it at the Homeopathic Hospital.

HICKSVILLE, L. I.—Fred. J. and Louis Kuhne have started in to grow carnations here. Their facilities are up-to-date in every way and the three iron frame houses, 26 feet wide and over 100 feet long, of the Hinchings construction, are planted exclusively with these flowers. The firm are good growers and turn out the kind of stock that always sells.

LOUISVILLE, KY.—Frank Lichtfield, the oldest florist in this city, died November 6, aged 85 years. He was born in Germany and came to the United States and to Louisville in 1848. A son survives him. His wife died two years ago.

BERKELEY, CAL.—Hugo Lilienthal, according to a local paper, is to organize in his locality a children's auxiliary of the S. A. F. O. H. The children who formerly were wont to trample down his work in the hotel gardens are now interested in gardening. He is a landscape gardener of this city.

Chicago.
Club Meeting.

The Florists' Club meet at Handel Hall on Thursday evening, November 14 with a large attendance. Secretary Schupp read a communication from Secretary Benjamin Hammond of the American Rose Society, giving a full report of the Washington show last March, and asking for further instructions as to the intention of the Chicago club for the coming meeting.

Two new members were elected and three proposals for membership were according to the rules held over till the next meeting.

The election of a treasurer came up and by unanimous consent the secretary was instructed to cast one ballot for E. F. Winterston.

President Bruns appointed a nominating committee, consisting of Leonard Kill, George Asmus and Phil. Schupp to present a list of candidates for the ensuing year.

At the December meeting, which is to be known as rose night, E. G. Hill has promised to be present and give a talk on roses. An invitation was extended to the members of the Lake Geneva Horticultural Society and the Lake Forest Gardeners' and Foremen's Association to be present on that evening.

News Notes.

After the council meeting on Monday evening, Peter Reinberg took the midnight train for his annual hunting trip in the Northern woods.

The party that left for St. Louis Monday night and Tuesday night included a great many prominent visitors and some of our local critics.

Plans are already in form for the Wienhoeber Floral Company Employees' annual reception, which will be held in the latter part of January.

The sodding experiment at the show certainly proved the greatest innovation of many years in show arrangement.

Press representative Burdett is a genius. The sending of four thousand

complimentary tickets among the six thousand teachers of the city, good for the first night only, was a great advertisement in connection with the \$200 worth of plants contributed by growers, the entire lot to be given to the school building receiving the most votes, each visitor being entitled to one vote. A better advertisement could not have been sent out, as was proven. W. K. W.

New York.

News of the Week.

With next Thursday comes Thanksgiving Day, and looking at it from a business standpoint it does not seem that the florist has much to be thankful for this season. At the same time, it might have been worse.

The social season in this city commenced on Monday last with the opening of the Grand Opera season and that grand annual event, the horse show. Judging from the flower market conditions, it is quite evident that among the social leaders great economy is being practiced in so far as the using and sending of flowers is concerned. Comparing the present week with that of any previous year for a decade, there has never been so few flowers disposed of as has been the case this year.

On Friday, the 15th inst., the firm of Hicks & Crawbuck, florist supply dealers at 76 Court street, Brooklyn, went into voluntary bankruptcy and a receiver was appointed by the court. Mr. Crawbuck informs us that owing to slow collections this action was made necessary. If 40 per cent. of the amount on their books could have been gathered in, there would have been no difficulty whatever in meeting all the firm's liabilities. It rests with the court as to whether the business will be resumed or not, but Mr. Crawbuck assures us that the assets are ample to pay one hundred cents on the dollar. In connection with this voluntary assignment, seeing that his name is at the head of the firm, F. S. Hicks, at present carrying on a wholesale florist business under the title of Frank S. Hicks & Company, 52 West Twenty-eighth street, wishes us to say that he sold his entire stock in the Hicks & Crawbuck company last Spring, and since that time has had no interest in that firm.

The name of C. H. Totty's white chrysanthemum that won the Lord & Burnham Company gold medal at the New York show is W. M. Moir, not Mrs. W. H. Moir, as appeared under our illustration last week.

The New York Florists' Club has decided that only those members who are in good standing—whose dues are paid to date—will be permitted to vote at the forthcoming election of officers.

The New York and New Jersey Plant Growers' Association intend securing a store somewhere in the wholesale flower district and will open the same as a plant market.

In the report of the Poughkeepsie flower show on page 661 of last week's issue, it was stated that the Saltford Flower Shop captured first prize for the best 100 violets. This was an error; the prize referred to was won by G. A. Saltford of Rhinebeck, N. Y.

Miss Ethel Hudson, a niece of A. McAllister, florist, Passaic, N. J., had a rather exciting time with a sneak thief on Saturday, the 16th inst. Miss Hudson works in the flower store of her uncle, and for some time money has been missed from the till. On this day she concealed herself behind some boxes in the store and finally saw a negro named Marshall, who at one time worked for Mr. McAllister, enter the back door and take a roll of bills from the cash drawer. The young lady gave an alarm, but the negro made for the door and got out, running up Main street. Miss Hudson seized a revolver from a desk and went after him; she fired five shots, but only succeeded in knocking off the negro's hat. He eventually escaped, and both he and the money are still missing.

NORFOLK, VA.—Two silver cups and \$400 for premiums have been contributed to the success of the cut flower and chrysanthemum show and fair to be held during the closing days of the Jamestown Exposition, November 25, 26, 27, 28, 29 and 30. The arrangements for the fair and carnival have been committed to the superintendent of landscape of Jamestown Exposition. Invitations to participate with exhibits of flowers have been extended to all prominent growers and dealers.

Cincinnati.

News Notes.

Notwithstanding the cry of bad times and with thousands of idle mouths the florist business seems to go along its even way in this city, and the general volume of business with the wholesalers is fully up to that of other seasons. We have not had so many late weddings, but the regular counter trade seems fairly good. At the present time Cincinnati is painfully healthy.

Yes, we are selling chrysanthemum and quantities of them. No, we are not getting as high prices as in other years for the same quality of stock, but are getting fair prices. Colonel D. A. Plepton is no good, except for exhibition purposes; small growers should discount it. And there should be an extra effort to displace Monrovia, which is entirely too sensitive to the touch, for, like sensitive plant, a breath of air and droops. Major Bonnaffon, as grown by George Bayer of Toledo, O., is the best selling yellow to date, and is a last monument to the introducers, F. D. Dyer & Sons Company, Lafayette, Ind. Old Ivory still holds its place in front row and is likely to do so many years to come. Dr. Enguehard holds up well for medium pink. Many new sorts come and many go, but old standbys retain their places in hearts of the retailers.

There is quite a little call for violets especially the single, which are much more popular than doubles in this market. High-grade carnations do not have to wait for buyers. Roses are very much on the slow side this week.

The gentlemen from here who attend the Chicago show speak in the high terms of all they saw and the treatment they received at the hands of the Chicago craft, who do all things well. When the doors open in 1908 for the national flower show of the Society of American Florists, you can expect to be bewildered by the display arranged by the lists of no mean order. Quoting from Mr. Rudd: "Just affiliate"—that's a nothing more need he said, only to point the various committees from various auxiliaries, which will certainly do more to cement brotherly love than any other possible means. Let the good work go on.

J. H. Broxey of Dayton, O., was buyer in this market Friday. He stated that the National Cash Register Company laid off over three thousand people during the past week and the car war over twelve hundred. Not a very encouraging story with Winter looking these people squarely in the face. Still behind each cloud the sun is shining.

The Republican landslide in this city has inspired new hope, and the office park superintendent is in the balance with former Park Superintendent Orbell camping on the trail and Day Knott, manager of the Eden Park greenhouses, well spoken of and a very capable man.

Edward Ellison, who for years conducted a florist plant in Clifton, famous for La France roses, has closed up his greenhouses and sailed on November 1 for England. He was a man of about sixty-five years of age and had many peculiarities. His only companions in the greenhouses were his two cats which shared his meals perched upon his shoulders.

C. Betscher, Canal Dover, O., was caller this week, selling peonies, gladioli, cannaes and dahlias. Martin Rekauf was also in the city November 1.

I failed to note that President Winterstetter was in attendance at the Chicago show; he slipped out of town so quietly with his mysterious Afterglow that we did not know he had gone. The game law is out now for a few days, and around Murphysville it is hard to find some of the sports at home. Especially is this true of Ed. George and R. A. Murphy, all good marksmen.

E. G. GILLET.

Greater Pittsburg.

Consolidation Effectuated.

The United States Supreme Court decided favorably on the consolidation act and our sister city Allegheny drops from the map and we now have a Greater Pittsburg. This has been the constant aim of the civic spirit of the community for many years, and it is a welcome success for the men who so long have worked to bring into existence the actual city government commensurate to the great community. We now have a city of about 575,000 population, placing us in the fifth rank, leading Boston, and it will not be long before we are ahead of St. Louis. Pittsburg ranks second only to New York in banking, and in clearing we are ahead of St. Louis frequently.

Trade Notes.

Cut flower trade has not been as good the past week as the preceding one, and it looks as if the financial troubles are affecting it. There is an abundance of stock of all sorts; particularly are chrysanthemums overplentiful and low in price. Carnations keep up best of all. Harriot lilies are also abundant and offered at very low prices with little demand. Bulbous stock is starting to come in. Paper White narcissus among the first, selling at \$3 per 100 wholesale.

It is a mystery how the many flower stands on Fifth avenue manage to get along; all carry a big stock of flowers constantly and sell at prices at times that other dealers could not think of, yet their expenses run as high and in some instances higher than some of the others and they never have any trouble to procure all the stock needed.

J. B. Murdoch & Brother moved their wholesale cut flower business several weeks ago from Liberty to Penn avenue on the first floor, and have everything more convenient for the handling of stock than heretofore.

A. Frischkorn is on the road for a week or more in the interests of W. C. Beckert, seedsman, Federal street.

F. Burki and family are spending several weeks visiting relatives in Virginia.

Mrs. Gustave Ludwig and daughter are visiting friends in Milwaukee.

W. Kroeck, in the Diamond market, has had several busy weeks selling bulbs.

E. C. REINEMAN.

New Orleans.

Society Meeting and Show.

The last meeting of the Horticultural Society was chrysanthemum night, and some very fine flowers were staged. M. Lapouyade brought flowers of Dr. Enguehard that were simply perfect; B. M. Wichers had blooms of Frank Hardy which went far to prove that some of the old varieties could still hold their own. J. S. Mard showed fine flowers of Mrs. Crane. The Metairie Ridge Nursery Company sent nicely finished blooms of Dr. Enguehard, Golden Gate, Mrs. T. G. Richardson, Convention Hall, Buff Globe, George W. Childs and several other fine varieties; also sprays of that pretty Mexican vine, Mina lobata, and fine American Beauty roses. C. W. Eichling brought Easter lilies and lily of the valley, which is one of his specialties.

News Notes.

Bruno Werner, formerly grower to Mrs. W. Rehm, has entered into partnership with his brother, Otto Werner, and Mr. Nurnberg has been engaged as grower by Mrs. Rehm.

M. M. Lapouyade has worked up a large stock of Metrosideros floribunda, which he propagates by layering. Another plant somewhat on the order of the bottle brush is that pretty Mexican shrub, Inga pulcherrima; this he finds grows well from seed as well as from layers. Both shrubs are good subjects for Southern gardens.

The chrysanthemums at Audubon Park this year, grown by Head Gardener Weller, are particularly fine and bring forth complimentary remarks from visitors. The most striking variety is Fred. Dormon, named in honor of a former head gardener at the park; this is a sport from V. H. Hallock and is identical with that variety with the exception of the color which is somewhat of an unusual shade, and might be described as a pinkish salmon. It is a most striking variety of an entirely new shade among chrysanthemums. Mr. Weller has a few nice plants of that hairy variety F. J.

Taggart, a class that apparently is not very popular nowadays, but when done well adds interest to any collection. The varieties which have done particularly well with Mr. Weller are Dr. Enguehard, Ben Wells, Buff Globe, Marie Liger, Miss Minnie Bailey, G. W. Childs, Brighthurst and Pennsylvania.

CRESCENT CITY.

Detroit.

Trade Notes.

The local business conditions are judged variously, some contending that trade is below the standard while others say just the contrary. Receipts at the wholesale houses are ample and clear out at good prices, which, after all, form the best guide to judge by.

The funeral of Dexter M. Ferry gave great opportunity for devising artistic arrangements, because many floral pieces were bought at prices up to \$50 and \$75. Very pretty wreaths of cattleyas and white Japanese lilies, also orchids with bouvardia could be seen. Large bunches of American Beauty roses containing as many as eight dozen in one bunch were displayed in 5-foot high wicker vases.

John Breitmeyer's Sons took a breathing spell long enough to arrange a chrysanthemum show. Their beautiful store does not call for much trimming to create an effect; still, it means a good deal of work to display properly their many varieties of large chrysanthemums without causing a disconcerting dash of colors.

Last Saturday several stores on Woodward avenue took the occasion of the Pennsylvania and U. of M. football game as a hint to decorate their windows in the college colors. All experienced a great run on yellow chrysanthemums; Ann Harbor called on the Michigan Cut Flower Exchange for 600 large flowers of these.

F. D.

Washington, D. C.

News Notes.

Gude Brothers and Company have greatly improved their store at 1214 F street by the addition of several rows of overhead electric lights. On Saturday they had some excellent chrysanthemums, including Golden Wedding, Major Bonaffon, Mrs. Perrin and others.

W. R. Smith of the United States Botanic Gardens has been in New York for a week or more.

Through an unforeseen change of plans at the last moment, Jas. J. Hart opened his new wholesale and commission house at 1312 G street, N. W., instead of 814 Fourteenth street as stated in a former issue.

There was a general depression in business last week, caused presumably by the condition of the money market.

Owing to the recent flower show, the florists' bowling team of this city postponed the game which they were to have rolled on the 13th until November 18.

J. L. C.

Ohio Notes.

There seems to be a general money scare throughout the country and florists in small towns feel that it particularly affects them; they all admit there seems to be plenty of money, work and crops in their individual locality, but no money for plants or cut flowers. Not a few have said that October business has fallen far short of that of the same month last year in general sales, that chrysanthemums move very slowly. But as time goes on they appear more optimistic.

The Springfield Florists' Club gave its members a fine banquet on Monday evening, November 11, which was well attended. An address on civic improvement was made, and there was a general talk on beautifying Snyder park.

News Notes.

At the annual meeting of the Massachusetts Horticultural Society on Saturday Dr. A. Henry, the noted botanist and traveler, was elected a corresponding member. The sum of \$6,700 was appropriated for prizes for the year 1908; this is \$1,200 more than the amount used for that purpose this year. The following officers were elected for 1908: President, Stephen M. Weld; vice-president, Walter Hunnewell; trustees for three years, Walter C. Baylies, Chas. W. Parker, John A. Pettigrew, William Whitman; nominating committee: W. H. Bowker, John W. Duncan, J. Henry Fletcher, D. F. Roy and Wilfred Wheeler.

Among Bostonians attending the Rhode Island Horticultural Society's exhibition at Providence were Wm. Nicholson and S. J. Goddard who each had exhibits of carnations. Unfortunately they had not heard of a change of date of the exhibition and they did not get there till the second day of the show. Their exhibits were so good, however, that S. J. Goddard received a special prize for his and William Nicholson was awarded a gold medal for carnation Afterglow.

The Garden Committee of the Massachusetts Horticultural Society visited the greenhouses of H. H. Rogers at Fairhaven where James Garthley is in charge. They found everything in fine order and chrysanthemums in extra good shape. Mr. Garthley said that the days they had their greenhouses open to the public over 4,000 visitors attended.

The Waban Conservatories and Galvin's bowling teams lined up against each other on Friday night with the result a tie.

Visitors this week included Carl Beers, Bangor, Me., and Mr. DeForest of the Pierson U-Bar Company, New York.

J. W. DUNCAN.

THE HOLLY STANDARD CIRCULATOR, No. 4 SIZE

HORIZONTAL SECTION
SHOWING CONSTRUCTION.

HOLLY STEAM ENGINEERING CO.
NEW YORK.

Independent Hot Water Circulation

Sectional View of the **HOLLY STANDARD ELECTRIC CIRCULATOR** (vastly improved over our 1896 model). **Rapid, reliable and economic** circulation, under any water temperature, guaranteed. The modern plant is perfected by it; the oldest and poorest plant may be saved by it. We call your special attention to the double peller—A-1 and A-2 (peculiar to this model) and the controlling valve—G—by which the rapidity of circulation is governed. Our references include some of the largest and most celebrated growers.

Sash opening apparatus and all kinds of greenhouse structural material

This is what happened to the open mortise joint after the sash had been in use but nine years. Photo made the fifth of October at Middle Village, L. I.

And here is an L. & B. sash made L. & B. way, that has stood the racket for eighteen years and is good for half as many more. Photo taken last Saturday at Peter Henderson's, Jersey City, N. J.

SASH SENSE TALK NUMBER 2

You know there is not a thing on your place that has to stand the hard knocks and gets the wear and tear that your cold frame sash do.

Then why under the name of all that is sensible, reasonable, do you buy the ordinary, open-mortise, wrongly constructed, cheap sash that cannot possibly stand the racket? The kind of sash that in a few years' time will be racked at the joints, twisty, sprung in the middle, putty loosened, glass cracked, and in a short time the joints open and decaying.

Don't let yourself be deceived into believing it is a case of materials only—it is a question that involves both construction and materials.

We have a special way of constructing our sash that last.

The photo at the top was taken at the establishment of a large Long Island grower who uses hundreds of sash every year. He is just starting in with our kind, after having given them a series of mighty rigid tests, under which they have stood up satisfactorily in every way. He is so dissatisfied with the way he has been spending his good money for wrongly constructed sash that he took all one afternoon pointing out the weak spots in them, and helping our Ad. man take their photos. What convinced him, we are sure will convince you—that it pays to pay a good price for a good thing.

We sell our specially constructed sash, unpainted and unglazed, or finished complete, ready to set right on your frames. Get our prices. Lord & Burnham Co., Greenhouse Designers and Manufacturers, New York Office, 1133 Broadway, Corner 26th St. Branches: Boston—819 Tremont Bldg. Philadelphia—1215 Filbert Street.

We make every part of a greenhouse but the glass.
We sell any part.

This is the way L. & B. make their blind mortise, double shouldered, steel dowel joint. It's the joint that keeps the moisture out, prevents it from decay and gives the sash a tremendous strength.

It's cheaper to make sash with open mortise and side ends left on like this one, but it's the joint that can't last—it's the joint that lets the weather in and makes the rot begin.

Seed Trade Report

AMERICAN SEED TRADE ASSOCIATION

George S. Green, Chicago, Ill., president; M. H. Duryea, New York, first vice-president; F. W. Bolgiano, Washington, D. C., second vice-president; C. E. Kendel, Cleveland, O., secretary and treasurer; Leonard H. Vaughan, Chicago, assistant secretary.

BALTIMORE, MD.—The Maryland Seed Corn Breeders' Association will hold its annual meeting and corn and wheat show at the Fifth Regiment Armory in this city on December 3 and 4, 1907. An interesting program has been prepared, and the Chamber of Commerce has appropriated \$300, which will be offered as cash prizes for the best samples of corn and wheat. J. Bolgiano & Son, seedsmen, have offered a handsome silver chased loving cup as a sweepstakes prize for the best 10-ear sample of corn in the show; this cup is to be competed for annually until won three times by the same exhibitor, when it becomes his permanent property. Educational exhibits will be made by the Maryland Experiment Station and by prominent corn breeders and others in this and adjoining States.

IMPORTS OF SEEDS, ETC.—November 19.—E. F. Buckingham, one case plants; Julius Roehrs Company, 17 cases trees and shrubs; H. Frank Darrow, 28 cases plants; Wm. Elliott & Sons, 11 cases roots, nine cases plants; McIntosh & Company, 46 cases plants, four barrels plants; Peter Henderson & Company, four cases bulbs and plants; Kennedy & Moon, one case shrubs and trees; R. F. Lang, 14 cases plants; Maltus & Ware, 197 cases plants, 31 cases trees and shrubs, five cases bulbs, one parcel bulbs, 100 bushels seed, 97 cases roots; C. F. Meyer, 10 cases plants; Henry Nungesser & Company, 25 bags grass seed; Cleary Horticultural Company, 12 cases plants; P. Ouwerkerk, 29 cases trees; P. H. Petry & Company, one case plants; T. C. Seed Trade Notes.

At last, after on the whole as good an Autumn bulb season as the trade ever has had, the end of both sales and stocks is rapidly drawing near. Japan stock, that is, the various varieties of *Liliums auratum* and *speciosum*, also the Japanese irises and some few other bulbs of lesser importance, has not yet arrived; but it surely cannot be long now before these last shipments will come, which will at once allow of a cleaning up of what remaining bulb orders are still unfilled. Many customers and for that matter dealers, prefer to receive their lily requirements altogether. There has been a very good retail demand these last days of the season, so much so that many of the larger distributors are still keeping their local advertising going in their respective city papers.

As regards seed shortages, from now until after the coming seed season is over, we shall hear little else. They exist practically throughout the entire list; that some things are shorter than others is the only distinction. We have, of course, in the past had years when many standard varieties of seeds were more or less crop failures, but I do not recall a season when the shortages were so general as they are this year; while, on the other side of the question, so far there appears to be very few instances of total crop failures.

I pointed out in these columns at least two months ago, that seed prices would steadily advance every week, especially until the publication of the preliminary wholesale price lists of our largest seedsmen, and most certainly they have done so. After our large dealers have issued their preliminary wholesale price lists they do their best to abide by them, and keep their regular wholesale list prices down thereto. (January 1 usually the yearly wholesale catalogues are issued.) But it is indicated now by all the signs we have, that a general order bought now will figure a less total in dollars and cents than it will six weeks hence. The seed situation is very truly and most tersely summed-up in the following few words, very recently written by one of the best known and most reliable seedsmen in this country: "Never before in our experience, covering over thirty years, have we gone through such a growing season as the one just closed. As everyone knows, we had not only practically no Spring, but the Summer was unusually short. As early as June we began to realize that crops of most kinds would fall below the average in yield, and felt that it was absolutely necessary to have our representatives travel almost constantly among the growers that we might keep posted, and to insure that even more than the usual care should be exercised"—to try and get at least part of a yield of seeds for the needs of 1908.

You, of course, know how scarce sweet corn will be. The seedsmen above referred to does not quote any rates for sweet corn in his preliminary wholesale price list just received, but says as follows: "At the time of going to press with our list, sweet corn, particularly of the late varieties, is in such an uncertain condition as to make it almost impossible to form any estimate of the yield." It is added that customers' requirements will be especially quoted upon. What few sales of sweet corn have as yet come to my notice, have been from \$5 to \$8 per bushel; the trade are already talking fifty cents per quart for the retail catalogues.

Peas and beans will also be very short in places, and crampingly lacking in spots.

Advices regarding small seeds are now daily coming to hand, and many crops are turning out much smaller even than estimates, thought to be final, that we made when examined for the last time in the field.

Speaking of catalogues reminds me that I wish to call special attention to a bulb novelty that certainly would seem to be a seller; I refer to the comparatively new, single fringed and ruffled tuberous-rooted begonia "*Begonia crispa*." I have seen considerable of them during the last few seasons, and I feel they have a great future before them; and that it will not be long before they become a most prominent division of these ever popular Spring bulbs. At the time of their introduction, some half dozen seasons ago, they were described as follows: "The plant itself is of good habit, a very strong grower naturally, fine for pots, and equally good outdoors in beds or cold frames, where all Summer long a continuous and most gorgeous display of bloom is maintained. The individual blooms themselves are most graceful, and chaste elegant, being exquisitely frilled and crested; and are borne in a very stately manner on long stems well above the foliage. The range of colors includes, in all the best shades: red, white, yellow, salmon, rose, and light pink."

Regarding lily of the valley pips there seems to be some confusion among many growers and handlers of them as to what does really constitute the difference between Berlin and Hamburg pips. As I understand the matter, Berlin pips, being grown on light soil, will bloom quite a little earlier than the other sort; in fact, it is very largely the Berlin pips that are used for first forcing by our florists. On the other hand, the Hamburg pips, being grown on heavy soil, bloom somewhat later, but no more profusely. But there is still a deeper difference than the one pip flowering earlier than the other, and it is this: Berlin pips throw regular-sized spikes of flowers, while the Hamburg pips produce the mammoth lily of the valley, so much prized by our florists. My experience in forcing both sorts is that there is possibly three or four days in time gained by using the Berlin pips. And so in a nutshell, you have this difference between the two standard brands of lily of the valley pips: the Berlin are the earlier, but the Hamburg throw the larger blooms.

As I have been writing, the almost blizzard storm that has been raging all day with relentless fury shows no signs of abating; so much rain is reported as having fallen all over the Eastern States, especially, that if it clears off cold, as it now bids fair to do, the water-soaked ground will freeze hard with the greatest rapidity. It certainly begins to look as if the Japan bulb stock had little chance of arriving in time to be planted this Autumn. V.

SECRETARY WILSON of the Department of Agriculture in his annual report issued to-day (Saturday) says, regarding progress in seed studies:

"The Department is making a special effort to educate the farmer in the matter of good seeds. With this end in view many thousands of tests have been made during the year, both for seedsmen and for farmers.

"The work on seed adulteration has been continued with gratifying results. Aside from the continued sale of Canada bluegrass seed for Kentucky bluegrass seed, fewer cases of adulteration have been found than in former years. The importation of low-grade red-clover seed has continued, some lots containing over 5,000,000 weed seeds per bushel.

"During the year special attention has been given to the loss caused by dodder infesting clover and alfalfa. Dodder has proved such a serious pest the past year throughout the world that the International Seed Control Congress at Hamburg, in September, 1906, took action toward encouraging all governments represented to adopt measures for the extermination of this pest.

"The work of securing, packing, assembling and mailing the seed for Congressional purposes was carried on the same as in past years. This work is now so systematized that it goes along smoothly, despite the large quantities of seed that must be secured and sent out. The total number of packages put up and distributed has remained the same for the past six years. In the annual distribution 6,400,000 packages of miscellaneous vegetable seed are put up and

sent out, each package containing 5 packets, and 800,000 packages of flower seed are put up and distributed in the same way, each package containing 5 packets."

"Fears of a failure or a large degree of failure of the corn crop this year diminished after Midsummer and at last the harvest scored 2,553,732,000 bushels, a production that is almost exactly the average of the crops of the preceding five years.

"The 25,420,000 bushels of flaxseed of this year's crop are worth about \$26,000,000, the quantity being 5 per cent. under and the value 3 per cent. over the average of the average of the previous five years."

Other matters of interest to the seed trade referred to in the report are: the yellow-flowered Siberian alfalfa has been tested in the severe climate of the Northwest, and seeds of it have grown into promising plants. The home production of alfalfa is being encouraged, the demand for seed having been much larger than our farmers were able to supply. This has brought about the heavy importation of foreign seed, some of which has been shipped even to the Pacific Coast. The seed of improved timothies distributed by the Department for experimental purposes has given encouraging results. Brome grass, orchard grass, red top, and meadow fescue are receiving special attention looking to their improvement. An early maturing vetch has been discovered, which, it is believed, can be harvested in the South in time for cotton planting. Seed of this will be available for distribution and trial next season.

European Notes.

A sensible improvement has taken place in our northern seed growing centers at last and it is now possible for us to trash out the remainder of our early ripened seeds that have been stacked for a convenient season. Beets, carrots, mangels and spinach are coming out up to latest estimates; cabbage has fallen off fully 20 per cent. more, especially hard conical varieties such as Filderkraut and Winnigstadt. Both these varieties are a constant source of disappointment to growers, even in good seasons, because they blight so easily. Radishes are very variable. Germany reports fairly good crops but in poor condition; France light crops of very moderate quality; England light crops of early varieties and heavy crops of later sorts, the quality being about average.

The following is a list of herbs and sundry seeds that will give us many anxious moments during the next two months:—Capsicums, celery and celeriac,

FLORISTS
Have a splendid opportunity of raising Mushrooms by utilizing the waste space under the benches, and then utilizing the waste material of expended mushroom beds to grow flowers. Now is the time to make you beds.

Lambert's Pure Culture, MUSHROOM SPAWN, the best Mushroom Spawn in the market, is sold by all leading seedsmen. A fresh sample brick, enough for a small trial bed, together with large illustrated book on "MUSHROOM CULTURE," will be mailed postpaid on receipt of 40c postage stamps. Address American Spot Company, St. Paul, Minn.

November 30, 1907

parsley, Hamburg turnip-rooted salsify, scorzonera, Summer savory, thyme and rosemary, for the crops in each case are almost nil, and the stocks carried over are very small.

As regards flower seeds, only the hardy sorts of nasturtiums are abundant. Sweet peas now coming to hand from the growers are a wretched crop and poor sample. As regards the German crops, the following report, prepared during the present week, speaks for itself.

Asters, dwarf and early varieties, very poor; this includes the chrysanthemum-flowered and Triumph classes.

Asters, taller sorts middling to good. German stocks, good generally, both open ground and pot-saved seed.

Wallflowers, single, those that survived the Winter have done fairly well. (N. B.—The crop of this article in England is very good.) Wallflowers, double, very poor.

Carnations, larkspurs, myosotis, sweet peas, petunias, bedding varieties, lupinus, verbenas, salpiglossis and antirrhinum Tom Thumb varieties, poor.

Godetias, helianthus, phlox, petunia large-flowered varieties, marigold, lobelias, poppies, candytuft, scabions, zinnias, Chinese pinks, middling to good.

Pansy, Spring plants good crop, but the loss of the Winter plants will be felt.

In southern France the rain still continues and such seeds as ipomoeas, four o'clock, late asters and verbenas have perished wholesale.

As regards the failure of Alfred Legerion the statement of affairs shows that for once the careful Dutchman has not exercised his usual caution, for different firms in Holland have been landed with more than half the indebtedness. It is expected that the estate will pay a dividend of fully 50 per cent.

Amid much that is discouraging it is very pleasing to be able to record a very profitable activity in the pea market, both at home and abroad. Varieties such as Prince of Wales, which on account of exceptionally heavy crops threatened to be a drug in the market, have been cleared off at good prices as if by magic. Advancer and Abundance have sold easily at almost any price we chose to ask; the same is true of Alaska, Gladiator and other round blue-seeded varieties that have hung fire terribly of late are eagerly bought up to-day for boiling peas at fully 10 per cent, above their seed value.

Quite a number of changes have taken place in the personnel of the London Horticultural Press of late. H. H. Thomas, sub-editor of The Garden, becomes editor of The Gardener; W. P. Wright has his hands too full to continue. His garden assistant, T. A. Weston, has gone to Eckford's at Wem. The sub-editor of The Gardener takes H. H. Thomas's late position on The Garden staff, and the new editor of The Gardener's Chronicle is feeling his way.

It is hoped that these changes will be beneficial, especially to The Gardener, which has lost favor lately, owing to the unpleasant wrangles of two constant contributors who should both be better employed.

EUROPEAN SEEDS.

CATALOGUES RECEIVED.

HENRY A. DREER

PHILADELPHIA

National Sweet Pea Society Trials.

Editor Florists' Exchange:

The National Sweet Pea Society of England has arranged for trials of new varieties to be made again next year under the superintendence of Charles Foster at the University College Gardens, Reading, England.

As the floral committee will not award a certificate to any variety that has not been tested at Reading, it is desirable that raisers of novelties which they propose to introduce to the trade next year should send samples of the same to Mr. Foster at the above address to arrive not later than January 10, 1908. Not less than 15 or more than 20 seeds should be sent. The variety must be named, and as the way and plain standard sections are to be tested separately, it should be stated to which class they belong; the color should also be stated. Every flower will be carefully removed after inspection and no seed pod of any variety permitted to form.

A duplicate copy of the names and other particulars (but not seeds) should be sent at the same time to the secretary of the National Sweet Pea Society, to be entered in the society's records. His address is C. H. Curtis, Adelaide road, Brentford, Middlesex, England.

No specific charge is made for testing, but as heavy expenses are incurred by the society persons desirous of availing themselves of the splendid advertisement they get in this way will no doubt wish to send the secretary a donation to the funds of the society.

It is earnestly hoped that any of our American and Canadian friends who possess distinct and valuable novelties which they propose to put into commerce will send samples of the same without delay.

S. B. DICKS.

CINERARIA Benary's or Sutton's Gold Medal Prize

Strains, all shades and colors, giant flower, dwarf or tall, 2½ in., \$2.50 per 100; 250 for \$5.00 cash.

NURSERY DEPARTMENT.

Conducted by Joseph Meehan.

AMERICAN ASSOCIATION OF NURSEYRMAN.

J. W. Hill, Des Moines, Ia., president; C. M. Hobbs, Bridgeport, Ind., vice-president; George C. Seager, Rochester, N. Y., secretary; C. L. Yates, Rochester, N. Y., treasurer.

ORIENTAL PLANT EXPLORATIONS.—China has proved a fruitful field for this work, and an explorer has been kept there constantly during the year, says Secretary Wilson of the Department of Agriculture in his annual report. His work has taken him through the little-known regions of southern Siberia, the border of Manchuria, the excessively dry mountains west of Peking, and through the fertile country between Peking and Hankau. This explorer has sent to this country over a thousand living seed and plant specimens for trial. Among these are promising blackberries and currants, from northern Korea; a north Manchurian apple; a collection of 24 named pears from north China; several bush cherries and plums and peaches from northern Siberia—perhaps the very northern limit of peach culture in the Orient; drought-resistant alfalfa; dry-land rice; staple foods of the native Manchurians, but unknown to us, from regions where the climate is similar to that of the Dakotas; and a cherry noted for remarkable earliness, ripening its fruit in mid-April in northern California. Besides these, the explorer has sent in a large number of ornamental plants which our nurserymen have been for some time anxious to secure, because of the unusual hardiness of these north China species.

Beauty of Azalea Calendulacea.

Notwithstanding the great beauty of many of the hybrid or Ghent azaleas, it is questionable if there is one in the whole lot as worthy of cultivation as the North Carolina mountain *A. calendulacea*. It is known to most Northern cultivators as the flame-colored azalea, but its original common name was fiery azalea. This name was given it by Bartram in his "Travels," and what he says of it and its merits is well worth quoting. "This epithet, 'Fiery,' I annex to this most celebrated species of azaleas, as being expressive of the appearance of its flowers, which are in general of the finest red, red, orange and bright gold, as well as yellow and cream color. These various splendid colors are not only in separate plants, but frequently all the varieties and shades are seen in different branches on the same plant and the clusters of blossoms cover the shrubs in such incredible profusion on the hillsides that, suddenly opening to view from dark shades, we are alarmed with the apprehension of the woods being set on fire. This is certainly the most gay and brilliant flowering shrub yet known."

This picture of the beauty of the plant is by no means overdrawn, for, as said, it is among the most worthy of cultivation of all azaleas. The fact of its existing in so many colors, as instructed by Bartram, is unknown to many, and it is not uncommon for those who buy a plant or two of it to think a mistake has been made when they notice a difference in color, and perhaps neither color just the same as they had seen on other plants.

Collectors have done well in making this azalea better known of late than it used to be, and florists and nurserymen should endeavor to make it still more known, keeping in mind that Bartram said of it that it "was the most gay and brilliant flowering shrub yet known."

Staphylea Colchica for Forcing.

There is a staphylea wild in our Pennsylvania woods, the *S. trifolia*, but it is not as handsome when in flower as *S. colchica*, an Asiatic species, which has been forced for Easter and other occasions in Europe for some years before it was used for a similar purpose here.

Of late years it has been seen in collections in this country, and it makes a nice addition to the list of shrubs available for forcing, its pretty white flowers being dissimilar to any others known to those who force plants. The flowers are in little bunches, not unlike very small heads of white lilacs, and they possess a delicate fragrance that pleases. It does not need large plants to flower. Many of those our florists had last year were not over two feet high, yet had a good show of blooms. Such small plants are really preferable to large ones, being more easily carried from place to place; and their small size is what makes them interesting to many purchasers.

The plants should be obtained now, and if from the open ground should be dug with care that as much root as possible be secured with them, then potted and placed in a cool shed or cellar until such times as forcing is to commence. When outdoors this staphylea flowers just as lilacs are finishing their display.

Forcing Hydrangea arborescens sterilis.

Whether the hydrangea, *H. arborescens sterilis*, will be valuable for forcing remains to be tested. Outdoors it flowers well in advance of the popular *H. paniculata grandiflora*, and while there need be no doubt of its forcing well, the question will be whether it will force in time to be of use before outside flowers are available. It is likely it would, as even after indoor plants are set out it is some little time before any of them return flowers.

When growing outdoors naturally the hydrangea in question blooms in June, late, or early in July, and when forced indoors a month or more could be clipped off this. It might not come along as quickly as the Japanese snowball, as it has to make long shoots and produce its heads of flowers on their ends, while the snowball has but to push forth its blooms from the shoots made the previous season, but the growth of the hydrangea is quickly made, and there is all probability of the flowers being produced in good time to be of use in floral work.

All acquainted with floral make-ups know how useful the old hardy hydrangea flower heads are; and those of the one now referred to would be found useful as well, especially if obtainable in advance of the others.

Americana Hazel Nut, Corylus americana.

The failure to succeed with hazel nuts which follows the attempts of so many who try to cultivate them

Staphylea colchica as a Pot Plant.

would seem to indicate that the cause is not a lasting one, judging from the quantities of these nuts now on the market from wild bushes. All over the country where the hazel grows wild there are nuts by the bushel this season, not only of americana, but of rostrata as well.

It has been supposed that the cause of failure to produce nuts, which some say follows their cultivation, comes from the male flowers expanding in advance of the female ones, and this may be so. Perhaps if a situation for them similar to their wild one could be given them better results would be obtained. In North Carolina it is found on the mountain-sides; and the few bushes the writer has seen wild have been on the slopes of hills well above the water flowing at their base.

When in cultivation the bushes do not seem to mind the open exposure, but as some shade seems natural to them it may be that nuts would be produced more freely were a partially shaded place afforded them.

The species rostrata is similar in size and appearance to the americana, but the husk of the fruit is prolonged into a beak, causing it to be known to some under the name of the beaked hazel.

Neither of these native sorts is thought the equal of the European varieties. The kernels are as sweet, but the nuts are smaller and harder shelled.

Value of the "Post Oak."

This is the season to secure a supply of acorns for immediate sowing or for keeping in damp soil for sowing in Spring. It is a cause of surprise to many, especially to horticulturists of Europe who come here, to find so little attention given to the many beautiful and valuable oaks wild in the midst of us. Take *Quercus obtusiloba*, *Q. Michauxii*, *Q. castanea*, *Q. laurifolia*, *Q.*

cinerea, *Q. aquatica*, *Q. nigra*, *Q. falcata*, and many others, and how many nurseries could supply them? The stock is all of alba, tinctoria, rubra, coccinea and prinus. The one heading these lines, *Quercus obtusiloba*, is one of the most valuable of oaks for its timber, to say nothing of its beauty as a tree. Authorities place it ahead of the alba as a timber tree so far as the value of its wood goes, but it does not make the large tree the alba does. It extends from Southern Pennsylvania through the middle districts of the South; never a very large tree, but owing to its durability it is much used for posts, hence its name, "post oak."

Many of the other oaks named as well as this one are of handsome appearance on lawns, and were nurserymen to pay more attention to sowing acorns of them stock would thus be obtained which would find a ready sale.

If too late to sow acorns on account of the ground being frozen, they could be mixed with damp soil or sand and kept in any cool shed until Spring, and then sown.

JOSEPH MEEHAN.

Diseases of the Peony.

Editor Florists' Exchange:

Though the healthiest of all plants, yet the peony has its idiosyncracies and we must pay some attention to its peculiarities. Of late there has been complaint of a blight which goes down into the root and rots it. Then there is the club foot, when the plant does not throw out any fibrous roots, but must live through the absorption of the larger roots. Then there is the imported French disease of a fungoid nature, which gives us an uncanny, distorted root, full of disease, and it does not seem possible for it to recover. It does not cure itself.

The cause of the blight is too rich ground, too much shut in from the wind, and too much manure. Peonies will not do well on the same ground year after year. When I commenced the business, I had the finest of prairie soil, four feet deep. The plants made a tremendous growth. To avoid mixing, I took up the plants, divided them, and put some back in the same row. They did not do as well. I tried it the second time and they refused to grow; they seemed to stay right there. The blight struck them and went down into the root, and some of these rotted. The remedy was to take them up and plant on entirely fresh ground, where they rallied.

Once I planted a lot and they made an immense growth. After two years I cut them up, had the ground heavily manured and planted over. I never saw such a lot of homesick plants. They would not grow; come to dig them up, they all had the club foot and the ends were rotten. They were nauseated. I took them up, cut off the diseased parts, put them on entirely fresh ground, and they rallied. So never replant on the same ground and never use fresh manure. Better not manure the ground, but put the manure on the surface and let it leach down and also act as a mulch.

The French disease is a tough proposition. I got a lot of diseased roots last Fall. I threw some into strong lye—too strong; it killed them. Some I planted in slacked lime and that did no good. The roots this Fall are as distorted and gouty as ever. As formaline is used to cure smut in wheat, I think it would be a good idea to dig the roots, let them dry pretty well, and then soak them in formaline, diluted about forty to one, and see how that would do. Copperas water is used on seed potatoes to prevent the blight and it seems to work well; it might also do in this case. Unfortunately, some of the finest and highest-priced roots are affected. But they may grow side by side with others for years and the disease never cross over to them; but it clings like death to infected roots. But don't be scared, however; you may never see a diseased peony, for any trouble of this kind is rare at best. Only give the plants what they want. Study their needs and you are all right. Don't buy any plants infected with the fungous disease.

C. S. HARRISON.

York, Neb.

Pamphlets Received.

ANNUAL REPORT (1906) Park Department of Cincinnati, O.—We acknowledge receipt of a copy of this report through the courtesy of Superintendent J. W. Rodgers. The city has now a park area of 459,817 acres, valued at \$3,300,189.76. A list of the plants cultivated in the greenhouses is furnished, also of the trees in the various parks, arranged according to their natural orders. Mr. Rodgers is to be complimented on the interesting document he has turned out.

A SENSIBLE STATEMENT.—I hold that the originator of a commercially valuable new plant should charge a good round price, commensurate with the care, trouble, and expense he has been put to in developing his production, and he should compensate the purchaser for the high price paid by delivering the very best stock that can be produced under the most advanced system of culture. —Charles Willis Ward, before American Breeders' Association.

ROSES

If the plants have received proper care, the light mulch applied earlier in the season is now about used up and a little more nourishment should be provided in the form of a mulch of but partly decayed cow manure, which has been turned over several times to liberate some of the ammonia, which otherwise would be apt to burn the foliage. Endeavor to have the beds fairly dry, then dust on a liberal coating of bone meal and then apply the mulch, after which water thoroughly. This if done as early in the forenoon as possible, on a clear day, will prevent any danger of the leaves getting burned. If the manure is, as recommended, but partly decayed, after a few good waterings it will soon disappear, for it is not desirable to have any coating on the benches during January and the early part of February, when the benches do not dry out very much.

It is a little early as yet to begin the use of liquid manure; this is too much of a stimulant and in the hands of any but the most experienced is rank poison to the plants.

From now on the grower must be very careful as regards watering, for the surface of the soil is apt to be moist at all times, especially where the plants are syringed frequently, while close to the bottom of the bench the soil will be as dry as powder. Plants grown under these conditions cannot be expected to produce good flowers, nor strong stems; it is best, therefore, as much as possible to water less frequently, but thoroughly, putting on a sufficient quantity of water to soak the bench through and see the water drip from the bottom. Of course, it is not wise to go to the other extreme and water so heavily that the water stands in pools under the benches, for then a great deal of available plant food is lost by being washed out.

As the days grow shorter, air becomes a greater factor, and it should be borne in mind that plants to remain healthy require a large amount of pure fresh air; therefore, the ventilators should be open on all favorable days; in continual cloudy weather at least a small crack should be put on for two or three hours at midday, so that the air never becomes heavy or stagnant.

Syringing should from now on be done only on bright days and the plants carefully shaken afterward that they may dry off the faster, as it is not wise to allow them to remain wet over night, and as recommended previously, a little air-slaked lime blown around will improve conditions materially.

Keep the plants clean and neatly tied up, not alone for the sake of appearance, but for the well-being of the plants themselves. If leaves are allowed to remain on the benches they harbor vermin of all kinds.

Keep the plants well disbudded and do not allow the strength to go into the side shoots that should go to make the bud. It is a mistake to disbud after the roses are cut and ready for packing, as is quite frequently done even now on some of the smaller places.

See that no gas from the boilers can enter any of the houses, for this will soon spoil the end of a house and the loss in dollars and cents is often considerable; so fill up with asbestos any crevices around beams and pipes, thus guarding against danger.

It is a pity that New York cannot give a show that would compare with the grand affair out West, where the rose was so well represented. There is something wrong somewhere. It would have been a pleasure to many growers here to see the new varieties exhibited.

Keystone Nurseries, LANCASTER, PA.

Mr. Advertiser:

Our Christmas Number will be issued December 14

To those who desire to reach buyers of holiday necessities, whether of plants, flowers, evergreens, supplies or any other commodity connected with the trade, the securing of advertising space in that issue will accomplish the desired end.

OUR CHRISTMAS NUMBER presents an excellent opportunity for clearing out not only surplus stock, but everything else that a florist uses in his business.

The money spent for advertising at this time is not an investment; it is an actual purchase of holiday customers.

Send your advertising copy early; we can receive until Wednesday noon, December 11. The earlier it reaches us, however, the better our opportunity to make a good display of it.

T. J. TOTTON, Saratoga Springs, N. Y.

To Catch Cockroaches.

The prevention of the ravages of insects on plants concerns every person engaged in horticultural pursuits in some degree or other. Cockroaches are at times troublesome and perniciously active in the destruction of the roots of some plants, such as those of cactuses, and the blooms of others such as gardenias, so that to those not hitherto in the know, it will be seen that these creatures are aristocratic in their tastes. What concerns us most, however, is the quickest method of exterminating these epicures. The most improved method of capturing them known to me was discovered by mere accident. A common fruit jar of a pint capacity was inadvertently left in the greenhouse. Within the jar were the remains of a portion of bacon. Next morning, on looking around the interior of the greenhouse, and happening to cast his eye on to the interior of the jar, the greenhouse man beheld a dozen or more cockroaches vainly endeavoring to climb the slippery sides of the glass jar in a desperate attempt at escape. In due time the workman gladly acted the part of executioner. Next evening and every evening since, the jar with its alluring and aromatic contents was in place with the result that the whole establishment is now almost clear of cockroaches. For the benefit of other sufferers from these voracious and repulsive creatures, I must add that they cannot climb into the jar from the outside any more than they can climb out and escape, unless a piece of paper is pasted on the outside for a foothold. In the first instance, the original label of the manufacturers answered the purpose admirably. This, of course, does not imply that the visiting gentry were made known of the jar's contents by the inscription, but simply that by it they got their supper, and a night's lodging, with a cordial greeting in the morning.

CHRISTMAS

Invitation Cards

Every retailer in the land makes special effort at Christmastide to draw the attention of customers and others to the choice stock of plants, flowers, etc., which he has provided for that festive occasion.

To facilitate the efforts of the dealer, the A. T. De La Mare Ptg. & Pub. Co., proprietors of The Florists' Exchange, have prepared a set of four invitation cards, each one printed in four colors, as follows:

Sample of No. 1 (Holly Wreath)

The cards are on the finest stock (size 4x5 ins.) and the printing is most excellent. Baronial envelopes of fine quality, unprinted, are furnished with each order. In addition, to make the work complete, we furnish any wording you wish on the Invitation, which latter will be printed in black ink, unless otherwise ordered.

On orders of 100, 250 or 500 we furnish your selection of any one design out of the four; additional designs, however, can be selected at an extra charge of One Dollar each. On orders for 1000 or over we furnish your choice of any two designs.

If interested, send at once for a set of sample Invitation Cards. They are the finest designs and the best money-makers that have ever been provided for the trade and, at the prices quoted, are very cheap.

We expect to be deluged with orders for these cards; therefore, would advise you to act promptly. Address

THE WEEK'S WORK

Timme's Timely Teachings

The Early Hyacinths and Narcissi

Roman hyacinths and Paper White narcissi are the easiest, the earliest and for this reason, probably also the most profitable of the many varieties of bulb that are annually handled in large quantities by professional florists. Both may be had in bloom as early as suits the wishes of the grower, while there is no difficulty in keeping them back if this serves his interests more effectually. No being stock that plays an important role at the holidays or justifying special exertion on the part of the grower in forcing out large quantities of it for the occasion alone, it proves most profitable when supplied in succession from November until about February, after which the Dutch bulbs take possession of the market.

The bulbs, after being planted in August or September and the boxes or tray covered with a top layer of fresh soil for about seven weeks and then taken out, show a mass of white roots and forcing may begin at once. Those to be held over in this condition must, of course, be kept cool but not allowed to become dry, a not altogether dark place under bench or staging being as good as any for a considerable length of time for that part of the stock which is to be forced into a crop of blooms for cutting. Whatever is intended for the trade in flowering potted plants, the bulbs being started in pans, pots or neatly finished boxes of suitable shape, must have the full light from the start after being well rooted, and be slowly brought into bloom in a rather cool house and on bench or shelf quite close to the glass. Short, sturdy growth and stout-stemmed flowering spikes, needing no support in the form of unsightly stakes, must be aimed at in the growing of bulbous plants for this kind of trade. Both French hyacinths and narcissi are admirably adapted for the purpose.

A high degree of heat may safely be employed in the actual forcing of either variety when the flower spikes are to be cut. In a temperature of from 60 to 70 degrees, under a shading for the first week or ten days, often sprinkled and the roots kept continually wet, Roman hyacinths will produce long spikes of exquisitely delicate bloom in about twenty-five days from the time the well-rooted bulbs were put into heat. If then removed to a somewhat lower temperature and exposed to the full light for a few days, the flower spikes would be found to be less brittle and more apt to stand without injury, bunching and shipping than when cut as they open up in forcing heat. Paper White narcissus requires about a week longer to fully expand its bloom in the same degree of heat, but will finish up in better shape for cutting when given time in a house not so warm and afforded light and air during the entire process of forcing, in which bottom heat should never play a part.

Holland Bulbs.

Dutch hyacinths, tulips and narcissi intended for indoor forcing in pot or box up as early as possible, using well-prepared, fairly rich and rather sandy soil, the addition of pure sand being necessary in the preparation of heavy loam composts for this purpose to insure best results. All bulbs of this kind are set high in the planting, so as to afford them plenty of root room in pots or boxes. After being watered we cover them with a layer of freshly dug soil to the depth of four inches; more will do no harm, but is not needed, less would cause the boxes to dry out and make another watering or even several necessary in the interval between boxing and removal from the trenches to indoor quarters, which latter should not take place before the soil in the trays or pots is filled with roots. Those not to be forced before Spring, all late sorts which include the greater number of double flowering varieties as also those of the singles to be held back for some time, already supplied with sufficient roots for immediate forcing or yet backward in that respect, we leave in outdoor trenches until their time for being forced arrives. The mounds, well marked as to what variety is beneath them, receive a good covering of litter or rough stable manure as a protection in Midwinter against a thorough freeze-up.

Where the burying of the boxes in open ground is not practicable owing to

"Fibrotta" FLORISTS' FURNITURE

Parlor Plant Tubs, Rolling Stands, Vases for Cut Flowers and Pot Saucers

WHY not try **Fibrotta Tubs and Vases?** They are free from the objectionable features of wood and earthenware; last longer, look better and are far more economical to use, and cheaper in first cost.

Our **Rolling Stands**, too, provide an ideal means for moving potted plants about.

Fibrotta Tubs are made of Indurated Fibre; are practically unbreakable and the most satisfactory Tubs made for growing plants.

Prices very low. Write your jobber or ask us for price list.

CORDLEY & HAYES
173 Duane St., NEW YORK CITY

low lying land or for other reasons, a place about the grower's premises must be found for the newly planted bulbs which affords the necessary room in conjunction with prevailing conditions favoring root formation, a place quite cool and rendering the maintenance of an even moisture in the soil an easy task. This mode of starting Dutch bulbs, though more convenient, perhaps, hardly ever serves the purpose as well as outdoor trenching, daffodils and narcissi in general probably giving least cause for preference in choosing either way. There is yet time to plant any of the Dutch bulbs, and as regards tulips for indoor forcing or outdoor bedding, very late planting has sometimes resulted in an exceptionally fine display of flowers; the risk of being compelled to handle bulbs and soil in disagreeable weather being the great disadvantage.

Hardy Bulbs for Bedding.

There is never a season but what retail florists are called upon to plan and lay out or at least to stock beds or borders with bulbs. Usually these orders come in so late that very often it becomes impossible to obtain just the kind or variety of bulbs needed or called for and plans must of necessity undergo modification. This is the opportunity of the professional florist to give ample evidence of his greater familiarity with the many varieties of hardy bulbs eminently suitable for outdoor planting and his greater skill in bringing about truly beautiful effects than is shown by the greater majority of customers favoring the trade with orders for this feature of outdoor gardening. It is not a rare occurrence to be asked to pass judgment on plans for a medium-sized bed or two, carefully worked out by themselves with any number of bulb catalogues at their elbows, that, were they to be carried out as submitted, would ruin the reputation of any gardener who had a hand in the horrible exploit. It is to our interest, of course, to humor as far as possible a well paying patronage in their ideas. Direct opposition or contradiction is a thankless piece of business policy and does little in the way of educating the public. But when the circumstance of its being late in the season, making it impossible to obtain over half the number of varieties called for, comes to our assistance in carrying contention to an

issue pleasing to both parties, bulb planting is entered into with zest.

If a meaningless intricacy of design in bedding is to be shunned at any time, it certainly proves most offensive to good taste when in the planting of bulb beds the attempts at rejuvenating the effete Rococo style result in a deplorable mis-carriage of preconceived ideas. Too many varieties, crowded into the narrow compass of a small design, spoil the beauty of many a bulb bed. The other extreme to be avoided is the planting of large borders with but one variety, one color, the tiresome expanse of unattractive sameness not relieved by so much as a finely contrasting fringe or a blending of shades into a glorious display of color effects. Dull uniformity is far from meeting the exactions of refined taste.

When several colors are to be used in one border the planter should be careful in selecting such varieties or species of bulbs as flower all at the same time, are as near as possible of the same height for the background, center or body of the bed and all requiring the same kind of soil and treatment throughout. In the use of mixed bulbs it is best to keep the early and late, the dwarf and the tall kinds, the hyacinths, tulips, snowdrops, crocuses, garden lilies, etc., each by themselves. A bed of mixed early flowering tulips or one planted with the tall and stately late sorts is least likely to prove a failure, while an indiscriminately mixed lot of hyacinths in one bed is most apt to cause disappointment. A bed of the earliest of tulips, the Duc van Thol set, coming in a half dozen or more distinct colors, never fails to give entire satisfaction, for the reason that they are dwarf, marking the lines of the design most plainly, and because they flower when Winter is barely past, never being in the way for a timely restocking of the bed with Summer flowering plants. All beds and borders set aside for bulbs should be well dug before planting. All bulbs like a fairly rich soil, tulips less than hyacinths and these less than lilies, which latter also prefer a much stiffer loam and very deep planting, seven or eight inches below the level of the ground not being too deep for them, while a depth of from three to five inches will suffice for any of the others and light sandy soil be best for them.

If not naturally sandy the soil should be made so by an admixture of a goodly quantity of rather coarse sand to the heavy loam when preparing the bed for planting. A heavy top covering of manure will be of benefit to all sorts of outdoor bulb plantations during Winter, newly planted bulbs and roots needing it especially, and of these lilies, hyacinths and narcissi need it most.

Spanish Iris.

Though all varieties of iris are worthy of a place in any garden none proves quite so valuable as a producer of bloom for cutting as many other crops grown out of doors for the purpose by florists. Throughout their natural season of flowering, not excepting any of the many species of iris, we are least in need of any addition to the wealth of material obtainable from indoor and outdoor crops. But when by forcing them into bloom under glass we are enabled to hasten their proper season of flowering by about six weeks they at once gain exceedingly in value for commercial purposes. This can be accomplished by potting up into a good grade of sandy, porous soil the bulbs of any of the varieties of Iris hispanica quite early in September, using several bulbs for the purpose of making one good 6-inch pot plant or planting the bulbs in boxes, as we do tulips for cutting, with this difference, that iris should not be planted quite so close, but deeper in the soil, with just the top showing above ground. We then place pots and boxes in frames, water thoroughly, cover with packing paper every bright day until cooler weather sets in and the full light and plenty of air night and day is needed for a slowly starting top growth. In real cold weather the sashes must be put on the frames and are sometimes needed before that as a protection against long-lasting, heavy rains. An additional covering over the sashes with litter or matting becomes necessary, occasionally left on for weeks as the severity of advancing Winter makes itself felt more and more. When active growth is well under way, as is the case by the end of December, this protective top cover, while doing good in keeping out cold, does harm as well in keeping out light and air, and the safer course then to pursue is to carry boxes and

GEO. J. HUGHES, Berlin, N. J.

pots containing iris into a cool greenhouse where proper attention can more easily be given to their needs. From then on they require to be watered quite regularly, the temperature not to be allowed to rise above 45 degrees at night with about ten degrees higher on bright days, tempered down as much as possible by ventilation at the sunniest hours of midday. The nearer we come to Spring the higher will the temperature rise under glass in daytime, and a correspondingly high rise in artificial heat during cold nights becomes necessary or mischief is sure to be wrought. This is the critical period in the otherwise smoothly progressing task of forcing Spanish iris. They now are nearing their finish, requiring an even temperature, and if this cannot be maintained at a low point without difficulty it is better for the unhampered development of the buds to finish up in a temperature five or more degrees higher, but safe against any excessive difference between day and night. Flowers in a cut state last longest when not allowed to open up fully on the plants before being cut.

Awards at Jamestown Exposition.

Editor Florists' Exchange:

I thought that you might like to let your readers know who got awards at the Jamestown Exposition, therefore I send you this list, which is complete to date, November 22.

Gold Medals.

Caldwell Lawn Mower Company, Newburgh, N. Y.—Hand, horse and motor mowers.

Arthur Cowee, Berlin, N. Y.—*Gladiolus* in beds outside.

W. G. Eisele, West End, N. J.—Bed of *cannas*. (Long Branch.)

Peter Henderson & Company, New York City.—The Henderson lawn grass, and Henderson's *Invincible asters* in four colors.

Hubert Bulb Company, Portsmouth, Va.—Flowering bulbs grown in Virginia (*narcissi*, *tulips*, etc.).

Silver Medals.

Cordley & Hayes, New York City.—Fiber vases for florists.

Frank Cummings Bulb & Plant Company, Meridian, Miss.—Bed of *cannas* and fancy-leaved *caladiums*.

J. G. Harrison Sons, Berlin, Md.—Nursery stock.

Thomas Meehan's Sons, Philadelphia, Pa.—Meehan's Mallow Marvels.

Henry F. Michell Company, Philadelphia, Pa.—Bed of *cannas*.

Perennial Gardens Company, Toledo, O.—Pink Baby Rambler rose (Anny Müller.)

Julius Roehrs Company, Rutherford, N. J.—Bay trees.

The balance of the awards will be out some time next week, also the awards for the chrysanthemum show.

JULIUS HEINRICH,
Supt. of Landscape Dept.

The Florists' Exchange would be pleased to receive, for publication, a brief report of your Thanksgiving trade.

Registration of a Hydrangea.

Another instance of the need of greater care being exercised in connection with the registration of "new" plants, both by the originators and introducers as well as by the S. A. F. O. H. itself, has just come to light in the case of naming, or as it turns out to be, renaming of *Hydrangea arborescens* var. *sterilis*. Briefly stated the facts are as follows:

On July 21, 1906, the E. G. Hill Company, Richmond, Ind., registered with the S. A. F. O. H. the name: "*Hydrangea arborescens alba grandiflora*." It appears from subsequent correspondence that the same plant to which this name was applied was enumerated and briefly described in Bailey's *Cyclopedia of Horticulture*, reference to which shows that the name there given is *Hydrangea arborescens* var. *sterilis*, "known also as Hills of Snow."

The National Nurseryman of Rochester, N. Y., recently published a letter from a correspondent calling attention to these facts, and at the same time asserting that the name given in the *cyclopedia* "is botanically correct, descriptive, and was the first published"; adding, also, that the name registered with the S. A. F. O. H. is so similar to *Hydrangea paniculata grandiflora* as to cause confusion in the minds of the people as well as on the packing ground. The writer likewise suggested that "nurserymen catalogue this plant according to Bailey, who is our 'lawgiver' as to names." The editor of the National Nurseryman appends the following pertinent inquiry: "How is this, Brother Registrar of the S. A. F.? What about the rule of priority?"

The "Brother Registrar," the ex-secretary of the national society, who is also the editor of our Boston contemporary, tells his readers of his belated endeavors to secure from the E. G. Hill Company their views on the validity of the name registered with the S. A. F. These views are frankly stated by Messrs. Hill in the same periodical. They say:

"The name given to the new hydrangea was suggestive, we thought, of its character, color of the flower, etc. We did not know the hydrangea had been named by Mr. Bailey in his *Encyclopedia of Horticulture* previous to the name *Arborescens grandiflora alba* having been registered with the S. A. F. by our firm. Had we known of this, we would not have suggested any other name. The name registered by the S. A. F. has been adopted by nearly all, if not all, the catalogue men both in America and Europe, and such being the case and as *sterilis* has not come into general use, why not let it go as registered?"

"We were the first to bring this plant into notice through a published description and also, we believe, the first to introduce it commercially, hence we were perfectly right in appending the name given and registered. This hydrangea had been growing under the very noses of J. W. McNary and E. Y. Teas for years and years, yet they never saw it, or, if they did, they did not give publicity to the fact."

But in a letter which we have received from an interested party it is therein stated:

"At the time Hill registered their name they knew that at least two enterprising florists had had the plant in cultivation and propagation at least two years before Hill ever heard of its existence. They had no right to name and register it. Ten years before they ever heard of its existence it was commonly known in dozens of gardens as 'everblooming,' just because it bloomed all Summer, the blooming season of the old form beginning and ending in August."

The Messrs. Hill, as well as the Secretary of the S. A. F. O. H., would, too, have found the hydrangea in question fully described by William Falconer in *The Florists' Exchange* of August 14, 1904, and also would there have learned that it was then being propagated by James Semple, florist, Avalon, Pa.

The editor of our contemporary in commenting upon the action of Messrs. Hill in registering the plant states:

"It affords convincing proof of the wisdom of being up-to-date in matters of horticultural interest, by taking advantage of existing mediums for publicity and by becoming identified with the only national body which has so far made any serious effort to provide a means for establishing plant names. It appears to us that upon the publication of the registered name by Mr. Hill, those who had known the plant by another name should have immediately informed the secretary of the S. A. F., who, not being omniscient, would, no doubt, have been grateful (as Mr. Hill would also have been) to get the information."

For our part we hardly see that any such eulogium fits this case. It does not appear that the publicity obtained by registration was needed in this instance, inasmuch as the evidence proves conclusively that the plant in question had already been named and described in Bailey's *cyclopedia*, as well as subsequently in this journal. In view of these facts, we regret to see the position now taken by Messrs. Hill in urging that the name they have registered should stand, thus setting aside all the well established rules of priority; and we hope for the best welfare of all concerned they will withdraw their name and abide by the designation first given the plant, and by which, according to all recognized nomenclature usages, it should now be known.

A well-known French proverb says: "He who excuses himself, accuses himself," and this would seem

to apply in this instance to the national society or its official. The secretary of that organization at the Milwaukee convention in 1903 stated that he accepted in good faith, in all cases of registration, the "word of a member of this society"; and then went on to explain that his instructions in the constitution regarding this branch of the society's work were very vague. The case in question proves the dangerous nature of this somewhat too confiding method. The further statement he now makes, to the effect that "botanical authorities should keep better informed as to events in commercial horticulture," is a mere begging of the question. It surely behooves all who present a name for registration to acquaint themselves beforehand as to whether or not the "new" plant has been named previously; and this can easily be done by submitting specimens to the Botanist of the S. A. F. O. H., in cases, such as the one under consideration, where there is any possibility of doubt, either on the part of the "Brother Registrar," or of the party submitting the proposed name. It is utterly impossible for any one to decide on the newness or oldness of any plant, simply from the publication of a name, or of a description lacking full botanical details, such as usually accompanies the appellations registered by the S. A. F. To discover whether the same name has been formerly applied to another plant is not such a difficult matter; and yet there are instances on record where this, although known, has been permitted to pass.

It has always seemed to us that the entire registration plan as now carried out by the S. A. F. is too lax, and the case in point substantiates our contention. Inquiry, both as to the newness of name as well as to the newness of the plant registered, should be made by the society before publicity is given to these facts by publication of the registration entry, and if the recommendations of the Committee on Nomenclature and Plant Registration presented at Philadelphia are adopted by the society, it will go a long way to place the registration matters of the S. A. F. upon the basis on which they should stand. The recommendations referred to require for the purposes of registration a full history of the plant, its parentage and origin, also specimens, and if the merit of the plant cannot be determined from these, that the subject mentioned be placed in suitable trial grounds, either under the direct control of the S. A. F., or such institution as it may designate, for a full test of the points claimed for it by its originator. And among these points is certainly the premier one of *newness* of the subject registered, for the constitution of the society distinctly specifies that registration is for "new plants," and not for new names to old plants.

The Fall Shows.

The reports from localities where exhibitions have been held this Fall indicate that there is no waning of interest in the flower that makes these shows attractive, namely, the chrysanthemum, and no diminution of its popularity. While the large blooms are, and possibly will continue to be the principal features at our Fall shows, it is gratifying to observe that the smaller-flowered varieties are now commanding attention from visitors and the trade—something that will increase when a better method of displaying the blooms has been adopted than the one now in general use. We should think that groups of pot-grown small-flowered varieties would better demonstrate the beauty of these sorts than the present plan of crowding a large number of the tiny blossoms into small receptacles.

And while on the subject of showing chrysanthemums in pots, it is not without some regret that we read that the well trained specimens of these, usually seen at the Boston show, were this year not in evidence there to the extent generally observable. This falling away is something the management of this and other exhibitions should endeavor to combat. To grow such plants to perfection requires lots of room and much painstaking care, and prizes adequate to cultural demands should be provided, to induce exhibits of this class of stock.

The management of the Chicago show has this year given a demonstration of the possibility and attractiveness of breaking away from the beaten paths so universally and monotonously apparent at exhibitions. While space limitation may preclude the duplication of the Chicago scheme generally, yet a display plan has been furnished worthy of emulation to the extent permissible by the circumscribed room at command. Novelty will thus be injected where sameness has prevailed, and in flower shows, as in everything else, it is novelty that takes with the public.

It is doubtful if ever better quality chrysanthemum blooms have been shown than this season; and that, too, generally throughout the country. The high standard that has been reached makes it a difficult matter for newcomers to find a place; and is doubtless responsible for the paucity of the novelties exhibited before the C. S. A. committees this year that have gained the coveted certificate, under both the exhibition and commercial scales. Perhaps the greatest excellence has been seen in the blooms grown by private gardeners, although

November 30, 1907

the commercial standard has also noticeably advanced. For this satisfying condition we owe much to our Fall flower shows; and as tending toward its continuance and betterment, everything that is possible ought to be done to make these exhibitions popularly attractive, so that they may be sure successes, both florally and financially.

The greatest interest in an exhibition way now centers in the forthcoming National Flower Show to be held, under the auspices of the S. A. F. O. H., at Chicago in the Fall of 1908. This show should, and undoubtedly will, receive the united support of every horticultural organization in the country, in the educational work of which exhibitions play a part. We hope the various special societies will urge upon their respective members to be represented at that exhibition with displays of their products in season at that time. And whatever form the carrying out of the details of judging and such like may assume—and this, after all, if competent men are chosen, is but a minor side issue when compared with the greater interests involved—there must be complete and full unity of endeavor, so much depending on the success or failure of the undertaking, so far as the S. A. F. O. H. itself is concerned. Given the loyalty the society deserves on this occasion, coupled with imperative individual and collective effort in promotion of the various branches of the business which the show is intended to further, and there can be no such thing as failure—from an exhibition point of view at least. That our craftsmen will rise nobly to the occasion is beyond question; and that optimism concerning the outcome is bound to be the impelling force toward ultimate and looked for results, in every respect, is our fervent belief.

BOOKS RECEIVED

WATER LILIES AND HOW TO GROW THEM. By Henry S. Conard and Henri Hus. Publishers, Doubleday, Page & Company, New York, Cloth; Illustrated. Price, postpaid, \$1.21.

This volume forms number five of the Garden Library series of the publishers. While covering the subject pretty completely it really presents nothing new, the niche in the gardening literary world it seeks to fill being already well occupied by other books of the same character which go more exhaustively into detail, and which, in our opinion, deal with the matters treated upon in a more practical manner. There are several statements in the text of the book before us that are quite misleading. For instance, on pages 3 and 4, it is asserted that a half barrel, cut to a depth of 18 inches and sunk so that "the bottom is three inches below the level of the ground," would make a thoroughly practical "lily pond" for the smallest garden. To follow this advice would be labor lost, as no benefit would result from the receptacle being placed at the recommended depth. If the idea is to keep the roots of the water lilies cool, the half barrel should be sunk to within three inches of the rim, which is, perhaps, what the author intended to say.

Plate II, purporting to show a tub of *Nymphaea tetragona*, is likewise erroneous; the flowers shown are not those of the pygmy lily at all, but are seemingly those of *N. odorata*.

On page 6 it is stated that a kerosene barrel sawed in half will furnish two tubs, each big enough for one lily; and that "the tubs should be well washed out and soaked for some time in water in order to remove as much as possible of the oil and glue, which is put on to render the vessel tight." This can be successfully accomplished in a few minutes by burning the inside of the tubs.

Then again, we are told that half of a brewer's hog-head "will harbor as many as five or six water-lily plants," whereas in actual practice it has been found that three of the smaller growing or two of the ordinary hardy lilies will fill this space.

In the instructions for the making of puddled clay ponds the author also seems to be somewhat at sea. He says "happily it is not necessary to use a layer more than four inches thick, so that for a pond twenty feet in length, and with an average width of ten feet, seven to eight wheelbarrow loads of puddled clay will be ample." The quantity of clay here named would not begin to be sufficient for the purpose specified; it would require just seven times seven wheelbarrow loads for a pond of the dimensions given.

The author's instructions for the treatment of natural ponds before planting likewise show a lack of practical knowledge of the subject. On page 12 a layer of soil and manure 12-15 inches thick (in a previous chapter a depth of 18 inches is named), is recommended. This would leave a depth of water of from 6 to 3 inches, which would be entirely inadequate for the

growth of the greater majority of water lilies; in fact, only the very smallest lilies would thrive in the depth of water recommended.

His unfamiliarity with the nature and habits of some of the varieties the author specifies is also quite apparent. He states of *Nymphaea chromatella* (page 93), "It is perfectly hardy, even in water so shallow that it must freeze to the bottom." All who have cultivated the water lily in question know that a few degrees of frost will kill it; also that the roots grow well up above the soil, hence the danger to it from freezing. It is likewise asserted (pages 94-95) of *Nymphaea Mariacea* var. *albida*, *N. M. carnea*, and *N. M. rosea*, that "none of the three can be said to bloom freely." This is a blunder; they are three of the very freest water lilies in cultivation.

While not without value, as we have said, the book can hardly be recommended as a safe guide to those who would follow this fascinating phase of gardening—the cultivation of water lilies. One of the most serviceable features of the volume is formed by the tabular analyses at the ends of chapters VII, VIII and IX, whereby identification of any of the water lilies now in the trade is rendered comparatively easy.

Copies of the book can be procured from the publishers of *The Florists' Exchange* at the price named above—\$1.21.

William N. Craig,

Secretary Boston Gardeners and Florists' Club.

AMERICAN BREEDERS' ASSOCIATION Volume III, being the Proceedings of the Meeting held at Columbus, O., January 15-18, 1907.

Like the preceding volumes published by this organization, the book before us is replete with valuable information on the subjects connected with the breeding of poultry, plants, animals, etc. Of particular interest to our readers are the papers by Fred. Dörner, Sr., Lafayette, Ind., on "Carnation Breeding"; by Professor Norton on "Heredity in Carnation Seedlings," and by Professor Simpson on "Rejuvenation by Hybridization," also the remarks of C. W. Ward, Queens, N. Y., on "The Introduction of New Varieties of Plants."

These volumes are sent to members only, and they are worth many times the price of the annual dues payable to the association. Full particulars regarding which can be obtained from the secretary, Hon. W. M. Hays, Assistant Secretary of Agriculture, Washington, D. C.

OUR READERS' VIEWS

Notes on Sweet Peas.

Editor *Florists' Exchange*:

On page 597 of *The Florists' Exchange* of November 2, 1907, my right good friend and fellow cultivator of sweet peas (which are the most popular Summer flowers now grown in England, Mr. Editor), alluded to notes of mine in your issue of August 24. Unfortunately, I am at a disadvantage, for *The Florists' Exchange* of that date reached my office during the holiday recess, and I cannot now lay hands upon it. However,

I am quite confident of the reliability of my notes, except that there was one evident mistake. If I wrote "Bakers' strain of Mrs. Charles Breamore," that ought to be altered to—"Bakers' strain of Mrs. Charles Foster." Messrs. Bakers of Wolverhampton, I believe, introduced this bewitchingly beautiful lavender mauve sweet pea, which is named in honor of the wife of Mr. Chas. Foster, assistant director of horticulture at Reading College, in the gardens of which the National Sweet Pea Society's trials were conducted.

I am glad to discover that friend Weston (who "knows" peas and potatoes as well as any man in Kent—or even further than that) supports me in my endeavor to name only good and well-fixed varieties. Like himself, I, too, would say, "hang it all, why send out such (unfixed) stuff?" It is really too appalling. If growers would adhere to the N. S. P. S. lists they would save themselves much worry and vexation in the time to come.

Mr. Weston, however, suggests that I got old and new sorts mixed up. Surely not; if my notes are properly read; and they are all in good, understandable English! Princess Victoria (Dobbie) is new and is quite fixed. Our Queen (Sutton) to all appearances was also thoroughly fixed, and will, as Mr. Weston suggests, be most likely sent out in Spring. I wonder if he saw the variety Mrs. Henry Bell (R. Bottom, Carnforth) at Shrewsbury show? If so, he would say here was Our Queen perfectly duplicated. But why does our friendly critic pit Our Queen against Evelyn Hemus? The two are vastly different, and I do not understand why they should be special rivals.

Lastly, in "this year's new things," I only named those that, after trial at Reading, had received certificates this year. In that sense they were "this year's new things"—certainly. Moreover, no variety was recommended that was not known to be as well fixed and as reliable as sweet peas nowadays can be hoped to be. One only hopes that these little criticisms and discussions of varieties may stimulate a degree of interest in sweet peas in the United States similar to that now existing in the United Kingdom.

J. HARRISON DICK.

A Hard-Working Club Secretary.

W. N. Craig, who was re-elected secretary of the Boston (Mass.) Gardeners and Florists' Club at the annual meeting held last week, is by birth an Englishman, a native of Westmoreland. He was born at Levens Hall where his father, one of the finest types of Scotch gardeners, had charge of the grounds for many years. Levens Hall has been for centuries noted for its fine examples of topiary work, but reading a description recently in a thirty-year-old copy of the *Gardeners' Chronicle*, we find that the elder Craig made the place famous also for its fine collections of ferns, bulbous and other hardy plants. Is it any wonder, then, that a boy brought up amid such surroundings should prove the enthusiastic and expert gardener we find in W. N. Craig.

For the son of a gardener Mr. Craig received a very liberal education, and after leaving school was apprenticed in the gardens of Lambton Castle, then in charge of Mr. Hunter. Carpet bedding was at that time in its full glory, and these gardens were famed for producing the finest examples of the art. After leaving Lambton Castle Mr. Craig was for several years at Henley-on-Thames, in the gardens of Mr. W. H. Smith, which were kept up in a princely way and afforded one of the finest schools of gardening for young men in England.

About seventeen years ago Mr. Craig decided to try America as the country of his operations. He first found employment in Framingham, Mass., and after a few years spent there and in Springfield, Mass., he became gardener for Mr. W. J. Clemson, Taunton, Mass., where for a number of years he was noted for his productions of fine specimens of flowers and vegetables. About eight years ago Mr. Craig took charge of the gardens of the F. L. Ames estate, North Easton, Mass., and in a short time, under his able hand, wonderful improvements were made. He is now superintendent of the whole estate, and besides carrying on the regular work on the farm and gardens, does much forestry work in the fine native woodlands on the estate.

Mr. Craig has always taken a keen interest in horticultural matters in general. He is an active member of the Massachusetts Horticultural Society, one of its trustees, and serves on several of the committees. He has been for the past three years the very efficient secretary of the Gardeners and Florists' Club of Boston. He is a member of the Society of American Florists, the American Rose Society, and the Chrysanthemum Society of America. He is an active worker in Easton (Mass.) Grange P. of H. He finds time to attend the Royal Arcanum and Masonic lodges. He is the regular correspondent of a local newspaper, writes a weekly column for an English paper, is the New England correspondent of a Western trade paper, and finds time occasionally to write an interesting letter to *The Florists' Exchange*. Apart from all this he is a home lover. He has a lovely home, where Mrs. Craig and four boys reign supreme.

D.

AMONG THE GROWERS

Peter Fisher, Ellis, Mass.

This carnation growing establishment holds up to the records of former years. The leading feature in the meantime is Beacon, and it certainly is fine. One of the large houses filled with this variety is a glorious sight. As a producer it is all that is claimed for it, and as a variety for the Christmas trade it is unequaled. Mr. Fisher is a great believer in indoor grown plants during the Summer months and Beacon responds well to this treatment. White Perfection is doing very well and is the best white. Mrs. C. W. Ward is extra fine, and so is Mrs. Tom Harvey; these two varieties will be more extensively grown when they become better known.

Enchantress is grown in large quantities and still commands the best prices of any of its color. Winsor here is doing better than we have seen it elsewhere; the blooms are grand and although the stems are short at present they will soon be lengthened out. Rose Pink Enchantress is very fine; this is a splendid variety. Evangeline, a variety of a salmon shade, which Mr. Fisher has grown quite largely the last three years but never put on the market, is doing very well and is a good carnation for many purposes, especially as a Summer bloomer.

Many seedlings are being tried and the future records

well; several houses are devoted to them, and of the latter thousands of seedlings are to be seen in all sizes for the making-up of dishes. Azaleas are the special feature at present and they are to be seen by the thousands in any size or variety that may be desired. Mr. Leuthy makes a point to visit Belgium annually and select his own plants, and from the appearance of his houses he has been very successful this season. Araucarias are quite largely grown and look well; and besides the numbers of A. excelsa, Mr. Leuthy this year has a few small lots of A. imbricata and A. brasiliana. Variegated euonymuses are here done in fine shape; these make fine pot plants, which come in handy in many ways for decorative purposes. Another old-fashioned plant for this purpose is Eurya latifolia. Quantities of pandanus, dracaenas, genistas and other plants for later on in the season are all in fine shape. We noticed in a cool house numbers of specimen boxwoods, bays, etc.—a department gradually being added to as the demands of the business require.

J. W. DUNCAN.

Plant Culture by Electricity.

The Scientific American of October 19 has an account of the experiments made and being made at the Royal Botanic Gardens, Regent's Park, London, under the name of "Thwaites Electric Culture." It has been long known that the arc light stimulated the growth of plants. Coming, says the writer of the article referred

forward of the glasshouse, radiating a powerful beam of light on both sides of the house.

It is also the inventor's contention that the apparatus is an economical one. It is expected that the figures will show a saving of thirty per cent. over all systems at present employed. Indeed, it is claimed that the whole cost of the apparatus and its working comes out in the end at the rate of two cents, as at present compared with six cents per hour. Then Thwaites estimates that with his system, from three to four producing seasons in the year will be attainable. If, of course, choice fruits and flowers can be produced at any period of the year at no great cost, the invention should certainly possess great commercial value. At the moment only been in working order for just about a month, too it is purely in its experimental stage, the plant having short a period for one to predict likely results. At the same time, it is an experiment which will undoubtedly be followed with the greatest interest.

The invention, of course, applies only to indoor cultivation such as is carried on in greenhouses, conservatories and seed houses; but, if so successful, could not the principle further apply, say in the night time when light is absent? Probably not in the temperate zone, but how about the semi-tropic and tropic parts of our country? The illustrations given with the article show beyond question the rapid and powerful effect upon plants in pots; why not to pineapple plantations, orange groves, vegetable gardens? The item of consideration would be size, quantity and cost of the arc lights and the electric machinery necessary.—Florida Agriculturist.

Our London Letter.

BY A. HEMSLEY.

PLANTS IN THE MARKET.—Well-flowered plants of Begonia Gloire de Lorraine are now seen, but we usually get it much earlier. I find at several nurseries it has been in flower for some weeks, yet there is no doubt that it is later in coming into bloom than when it was first grown for market, the reason being that it makes more vigorous growth. The increase in its vigor is probably owing to the fact that it has proved abortive. We frequently hear of seed having been saved, but up to the present I know of only one instance of seedlings having been raised, and this was from seed saved from a distinct sport and not from the original variety. I find that in the market the white variety is not so much appreciated as the pink one and some growers who depend on the market only have given up its culture. Mrs. Leopold de Rothschild is the favorite, for though the flowers are not of quite such a good color they stand up well above the foliage, and they do not fall off. I have had them hold on and turn quite green with age, in the same manner as occurs with the hydrangeas when grown in the open.

ERICAS.—Some growers were afraid that owing to the sunless Summer the heaths would not flower well. It appears to have had some effect on caffra, for I have seen but very few good plants of this. Gracilis, however, is beautifully flowered. The white variety is a favorite and has been selling freely. Ilyemalis is now coming in from several growers, and is certainly much better flowered than it was last season. It would be difficult to get them much better, yet I find that prices are rather low. While chrysanthemums are so plentiful and good they spoil the trade for other flowering plants. We continue to get good supplies of well-flowered plants and comparing prices they must be far more profitable than ericas; the latter, which have taken two years to grow, only make about the same, if they do as much, as the chrysanthemums which have taken only about nine months, and not so much labor.

CYCLAMEN are very good, but as yet I have seen them from only one grower; they make only about 15 to 18 shillings, where a few years ago they would have made 24 to 30 shillings a dozen.

ALL CUT BLOOM has been comparatively low in prices. The American varieties of carnations take the lead still; the only really good English sorts we have in competition with them are Britannia, which is certainly one of the finest reds we have, and Mrs. H. Burnett. The latter is a great favorite on account of its lovely shade of flesh pink, which is more decided than in Enchantress. What we want is an Enchantress of the same color as Mrs. Burnett. Fair Maid remains a favorite. Whites are now numerous, but there seems no great advance on Lady Bountiful and White Perfection. Several English growers are now hybridizing, and some have already got some promising seedlings which we may expect to hear more of later on.

Hydrangea Arborescens var. Sterilis.

Our illustration shows a plantation of this hydrangea on the grounds of E. Y. Teas, Centerville, Ind. That gentleman is seen in the picture; he stands 5 feet 8 inches tall, which gives a comparative idea of the size of the plants. The photograph was taken on October 8 of this year.

Hydrangea arborescens var. sterilis.

Grower, E. Y. Teas, Centerville, Ind.

Photo taken October 8, 1907.

of Ellis as to production of new varieties will continue as in the past; none will be sent out but what will stand the test and prove whatever may be claimed for them.

J. T. Butterworth, South Framingham, Mass.

This establishment is always well worth visiting. At the present time the cattleyas are in fine shape and a house of C. labiata contains many fine spikes of bloom. The coloring of many of the flowers is exceedingly good and then the plants are of such a size that a finer lot is seldom seen. Cypripediums are coming in fine bloom; there are large numbers of them grown, as they find a ready market. Orchid growing is the specialty of this place and varieties are cultivated so that a continuous supply of blooms may be had for the market. During his recent visit to England Mr. Butterworth bought several large lots of plants, which although not in extra fine shape now will under his treatment soon prove worthy of the space they occupy. Carnations and chrysanthemums are grown in several houses and they all look well; the latter are replaced by forcing bulbs, of which there is considerable done. Lily of the valley is also done here in fine shape.

A. Leuthy & Company, Roslindale, Mass.

A plant growing establishment is always an interesting place to visit, and this one seems to keep up its end, for it is well stocked with all the marketable products for the coming holiday trade. Palms and ferns look

to, to the present experiment, we have an ordinary glasshouse in which have been placed some two hundred plants, consisting of geraniums, fuchsias, various kinds of palms, grasses, tomato plants, etc. The plants are being forced by light from an arc lamp, and the house heated in a new and ingenious manner. This apparatus, which is causing much discussion among electricians, consists of a modern producer-gas suction engine coupled to a dynamo. The electric energy developed by this plant is allocated to the feeding of the arc lights in the glasshouse. An electrostatic machine is driven from the gas-engine crank-shaft, and the electricity is discharged by points along the plants to electrify not only the air, but the plants and their roots as well.

The arc lights are equipped with special reflector hoods, by which the beam of light is confined within narrow limits of concentration. The open end of the hood is closed by a water screen, made up by a glass trough filled with water. This water screen, through which the light rays have to penetrate, is intended to secure as near an imitation of natural solar effect as possible, and to limit the effect of the rays; and if it is desired to screen from the plants any portion of the spectra, colored water can be employed. The roof of the reflector is provided with a chimney, to permit the escape into the roof of the glasshouse of the nitrous oxides that may be produced. It is arranged that the arc lights are automatically constantly and almost imperceptibly moving along the entire length backward and

FOR THE RETAILER

For reproduction on this page, we solicit from our readers engaged in the Retail Trade, good, clear photographs of subjects that are of general interest, such as store interiors, designs of different classes, new delivery wagons, etc.

A Fashionable Home Wedding.

A pretty wedding, which took place in one of New York's older houses in the Gramercy Park section, was one of the important affairs of the week. The decorations were simple but elegant, nothing but the finest plants and flowers being used. The large square entrance hall was the first feature to attract. The winding staircase, which was visible up to the second floor, was completely covered on the outer side of the balustrade with large plants of Cibotium Schiedeii, turned over and fastened so that the pots were hidden. A large vase of American Beauty roses stood at the foot of the stairway; these flowers were also arranged in clusters at various intervals up the stairway and over the large mirror. The front room facing the street was decorated in yellow. The walls of the room were lightly draped with wild smilax; on either side of two large mirrors stood tall graceful plants of Cocos flexuosus. The mantels were banked with yellow chrysanthemums and Adiantum Farleyense. Vases of yellow chrysanthemums were arranged in convenient places around the room.

aisle for the bridal procession were wound with garlands of lily of the valley and maidenhair fern, and connected with white ribbon, which was also wound with light strings of smilax.

The conservatory, which was used by the musicians, was completely covered on the inside with wild smilax, while on the benches were placed large pots of Begonia Gloire de Lorraine, baskets of the same being suspended from the roof. These were visible from the dining room, the effect being very pleasing, and enhanced by the numerous miniature electric lights.

A large buffet table occupied one side of the dining room. In the center of this was placed a silver vase, fully four feet high, this was filled with about four dozen long-stemmed American Beauty roses. A few palms were placed about the room.

The six bridesmaids carried bouquets of Killarney roses tied with Nile green ribbon to match their dresses. The bride carried a shower bouquet of lily of the valley, with a cluster of Dendrobium Wardianum and Phalenopsis amabilis tied in with the shower. The ushers wore single flowers of Dendrobium Wardianum and the groom lily of the valley.

D. RAYBUN.

MANUFACTURES OF WOOD—PAINTED GARDEN STICKS. —In the protest of Reed & Keller against the assessment of duty by the collector of customs at the port of New York, before Board 1, November 13, 1907, the im-

Table Decoration by Bertermann Bros. Co., Indianapolis, Ind.

Electric centerpiece, with Killarney roses and ribbon to match. Favors of same flower. Accessories valued at \$750.

ports contended that the merchandise had been improperly classified under paragraph 208, tariff act of 1897, as manufactures of wood, asserting that it should have been classified under paragraph 198 (wood unmanufactured), paragraph 200 (blocks or sticks), paragraph 699 (unmanufactured timber, etc.), or paragraph 700 (woods in the rough, etc.). Assessment affirmed. McClelland, General Appraiser, renders the following decision: The special report of the appraiser on this protest states: The merchandise the subject of this protest consists of wooden sticks painted green, pointed at ends, of various lengths, and used by gardeners and florists for training and supporting plants. * * * The protest has been submitted for decision on the appraiser's report and T. D. 27855 (152 Fed. Rep., 590), which is the decision of the United States circuit court in United States v. Knipscher & Maas Silk Dyeing Company on bamboo and hard-wood dyers' sticks. We do not think that either of the questions passed upon in the Knipscher case is comparable with the articles at issue here, for the reason that it appears that the sticks under consideration have been by deliberate processes of manufacture fashioned into shape for a special use, and they are therefore no longer merely wood manufactured, but are manufactures of wood and were properly assessed.

In the drawing room the decorations were white and gold. Asparagus plumosus strings were carried from the center to the corners, and other parts of the room, forming a light curtain over the ceiling. The two large mirrors in this room reached from the floor to the ceiling; these were lightly curtained with asparagus, a large cluster of Vanda cœrulea being fastened at the top, with a few sprays placed here and there through the asparagus. Yellow ribbon of a very pale shade, tied in bows and gracefully looped, contrasted beautifully with the pale blue of the orchid. The fireplaces were banked with Nephrolepis Whitmani and a cluster of Maud Dean chrysanthemum.

The third room, in which the ceremony was performed, was banked at one end with a crescent-shaped group of palms, high at the center, gradually tapering to a point at either side of the room. A shell canopy was placed in the middle of the group, and covered lightly with wild smilax. White chrysanthemums were employed in large sprays and clusters throughout the group and canopy, intermingled with bows of wide satin ribbon. The prie Dieu was covered in front with a mass of lily of the valley. The posts forming the

DIRECTORY OF RELIABLE RETAIL HOUSES

The retail florist firms advertising under this heading will accept and fill orders for flowers and floral designs forwarded them by mail, telegraph or telephone, the usual commission of 25 per cent. being allowed.

\$25.00, payable quarterly in advance, will entitle the advertiser to a four-line card, under this heading, for one year, 52 insertions. For every line additional to four, \$5.00 will be charged. Four lines will average 32 words: each additional line, 9 words. Each advertiser receives one copy, free, of our Florists' Telegraph Code.

New York.

YOUNG & NUGENT, 42 West 28th St. We are in the theatre district and also have exceptional facilities for delivering flowers on outgoing steamers. Wire us your orders; they will receive prompt and careful attention.

MYER, 611 Madison Ave. My facilities for delivering flowers for any and all occasions are unexcelled. Can give prompt service to steamer and theatre trade. Telegraphic orders solicited. Telephone, 5297 Plaza.

Kansas City, Mo.

SAMUEL MURRAY, 1017 Broadway. I will deliver orders for flowers in Kansas City and vicinity promptly. A first-class stock of reasonable varieties of flowers always on hand. Wire me your orders.

Detroit, Mich.

JOHN BREITMEYER'S SONS, Broadway and Gratiot Avenue. We cover all Michigan points and large sections of Ohio, Indiana and Canada. Retail orders placed with us will receive careful attention.

Denver, Colo.

THE PARK FLORAL CO., 1706 Broadway, J. A. Valentini, Pres. Orders by wire or mail carefully filled; usual discounts allowed. Colorado, Utah, Western Nebraska and Wyoming points reached by express.

Cincinnati, O.

HARDESTY & CO., 150 East Fourth. sell the best grade of flowers grown. Retail orders from distant points for delivery in Cincinnati or surrounding territory will receive prompt attention. Telegraph us.

Dayton, O.

W. G. MATTHEWS, FLORIST, 18 West Third Street. Flowers in any arrangement for all occasions for Dayton and vicinity. Personal attention given to all orders. Long distance telephones.

Dallas, Texas.

LANG, THE FLOEIST, the largest flower store in the South. Floral designs and all flowers in season; personal supervision and prompt service in Oklahoma, Texas, Louisiana. Mail and telegraphic orders solicited.

Louisville, Ky.

JACOB SCHULZ, 644 4th Avenue. Personal attention given to out-of-town orders for Louisville and surrounding territory. Have a choice line of reasonable flowers always in stock; delivery facilities perfect.

Indianapolis, Ind.

BERTERMANN BROS. CO. Our facilities for executing orders in an efficient manner are unexcelled. Our shipping territory includes the surrounding states. High grade flowers; expert workmanship.

Albany, N. Y.

EYLES, 11 North Pearl Street, cut flowers or floral designs delivered to any part of Albany and vicinity on telegraphic order. Personal attention given and satisfaction guaranteed.

Chicago, Ill.

HAUSWIRTH, The Auditorium Florist, 232 Michigan Avenue. The quality of our work is of National reputation, and we are prepared to execute commissions in first-class style in Chicago and its environs.

Retailers desiring a share of out of town trade should be represented by a card in this column.

The Advancement of the Middleman and His Associate, the Salesman.

Read before The Florists' Club of Philadelphia,
by W. E. McKissick.

This paper, gentlemen, is not written with an antagonistic spirit; for we wholesalers are far from hunting trouble. A full share is already apportioned to us, and we are pretty sure to get it without looking for it; but it is written with a hope that it may in a measure bring the middleman and the storekeeper (or the buyer) into closer touch with each other, and with the idea that it will help each to more fully realize and appreciate what one is doing for the other.

A Glance Backward.

Twelve or fifteen years ago, some of you will probably remember how the few wholesale houses which were in existence at that time employed men and boys at from eight to twelve dollars per week, and called them salesmen. Their business was to sign for express packages, check up the contents wait on a customer, or answer the telephone (the first of which was installed about this time in one of our houses). In other words, these men were sort of jack-of-all-trades and master of none. As a rule, their employer was a frank, open-hearted, honest sort of man himself, who felt that his employees were equally so, whether he was on deck or not; and he never thought it necessary to see whether so-called salesmen were handing out a dollar's worth for a dollar, or ten dollars' worth. He simply took their word for it, and when the end of the week came, he possibly sat down and figured for hours and hours in his efforts to locate the sales of certain material, which he was positive he had received from his growers, and for which he found no bill of sale. Finally, after all his efforts had been exhausted, he would go down in his pocket, pay for the goods, and take chances of finding the leak later on. Another week would go around with possibly the same experience and the leak still undiscovered.

How in other markets, I am told, it was customary for the buyer, (in order to secure a bargain) to pass (on the quiet) to the so-called salesman, a piece of money, (possibly fifty cents or a dollar) and if he did not resort to this method, he would probably have to pay an exorbitant price, or to use a common phrase "be burned." The word "burned" needs no explanation; we all know too well the meaning of it.

Now, while conditions were in days past nearly as bad on this market, it never came down (to my knowledge) to the deliberate handing out of "cold money." To be sure there were times when material disappeared mysteriously from the wholesale houses, but a cigar, a dinner on the quiet, or a visit to some neighboring grog shop, by some of the buyers (who were burdened with an oversupply of principle) and the so-called salesman did the work; and should these buyers have suddenly gotten religion, and on the impulse of the moment revealed what they knew to the proprietor, he would probably have had a solution to the leak in his sales.

Another bad feature of the business at that time, was the over generous spirit of the wholesaler in allowing his employees and other what was known as a donation. When Saturday night came it was not considered out of place for the employer to allow an employee a portion of the flowers left over as a donation. But this privilege became sadly abused, so much so that flowers at times took wings, and the privilege had to be stopped.

Another ancient idea was the sale of flowers from the wholesale houses by wagon; this custom you are all familiar with, and while at one time a success, of late years (since we have had the telephone and understand more thoroughly what can be accomplished by it) the wagon has almost entirely been abandoned. If it were not for the fact that one of our wholesalers, whom I have the honor to regard as a good neighbor and a close friend, still persists in using his wagon, I would say about him as our friend Mr. Meehan said about the grower who still carries his own stock, "That he was ten years behind the times."

Modern Methods.

But to-day, gentlemen, things are different. The wholesaler profiting by his past experience and that of others, and awakening to the call which competition has made, is running his business direct from the shoulder, and on the most up-to-date principles and methods. The day of the donation is past; he has discovered that the flowers in his possession are not his own, but the property of some grower. If his employees want them, they are welcome to them at the

lowest market price; but they must be paid for. The day of the would-be salesman is done, and in his place we have those who have stood the test and have proven themselves to be capable salesmen without a question of doubt. The wholesaler of to-day employs the best, experienced men he can get, systematizes his business, puts them in their respective places according to their knowledge and ability, as salesmen, packers, graders, and delivery clerks; pays them their price and demands results. He has an eagle eye on the goods coming in; from whom they come, how they are handled and graded, how sold and at what price, how packed and delivered, thus keeping in touch with the stock he is handling from the time it reaches his place of business, until it is handed over to the storekeeper and the bill "O.K'd," or delivered to the express company for shipment.

The salesmen in our wholesale houses to-day are a class of experienced and energetic young men, of whom our storekeepers should well feel proud. As compared with the salesmen of fifteen years ago, these are real salesmen and real men, who are fully capable of selling material at its market value, and who do not have to stoop to the low standard of giving the buyer more than a dollar's worth for a dollar, with the idea of securing his business and making a large book, or appearing to be more than he is to his employer as a salesman.

The Status of Philadelphia Middlemen.

Philadelphia middlemen, I am glad to say, are all progressive, and have made wonderful strides along

William E. McKissick

the line of advancement; credit for which has been handed out to them in various forms. One will say, "He's a wise, shrewd, business fellow;" another will say, "Mr. Blank (his former employer), taught him all he ever knew;" and still another will say, "His financial backing is his whole success, and without which he would be lost." But, gentlemen, let me put you right; all of these things are in a measure responsible. A man must have a good level head to manage his business successfully, but a great percentage of his success is due to the ability and untiring efforts of the men who plug away from morning until night to sell the stock, and who after hours will give him valuable suggestions to aid him in the daily routine of business; this man is the salesman. Now where do we get these good salesmen of which we are boasting? Were they born salesmen or made salesmen? Allow me to answer this by saying, that in my judgment it is a question of ability and experience on their part, combined with keeping in close touch with their employer, which has made many of these men what they now are. But I hope they will not take my remarks as flattery; they are simply intended to give them the encouragement which they deserve, and which has long been coming to them.

We have few college-bred men in our profession, but we have men of character and ability who are slowly but surely pushing to the front. Why not a course in "Scientific Salesmanship" for some of these young men, that it may develop and fit them for the positions which will surely be to offer if the wholesale florists' business continues to advance with the same speed it has done?

The Telephone a Factor.

Possibly two-thirds of our local business is at the present time done over the telephone. Each wholesaler has his trade divided and a careful man appointed to look after the requirements of every customer. The stores are only beginning to appreciate what these men do for them in the way of keeping in touch with the market conditions, and especially in the way of prices and new materials about which some of the out-of-the-way stores would not know for possibly a week if it were not for the 'phone. As it is, they can now find the exact conditions in a few minutes. But does our friend the storekeeper realize the great expense item that the telephone is to us? The total cost to the wholesalers combined for local telephone service is probably from five thousand to eight thousand dollars annually, and while we cannot do without it, I assure you the cost is a problem which gives the middleman some occasion at times to put on his thinking cap. With this amount of money expended we expect results, and in most instances we get them, as I am glad to say that the majority of our stores appreciate the telephone service, and the information which it brings; but there are still a few stores where management is so poor, that they allow their employees to treat a call from a wholesale house as a joke, and believe the salesman have nothing else to do but to make 'phone calls to pass away the time. Again they in reply to a 'phone call will not extend one the courtesy to ask his business; but as soon as they learn that a call is from a wholesale house, simply say, "Nothing doing" and hang up the receiver. This is one abuse of the service which needs attention. We can make allowance in some instances, where the storekeeper may be busy with a customer, or again, where he may have a good supply of stock on hand and no prospects of business, but salesmen are human beings, and a little courtesy extended to them, (which costs nothing) would work wonders for the storekeepers at some future time, when certain material may be scarce and the proprietor badly in need of it. Mr. Storekeeper, try my prescription, and instruct your employees accordingly, and if it fails to cure, we will refund your money with pleasure.

Delivery Service.

Just a word now in regard to delivery service. Our city to-day is doing for the retail trade what no other city does (as far as I know)—giving them prompt delivery service at any hour of the day from 7 a. m. to 8 p. m., and during the holiday season (I may add) any time during the day or night. This is all free to the storekeeper, but not to the wholesaler. To give the proper service, the larger houses are compelled to employ for their delivery at least from five to ten boys at a cost of anywhere from four to five dollars per week. Total this up, add the amount it costs weekly for car tickets, etc., and you will find it runs into money. The prompt delivery service which we are giving to-day has been brought about by competition. Oftentimes our larger stores will divide a very large order between two or more wholesale houses, ask for immediate delivery, and then watch carefully to see which house has its order delivered first. This is an important item to the buyer, who makes a note of the best service given him, and in return places the next important order which he may happen to secure with the man who gives him attention, and on whom he can depend.

I have endeavored to show you what this service means to our most up-to-date storekeepers, and to make it plain to you that they fully appreciate our efforts, but in some ways the competition has been overdone (in the way of delivery). We have been at times so ambitious to please the trade that we have delivered very small bills of goods, at a loss of possibly seventy-five cents, or to make it round figures a dollar's worth, the commission on which will amount to a paltry fifteen cents. The goods are placed in a box probably worth five cents, and the car fare to the customer may run anywhere from eight to fifteen cents; figure this up yourselves, gentlemen. This is what some of our less thoughtful storekeepers expect and insist on us doing, but I tell you that the wholesaler is beginning to realize that this is making money backwards, and one of our houses has boldly come out recently and told its customers, in a polite way, that while it wants their business, and is willing to give them the service, it cannot afford and will not deliver a bill of goods under \$2 to any point where it is necessary to pay car fare, unless the same be charged in with the bill of goods. This, in my judgment, is a step in the right direction, and while I believe in every man running his own business, I do not think we would make a mistake in following this example. Every sound-minded storekeeper is well aware of the fact that the existing competition in our business is bringing not only this service but dollars and cents to his door every day, and it would be suicide for him to discourage us in these efforts. Is not ten or fifteen cents car fare a small matter to you, Mr. Storekeeper, if you want an accommodation, and want it quick?

THE EXHIBITIONS

Toledo, O.

On November 16 the Toledo Florists' Club held its first public flower show. It was of course a chrysanthemum affair and was very successful. The newspapers did all they could to help us along and the financial success was pleasing enough so we will not have to go into our pockets to make up a deficit. Our hall was an empty store, 19x120 feet, and was well filled with chrysanthemums, carnations, roses and groups of palms and other foliage plants.

The E. G. Hill Company, Richmond, Ind., had the most admired and best collection of chrysanthemum show flowers and a large vase of their new rose Rhea Reid. The chrysanthemum flowers sent fully sustained the reputation for perfection in every respect this firm enjoys. Among the varieties most admired were Duchesse d'Orleans, President Roosevelt, British Empire, Mrs. Beach, Angele Laurent, Sunburst, Timothy Eaton, Yellow Eaton, Sans Souci, Nina Fujot, Mary Mann, Mrs. Robert Foerderer, Joseph Roacher. The most admired of the collection were Sunburst and Joseph Roacher.

Two vases, one of Jeannie Nonin and one of President Roosevelt, were shown by Chris. Winterich, Defiance, O. The flowers were good and were effectively staged with Nephrolepis Whitmani.

Carnations of good quality were exhibited by the Chicago Carnation Company; the varieties were Aristocrat, Winsor and White Perfection.

The Golden Gate roses of the Fostoria Floral Company were superb.

Among the local growers by far the best chrysanthemums were those from the Toledo State Hospital, Mr. Haebich, gardener. Timothy Eaton, Yellow Eaton, Dr. Enguehard, Nagoya, Vivian-Morel and Golden Wedding formed the cream of the collection.

The most generous exhibitor was George Bayer, and considering his way of growing (the plants are lifted from the open, when showing bud), the flowers were remarkable. Two large vases of Major Bonaffon were simply excellent; other varieties were Mrs. N. Smith, Colonel D. Appleton, and Minnie Wanamaker. His hardy chrysanthemums also found many admirers.

A market gardener, Henry Miller, Jr., who just for the fun of the thing devotes a house to chrysanthemums, had fine White Bonaffon, W. H. Chadwick, Yellow Chadwick and G. W. Childs.

Harry Flint exhibited a vase of fine Mrs. T. W. Lawson carnation and of chrysanthemums the varieties Arline, Major Bonaffon and Dr. Enguehard.

Good flowers and in plenty were shown by Krueger Brothers, Golden Wedding and President Roosevelt being the principal ones; they had also fine Meteor roses, and in carnations White Perfection and Enchantress.

Chas. Koelker & Sons showed Timothy Eaton, Yellow Eaton, White Bonaffon and Dr. Enguehard, and they were good, too.

One of the largest and the best staged exhibit was that of Davis & Magee; it was prettily arranged with ferns, *Darcena terminalis* rosea, crotons and *Begonia Gloire de Lorraine*. Their chrysanthemums were show flowers of various kinds, especially Colonel D. Appleton, Sunburst, Guy Hamilton and Dr. Deche. They also had a few vases of La Detroit and Kaiserin Augusta Victoria roses.

Emil Kuhue had groups with callas, *Nephrolepis Scottii* and Whitmani, and cyclamen of the silver leaved variety.

S. N. Peck had a group of palms, tastily arranged; and H. A. Mills a table of cactus, which were much admired.

John Barrow took care of the outside decorations with his bay and box trees, and the Schoen Floral Company arranged the show window in a very attractive manner.

The most attractive subject at the show was a basket standing about 6 feet high. It was formed by a *Latania borbonica* in a 10-inch pot, and was very artistically arranged with pink and white chrysanthemums and broad pink ribbons. It was the exhibit of Mrs. C. F. Imobersteg, who also had some very fine cut roses on exhibition.

The Schoen Floral Company had a table decoration, and the Zenobia Floral Company, a beautiful wreath and a basket of Meteor roses and lily of the valley.

Of out of town visitors we had the following: F. A. Gussenbauer, Adrian, Mich.; C. H. Jordan, Wauseon, O.; F. J. Norton, Bucyrus, O.; Chris. Winterich, Defiance, O.; E. R. Sackett, Fostoria, O.; D. R. White, Sandusky, O.; Wonseller & Son, Bryan, O.; A. A. Hiser, Bradner, O.; and J. J. Waaland, Findlay, O.

SCHILLER.

Toronto, Ont..

The Ontario horticultural exhibition this year was conceded a decided step in advance of that of former years, though there were still many points that could be much improved. The floral end was well to the front, and the exhibits of fruits and vegetables, in spite of the unfavorable season, were very fine. The apples shown, while perhaps a little small, were generally very good and beautifully colored.

The specimen chrysanthemums were rather better in quality than usual; the same may be said of the standards. The single stems were also a well-done class. The palms were fairly good, but the ferns were hardly up to the usual mark. Cyclamen, begonias, callas and primulas were about up to the usual standard. The groups of chrysanthemum and foliage plants were good. The first prize was taken by the Allan Gardens, with a well-arranged group of clean foliage plants and well-grown chrysanthemums,

ties. They were arranged with *Asparagus plumosus* and maidenhair fern, but the effect was somewhat spoiled by the mixing of colors, the yellow sprays of the oncidiums covering up the cattleyas. The plants were in fine health and splendidly flowered, one cattleya in a 6-inch pot having twenty blooms on it. Exhibition Park took third prize with a well-arranged group, but they were rather shy of flowers, as the rats have been among their plants this fall and have eaten a large number of the new growths. The Allan Gardens took fourth prize with a well-arranged group, consisting of a few orchids and some well-done anthuriums and foliage plants.

The decorated dinner tables were none of them up to the standard.

The cut chrysanthemums were by far the best we have had here, and the Dale Estate, Brampton, was generally in the lead, closely followed by R. Jennings, also of Brampton, and J. H. Dunlop. The fight for the Hallam cup for twelve distinct varieties was very close between T. McHugh, the holder of the cup, and the Dale Estate. It took the judge, Mr. Wilshire of Montreal, over half an hour to decide this, and after scoring them all, he gave the decision to McHugh by half a point. This is the third time in

Chrysanthemum John Lemon.

Winner of Sweepstakes at Chicago Show.

Growers, E. G. Hill Company, Richmond, Ind.

with the colors massed. The second was won by Sir W. Pellatt (gardener, T. McVittie) with a well-arranged group, packed rather too tightly. The Exhibition Park took third prize; this group was also packed too closely, and the colors of the chrysanthemums not well arranged.

The orchids were an important feature of the show, and the competition was very keen. The prize list called for them to be "arranged for effect." This made quite a difference in the result. The first prize was won by Thomas Manton with an arrangement that just suited most of the profession. The orchids used consisted mostly of *Cattleya Harrisoniae* and *C. labiata* in many varieties, from nearly white to deep rose color. These with a few oncidiums, cypripediums, anthuriums, ferns and moss made an effective display. The Dale Estate put up a grand lot of orchids—*Cattleya labiata*, *Oncidium varicosum*, in variety, and *Dendrobium Phalaenopsis* in many fine varie-

succession that Tom has won the cup, so it is now his permanent property.

The show of roses was quite up to our usual standard, the Dale Estate and Bedford Park Floral Company taking most of the first prizes. Carnations were also good, the Dale Estate being again well to the front, with Jennings of Brampton and the Toronto Floral Company close up.

The floral designs were fairly good; T. Manton took first for the funeral design and Dunlop first for all the other pieces. Several of our regular exhibitors dropped out of this class for various reasons.

The balcony decorations were a new feature this year. There were three in competition, two put up with plants and one with drapery and cut flowers. The judge fancied the plant decorations, and many and varied were the comments on his decision.

W. Wilshire of Montreal acted as judge on plants and chrysanthemums. S. A. Anderson of Buffalo judged the carnations, and was to have judged roses and designs, but received a wire that his mother had died suddenly and had to go home. C. Tidy of this city was then asked to fill Mr. Anderson's place on Thursday, and did so very efficiently.

T. M.

Little Rock, Ark.

The first annual flower show given by the Arkansas State Floral Society was opened on November 14 in the banquet hall of Hotel Marion. The success of the show far exceeded our anticipations, and the exhibits were all of a very high order. The success will put the society in fine condition financially for a good start for our next exhibition.

The principal prize winners in the professional classes were Poehlmann Brothers Company, Chicago; H. W. Buckbee, Rockford, Ill.; E. G. Hill Company, Richmond, Ind.; Nathan Smith & Son, Adrian, Mich.; and Vestal & Son, Little Rock, Ark.

Special prizes were awarded to Peter Reinberg, Chicago, for his new rose, Mrs. Marshall Field; E. G. Hill Company, Richmond, Ind., for new rose, Rhea Reid; Poehlmann Brothers Company, Chicago, for new rose, Cardinal, and for new rose, Mrs. Potter Palmer; Chas. W. McKellar, Chicago, for collection of orchids; Steven Burns, Rhinebeck, N. Y., for double violets; Ed. Marquand, Rhinebeck, N. Y., for double violets; Zeck & Mann, Chicago, for collection of chrysanthemums.

Paul M. Palez, manager of the flower show, and Charles Vestal entertained the visiting florists at dinner in the main dining room of Hotel Marion. Those present were A. L. Vaughan, Chicago, judge of the show; H. W. Buckbee, Rockford, Ill.; Charles Vestal of J. W. Vestal & Son, Little Rock; J. J. Mandelbaum, president of the Arkansas Floral Society; George R. Brown, secretary of the society; Will Pollock, treasurer; Augustus Poehlmann, Chicago, and Mr. Palez.

The varieties in the prize winning lots were Dr. Enguehard, Colonel D. Appleton, Alice Byron, Golden Wedding, Maud Dean, White and Yellow Timothy Eaton, White and Yellow W. H. Chadwick, S. Simon Jossier (white), A. J. Balfour, Gold Mine, W. Wells, John E. Dunne, Mrs. William Duckham, John H. Doyle, Ben Wells, William Duckham, Mrs. Mease, T. Carrington, Mrs. A. J. Miller, Jeannie Nonin, Mme. Chabanne, and S. T. Wright.

Poehlmann Brothers Company took first in all the rose classes, and in the carnation classes, with the exception of one hundred pink, which was won by Buckbee with Rose Pink Enchantress. Among the carnations shown by Poehlmann were Enchantress, Rose Pink Enchantress, Beacon, Winsor, White Perfection and Robert Craig.

J. W. Vestal & Son led among the local winners of premiums, capturing firsts for chrysanthemums in pots, and for single bloom with S. Simon Jossier.

C. V.

Detroit.

The exhibition of the Florists' Club held in connection with its last meeting was much larger than that of last year, although outsiders were not very well represented. Robert Craig Company, Philadelphia, showed Baby chrysanthemums, also Lulu and Garza, both white; Klondike, yellow, and Kitty Bourne. The Chicago Carnation Company had a lovely lot of the variety Aristocrat. Stevenson Brothers, Baltimore, Md., aroused much interest with their novelty Splendor. The greatest attraction, however, was the exhibit of the new rose of E. G. Hill Company, Richmond, Ind. The beautiful form and color of Rhea Reid has gained for it the name of being the best acquisition in the rose line for many years. This firm's chrysanthemum exhibit contained well-grown specimens of Morton F. Plant, Mme. Archdeacon, Yellow Eaton, Mrs. Swinburne, Timothy Eaton, Naceur Bey and Miriam Hankey.

The following local exhibitors also contributed to the display: Fred Pantke, Baby chrysanthemums; Thomas Browne, specimens of Mrs. Swinburne, Timothy Eaton, Golden Chadwick, Golden Wedding, Wm. H. Chadwick, Delia, Maud Dean, Dr. Enguehard, Arline and Mrs. Weeks. John Breitmeyer's Sons had Yellow Jones, Maud Dean, Dr. Enguehard and W. H. Chadwick. J. F. Sullivan had a good display of Dr. Enguehard, Golden Chadwick, W. H. Chadwick and a very well-grown box of Roman hyacinths. Robert Klagge sent La Detroit and Kaiserin Augusta Victoria roses of extra quality, also fine violets, sweet peas, stevia and snapdragon.

Among the carnations shown were flowers of Enchantress, Mrs. Thomas W. Lawson, light pink sport of Lawson, Nelson Fisher, Carey's sport, a variegated variety with the ground color of Enchantress; White Perfection, Winsor, Enchantress, White Enchantress and Rose Pink Enchantress.

Among the pot plants Messel Sons had two tables of cyclamen, Baby primroses, Boston and Whitmani ferns. John Breitmeyer's Sons staged a beautiful display of cypripediums, cattleyas, dendrobiums, poinsettias, *Begonia Gloire de Lorraine*, Farleyense and Whitmani ferns, Cocos Weddelliana, etc.

B. Schroeter furnished a centerpiece of cattleyas, lily of the valley and adiantum.

Taepke showed a centerpiece very tastefully executed, included in which were Sunset roses and lily of the valley. Poncholon's centerpiece was made of chrysanthemum Arline, stevia, pompons and Asparagus plumosus. Wm. Brown had a centerpiece of La Detroit roses, cosmos and Asparagus plumosus. J. F. Sullivan's centerpiece was of Arline chrysanthemums, Asparagus plumosus and green gauze ribbon.

After the exhibits had been duly inspected, the tables were removed and dancing indulged in until an early hour.

FRANK DANZER.

Waco, Tex.

The twelfth annual exhibition, held November 13-16, inclusive, was well attended in spite of the inclement weather. A movement is on foot to secure a permanent building in which future exhibitions may be given. Some of the local prize winners were as follows:

HARDY PLANT NOTES

Fall Flowers.

If due regard with reference to the selection of varieties when planting the hardy border has been observed, it will not yet be without its attractions and beauties. The latter days of October the Tartarian aster, with its coarse growing foliage and strong 5 to 6-foot flower stems, was still looking fairly good in a somewhat sheltered position near some tall evergreens and by the side of a large pond of water.

Aster trinervis comes into bloom during the month of November, and in a favored sheltered spot will add brightness and beauty to the border throughout the whole month. It is propagated from its numerous stolons.

Aster grandiflorus, a native of Virginia and southward, commences to bloom this month also and continues to

some very rare occasions and in very shallow soils. A. grandiflorus may be very easily and readily propagated by top cuttings taken when the growths are about three inches long, inserted in sand in boxes or pans and placed in a cold frame and kept shaded for one or two weeks, when they readily root; or a few plants may be potted up after flowering, kept in a cold frame until February or March and then brought into a greenhouse temperature somewhat suitable for geraniums and treated as above, or put in the coolest end of the propagating bed. This course is only advised where quantities are needed; where only a few are required in the Spring, as soon as they can be dug and the dirt is shaken from them, every eye or growth may be cut off with a piece of root attached with a safe guarantee of growth if properly planted or potted. In commercial establishments, when pinched for time in early Spring, this work can be successfully done dur-

fied tints and hues of nature as seen on our landscapes, fields, woods and forests as Autumn rapidly draws on to its close. In the matter of selection of the choicer varieties and colors nearly every dealer has his own individual collection. Selection, therefore, should be made from the choicest and hardiest of these from trial and observation, for it is hard to judge in these days what are the hardiest forms, as so many dealers house their stocks on the approach of Winter for propagation, etc., and most of what we see at the exhibitions are greenhouse grown. Under these circumstances, therefore, varieties adapted to various localities must be tried and best selections made, having due regard to merit, taste, color and hardiness. The writer last Spring planted a row near or partially under a row of Austrian pines which had lost their lower branches. The pines were growing on a low, sloping knoll and the chrysanthemum were set in the rear not more than three feet from the base of the trees. They grew and flowered beautifully and were clothed with bright green foliage to their base, while a bed of nearly 50 varieties that had three times more care given them, planted out for stock and show in an open position, lost nearly all their foliage.

Thomas Meehan's Sons, Henry F. Michell Company, The Overbrook Gardens and Chas Zimmer, West Collingswood, N. J., all staged at the Philadelphia exhibition some remarkable varieties and well grown, too. Perhaps the best and most generally admired was the beautiful vase of White Diana, shown by Mr. Zimmer; and what appeared to me identical was Queen of the White, and a magnificent thing it is, one which will no doubt prove its great usefulness by its extensive cultivation when well known. I secured from the largest exhibitors and also from Henry A. Dreer, Inc., what they considered to be their 12 choicest varieties.

Henry F. Michell's pink of the collection selected from 55 varieties was as follows: Joppa, pink; Aaron, terra cotta; Queen of the Whites, white; Bohemia, yellow; Julia Lagravere, crimson; Boston, copper; Sunshine, yellow; Alice Carey, bronze; The Hub, white; Sir Michael, yellow; Miss Julia, bronze; and Salem, single, white and pink.

Henry A. Dreer's list was: Julia Lagravere, fine rich garnet; Globe d'Or, lemon yellow with darker shadings; Mrs. Vincent, dark crimson; Rosinaute, blush rose; Model of Perfection, pure white; Tiber, crimson crown tipped yellow; Dundee, maroon shaded scarlet; Pettulant, soft creamy sulphur; Rhoda, apple blossom pink; Fred. Peele, deep crimson tipped gold; Golden Pheasant, rich golden yellow; and Queen of Bulgaria, rich rosy crimson.

Thos. Meehan's Sons' selection was: Brown Bessie, small brown; Fremy, terra cotta; Golden Mlle. Martha, clear orange yellow; Jersey Beauty, small golden yellow; Julia Lagravere, deep red; L' Ami Conderschlerdt, small sulphur white; Maid of Kent, white; Model, white; Seur Melaine, pure white; Strathneath, clear pink; Victor, claret; and Autumn Queen, rosy lilac and white. For the last named they claim the reputation of its having the hardiest constitution of all, saying it survives, succeeds and blooms where all other varieties fail.

There were nice single and semi-double varieties on exhibition which were very attractive and would no doubt prove useful for outside cut flowers were the double forms not so numerous. The most noteworthy of these were Sunset, single crimson; The Hub, single, white; Salem, white and pink; Aurora, single, light crimson.

HERBERT GREENSMITH.

A Well-flowered Hardy Chrysanthemum.

Twenty-five blooms in variety—Miss Annie Wolfe, first; C. H. Mayer, second. Fifteen blooms, white—Walter L. Reese, Jr., first; James Mohan, second.

Fifteen blooms, pink—James Mohan, first; C. H. Mayer, second.

Fifteen blooms, yellow—James Mohan, first; Walter Reese, Jr., second.

Best one bloom, 1905 production—C. H. Mayer, first; no second.

Best design in cut flowers—Miss Annie Wolfe, first; C. H. Mayer, second.

Best original design in cut flowers—Miss Annie Wolfe, first; C. H. Mayer, second.

Most unique exhibit in display in the building during entire exhibition, Switchmen's Union of North America, Lodge No. 178, Waco, designed and owned by Miss Annie Wolfe.

push forth its purple-rayed flowers with rich golden yellow centers until heavy December frosts completely cut it off. This is one of the neatest and most desirable of all our hardy asters, as it does not possess that long running stoloniferous method of perpetuating itself; the buds or stolons for the following years are produced sparingly on this year's growth and are short, compact stocky growths, which do not fully develop till quite late in the season, therefore it is not always wise to move this variety as early as most others are moved on account of this incomplete growth which appears mostly to be made during the period of its bloom. This same rule generally applies to the A. novae-angliae types as well, except on

ing the Winter season. The method is to lift the plants after they are through blooming, store them in some frostproof place until opportunity comes for handling them. They may then be cut up with roots attached, as already recommended, put into suitable pots and then placed in a cold frame, plunged in ashes, sand or soil, and well protected from frost, when nearly every piece will grow.

This is the month when the hardy chrysanthemums reach the zenith of their perfection, and the demand for them seems to be constantly increasing. They certainly deserve it, for what a wondrous show they make at this late season of the year, with their various shades of crimson, bronze, yellow, white and gold, in striking harmony with the glori-

HOPKINSVILLE, KY. — A local newspaper of recent date contains an interesting account of the career of Thomas L. Metcalfe of this town. Mr. Metcalfe is a laundryman as well as a florist, and is making a success of both businesses. He has greenhouse plants in this city, also at Madisonville, Ky., and Clarksville, Tenn. His greenhouses in Hopkinsville cover half a square, and are presided over by Frank Brown, a Canadian; Mr. Decker, formerly with Martin at Clarksville, is now assistant to Mr. Metcalfe. A general assortment of stock is cultivated. Mr. Metcalfe has exhibited his new chrysanthemum, Sadie May Stremler, at different points this season.

HAMMONTON, N. J.—J. M. Bassett has just completed a packing house and office, 24x30 feet, two stories.

Plants for Name, B. A. B.—The large leaf is that of *Byrophyllum calycinum*; the variegated leaf is *Paeon fruticosum* var. *Victoriae*. G. W. O.

(S3) **Trouble with a Vaporizer.**—Please advise me how to use Campbell's Sulphur Vaporizer; I cannot get it to work well. I have tried different quantities of sulphur, and have cleaned out the receptacle each time after using. Perhaps some one who has had experience with same can help me. New York. W. P.

—Will some reader who has had experience with Campbell's Sulphur Vaporizer give the desired information?

(S4) **Buds of Liliun Harrisii Rotting.**—We notice on a great many of our Harrisii lilies which we are forcing for early December and Christmas use, that some of the buds appear to rot when they are about three-quarters to one and a half inches in length. The plants themselves are very healthy; in fact, it seems to happen on the plants that look to be in the best condition. We have been forcing Harrisii lilies for several years, and have never experienced anything like this before. The plants are being forced in a temperature of 65 to 70 degrees. We would like you to inform us the cause of this rotting of the buds. T. N. Y. Penna.

—The decaying of the young buds of the Harrisii lilies can be brought about by several causes, and just what is the matter in the present case is hard to determine. We have seen Harrisii lilies that have been grown in a high temperature, and that have been standing on a bench of bare boards, under which were several rows of heating pipes, lose their buds on account of the plants being allowed to get a little on the dry side during the night, the tips of the roots, seemingly, having become withered, which affected the young buds only, and did not seem to injure the foliage. Sometimes the buds decay through aphid being allowed to accumulate too much at the base of them and just before they stand out far enough to be seen, though this only happens where the plants are not grown carefully and kept clean. Sometimes the plants will grow finely until the buds are formed and then not mature the buds, otherwise appearing to be very healthy, the cause of which evidently arises through the bulbs not being well ripened. Whatever the cause in the present instance may be, there is nothing that can be done to help the plants now. If the buds are decayed, the plants might just as well be thrown out at once.

(S4) **Chrysanthemums for Pot Culture.**—Kindly give me a list of chrysanthemums for pot culture—early, midseason and late, three or four varieties of each, white, pink, yellow, etc. New Jersey. SUBSCRIBER.

—The following kinds are good for pot purposes; we give them in their order of merit: White—Polly Rose, Mrs. Henry Robinson, Ivory; pink—Glory of the Pacific, Wm. Duckham, Dr. Enguehard; yellow—Monrovia, Colonel D. Appleton, Major Bonaffon. There may be some of the newer varieties which will answer the purpose better, that some other grower can recommend.

(S5) **Earth Worms in Lily Pots.**—Please inform me how to kill earth worms in Easter lily pots. The lilies are just beginning to show above pots; they have been standing under the benches in greenhouses and have become quite infested with the worms. New Jersey. T. C.

—Give the plants a thorough watering with lime water, and the worms will come to the surface and die. Repeat the application in three or four days so as to be sure that all the worms are destroyed. To make lime water, put a four-inch potful of lime in a pail or watering can; fill with water, stir and use as soon as the lime has settled on the bottom. As the water only absorbs a certain percentage of the lime, there is no danger of getting the mixture too strong.

OPEN YOUR EYES

Prepare for CHRISTMAS and the Holidays

Watch Prosperity Look

Money stringencies are of the past, the country settled and the outlook is good. The wise florist knows that a dollar invested in a good stock of plants is safe and brings more returns than one hundred dollars invested in banks, which are unsafe.

Great prosperity is in sight. Everybody wants to invest their money. Why not you? Don't consider long. A little fortune lies before your door. Grab it quick while the market is low and while there is a chance for you. Waiting means suicide.

LOOK!

We have *Araucaria* to beat the band. A houseful of the best selected specimens of *Robusta Compacta* and *Glaucia* in the country.

WHY?

Because we are specialists in importing, growing and shipping *Araucaria excelsa*, *robusta*, *compacta* and *glaucia* for the last fifteen years from the Atlantic to the Pacific ocean, Cuba, Canada and Mexico. Our *Araucarias* go and are well known everywhere. Where do you think you will buy them for the holidays? From a man who imports a few hundred, or from a specialist who imports them yearly in numbers of 10,000? Surely from a man who can give you bargains.

FIFTY CASES of plants just arrived per steamer *Manitau* from Belgium, October 27. Amongst them are several thousand *Araucaria excelsa* in smaller sizes, fine bushy little plants, which we offer at a bargain. 3 tiers, 5 in. pots, only 40c.

Last Spring's Importation
ARAUCARIA EXCELSA, 3 year old, 5 1/2 to 6 1/2 in. pots, 10-12-14 in. high, 3 tiers, 50c.

ARAUCARIA EXCELSA, 3 year old, 5 1/2 in. pots, 15-16-17 in. high, 3-4 tiers, 60c.

ARAUCARIA EXCELSA, 4 year old, 6 in. pots, 20-22 in. high, 4-5 tiers, 75c.

ARAUCARIA EXCELSA, 5 year old, 6 in. pots, 22-26 in. high, 6 tiers, \$1.00.

ARAUCARIA EXCELSA, Specimen plants, 6-7 in. pots, \$1.25-\$1.60 each.

No. 2 Duane Street, New York

American Rose Society.

The executive committee of the American Rose Society met at Hotel Martinique, New York City, on Monday, November 25, President Robert Simpson in the chair.

Ex-President F. R. Newbold of Poughkeepsie, N. Y., invited the society to hold a show in connection with the Horticultural Society of New York at Bronx Park, New York City, in June, 1908. Various prizes of considerable value will be offered at this show. This is a popular show which it is estimated thousands of people will visit daily, and is a part of the usefulness of the society planned from the beginning. The invitation was formally accepted. Medals of the society will be offered to exhibitors.

August Poehlmann of Chicago stated that the secretary of the Florists' Club would report in full to the American Rose Society concerning the action of the Chicago club and that Chicago would certainly be glad to have the American Rose Society make the best show both in size and quality that ever had as yet been made.

It was resolved to issue the schedule of prizes of the American Rose Society without delay, so that all contributors to the show may know what is required at a date early enough for them to make full preparation. The cash premiums for exhibitors at the present time reach the sum of \$700. There are two prizes amounting to \$300 in cash from Philip Breitmeier and A. T. Boddington for outdoor roses; \$25 in cash for the best twenty-five blooms of La Detroit; \$25 for the largest and most varied collection of cut roses of all classes, only out bloom in a vase, the variety to count 65 points; this is from W. A. Manda. The E. G. Hill Company, Richmond, Ind., offers a prize of \$50 in cash; Alexander Montgomery of Natick, Mass., a silver cup valued at \$25 for the best 50 blooms of any variety of American origin now in commerce, and four other cups are also promised.

The new life membership certificates were authorized to be issued and signed, also certificates of merit for the roses exhibited in Washington, which were as follows: F. H. Kramer, Washington, D. C., for "Queen Beatrix"; Myers & Santman, Wyndmoor, Pa., for the rose "Wyndmoor"; the E. G. Hill Co., Richmond, Ind., for "Rhea Reid," and M. H. Walsh, Woods Hole, Mass., four certificates for "Paradise," "La Fiamma," "Delight" and "Juniata."

The following topics have been named to be presented to the Chicago convention: "Practical Rose Growing in the Middle West"; "The Raising of New Roses"; "What is the Proper Size of a Greenhouse to Grow Roses for Commercial Purposes?"; "Twelve Best Garden Roses"; "Roses in the Far West"; "Forcing Roses in Pots for Easter"; "Roses from the Retailer's Standpoint."

BENJAMIN HAMMOND, Secretary.

Chrysanthemum Society of America.

Work of Committees.

CINCINNATI, November 23.—No. 74-5-06, pink Japanese incurved, exhibited by Nathan Smith & Son. Scored 83 points commercial and 86 points exhibition scale.

The variety exhibited by C. H. Totty before the New York committee as Number 20 has been named A. McKendry; and the variety exhibited by Gordon Smirl before the Philadelphia committee as Number 1 has been named Mrs. Giraud Foster.

DAVID FRASER, Secretary.

PITTSFIELD, MASS.—Mrs. Pauline Engleman, 46, wife of Richard Engleman, florist, died Saturday, November 23, after several days' illness with heart and kidney trouble. She was a native of Germany, and had passed a greater part of her life in Pittsfield.

NORTH MIDDLEBORO, MASS.—The Rev. Joseph Jenks is dead at his home here, aged 62. He was born in Boston. For many years he was a missionary in the Northwest. Of late Mr. Jenks had been unable to preach and had raised flowers. He leaves a widow and a daughter.

Plant Notes.

NEPHROLEPIS SUPERBISSIMA.—We no longer look in a new introduction of nephrolepis for something likely to be more serviceable than anything already in commerce; we are about convinced that the limit of usefulness in new varieties of this most deservingly popular fern has been attained. What we do look for and unquestionably see is something more or less novel as each one appears in line for inspection. The latest of these ferns, *N. superbissima*, which is now undergoing the exhibition state of its existence, is certainly a distinct novelty in so far as density of decorative frond furnishings is concerned. Another favorable point in this fern, but one which may be as much or more attributable to cultural methods or treatment, or both, than to anything constitutional peculiar to itself, is the decidedly dark green color of the fronds which was particularly noticeable in the specimen exhibited at Boston recently. There is no doubt but there is considerable interest taken in each one of these new varieties of ferns as they make their appearance with just as little doubt of the worthiness of every one. The time to take hold of anything new in order to make money out of it as a novelty is at the start when such an object is helped to be gained by the advertisement of the introducer.

OLD NEPHROLEPIS AS STOCK PLANTS.—Beginners sometimes get hold of a few old plants of nephrolepis and attempt to use them for the increase of stock, but they learn eventually that it is worse than useless to bother with such plants for that purpose. Anyone without experience would reasonably suppose that a large plant of Boston fern or of any of the improved varieties would by division make quite a number of young plants, while the fact is that surprisingly few can actually be got in that way. The most rapid method of increasing these plants, when a few plants are in stock, is by placing all available in a bench where conditions will be most favorable for runners to be made; these taken off and potted up as they attain sufficient size is the only practical method of increasing the stock. Of course, the runners and consequent young plants formed around the base of plants in pots and pans can be utilized in the same manner, as they invariably are when there is an object in increasing the stock.

PANDANUS SANDERAE is practically of no value if it does not possess the golden color of foliage, a distinct characteristic of the variety and the only feature that put it into prominence. This variety in habit is in no way comparable to *P. Veitchii*, but when a well-developed specimen is seen with all the leaves more or less colored and those in the center and the young growth a rich yellow, it is certainly a novelty, as well as a really rich decorative plant. Now is a good time to propagate these plants from short stocky side growths. If the cuttings are long and drawn when propagated, the result will be plants of emphasized lankiness, which should, more in the case of this variety than of *Veitchii*, be avoided. *P. Sanderæ* stands sunlight fully as well as *P. Veitchii*, and is also quite as capable of lengthy endurance in use.

FICUS PANDURATA.—The biggest lot of *Ficus pandurata* I have so far seen was at the exhibition of the Massachusetts Horticultural Society recently. They were put there by Hoffman, the florist, who seems to be a hustler in many ways. Opinion differs concerning the extent of the adoption of this plant as a decorative subject up to date, but I do not see how there can be any difference of opinion regarding its adaptability, decorative character and usefulness and, as a natural result, ultimate popularity.

DRACAENAS.—Of all the plants grown because of the beauty of their foliage exclusively there are perhaps none, at most but very few, that are so satisfactory as dracaenas, always, of course, leaving several kinds of ferns out of such a reckoning. The propagation of dracaenas by the several methods through which it can be accomplished is quite feasible at any season of the year if conditions favorable to rapid progress of development in different stages of the growth of the plant are present. The most important condition for propagation just now, which is probably as good if not a better time than any other, is bottom heat.

Dracaenas in nearly all varieties take

the best part of a year to make good salable plants in 6-inch pots. Plants of a smaller size and in smaller pots are of use and used but not as specimen plants very often. Even if it were possible to grow the finely colored dracaenas into specimens in less time than indicated, it would be harder still to get plants of those varieties to develop good color when grown from cuttings of roots or stems in much less time. It is different in the case of plants topped, which are always the finest colored specimens in medium size pots, because of the well-known fact that the top leaves of brilliantly colored dracaenas are always of a greater intensity in coloring than those lower on the stems.

If a start is made immediately in the work of increasing by means of mossing the stems after the manner in use in the case of rubber plants, these tops will in a few weeks have made roots enough to sustain them when severed from the parent plants, and then the stems and fleshy parts of the roots of the latter can be used for the further increase of the stock.

When plants are mossed, the moss should be kept in a continuous moist condition by means of syringing or watering with a fine rose, taking care not to allow a great deal of water to get to the roots of the old plants, which ought to be kept on the dry side, especially during the period directly preceding the final operation of severing the plant newly furnished with roots from the old, which may be done when roots appear through the moss. When the rooted tops are severed and potted up in a compost of two-thirds fibrous loam and one-third leaf mold with an addition of a sprinkling of peat and sand, they should be placed over bottom heat, shaded and the foliage kept moist until they begin to be in a condition to rely more on their own resources.

The stems of dracaenas may for propagation be cut into pieces about an inch and a quarter in length and laid quite closely together in rows in sand in the propagating bench, or they may be placed in the same manner in flats, previously half filled with clean moss and then covering the stems with moss, placing the flats when filled over bottom heat. Root cuttings are made from the fleshy portions of the roots, which should be freed of all dry, wiry roots at the time of preparation. These root cuttings may be treated subsequently similar to stem cuttings. Some growers instead of potting the young plants as produced directly from either the stem or root process, cut them off and root them in sand when they are large enough to be so treated. In one particular and one only is this method to be commended and that is, that it has a tendency to make the plant stockier with less bare stem and drawn appearance than an uninterrupted growth; otherwise it is a waste of time and labor. Dracaenas grow luxuriantly when planted in benches, but it is questionable if all told it is a better method of growing them than in pots from start to finish. The plants certainly delight in heat and moisture, especially bottom heat, but a very high temperature is ruinous to their lasting qualities when they are taken out of it; 60 degrees is warm enough for the temperature of the house now, and a degree or two less will work much injury.

New Carnation **DEFIANCE** Brilliant Scarlet

This sterling novelty is the result of a cross between ESTELLE and a seedling with MACEO and DAYBREAK blood in it, and was originated by W. N. Rudd, Mount Greenwood, Ill.

The color is a most beautiful scarlet, brighter than anything seen in carnations heretofore; size, three inches and over; habit and form ideal. It is a very rapid grower, and has no tendency to produce surplus grass, every shoot advancing rapidly and producing a perfect flower. If you did not place your order already, we would advise you to do so without delay, so as to insure early delivery. **\$12.00 per 100, \$100.00 per 1000.** Usual discounts on larger orders.

There may be other red carnations, but there is only one scarlet, and that is DEFIANCE. Come and see it growing and be convinced.

JENSEN & DEKEMA, 674 W. Foster Ave., Chicago, Ill.

W. N. RUDD, Morgan Park, Ill.

THE NEW CARNATION

AFTERGLOW

Bright Rosy
Cerise Pink

The highest scored seedling at the Toronto Meeting of the A. C. S.; winner of the Craig Cup at Philadelphia, for best seedling; and has scored 91 points at quite a number of prominent cities. It is a very healthy and vigorous grower, early and continuous bloomer, and the predictions are that it will take the place of Lawson. Afterglow has been grown for the past season—and is doing universally well—by the undersigned, by whom it is offered. Orders now booked to be filled in rotation, for well grown, well rooted cuttings at \$2.00 per dozen; \$12.00 per 100; \$100.00 per 1,000.

REVIEW OF THE MARKET

NEW YORK.—Business in cut flowers has shown quite an improvement this week. Chrysanthemums have fallen off considerably, and prices have stiffened materially, though they are hardly reaching the figures that were obtainable at this time last year. Among the best varieties coming in just now are Gold Mine, Timothy Eaton, Maud Dean and Major Bonnaillon—old varieties, surely, but there seems nothing to replace them for commercial purposes as yet.

The rose supply is not unduly heavy; consequently prices have improved. American Beauty reach 35c. each for the best; Richmond, 10c.; Bride and Bridesmaid, 6c.; number two realizing \$1.50 and in a few cases \$2 per 100.

Carnations also are doing quite a little better; some of the new kinds have touched the 4c. mark in small lots, though \$3 per 100 has been the ruling figure for high-grade blooms.

Cattleyas have been rather scarce, and at times there has been some hustling to fill orders. Gardenias are in fairly good supply continuously, and prices do not vary much. Lilies, callas, Paper White narcissus and mignonette are in ample supply for all demands. Sweet peas and wallflowers are seen occasionally, as also are pansies. Lily of the valley continues plentiful, with little change in values. Violets do not seem to get a fair start this season somehow, and 60c. is considered a good price; a few specials occasionally bring 75c., but such sales are exceptions. A limited number of Lilium rubrum reach the market and are meeting with a fairly good demand.

Thanksgiving Day brought no increase in prices over those asked the day previous. Quite a few chrysanthemums, violets, carnations and roses were left over. Where clearances were made, they were only effected by making prices easier. Some dealers recognized the fact that there was more stock than would be required, and began making concessions on Wednesday. Taking into consideration the fact that business has been pronouncedly dull for several weeks, it must be admitted that Thanksgiving trade was fairly good, though prices on some lines were not more than half what were obtained one year ago.

CHICAGO.—The market has been oversupplied in every line for the past week with the exception of American Beauty roses. Friday and Saturday showed a slightly stronger price on high grade stock, but on Monday some held-back tea roses appeared in quantity. Good carnations strengthened in price and at the close were holding firm at advanced figures. There was slight change in other stock with the exception of green, which is holding firm. W. K. W.

BOSTON.—Market conditions show quite a little improvement over those of last week. The chrysanthemum season is practically at an end, with the exception of some fine large blooms for Thanksgiving trade. Roses are plentiful enough and there is no advance in price except on American Beauty, which command a higher figure for the best grades.

There are grand carnations now on the market with a fairly good demand for them. Violets sell fairly well. Lilies are plentiful enough, and so is lily of the valley. Paper White narcissus are now in greater supply but sell well.

Mignonette is of good quality, as is bouvardia and there is lots of fine stevia to be seen. J. W. D.

ST. LOUIS.—During the past few weeks trade has been anything but satisfactory. Added to this, there was an over-supply of almost everything in season. Chrysanthemums are still holding out, and it is said that plenty will be in the market for Thanksgiving Day. The downtown retailers sell roses and carnations at 15c. per dozen and advertise them by display signs in their windows.

As to Thanksgiving prices of stock chrysanthemums will hardly go over \$15 per 100 for the best blooms; some extra good Golden Wedding, Timothy Eaton and Mrs. Jerome Jones are coming in

daily. Roses are and will be plentiful; fancy stock will run not over \$6 to \$8 per 100. Bride and Bridesmaid are more plentiful than others. American Beauty, in fancy long, are not any too plentiful at \$4 per dozen; plenty of shorts at \$3 to \$10 per 100. A scarcity of roses is looked for this week. Violets are very scarce and in good demand. The weather is not cold enough for them; for extra good quality, 50c. and 75c. has been the price; this week they go to \$1 per 100. Carnations are of extra good quality, but in light demand. Last week the price was hardly over \$3 for the best the bulk of them going at \$2 per 100. Fancy stock will go up to \$5 this week; \$3 and \$4 per 100 for second choice. Paper White narcissus are extra fine and will command \$4 per 100. Lily of the valley sell at \$3 and \$4 per 100. Stevia is in at \$1 per 100 for the best. ST. PATRICK.

INDIANAPOLIS.—The general tone of the flower business is brighter than for some weeks. Stock of all kinds is diminishing in supply, which fact bodes well for a busy Thanksgiving. The remaining supply of chrysanthemums is nearly all ordered from the growers at current prices, as the store men are taking few chances on shipped goods; \$1, and \$1.50 and \$2 per dozen are the popular prices. Small cut stock, such as Christmas Eve, brings \$2 to \$3 per hundred.

Carnations are much scarcer and prices have advanced to \$4 a hundred for fancy ones; medium grades are bringing \$3 to \$3.50 per hundred; 75c. to \$1 a dozen is the Thanksgiving retail price.

Home-grown violets are a scarce article at 75c. to \$1 per hundred; shipped Eastern violets are on hand in quantities, but a heavy local cut is sorely missed this season.

Bridesmaid and Bride of good quality are plentiful at \$5 to \$6 a hundred. Richmond and a few other roses are shipped in at market prices. American Beauty are always in demand at \$5 to \$35 a hundred.

An increase has been noted in the plant line. Cyclamen, Gloire de Lorraine begonias, poinsettias, chrysanthemums and primroses outsell cut flowers when good plants are obtainable.

Tomlinson Hall Market transacted a fair business last week, but the quality of the flowers did not permit of much wholesaling. I. B.

NEW BEDFORD, MASS.—The cut flower trade has been rather quiet the last week. Funeral work has been plentiful, one of a very prominent local man using up a large quantity of stock. Some very handsome designs were seen at this funeral. Carnations are plentiful just now, with prices about the same as usual. Violets are blooming well now and there will be a good supply of these for Thanksgiving; they have been a drug on the market here for the past few weeks; \$1 per 100 retail is the price. Chrysanthemums are still in the race, but a couple of weeks or so will see their finish.

S. S. Peckham will go strong on rooted carnations the coming season. He has a batch of ten thousand already in the sand. He will also go strong on Winsor, and is trying all the new sorts this year.

H. V. Sowle has opened a new store at the North end of the city.

E. S. Haskell, formerly at 7 Pleasant street, is now the owner of the Madison dog kennels. HORTICO.

FIRMS WHO ARE BUILDING.

LINCOLN, MASS.—Charles Lunt is building another greenhouse.

CANFIELD, O.—Jarvis Smith is building a new greenhouse on High street.

STRATFORD, CONN.—John F. Sexton, florist, contemplates erecting a large greenhouse in the near future.

TOLEDO, O.—Kruuger Brothers, East Side florists, have purchased 26½ acres of farm land about a mile beyond the city limits in Wood county. It is the intention of the firm next year to start work in the Spring on the first installment of what will ultimately be an immense greenhouse plant.

CARNATIONS A SPECIALTY
GEO. B. HART, Wholesale Florist, 24 Stone St., ROCHESTER, N. Y.
Mr. Hart's Handy Handle.

CHANGES IN BUSINESS.

SHERIDAN, WYO.—H. Adam Loucks, formerly of Cheyenne, has opened a florists' store here.

WOONSOCKET, R. I.—Jonas Brook has sold his flower store at 75 Main street to Simon Colitz. Mr. Brook retains the Summit greenhouses.

GRISLEY, ILL.—C. A. Rowley, who has had 25 years' experience as a nurseryman, is to start a nursery here in the near future.

GREENFIELD, MASS.—Charles P. McDonald is making extensive alterations at his Federal street store preparatory to installing a florist business.

HAVERHILL, MASS.—George O. Morey & Company, florists, until recently located in the old Music hall building at 44½ Winter street, have removed to 23 Main street.

JEFFERSONVILLE, IND.—Frank Anderson is building two greenhouses and will enter the florist business. He is a councilman of this town, and was formerly in the foundry business.

BAR HARBOR, ME.—The store of the Mt. Desert Nurseries is being moved from its present location on the east side of Main street to a point just across the street immediately in front of the site of the old Rodick house.

Albany, N. Y.

The greenhouses and plant growing department of Whittle Brothers is situated on Madison avenue. This is a well-appointed range of glass and is superintended by Alfred E. Whittle. A new cottage adjoining the greenhouses was near completion. This is to be occupied by the night fireman and his family.

Two large houses are devoted to roses for Summer bloom; Souvenir du President Carnot and Kaiserin Augusta Victoria are used for this purpose. The other varieties popular for Winter blooming are grown in large numbers. Both grafted and own root stock is used. Mr. Whittle is not partial to either; he says the results are equally satisfactory from both classes of stock. More depends on the culture and care in producing results than in the selection of planting stock. The high price of the grafted stock was not commensurate with any particular advantage it might possess over well-grown stock of ordinary propagation. A house of Souvenir du President Carnot, on own roots, where wood of extraordinary size and length could be seen, was pointed out as substantiating this theory. No grafted stock could equal it. Mr. Whittle believes in good roses all the season around, and takes particular pains with his Summer flowering stock. Good roses bring as good a price in Summer as they do in Winter. It costs but little to carry them over Winter in a semi-dormant condition to follow up the Winter-flowering varieties that become smaller as the weather gets warm. If florists would pay as much attention to roses for Summer blooming as they do to the Winter supply, good stock could be had the entire season through.

The new house erected the past Summer by E. A. Danker, has been planted in all the popular varieties of carnations; they are at the present time looking well. A finer house of carnations would be difficult to find; they are a credit to Thos. Snare, grower for Mr. Danker. The greenhouses are on Central avenue and are in splendid running order. Mr. Danker grows, besides the general line of roses and carnations, quite a good collection of orchids. Cattleya labiata were just commencing to bloom as well as several other cattleyas usually found in good commercial collections.

Oncidiums, cypripediums, etc., are grown extensively, the blooms of which can always be found at the Danker store at 40 Maiden lane. The first chrysanthemums of the season in Albany came from the Danker greenhouses. Monrovia and Polly Rose are grown for early. The Danker store is always attractive; flowers of a high grade are continually on hand to supply an extensive trade of this kind.

Edward F. Meany and Edward P. Tracey, for the past seven years or more employed by Mr. Danker in his store, have formed a partnership and will open a new cut flower shop at 76 Maiden lane. These are young men of great popularity and, while Mr. Danker dislikes to loose their valuable services, he joins with all their other friends in wishing them success in their new undertaking.

Whittle & Riggs, on Hudson avenue, report good business. They are not growers, but the best stock to be found on the wholesale market can always be had at this popular store.

The greenhouses of W. C. King, on Madison avenue, are at present undergoing a complete system of repair. A new boiler is now being installed; this with the rush of getting all plants in their Winter quarters keeps the entire force busy. Sam Goldring has charge of the King greenhouses and all stock on the place attests to his abilities as a good grower. The carnation houses are looking well; all show a sturdy uniform growth. Mr. Goldring has an idea of his own in carnation growing that may be worth the consideration of other growers. The best possible plan, he claims, is to plant the carnations in new ground each season. Before planting, the sod or top soil is removed and placed in piles and prepared for filling the benches. After the removal of sufficient soil for filling the benches the ground is then prepared for the young plants. As soon as the plants are sufficiently large, and the proper season arrives, they are lifted from the field. In the meantime the benches are filled with the same soil as that in which the carnations have been growing in the field. The check incidental to housing the plants is not as severe as if the plants had also to adapt themselves to a change of soil. This is a point that Mr. Goldring lays particular stress on, and the appearance of his stock shows that his theory may be worthy of emulation by other carnationists.

John Berberick, who terms himself the South End Florist, has a very attractive store and showroom with a few well-stocked greenhouses at 26 Second avenue. Mr. Berberick would like more room, as his increasing trade demands it. Being in a densely populated section it is not possible to secure ground for extension at a price suitable for greenhouse construction. A visit to his store and greenhouses, however, shows that all his space is occupied to good advantage, and all stock is tastefully displayed.

R. W. Zobel, who about two years ago moved to this city from Chattanooga, Tenn., has built a number of modern greenhouses on the Troy road, in which he produces some good chrysanthemums, roses, and carnations to supply his store on Broadway that is presided over by Mrs. Zobel. The Tennessee sunshine, Mr. Zobel states, was a little more than he could stand, and for that reason only he sought a cooler climate. Paradise, it is said, has its attendant evils, and while he has not as strong a sunshine here, other difficulties in the way of getting established have to be overcome. Mr. Zobel speaks warmly of his friends in Tennessee, and the liberal patronage he controlled when in Chattanooga. J. M.

Philadelphia.
Trade Notes.

There is apparently no change in business conditions here this week; the wholesale houses are loaded down with flowers, and the stores are only buying sparingly. Shipping trade has improved. Prices are low; anything in quantity can be bought very cheaply. Some very good American Beauty roses sold on Saturday last for \$1 and \$1.50 per 100. Chrysanthemums are a complete glut. The past few days both roses and carnations have come in very soft.

There has been some work going on in the decorating line; on Saturday last the William Graham Company had a large decoration at the Union League for the Founders' Day celebration. On the same day H. H. Battles had a large dinner decoration at Horticultural Hall, it being the Bar Association dinner to Judge Mitchell of the Supreme Court.

The Florists' Club will meet on Tuesday next when Charles H. Grakelow will read a paper on the "Retailer's Position Toward the Wholesaler."

Bayersdorfer & Company have received a large consignment of holiday goods this week on the steamer Marquette. This firm is very busy, the packing department working overtime. DAVID RUST.

They Liked the Root Cellar.

"The root cellar served as refreshment room and was highly appreciated."—Twin Cities News Item in Horticulture.

News Items.

The Gardeners and Florists' Club will hold an outing among the Framingham growers on December 14.

Bouvardia is seen in fine shape in this market at present; some of the growers of this flower are Anderson & Williams, Thomas Stock and William Patterson.

S. J. Goddard has been on the sick list for the past few days.

M. A. Wood had a fine lot of chrysanthemums for the Thanksgiving trade; the variety is Jeannie Noun. Chas. Evans has some well-grown chrysanthemum plants of the variety Garza for which he has had a good demand.

Frank Deery of Zinn's had a slight case of poisoning in his thumb, last week, caused from a rose thorn; fortunately it was not so serious, though he had to leave off work for several days.

J. W. DUNCAN.

New Bedford, Mass.

August Jahn has a fine lot of carnations, of which he makes a specialty. Only a few of the ordinary commercial varieties are grown, as Mr. Jahn has a number of fine seedlings of his own production that he is growing in large numbers so as to have ample stock to place them on the market if possible the coming season. A large white that he proposes calling The Lloyd he considers his best; of this he has about 10,000 plants, filling three large houses. It is a high-built flower, on the peony style, is slightly fringed and very fragrant. In point of productiveness it is a wonder—the benches were a perfect sea of buds. Mr. Jahn claims the blooms have fine keeping qualities. Another of the seedlings is a good Harvard crimson; a house of about 1,200 of these looked in fine shape. Unlike most of the other crimsons, it has a good stocky habit, and Mr. Jahn believes it to be the best crimson to date. The blooms of these plants are shipped daily to the Boston market, where they command a good price. Mr. Jahn gave up his city store last July so as to devote his entire time to his carnations.

J. M.

Northampton, Mass.

The greenhouse property of H. W. Field at this place is new and of considerable extent. G. H. Sinclair is the superintendent. All stock shows his ability as a grower. A fine rose house was finished the past Summer and planted in all the popular varieties of roses. This house is 34x200 feet, of the Lord & Burnham construction, and is a fine piece of workmanship. The roses are in solid beds; considerable grafted stock is used, the intention being to carry them along in the beds for several years.

In carnations Mr. Sinclair is considerable of a specialist; he has a few promising varieties of his own production. Viola Sinclair, a fine freeblooming pink of the Lawson style, will be put on the market the coming season; this Mr. Sinclair has named after his little daughter. Another promising one is President Seelye, named after the president of Smith college; it is a cross between Mrs. Lawson and The Queen; is a white with good large bloom and very productive. Several houses are devoted to these new sorts.

Mr. Sinclair has just returned from a six weeks' trip to England.

FOR

CUT FLOWERS AND SUPPLIES

76-78 Wabash Avenue, CHICAGO.

LONDON, ONT.—Business for the past month has been almost at a standstill. However, the Christmas season is almost at hand and trade is beginning to get more lively. Roses are plentiful, carnations in fair supply, quality of both very good. Chrysanthemums have been very plentiful, the quality only fair; a large number have been sold on the local market at from 15c. to 75c. a dozen; in fact, several times the smaller varieties went at 15c. for twenty-five flowers.

A visit to Gammage & Sons' establishment found everything in good shape for Christmas.

Walter Ramsay, of Edmonton, Alberta, was a recent visitor.

rists' Union, has established himself in the retail florist business by the purchase of the greenhouse and store built about a year ago by Louis Ostendorf at 425 Douglas boulevard. The concern is known as the Douglas Boulevard Floral Company, with Mr. Vanderpoel as manager, and landscape gardening is included within its line of work.

The returns show that 31,689 people passed through the doors at the recent show at the Coliseum and that something over eleven thousand dollars was taken in at the box office, which speaks well for the management.

It may not and probably is not generally known that the late Edgar Sanders for the last quarter of a century of his life kept a careful diary of the day's doings in horticultural and other lines, and his daughter, Mrs. Victor, with whom he made his home for the past twenty years of his life is now at work compiling these valuable data, which it is hoped will later be published in book form.

Joe Brown, the expressman who fell down the elevator well in the Atlas Building a few weeks ago, showed up on Monday on crutches.

W. K. W.

New York.**The Week's News.**

The retail trade has shown some signs of recuperation this week. There has been quite a little more doing in a transient way, and most of the store men have a few weddings booked for the near future. Thanksgiving Day trade is going the way of the Saturday trade, evidently. Time was when Saturday was counted the best day of the week for business, but that was before the automobile craze struck the fairly well-to-do class. Now, everybody who can afford it, owns a machine and week ends are spent touring the country and paying visits to rural friends, all of which is, no doubt, very healthful, but has had a bad effect on the Saturday flower trade so far as concerns this city.

The gratifying results that have so far been accomplished by the recent amalgamation of the wholesale florists has stirred our Philadelphia friends to make another attempt at co-operation, and we are credibly informed that a system similar to the one in operation here will be inaugurated in that city early next month.

Some well-grown plants of heaths and begonias were on sale for Thanksgiving and helped to make very attractive window effects.

Adolph Jaenicke, who some months ago established a landscape and nursery business at Floral Park, L. I., has been very successful in the undertaking, and finds constant employment for a large force of helpers. He is making a specialty of an improved form of Gerbera Jamesoni, and next Spring intends to place an immense stock of these plants on the market.

The officers of the American Rose Society held a meeting on Monday afternoon at the Hotel Martinique.

Miss Moore, daughter of F. L. Moore, Chatham, N. J., left on Saturday last for Mexico where she will visit her brother who is surveying and laying out the route of a new railroad that is to penetrate the mountainous regions of that country.

We rejoice to observe that the editor of our Boston contemporary still shares in the enjoyment that proceeds from the qualification of "seeing double."

C. W. Ward, Queens, N. Y., delivered an interesting lecture on "Forest Taxation" before the Lake States Forestry Convention held at Saginaw, Mich., November 12-13, 1907.

Among visitors in town this week were Robert Craig and Leo Niessen, both of Philadelphia, Pa.

TERRELL, TEX.—W. C. Hawkins, one of the florists of this place, states that his recent loss on account of the freeze, his chrysanthemums being all lost, was close to \$800.

CHRISTMAS INVITATION CARDS

Attention is called to our advertisement in another portion of this issue offering a selection of four choice Invitation Cards, with appropriate designs, and printed by four color process. Something new, good and special. Look up the advertisement.

W. Z. PURNELL, Snow Hill, Md.

St. Louis.

News Notes.

O. Friebasser, florist, of Philadelphia, is in the city this week on his way West, where he intends to locate in the greenhouse business.

Charles Schoenle, head of the Schoenle Floral Company, has an interest in the Burton-Allison Company, who have put on this market flower colorings. Samples have been sent to the local trade who report the material the best in the market.

Secretary W. B. Stevens of the Louisiana Purchase Exposition Company the past week turned over to Park Commissioner Phil. Scanlan the western half of Forest Park which was used for the World's Fair in 1904, and says the park has been fully restored at a cost to the Exposition Company of \$500,000. Commissioner Scanlan's approval is all that is needed now in order to relieve the company of the grounds. George Kessler, the landscape architect, has supervised the restoration since the close of the fair.

The trustees of the Missouri Botanical Garden will next Saturday evening hold the seventeenth annual Shaw banquet at the Southern Hotel. This banquet is provided for in the will of the late Henry Shaw, who bequeathed \$1000 annually for this purpose. The guests at this banquet will be literary and scientific men and patrons and friends of natural scientists. Professor Wm. Trelease, Director of the Garden, will be the toastmaster on this occasion.

The St. Louis Seed Company has purchased a large tract of land in the county, on which the company will build a range of greenhouses to grow vegetable plants for their own use. After January 1 they will start a number of bulbs in pots for growing early Spring plants. They will also go in for a large number of hardy shrubs and roses.

Arthur Ellison, son of Mr. and Mrs. William Ellison, is now employed at Vaughan's Greenhouses, Western Springs, Ill. Under the watchful eye of James S. Wilson Arthur should make good; the best wishes of the trade are with him.

Walter Sanders, who manages his father's place on Delmar boulevard, reports that they have a fine lot of poinsettias in pans for the holiday trade. Their table decoration at the late flower show won them many friends.

The executive committee of the St. Louis Horticultural Society held its first meeting since the show the past week in the rooms of the Missouri Athletic Club. All bills were ordered paid. The society has taken in several millionaires lately, and the membership is fast reaching the limit. The show was not a financial success.

ST. PATRICK.

BAR HARBOR, ME.—Alexander Robertoff, formerly in the market garden and florist business here, died on Tuesday, November 19, 1907, from a shock of paralysis. He was a native of Russia and came to America some 35 years ago. He leaves a widow, also a number of relatives in Russia, whose home is near the city of Moscow.

DAVENPORT, IA.—At the last meeting of the Tri-City Florists' Association, held at the home of Superintendent Boehm at Central Park, John T. Temple, who was one of the judges, gave his impressions of the recent Chicago flower show.

Cherokee, Ia.

At O. B. Palmer's greenhouses great changes have been made. Mr. Palmer has replaced all his wooden benches with concrete ones. He says the latter is a deal cheaper and certainly more durable, as well as cleaner.

His roses and carnations are looking well, and he reports a good run of business. Chrysanthemums are nearly done now; they were earlier than usual in this section of the country.

At the Insane Hospital greenhouses there has been a great display of chrysanthemums. A house of carnations, planted late on account of delay in renewing the benches, which are now of concrete, is looking very well and will soon be producing lots of good flowers. The grounds around the Hospital are fast coming into shape and are already very highly spoken of by visitors. About 20,000 trees have been planted in the last four years. This coming season it is expected that a lot of ornamental shrubbery and evergreens will be set out. All this work in addition to caring for a 40 acre vegetable garden and planting 15 acres of orchard, has been done within the last five years, and is all the work of patients under the direction of the head gardener, Henry Stocking.

Cincinnati.

News Notes.

Herbert Heller, New Castle, Ind., was a caller Friday on his way home from a hurried trip through the South. Fred Lautenschlager was a caller Sunday.

The outlook for Thanksgiving is quite promising, and there will be plenty of stock to fill all orders. Single violets are in demand, as are chrysanthemums. Roses are a drug now, and will be until chrysanthemums are gone. Good carnations find a ready sale at 3c. and 4c. The extra high prices for Thanksgiving only do harm to the business; good, fair prices would be much better and would not scare away trade.

With the present conditions of the money market it is not safe to make predictions for Christmas, but I really believe the florists will fare better than the other merchants.

Superintendent Rodgers has just issued his annual report of the parks of Cincinnati; it is quite an attractive and instructive document, well illustrated.

David Knott, foreman at Eden Park greenhouses, has given our citizens a fine chrysanthemum show, and for the past month thousands of people have passed through the houses.

E. G. G.

TOLEDO, O.—The Perennial Gardens Company has been awarded a diploma and medal for its display at the Jamestown Exposition. The jury on awards highly commended the rose Anny Müller shown by the same firm.

HITCHINGS & COMPANY

GREENHOUSE DESIGNERS AND BUILDERS

Manufacturers of Heating and Ventilating Apparatus

1170 Broadway, New York

Baltimore.

News Items.

A number of the Baltimore florists attended the Washington chrysanthemum show last week; all of them pronounced the exhibits very good.

The various park districts in Baltimore displayed a good collection of well-grown pot plants which were artistically intermingled with exotics in the conservatories.

Preparations for the annual meeting and exhibition of the Maryland Horticultural Society are about completed. It is expected that the decorations of the Armory Hall, which will consist of bunting and evergreens together with large groups of decorative plants, will be completed by 1 p. m. Tuesday. An extensive exhibit by nurserymen is promised. The fruit, vegetable, and cut flower exhibit will exceed any previous show that has ever been held in Baltimore; 40,000 square feet of the hall will be given over to these displays and about 12,000 additional square feet for other exhibits. A floor plan can be had upon application to Secretary T. B. Symmons by any prospective exhibitor. Exhibits of all kinds will be given plenty of room for artistic arrangement; the average promenades are 20 feet wide, which will insure convenient inspection by the public. No doubt the people will attend in large numbers, as the meeting as well as the exhibition is free to all.

The program of the meeting is as follows:

December 3, 2 p. m.—Invocation, Bishop Paret; Organization and announcements. 3 p. m.—Address of Welcome, Hon. J. Barry Mahool, Mayor of Baltimore; response, Henry Holzapfel, Hagerstown, Md. Reports of secretary and treasurer J. B. Symmons. Reports of standing committees—orchards, stone fruits, vineyards, small fruits, flowers, vegetables, ornamentals, entomology, ornithology, botany, plant pathology, nomenclature, new fruits, packing, storing and marketing fruits, transportation. President Orlando Harrison's annual address. Appointment of committees on resolution, obituary and auditing; treasurer's account.

7.45 to 9.30 p. m.—Question box; announcements and miscellaneous business. Report of State Forester Professor F. W. Besley, Baltimore, Md. Water Gardening by Peter Bisset, president Washington Florists' Club. Sketches of the Peach Industry in the United States by Professor John Craig, Cornell University, Ithaca, N. Y.

Wednesday, December 4.—Announcements and report of State Pathologist, Professor J. B. S. Norton, College Park, Md. Forty Years in the Apple Orchard.—N. T. Cox, Proctorville, Ohio. Maryland Agricultural College—President R. W. Silvester, College Park. Marketing Fruits and Vegetables—Walter Snyder, ex-president of National Shippers' Association, Baltimore, Md.

2-5 p. m., December 4.—Question box; announcements and other business. Report of State Horticulturist Professor C. P. Close, College Park. Growing Small Fruits for Market, by C. F. Hale, Shelby, Mich. Report of Maryland Experiment Station, Director H. J. Patterson, College Park, Md. Election of officers; reports of select committees. 7.45-9.30.—Commercial Floriculture, C. W. Ward, New York. Report of State Entomologist Professor T. B. Symmons. General business; adjournment and banquet. C. H. S.

Kalamazoo.

Trade Notes.

As is usually the case just previous to Thanksgiving Day, business is rather slow although better than might be expected when taking into consideration the money panic that has now extended even into the small cities. The retailers call business very fair although they admit collections harder than usual.

Thanksgiving trade promises well and some good orders are already booked. There will be ample stock to meet all demands, as chrysanthemums are holding out well. Prices at retail will average rather lower than last year. Chrysanthemums will range from 50c. to \$6 per dozen; the bulk, however, will sell at from \$2 to \$3 per dozen. American Beauty roses, \$2 to \$6 per dozen; teas, 50c. to \$1.50; carnations, 40 to 75c. per dozen; violets, 25c. per bunch up. Plenty of pot plants will be available at moderate prices.

According to the local press R. H. Wells of the Central Nursery Company has perfected a process whereby he can utilize for steam raising purposes all the ashes and clinkers coming from the boilers there. The process is secret although not at present patented. If practical, it will be a gold mine to the ingenious inventor.

The general average of prices at retail here the past month has been lower than usual at this season. Whether this is the result of the money situation I know not, but as there has been a considerable reduction in the working forces of the factories here it can scarcely help having some effect on the florists and other business interests. However, there will always be a little something doing all the time to use up a few flowers, so doubtless the florists will weather the storm in as good shape as any other trade or calling. S. B.

Washington, D. C.

Trade Notes.

The Smith-Saunders wedding on Wednesday was one of the chief events of the season in Washington society. In one corner of the bride's parlor was arranged an altar, artistically decorated with white chrysanthemums; 400 or 500 of these flowers were used in the decoration, besides many other plants. Gude Brothers & Company did the decorating.

Washington's new wholesale and commission house, located at 1312 G street, N. W., is enjoying well-deserved success; the quality of the flowers handled is excellent.

Dark, rainy weather prevailed during nearly the entire week, and continued over Sunday, and it is no wonder the retail stores are complaining that business is not up to the season's average. Prices, however, are on the increase, and Thanksgiving Day promises good returns. JAS. L. CARBERRY.

BURLINGTON, VT.—The thirteenth annual meeting of the Vermont State Horticultural Society will be held in Masonic Temple Hall, Tuesday and Wednesday, December 3 and 4, 1907. An interesting program has been prepared, and there will be an exhibition of fruit, flowers and vegetables, for which premiums will be awarded.

During the months of December, January and February, the factory frequently wants more work to keep it going at the full capacity, so it is to our interest to get a goodly number of you growers to place your Spring work with us **now**. It is of special

THE MOST Important Thing

about any statement in an advertisement is the truth or falsity of it. Some of the firms advertising their products are not over scrupulous as to keeping their claims within the bounds of truth and as a consequence the goods they sell offset the value of their advertising, which hinders the progress of their business. Let us say here that we are ready to stand back of every statement we have ever made in any advertisement and that we will guarantee our material to be all we claim it to be. You should investigate our material and get an estimate to-day on your needs.

WRITE FOR NEW CATALOGUE

You know last week we showed you how end rot affected the side rail when the joint was open mortise. Now here is another thing that happens: The water easily soaks in and not only the side but every part of joints decay.

Here is L. & B's way of making a joint. You see the tenons are double shouldered, which gives double bracing strength—that the mortise does not extend through, and so thoroughly protects the end of the tenon from the weather. Heavy steel, barbed dowel pins are used instead of the short-lived wooden ones.

SASH SENSE TALK No. 3

You know the good sense of a good joint lies in having it fit snug, and if possible, be constructed to keep the weather out. You also know the end of a piece of exposed wood starts to decay first.

Sash made with the open mortise joints leaves the tenon end exposed to the destruction of the weather which works its way into every part of the joint. First the joint loosens a bit and then both mortise and tenon soon begin to decay. The sash is twisty, loses its rigidity, and snaps the glass if not handled with great care. It is cheaper to throw them away than commence the endless repairs. Our rock solid sash with blind mortise, double shouldered, carefully fitted joints that are thoroughly leaded before being put together, stand the racket. They are strongest where strength is greatest needed. It costs money to make *sash that last*, but we claim they will outwear three of the ordinary kind, and when we make a claim like that we have to know what we are talking about. Write for circular and prices. Lord & Burnham Co., Greenhouse Designers and Manufacturers. New York Office, 1133 Broadway, Corner 26th St. Branches: Boston—819 Tremont Bldg. Manufacturers of all silk ribbons in all qualities and all widths. Samples cost you nothing. A postal will bring them.

Mr. Advertiser:

Our Christmas Number will be issued Next Saturday, Dec. 14

¶ To those who desire to reach buyers of holiday necessities, whether of plants, flowers, evergreens, supplies or any other commodity connected with the trade, the securing of advertising space in that issue will accomplish the desired end.

¶ OUR CHRISTMAS NUMBER presents an excellent opportunity for clearing out not only surplus stock, but everything else that a florist uses in his business.

¶ The money spent for advertising at this time is not an investment; it is an actual purchase of holiday customers.

¶ Send your advertising copy early; we can receive until Wednesday noon, December 11. The earlier it reaches us, however, the better our opportunity to make a good display of it.

FRED ROEMER, Seed Grower
QUEDLINBURG, GERMANY

Seed Trade Report

AMERICAN SEED TRADE ASSOCIATION

George S. Green, Chicago, Ill., president; M. H. Duryea, New York, first vice-president; F. W. Bolgiano, Washington, D. C., second vice-president; C. E. Kendel, Cleveland, O., secretary and treasurer; Leonard H. Vaughan, Chicago, assistant secretary.

EDWARDS, MISS.—On November 24 fire resulted in following losses: Office building, two barns and two seed houses, property of V. M. Noblin and Mrs. Mattie Montgomery, valued \$1,500; no insurance.

BOSTON, MASS.—Will W. Tracy, Sr., of the Bureau of Plant Industry, Department of Agriculture, Washington, D. C., delivered an address before the Massachusetts State Board of Agriculture this week on the subject "Breeding and Raising of Garden Seeds."

MARBLEHEAD, MASS.—Gregory's new seed catalogue is ready for free distribution. Not only does it illustrate and describe the new and old varieties, but it also helps make the planting a success, by giving expert advice on the raising of various vegetables. Everyone interested in vegetables and flowers should have this catalogue, and the only thing necessary to do to secure a copy free is to write J. J. H. Gregory & Son, Marblehead, Mass., with a request for one.

Every year the firm of Gregory & Son make over 2,000 tests of the vitality of both vegetable and flower seeds, and thousands of dollars' worth are thrown away as not being up to their high standards. This year Gregory offers, besides many new varieties, a potato that's a wonder. It's called "Big Crop," and it is claimed it will outyield all the well-known varieties, is least affected by rot, and is deliciously mealy. It produced this season on their own farms at the rate of 836 bushels per acre.

SEED OF THE SPENCE COTTON TREE.—Consul John L. Griffiths of Liverpool, in reply to an inquiry concerning seed for planting the Spence cotton tree of India, furnishes the following information: Mr. Spence states that he has been selling the seed at 10 rupees (\$3.24) per pound in India, but that he has ceased doing so for some months past, as he requires all he has in stock for the cultivation in India of the 50,000 acres of land, for which purpose he is now endeavoring to launch a public company in London with, he says, necessarily a very large capital. He informs me that he has between 200 and 300 pounds of seed in England, and that one pound is required to each acre containing over 5,000 trees. [Address of the Spence Company on file at Bureau of Manufactures.]

LILY OF THE VALLEY TIPS.—The following consignments of Lily of the valley pips reached New York on November 27-28:

	Cases.

S. Stern	327
Ralph M. Ward & Company	40

Prices Advertised in these Columns are for THE TRADE ONLY—When Writing Please Mention THE FLORISTS' EXCHANGE.

IMPORTS OF SEEDS, ETC.—November 25.—O. G. Hempstead & Son, 34 cases seed, six cases plants; H. F. Darrow, three cases plants; L. Dupuy, five cases seedlings; O. G. Hempstead & Son, four cases trees, etc.; McHutchison & Company, seven cases plants, November 27-28.—Yokohama Nursery Company, one bag seeds; O. G. Hempstead & Son, 14 cases roots, etc.; McHutchison & Company, 10 cases live plants, eight cases trees; August Rölker & Sons, seven cases live plants, November 29.—Kraemer & Foster, one case plants, 12 tubs laurel trees; Maltus & Ware, three cases bulbs; John Scheepers & Company, one case plants; L. Chanler, one case bulbs, November 30 and December 1.—H. Frank Darrow, 255 packages seed; McHutchison & Company, 12 packages seed, December 2.—H. Frank Darrow, two packages plants, 21 packages seed; Peter Henderson & Company, 178 packages seed; F. B. Vandegrift & Company, 51 packages seed.

GARDEN PEA CROPS.—An American correspondent to the Horticultural Advertiser, England, writes as follows on the condition of the supply of garden peas:

"To give your readers a general idea of how short our crops of seed peas are turning out this year, I have prepared the following list of varieties, giving my estimate of the yield of each sort, and as nearly as possible the present market price:

Variety	Per cent. of an average crop	Present value per bushel
Early Alaska	50	4.25
Early Daniel O'Rourke	60	3.75
Pride of the Market	65	5.75
McLean's Advancer	40	5.00
American Wonder	90	4.50
Champion of England	25	5.00
Bliss' Everbearing	40	4.50
Gradus	50	10.00
Gregory's Surprise	40	5.50
Heroine	30	6.00
Horsford's Market Garden	40	5.00
Premium Gem	60	5.25
Nott's Excelsior	60	6.00
Carter's Daisy	75	7.00
Prince of Wales	50	4.50
Carter's Stratagem	75	6.00
Carter's Telephone	25	7.00
Thomas Laxton	75	6.25
Admiral	40	4.50

"The above, of course, is a very unfavorable report, and while we hope that the actual deliveries of seed peas from the growers next month may be somewhat more favorable, everyone now expects very light returns. No seedsman, to my knowledge, has as yet published any preliminary price list of garden peas for the coming season of 1908; but the rates I have mentioned above would seem to be about what the trade has in its mind as the market prices at the present time. Various circumstances may somewhat vary these estimated quotations before the advent of the new year; but at this writing, it would seem improbable that much lower quotations could be made. Our seedsman, you can imagine, are not very happy over the present prospect, but think how serious will be the loss of our growers, who in many cases have not any more than harvested the seed stock planted. It certainly has been a most discouraging season for garden peas."

SEED TESTING BY THE GOVERNMENT.—The Seed Laboratory of the United States Department of Agriculture has issued the subjoined circular regarding seed testing:

Address all samples and correspondence concerning seed testing to "Seed Laboratory, United States Department of Agriculture, Washington, D. C. Samples are often lost and reports delayed on account of improper address.

INFORMATION.—Accompany all samples with a statement as to the exact purpose for which they are sent—

(1) Examination for presence of adulterants or dodger; (2) Test for mechanical purity; (3) Test for germination.

The examination of samples for the presence of adulterants or dodger requires but little time and will be given precedence over all other work. All samples sent for this purpose will be examined at once and reports sent by mail or on special request by telegraph at the expense of the receiver.

TEST FOR MECHANICAL PURITY requires the separation of the samples into three parts—(1) Pure seed (the kind being examined); (2) Foreign seed (all seeds not of the kind being examined); (3) Sticks, stones, dirt, and chaff, the determination of the weed seeds present, and the percentage by weight of each of the three parts. These tests require considerable time and can only

HERE IS A BARGAIN BULBS BELOW COST

WE NEED ROOM—DO YOU NEED BULBS?

HYACINTHS, single, mixed, \$1.75 per 100, \$16.00 per 1000. Also small quantities in separate colors at the same price.

HYACINTHS, double, mixed, \$2.00 per 100, \$18.00 per 1000. Also small quantities in separate colors at the same price.

The above are extra choice bulbs and are only sacrificed because of the lateness of the season and want of room.

TWO thousand dollars or more may be made from one-quarter acre devoted to the culture of our aster Lady Roosevelt, conducted scientifically according to our Practical Intense Culture Methods (not theory), as set forth in our Aster Culture Instructions which contain about 4000 words; more fully explained in our Illustrated Folder especially devoted to our Special Crop. Address: BOX 344, ELMHURST, ILL.

be made by experts. The facilities of this laboratory will not permit more than five such tests to be made for any one firm or individual in any one calendar month. These tests will be made and reports sent as promptly as possible and in the order in which the samples are received.

TEST FOR GERMINATION consists in determining the percentage of a sample of seed which will germinate under favorable conditions. These tests of most seeds are easily made by anyone, although some seeds, including many grasses, are somewhat difficult to test, requiring exact conditions. Samples will be tested in the order in which they are received, and not more than five tests for germination will be made for any one firm or individual in any one calendar month.

EDGAR BROWN,
In Charge of Seed Laboratory.

Seed Trade Notes.

A week ago we expected that the very heavy snow, rain, and wind storm we had would clear off very cold, with the result that bulb planting would come to an immediate end. While the weather is somewhat colder, bulb planting can, and is, still being extensively continued in many sections, with the result that trade the past week has been especially good for these last days of November. Many advance seed orders are also being placed, so altogether there were spurts the past week of real active business. The main reason for so many early seed orders is now most certainly because both dealers and planters are beginning to realize that seeds not only will be short for the Spring sales of 1908, but are short now for sales of any kind.

Since my last letter the preliminary trade price lists of several of the most important seed houses have been distributed, and as before intimated these price lists show seeds of many prominent varieties to be almost crop failures, while there are no really substantial surpluses of anything at all desirable. Sweet corn is characterized as "mostly a failure," and "we have so little sweet corn to offer that it is hardly worth offering." I know of no better way to show the real state of the sweet corn market than to compare this present week's prices with those obtained a year ago. At the present time a fair average of all the wholesale dealer's rates so far received gives twenty-five leading varieties of sweet corn as being worth \$1.50 per bushel more than last season; in other words, these same twenty-five sorts last year sold in a large wholesale way at \$3 per bushel—the equivalent price now is \$4.50 per bushel. Taking a few special varieties to show exact advances in rates: last season Stowell's Evergreen was held at \$2.50 a bushel—I think (I am not sure) that a little can be obtained if purchased at once at \$5 to \$6 a bushel.

A year ago Early Crosby sweet corn was worth \$2.50 per bushel; to-day \$3.50 to \$6, according to the strain. Allow me to diverge a little here and say that there is no seed sold in this country that has taken so many types and forms as growers and dealers have allowed their seed stocks of Crosby sweet corn to assume. The true Josiah Crosby sweet corn is a twelve-to-sixteen-rowed variety, of good size, but not over long, and with very white kernels when cooked. In growth it is very dwarf, so much so that if a man walking through a field of genuine Crosby sweet corn holds his arm out straight, the stalks when fully matured will pass under his arm. The ears themselves are set very low, the first ear only a few inches from the ground. Genuine Crosby is a medium early sweet corn, and of the finest possible table quality. It is the standard early, and in fact main crop sweet corn of the Boston market (Josiah Crosby, the originator of this most famous of all sweet corn sorts, was a Boston market gardener). This splendid variety has yet another distinction: it is the sort used practically to the exclusion of all others by the sweet corn canners of Maine; in fact, the Early Crosby has made the State of Maine famous in this respect.

In looking through the various preliminary trade price lists that have so far come to hand, I could not but admire the satisfactory and most conservative way in which Messrs. J. M. Thorburn & Company, New York, handled the sweet corn question. This firm simply says in its advance list "sweet corn is mostly a failure"; then, gives the market prices for each variety. There is no asking customers to send in a list of their needs for rates. Messrs. Thorburn make prices at which they stand ready to fill all reasonable and proper orders while their stocks last.

The recent fire at Washington, D. C., which to a greater or less degree has destroyed many of the seeds which were destined to fill the little envelopes that are given to those worthy planters who vote the right ticket has caused the Department of Agriculture much trouble and bids fair to cause it a great deal more before they obtain what seeds they evidently must have to replace their losses. Another condition that makes it bad is the fact that the Department has no money on hand for purchasing another quota of seeds, and is therefore obliged to place all seed orders with the proviso, that if the Congress that is this week organizing does not authorize a deficiency appropriation to cover the seed lost through the fire on the sixth of November last, "all seeds ordered or otherwise contracted for shall be subject to the order and remain the property of the seller," and the Government be relieved of all responsibility in the matter. Of course this is but reasonable and right, as no officials can count on any appropriation until they know ab-

olutely that they have got it; but the eagerness of many seedsmen to fill orders for the Government seeds, regardless of these conditions, is a pretty sure sign that Congress will vote the needed relief and thereby continue the free seed distribution.

Holiday greens are beginning to be a daily increasing factor in the horticultural market. In one large item there is taking place this year a very radical change. Christmas trees are coming in very largely from New Brunswick and not so much from Maine as in former years. The American buyers are finding that it is much cheaper to get fine trees from Canada than from Maine. The Canadian stumpage price, and wages for labor being very materially less than in Maine, and with no duty on Christmas trees into the United States, every condition favors Canada. It is estimated that some 200,000 trees will no doubt come to us this year from Canada, much to the injury of the trade that Maine has for so many years almost absolutely controlled.

California Plant Notes

THE GUAVAS.—Of the many fruits that flourish in Southern California the guava, *Psidium Cattleianum*, is one of the most valuable for home consumption. So far as the writer has observed, it is absolutely free from insect pests of any kind, and immune from fungous diseases that attack many other fruit trees. There is a great variety of the plants, differing in size of fruit, the time of ripening and quality. No nurseryman in this State has made any attempt to perpetuate any one of these types, all stock put upon the market being seedlings. The early sorts have been on the market since October, while late varieties are only now—the latter part of November—coming into bloom. Some bear fruit of an inch diameter, while others are no larger than the service berry, *Amelanchier canadensis* of the Atlantic coast, which they greatly resemble in appearance. For jellies and marmalades they are unsurpassed; the product being several shades darker than that of the currant. Since currants and gooseberries do not bear fruit, indeed the bushes are but short-lived in this part of the State, and our native gooseberry being an ornamental shrub only, the guava fills the bill to perfection in the domestic economy of California homes. The season for this fruit continues until March, at which time the loquat, *Eriobotrya japonica*, begins to ripen, which will be referred to in these notes at a later date.

There is but one difficulty to be met with in the cultivation of the guava; namely, the destructive work of birds, and the greatest offender of the tribe is an active one known as the red-headed linnet. About the size of the English sparrow of the East, though not so pugnacious, this gourmand is the terror of the fig, apricot, Japan persimmon and guava grower. In this favorable climate the birds seem to have broods of young every day of the year, and during the Winter months feed on the buds, both leaf and blossom, of the deciduous fruits. California fruit growers, like their brothers of the craft in other parts of the world, have their difficulties to overcome.

Deutzia Lemonei for Pot Culture.

For forcing for sale as a pot plant *Deutzia Lemonei* is finding favor with florists who have a trade of this kind, and among those who grow such plants for selling to city stores. The *Lemonei* in its appearance is a stronger grower than the well-known *D. gracilis*, and it flowers at the same season as the latter, which is before the tall growers, represented by *D. crenata*, are in bloom. It was expected it would take the place of *D. gracilis* when first introduced, but florists say it has not done this; for cut flower work the old kind, *gracilis*, is much the better. For forcing as a pot plant for Easter and other occasions, and for plantings, *D. Lemonei* is a very useful kind. As an outdoor shrub it makes more display than *D. gracilis*, being of taller growth, while still but half the height of the taller growing sorts. In many States its flowers would be in good form for use on Memorial Day, unless the season should be a very early one, and its white blooms would be much sought for at that date—the close of May.

Forcing *Viburnum Rotundifolium*.

Because the common Japanese snowball, *Viburnum plicatum*, appears to fill all requirements as a forcing snowball, but few persons know of the variety *V. rotundifolium*. It is of more compact growth than the other, has rounded leaves and red-tinted leaf stalks, bears larger heads of flowers, and is in full bloom a week before *V. plicatum*.

Perhaps another reason why it is not so well known is that it is not quite as hardy as the other. In hard Winters its shoots will be injured on the extreme ends, so that its branches of flowers do not appear to so great an advantage when cut as those of *V. plicatum*. But when dug in Autumn and brought inside for forcing, this loss of the ends would not occur, so this objection would not exist with such plants. When in protected places outdoors so that no injury occurs to it at all, its beauty when in flower attracts every one because of its very large balls of blossoms and their pure white color.

Evergreen Privet.

In a recent issue of The Florists' Exchange Professor Massey inquired if the evergreen privet, *Ligustrum lucidum*, cuttings of which he sent me a year or more ago, had proved hardy. The cuttings rooted well, and being but small plants were wintered in pots in a greenhouse. This Spring they were planted outdoors, and they have made nice, stocky plants of over a foot high. One has been planted in a sheltered position near a dwelling; the others are in an open lot. I am hoping the one near the dwelling will survive, as it is sheltered very much, and a board will be placed over it in a slanting position leaning on the wall, which will keep the sun from it, to give the foliage a chance to live.

The only evergreen privet we have now is *L. japonicum*, a true evergreen, and just hardy enough to endure our Winters here. *L. lucidum*, the one now about to be tested, has larger and less pointed leaves than *L. japonicum*, and being a beautiful evergreen it is greatly hoped it will survive the Winter.

Both of these evergreen privets deserve to be better known, for where hardy they would be valuable additions to collections of broad-leaved evergreens.

About Washington, D. C., whence the Philadelphia stock of *L. japonicum* came, this species is often seen. It is hardy in any situation there, and if the writer is not mistaken he has seen *L. lucidum* thriving there as well.

A good word needs saying for the common California privet, *L. ovalifolium*. Many persons here set it out as a single bush on their lawns and near their dwellings, and there it flourishes, keeping its evergreen character until very severe weather comes. It does not mind freezings of a few degrees; it is only after the glass records that 10 to 15 degrees of cold is prevailing, that its foliage suffers, so that it is now as fresh to-day as it has been at any time, and we have reached December 2 already. In angles of dwellings, where it is often planted, it is evergreen the whole Winter through, and so it is where hedges of it are thick, one plant protecting the other. It does best when so sheltered and when given good food, so that it makes a vigorous growth.

Flowering Spray of *Deutzia Lemonei*

Photo by J. F. Johnston, taken June, 1907.

Euonymus for Shady Places.

Every planter knows the difficulty of getting a variety of shrubs to grow well under trees or in shady places, so those who look for such shrubs are recommended to try the burning bush, *Euonymus atropurpureus*. All the euonymuses, in fact, are found in partly shaded places in a wild state, suggesting the position they prefer. There is something in the coolness of the ground in such situations that is to the liking of these shrubs, for they flourish well there, much better than they do when in open positions on a lawn.

Euonymuses are of no attraction when in bloom, the color of the flowers being greenish white, but when late Autumn comes the seed pods and seeds are highly ornamental. The pods change from green to a pink color—red in some sorts—and when quite mature they burst apart and display seeds within, light orange in some, bright red in others, and then it is that their ornamental character is at its best.

A good assortment to plant would be our two native species—*E. atropurpureus* and *E. americanus*, and *E. europaeus*.

It is a great treat to see the bushes in their wild state displaying their beautiful seeds the very last

thing in Autumn, persisting in good condition until freezing weather sets in.

Trees for Forestry Purposes.

Nurserymen who have the facilities for raising seedlings of forest trees would find the subject of forestry one well worth looking into at this time. The Government officials, State officials, colleges, as well as numerous individuals have all become alive to the importance of setting out seedlings for a future forest supply, and are preparing to get land in condition for the purpose. Already those concerned are looking forward to the procuring of seedlings, and there is no doubt whatever that the future will see an ever increasing demand for the young trees.

It is very likely that the demand will find a short supply, as so many fail to anticipate a boom in trade, but wait until it comes.

At the present time calls for seeds show what is coming. Many of those asking for them know nothing of the raising of trees from seeds, and a disappointment is in store for many of these people. The raising of the seedlings will have to be done largely by nurserymen or those qualified to undertake it on contracts, for it needs more experience than amateurs possess.

Just now white pine leads all other kinds in the demand for seedlings. But oaks, hickories, catalpa, ash, tulip tree, chestnut, and every other kind of useful tree are being called for, while inquiries concerning seeds and seedlings are numerous. It will be for those who think they can undertake to raise such seedlings to interest themselves in forestry matters and get in touch with State officials and others who may be expecting to plant the seedlings, and in this way a contract could be made, probably to grow in advance some of the thousands that will be required.

If the raising of seedling trees is anticipated the coming season the seeds of many kinds should be secured now. Of the few sorts named catalpa would need no preparation, but could be kept as it is until Spring and then sown. All the others require to be kept damp through the Winter, or they would not grow sown in Spring. They need to take up a little moisture all Winter to make safe their sprouting when sown in Spring.

JOSEPH MEEHAN.

TREE PLANTERS DISCOVER GOOD QUALITIES IN NORWAY POPLAR.—Tree planters throughout the northern portion of the Middle West have had brought to their attention lately the extraordinary value of the Norway poplar, a near relative of the common cottonwood, which possesses fine qualities that bid fair to raise the prestige of the whole cottonwood family.

This cottonwood is shrouded in mystery, so far as its origin is concerned. It bears no cotton and is reproduced entirely from cuttings. The tree grows straight and lean and it is said that the bark never scalds or cracks. The wood is straight-grained and suitable for lumber. It splits easily, seasons quickly, and makes excellent fuel.

The Norway poplar grows very rapidly. In Minnesota it has been known to grow 50 feet high with a diameter of 17 inches in 14 years. It makes a good shade tree, retaining its leaves until late in the Autumn, and on account of its rapid growth should prove very desirable for windbreaks and shelterbelts. So far as is known at present, this tree is perfectly hardy and will grow under a variety of soil and moisture conditions. It seems, however, to respond quickly by increased growth to cultivation and care.

The advantage which the Norway holds over the Carolina poplar, one of the most popular of cottonwoods, is chiefly in its greater hardness, better form, and the seemingly superior quality of its wood is shown in preliminary studies made by the United States Forest Service. It will be some time before the Norway poplar will be available for widespread planting, since cuttings of the true variety are at present very scarce and hard to obtain.

Nut Notes.

California nut growers are giving increased attention to the pecan.

Drouth in Texas has seriously hurt the promising pecan crop, the lack of moisture causing the immature nuts to drop.

Reports from California indicate that the walnut crop will not be much larger than that of last year. This should insure good prices.

The United States, or the Gulf Coast, rather, has a natural monopoly of the pecan. This is the only country where it is indigenous. The nuts, however, are marketable all over the world.

The Year Book of the Department of Agriculture, for 1906, under the head of New Fruits, adds to the previous list of promising varieties of pecans: Alley, Teche, Curtis, Georgia and Delmas.

Professor F. H. Burnette of Baton Rouge, La., president of the National Nut Growers' Association, and Dr. J. F. Wilson of Poulan, Ga., secretary of the organization, were both re-elected at the recent convention held at the Jamestown exposition.

(86) **Analyses of Water.**—Is either or both of the subjoined waters injurious to plants growing under glass? If both are safe, which one is the better for roses, carnations, etc.? The one marked "Mine" comes from a soft coal shaft; the one marked "Pump" from a drilled well below the coal vein.

	J. W.	Mine	Pump
	Grains per U. S. gal.		
Silica and Silt	1.2	0.7	
Alumina and Iron	8	5	
Lime as Sulphate	32.0	2.0	
Lime as Carbonate	none	14.0	
Sodium Sulphate	3.5	none	
Magnesium Carbonate	9.2	2.2	
Sodium Chloride (Common Salt)	1.2		.6
Total Solids	47.9	20.0	

Remarks: Both waters are faintly alkaline. There is no free acid present. All sulphuric acid having been neutralized with lime and soda.

—Your letter of November 22, addressed to Professor Milton Whitney, referring to the use of two waters marked "Mine" and "Pump" respectively, for which analyses are given, has been referred to this office.

In reply we would say that the analyses of these waters so far as given would lead us to expect that they would be very suitable for the irrigation of all of our common field crops. Under greenhouse conditions, especially with roses, however, experience has shown that much more care is necessary in the use of waters carrying as much mineral matter as do these. For ordinary conditions where the drainage is good and accumulation of the soluble material in the soil or on the benches is thus prevented, we should not anticipate any serious trouble from the use of either of these waters, but unless care is taken to keep the soil washed out by thorough drainage or by occasional floodings, we should anticipate the possibility of trouble. In other words, our experience would suggest that neither water is in itself a bad one, but that in the case of the water designated "Mine" especially great care must be exercised in its use.

There is, of course, another possibility, that either or both of these waters may contain constituents objectionable to plants, which do not appear in the analyses, and it would obviously be desirable to try the water for a short while on some potted plants before employing it on a large scale on the bench.

FRANK L. CAMERON,

Physical and Chemical Investigations,
Bureau of Soils,
U. S. Department of Agriculture.

(87) **Snails Eating Carnation Buds.**—I send you two carnation buds which have been eaten by some pests I am unable to find. Will you kindly tell me the cause of the trouble and what I can do to prevent it?

New York.

SUBSCRIBER.

—The carnation buds appear to have been eaten by snails, and we would advise a sprinkling of fresh lime over the surface of the beds, or going carefully over the plants at night and catching the snails while at work; this latter can easily be done with the aid of a lantern.

(88) **Trouble with Violet Princess of Wales.**—I have a house 24x80 feet, of Princess of Wales violets, holding 2500 plants, planted in the house last Spring before I put on the sash. Before planting I put about two inches of manure on the ground, and dug it in thoroughly. The plants made good growth, and in September I put the sash on. Since then I have been keeping the house at a temperature of 40 to 45 degrees at night, syringing on bright days and giving plenty of ventilation. I have fed with manure water during October and November, about once in two weeks. During November I picked only about 400 first-class flowers a week, with stems eight or nine inches in length. There are lots of buds showing, and the plants seem in a healthy condition, with the exception

that the leaves turn yellow around the roots. Would you advise raising the temperature and making the flowers come out faster? Also should the plants be fed during December and January?

New Jersey.

E. S. E.

—The feeding with liquid manure while the plants were neither growing fast nor producing many buds, was a mistake, and perhaps, to some extent, is responsible for the foliage turning yellow. We would advise discontinuing the liquid feeding and the raising of the temperature to 48 or 50 degrees. The watering should be watched very closely, allowing the plants to be rather on the dry side than too wet at any time. Whenever it is seen that the plants are showing a general new growth, feeding may be commenced again, but it should be done sparingly.

(87) **Yellowing of Gardenia Foliage.**—I send you foliage of gardenias. Will you kindly advise me as to what is the matter with it, also the cause and cure, if possible. The roots seem to be in a healthy condition. The night temperature is kept at 65 to 68 degrees. I have some gardenias planted in benches and some in pots. One whole bench is affected as per sample sent as are some that are in pots. One bench is quite green, with plenty of buds, but they will not swell.

New York.

G. T.

—The leaves sent for examination show the same trouble that nearly every grower who has attempted to raise gardenias has to contend with—the yellowing of the foliage. This condition can be brought about by so many causes that one can never tell just how to remedy the trouble. Plants that are over-watered, that are badly drained, or that have been subjected to a sudden change of temperature will soon show a yellowing of the foliage.

In regard to the bench of plants that are well budded but do not mature, do not be uneasy about them, as the buds will finally develop; sometimes, though, they will hang six or eight weeks seemingly in a dormant condition, and then all at once start to swell. They will do this even if the foliage is yellow, provided the root action is all right; and, while the flowers do not appear so nice when the foliage is yellow, still they are better than no flowers at all.

(90) **Lilium longiflorum Multiflorum for Easter.**—Will Lilium longiflorum multiflorum, 7-9 inch bulbs, which were potted up December 1, be in time for Easter? The bulbs are thoroughly ripe; in fact some of them had made a start in the cases, both the roots and the tops. We can command heat of 70 degrees in cold weather and, of course, much higher toward Spring. We intend to plunge them out in the ground, covering them with about two inches of soil, and when the weather gets a little colder put over this a heavy mulching of manure until they are rooted and bring them in about January 15.

Do you think it advisable to shade houses where lilies are grown in order to make the stems long until the buds appear?

Penna.

—The lilies will be all right for Easter. Though potted up rather late, lost time may easily be made up in the forcing—not now or in the first half of the course to be pursued. Full time should be allowed for the formation of roots before subjecting them to a high temperature. Any premature pushing is to be avoided. On the other hand, it must be borne in mind that a certain degree of warmth is necessary for the formation of roots and that, should extremely cold weather set in before the bulbs have fairly begun to supply themselves with a sufficiency of working fibers, much time will be lost right at the start. I advise timely removal from outdoors to a cool greenhouse—cool but not cold. Then as the plants show progress in perfect root formation and correspondingly thrifty top growth, a slow and gradual rise in temperature is in order, the first move toward the maximum point required in forcing, which, to be effective in bringing these lilies out in good time for Easter, need not be reached before the end of February or the beginning of March. It can then more easily be determined how best to proceed in bringing about a timely finish. There will be no difficulty with the heat at your command.

No! Shading is good, should the lilies

To be disseminated Spring 1908. Ask for illustrated pamphlet and prices.

JULIUS ROEHRS CO., Rutherford, N. J.

NEW BABY DOROTHY ROSE

The greatest pot rose for florists extant. A superb forcing variety. We have proved it. Color a deep pink. Price, \$3.50 per 10; \$30.00 per 100. WHITE BABY RAMBLER (Catherine Zeimet), with double white perfect flowers; fragrant; a good forcer, \$3.50 per 10; \$30.00 per 100. PINK BABY RAMBLER (Anny Muller), a perfect bedding rose; as such there is nothing to equal it. Its color is charming. \$3.00 per 10; \$25.00 per 100. Above all in field-grown plants.

JOHN CHARLTON & SONS, University Ave. Nurseries, Rochester, N. Y.

be ahead of time with flowers fully expanded and no other place available for them, a shed for example, until marketed.

F. W. TIMME.

(91) **Treatment of Spiraeas.**—In forcing Spiraea Gladstone and Golden Queen, how long should the plants be left under the benches after potting up before putting them in the full sunlight, and about when would you advise bringing these into heat?

N. Y.

Penna. —Place in light when growth starts, but not into heat—50 to 55 degrees—until the first week in February and guard against tobacco fumes.

F. W. TIMME.

(92) **Dwarf Vienna and Grenadin Carnations.**—In looking over some old copies of The Florists' Exchange I note where Mr. Timme states that the dwarf Vienna and Grenadin carnations bloom from early Spring until late in the Fall. Now, I had some plants of these varieties last Spring, or at least bought the seed to be such, but they only gave one set of flowers in May and did not bloom after that. I now have about one thousand nice plants from the same seed, but would like your opinion as to whether they are the true Vienna and Grenadin sorts before I pot them up for Spring sales.

E. S.

Ohio.

—Both Grenadin and Vienna carnations flower all Summer, the first named less freely after its first crop of bloom in the early part of the season. They are fine stock as potted plants in early Spring, when in full bloom, and as such unexcelled by any other kind of carnation; but as bedding stock proper, or as a Summer crop for cutting, the newer and greatly improved strains of the large flowering Marguerite carnations are to be preferred. Of these the variety Glowing Coal, as a red, deserves commendation as being particularly fine for effective bedding. As producers of a splendid grade of flowers for cutting the Chabaud and Guillard strains may be relied upon as furnishing a lasting and abundant crop throughout the latter part of Summer. These, unlike the Vienna or Grenadin carnations, which do not flower until the second season, bloom the first year from seed sown in early March. Cuttings taken in Midsummer from the best of plants among carnations of any of these types root easily in outdoor frames, and in this manner a most desirable kind of stock in outdoor carnations may be obtained in the course of a year or two, a plan much more satisfactory than having recourse to seedlings or indoor forcing carnations for the purpose of securing an unfailing outdoor crop of marketable blooms.

FRED. W. TIMME.

TWO YEAR OLD

Everblooming Roses

Own Roots

THESE are strong, well-branched plants. They have been potted for some time and are well equipped with roots. Packing can be done very light and they will carry safely to any part of the country.

CHRISTMAS Invitation Cards

Every retailer in the land makes special effort at Christmastide to draw the attention of customers and others to the choice stock of plants, flowers, etc., which he has provided for that festive occasion.

To facilitate the efforts of the dealer, the A. T. De La Mare Ptg. & Pub. Co., proprietors of The Florists' Exchange, have prepared a set of four invitation cards, each one printed in four colors, as follows:

Sample of No. 1 (Holly Wreath)

The cards are on the finest stock (size 4x5 ins.) and the printing is most excellent. Baronial envelopes of fine quality, unprinted, are furnished with each order. In addition, to make the work complete, we furnish any wording you wish on the Invitation, which latter will be printed in black ink, unless otherwise ordered.

On orders of 100, 250 or 500 we furnish your selection of any one design out of the four; additional designs, however, can be selected at an extra charge of One Dollar each. On orders for 1000 or over we furnish your choice of any two designs.

If interested, send at once for a set of sample Invitation Cards. They are the finest designs and the best money-makers that have ever been provided for the trade and, at the prices quoted, are very cheap.

We expect to be deluged with orders for these cards; therefore, would advise you to act promptly. Address

KALAMAZOO, MICH.—The amount of business handled during Thanksgiving festivities proved quite satisfactory to the local craftsmen. It was at no time expected to be equal to that of last year as the financial stringency cuts something of a figure in local circles as elsewhere. The shipping trade also feels the effect and this in addition to a shortage in the cut of carnations helped to reduce the general average of sales below that of last year. Prices were lower than usual; roses at 50c. and carnations at 25c. to 40c. per dozen are rather unusual figures at this season here. Chrysanthemums were in plenty and of exceptional quality, bringing from \$3 to \$6 per dozen, while others were offered as low as 50c. per dozen. Violets are rather scarce and maintained better figures.

Pot plants of primroses, cyclamen, solanum and lilies, at prices ranging from 25c. to \$1.50, sold fairly well. The lower quotations were probably justified under the present conditions here and undoubtedly helped swell the total volume of business.

Funeral work became exceedingly brisk following Thanksgiving Day and fairly cleaned up the market. Chrysanthemums will be off the market entirely after next week, which should have a good effect on the rose and carnation price lists, as the latter are coming in very slowly, even though the month of November has been exceptionally bright and fine. S. B.

NEWPORT, R. I.—Thanksgiving business was on the whole satisfactory. Cut flowers were in good supply and of good quality; the demand was about equal to the supply. Plants moved slowly and it seems still to require an effort to make them go any way quickly. In the days elapsed since Thanksgiving, just as it was in the few days just preceding, roses have been somewhat scarce, locally occasioned by the unfavorable weather conditions. In all likelihood the great deal brisker; the supply will, as usual, come from the vicinity of such centers as New York, Boston and Philadelphia, because of the fact that few plants for the holiday trade are grown in this locality. D. M.

OPEN YOUR EYES

Prepare for CHRISTMAS
and the Holidays

Watch Prosperity Look

Money stringencies are of the past, the country settled and the outlook is good. The wise florist knows that a dollar invested in a good stock of plants is safe and brings more returns than one hundred dollars invested in banks, which are unsafe.

Great prosperity is in sight. Everybody wants to invest their money. Why not you? Don't consider long. A little fortune lies before your door. Grab it quick while the market is low and while there is a chance for you. Waiting means suicide.

LOOK!

We have Araucaria to beat the band. A houseful of the best selected specimens of **Robusta Compacta** and **Glaucia** in the country.

WHY?

Because we are specialists in importing, growing and shipping Araucaria excelsa, robusta, compacta and glauca for the last fifteen years from the Atlantic to the Pacific ocean, Cuba, Canada and Mexico. Our Araucarias go and are well known everywhere. Where do you think you will buy them for the holidays? From a man who imports a few hundred, or from a specialist who imports them yearly in numbers of 10,000? Surely from a man who can give you bargains.

FIFTY CASES of plants just arrived per steamer Manitau from Belgium, October 27. Amongst them are several thousand Araucaria excelsa in smaller sizes, fine bushy little plants, which we offer at a bargain. 3 tiers, 5 in. pots, only 40c.

Last Spring's Importation. ARAUCARIA EXCELSA, 3 year old, 5 1/2 to 5 1/2 in. pots, 10-12-14 in. high, 3 tiers, 50c.

ARAUCARIA EXCELSA, 3 year old, 5 1/2 in. pots, 15-16-17 in. high, 3-4 tiers, 60c.

ARAUCARIA EXCELSA, 4 year old, 6 in. pots, 20-22 in. high, 4-5 tiers, 75c.

ARAUCARIA EXCELSA, 6 year old, 6 in. pots, 22-25 in. high, 5 tiers, \$1.00.

ARAUCARIA EXCELSA, Specimen plants, 6-7 in. pots, \$1.25-\$1.50 each.

ARAUCARIA EXCELSA GLAUCA. This variety, on account of its beautiful bluish foliage, dwarf habit and fine compact shape gives it a striking appearance. Anybody seeing them must undoubtedly fall in love with them at sight. They are all in the finest shape you ever saw. 4 year old, 6 in. pots, 16 in. high, same in width, 3-4 tiers, \$1.25. 4 year old, 6 in. pots, 17 to 23 in. high, same in width, 4 tiers, \$1.50 to \$1.75. 5 year old, 7 in. pots, 15-20 in. high, same in width, 4 tiers, \$2.00. 5 year old, 7 in. pots, 20 to 26 in. high, same in width, 4 tiers, \$2.50. 5 year old, 7-8 in. specimen plants, \$3.00-\$4.00.

ARAUCARIA ROBUSTA COMPACTA. This is the King of the Araucaria Family. It is of a beautiful green, fine in shape (width), compact habit, and highly admired by everyone. I have a house full of them; can meet all wants. 4 year old, 6 in. pots, 22-25 in. high, same in width, 4 tiers, \$1.50-\$1.75. 4 year old, 6-7 in. pots, 25-30 in. high, same in width, 4 tiers, \$2.00-\$2.50. 5 year old, 7 in. pots, 30 in. and above, 4-5 tiers, specimen plants, \$3.00-\$3.50.

LATANIA Borbonica, 4 in., strong, 25c. each.

KENTIA Forsteriana and Belmoreana, 6 in. pots, 5 to 6 leaves, about 25 inches high \$1.00, 5 1/2 and 6 in. pots, 5 leaves, 20 to 25 inches high 75c. 5 to 6 1/2 in. pots, 5 to 6 leaves, strong bushy plants, 50c. to 60c. 4 in. 18 to 20 inches high 35c. each.

COCOS Weddelliana, 3 in. pots, 10-12-15 in. high, 15c.

ARECA Lutescens, 4 in. pots made up, three plants in a pot, 18-20-22 inch high 20c. each.

FICUS ELASTICA or RUBBER PLANTS, home grown and Belgium stock, 5-5 1/2 to 6 in. pots, 25c.-35c.-40c.-50c. and 60c. each; 7 in. pots, 75c.; 8 in. pots, \$1.25 to \$1.50.

FERNS Boston, 4 in. 20c., 5 in. 35c., 6 in. 50c. each, 7 in. 75c. to \$1.00 each; 8 in. pots as big as a washtub, \$1.00, \$1.25 to \$1.50 each.

Elegantissima, 6 in. 50c. each. Whitmanii, 6 in. single plants, strong, 50c., 75c., \$1.00 each; 7 in. as big as a bushel basket, made up 3 plants in a pot, larger than plants in 8 in. pots, \$1.25 to \$1.50 each.

Pieroni 4 in 20c. to 25c., 6 in. 50c. each. Scottii, 4 in. 20c. to 25c., 6 in. 50c., 5 and 5 1/2 in. 35c. and 40c., 7 in. very heavy 75c. to \$1.00 each.

Pieris Wilsoni, 5 1/2 in. pots, very attractive, 20c. each; 3 in. pots, 15c. to 18c. each.

Ferns for Dishes. A large assortment in 2 1/2 in. pots, \$5.00 per 100.

ADIANTUM Hybridum, the best adiantum for cut purposes, large plants in 6 in. pots, 30c., 35c. and 40c. each.

ASPARAGUS plumosus nanus, 3 in. pots, \$7.00 per 100; 4 in. \$10.00 per 100; all bushy plants.

PRIMULA OBCONICA, in bud and bloom, best strain, 4 in., 10c.; in bloom 15c.; 5 1/2 in. in bloom, \$2.50 per dozen; in bud, \$2.00 per dozen.

CHINESE PRIMROSES, Jno. F. Rupp strain, 5 1/2 in. pots in bloom and bud, very strong and fine, \$2.50 per dozen.

HYDRANGEA OTAKSA, pot grown, 6 in. to 7 in., 25c., 35c. to 50c. each.

BEGONIA, Gloire de Lorraine, were never so nice as this year, in bloom and bud now, just right for Christmas. 6 in. pots, 50c., 75c. and \$1.00 each; 4 in. pots, 35c.; 3 in. pots, 25c. each. Also new improved Erfordi, 4 in., strong, 20c.; 5 1/2 in., 25c. each; and B. Flambeau, sells at sight, 5 1/2 in., 25c. each.

SOLANUM (Jerusalem Cherries) full of berries 6 in. and 7 in. pots, 25c., 30c., 40c., and 50c. each.

DRACENA BRUNTAI, 6 in., full of leaves from bottom to top, 24 in. high, 40c. each.

AZALEA INDICA, 6000 just arrived from Belgium, grown under contract for us, and never in my life have I received them in such a good condition as this time—well budded and with all their foliage on them. Have only well-known leading varieties, such as Deutsche Perle, Simon Mardner, Vervaeana, Apollo, Mme. Van der Cruyssen, Empress of India.

AZALEAS in bloom for Christmas: Deutsche Perle, white; Simon Mardner, pink; Vervaeana, rose variegated; Apollo, red; and Mme. Petrich, new, (\$1.00 each), prices, 75c., \$1.00, \$1.25, \$1.50 and \$1.75 each.

Prof. Wolters, Bernard Andrew Allen, Niobe, John Llewellyn, Talisman, etc., price, 40c., 50c., 60c., 75c., \$1.00, \$1.25, \$1.50, \$1.75 to \$2.00 each.

CYCLAMEN in bud, 4 in. pots, 15c., 20c. and 25c. each.

FRINGED Double Petunias

I have had the greatest success this season with my double hybrid Petunia stock, so I have an immense stock of over 40 fine new varieties in solid colors and variegated in every style.

Timme's Timely Teachings

Outdoor Shrubs for Indoor Culture.

Nearly all species of hardy shrubs worthy of being planted for outdoor effects may also be grown under glass and forced into bloom months before their natural season of flowering. Especially are those kinds that brighten our gardens with a profusion of flowers in May and June good for indoor forcing. In estimating the value of hardy shrubs as commercially adaptable specialties for florists it will be found, though, that the number of species and their varieties deserving to be thus considered is limited to but a few. These, indeed, have been made use of by greenhouse men to a considerable extent, both as yielders of flowers for cutting and as market plants. Much more attention than here is given this feature of commercial floriculture in Europe, where large quantities of this stock are grown under glass annually and disposed of at the flower markets. When once the question of profit in this line of trade has been settled to the entire satisfaction of growers in this country, the value of hardy shrubs for indoor forcing will also here be accorded due recognition in time; signs of their coming more and more into favor with growers and their patrons are not wanting.

The Best Kinds.

Syringa persica and S. vulgaris furnish most of the varieties of lilacs now largely cultivated under glass as potted plants for the early Spring trade, some being forced quite extensively for their flowers as fine material for cutting. For the latter purpose a high degree of heat—from 70 to 75 degrees—may be safely employed should the crop need hurrying.

But in a temperature from 5 to 10 degrees lower a firmer article for the cut flower market will be produced, and the risk of having the flower trusses fully out before the foliage has hardly made a start in development is not so great. Potted lilacs, to be perfect as market plants, should be grown slowly and flowered in a rather cool, light and well-ventilated house. The best white-flowered varieties for cutting and early forcing are Persica alba, Marie Legraye and common single white. As short, bushy flowering specimens for the pot plant trade the double-flowering white, Mme. Cassimir Perier, the common varieties, white and purple and the beautiful Virginita are most tractable. The finest sorts of purple-flowering lilacs for forcing are Charles X and purple persica, both standing considerable heat well, but promptly resenting lack of moisture and sudden change in temperature. Frequent sprinkling must not be omitted in hard forcing. A slow pace in bringing those intended for the trade in well-done potted specimens into bloom is to be preferred, and plenty of air and light are necessary for perfect development of bloom and foliage. This also applies in the main to the treatment required in the forcing of the following hardy shrubs, all of which prove highly satisfactory for the purpose.

Several varieties of hard wooded spiraeas are easily managed subjects for indoor culture; of these the best two with double white flowers are Spiraea Reevesii fl. pl. and S. prunifolia fl. pl., the first named a trifle tender and almost evergreen in character. Two other good forcing sorts are Douglasii, rosy pink flowers, and Anthony Waterer, flowering red and, on account of its dwarf and compact growth, most highly valued. Many other fine varieties of shrubby spiraeas, though forcing easily, are of a too tall and loosely branched growth for florists' use.

Philadelphus roseaeflorus plenus and P. coronarius fl. pl. are two varieties of the well-known mock orange that admit of being grown into convenient shape for indoor pot culture, both having double flowers thickly set all along the branches and presenting a splendid appearance when in bloom. They will bear no hard forcing, but can be had in flower in early April, if grown in a cool and amply ventilated greenhouse and close up to the glass.

All weigelas force easily, but their sprawling habit of growth is against their ever being looked upon with favor by the grower of finely shaped potted plants. The best two are W. candida, white, and W. amabilis, pink, the last named, though a little late, flowering most freely.

Iowa State College, Dept. of Horticulture and Forestry.

Ames, Ia., October 24, 1907.

Mr. Godfrey Aschmann, 1012 West Ontario St., Philadelphia, Pa.

My dear Sir: The shipment of plants recently ordered from you came to hand in good condition. Kindly accept our thanks for your prompt attention.

Yours very truly,

A. T. ERVIN, Associate Professor.

Oakmond, Pa., October 22, 1907.

Mr. Godfrey Aschmann, 1012 Ontario Street, Philadelphia, Pa.

Dear Sir: I have not had time to write you since I received the plants on the 12th ult. I must state I am well pleased with them; they are fine and doing nicely. Thanking you very kindly for sending such nice plants. Very respectfully,

R. H. NIEL, florist.

GODFREY ASCHMANN

Importer, Wholesale Grower and Shipper of Pot Plants
1012 West Ontario Street, PHILADELPHIA, PA.

Prices Advertised in these Columns are for

Deutzia crenata, *D. Lemoinei* and *D. gracilis* are all good shrubs for Winter forcing, when grown in pots for a season previous to being flowered under glass and their wood has thus had a chance to ripen up early. Not so treated, they can still be grown under glass and slowly brought into bloom as most desirable stock for the better class of the plant trade in the Spring. *Deutzia scabra* is also a fine variety for that purpose, but apt to branch irregularly. It much resembles *philadelphus* when in bloom.

Prunus triloba and *P. japonica* fl. pl., the double-flowering plums and almonds, the first pink, the latter white as well as pink, are among the easiest and earliest of hardy forcing shrubs and very attractive when grown in pots and kept in shapely bounds; grand for early greenhouse display despite their tendency to flower before the leaves appear.

Roses, of course, have always been the most popular of hardy shrubs for indoor forcing, justly claiming a place of their own for exhaustive discussion of methods and varieties employed in the mass forcing for cut blooms. As to the best varieties for greenhouse pot culture, much has yet to be learned.

No also are growers still much at sea as regards the best—i. e., the least expensive—way of growing and preparing the available stock for this particular purpose, thereby sometimes placing least importance on pre-requisite points which roses of this character should possess in their make-up when declared to be fit subjects for pot culture and forcing. A potted rose is a fast seller even when not all in bloom, but it must display some color in one or two open or opening flowers, must give promise of more coming later on through buds in all stages of development, lending strength to this promise by their healthy plumpness rather than great number; and all this would stand for little in rendering the rose an attractive object unless it is of dwarf, compact growth and clothed in the vivid green of a luxuriant foliage. Many kinds of the hardy hybrids, remontant and tea, carefully grown for the purpose and slowly forced when firmly rooted in their pots, come nearest to being fine material for that class of trade. It is their inherent vigor, which, on the one hand, makes hybrid perpetual roses the best appearing pot specimens, when well grown, and, on the other, defeats all efforts of the grower to accomplish this end. The various types of Rambler roses give less trouble on this score and are always good stock for Easter, but should be tied into form before growth starts. These bear lively forcing if deemed needed. All roses do best in well-enriched sod compost made quite firm in potting.

Hydrangea paniculata, *Pyrus japonica*, *Viburnum plicatum*, *Chionanthus virginica* and some of the choicest varieties of hardy azaleas and rhododendrons may all be forced with ease under properly adjusted greenhouse conditions, none of them requiring a high temperature in the process. Rhododendrons and Azalea amena should be potted in sandy, porous soil intermixed with leaf mold, and should not be exposed to hard freezing previous to being forced.

Preparatory Culture.

Hardy flowering shrubs of the kinds most desirable for indoor forcing must first be grown into proper shape and condition for that particular purpose. Some of the varieties require years of attentive nursery treatment to work them into suitable material for pot culture, to convert naturally straggly habit into compact, shapely growth and the plants, thus dwarfed and shy in bloom, into freely flowering specimens. Aside from ordinary good field culture it is the knife, skillfully used in timely pruning, which is mainly instrumental in accomplishing this feat. A great part of the stock, thus carefully grown especially for indoor forcing, comes to us in yearly importations from abroad; some is supplied by nursery firms in this country and but little in the way of ready home supply is raised from start to finish by florists themselves, roses furnishing the only noteworthy exception.

No valid reason exists why most kinds of hardy shrubs of this class could not be grown into serviceable stock for forcing on nearby ground under the supervision of the florist who must do the forcing. All species propagate easily, or can be obtained in the form of thrifty young stock, be planted out on good ground, would occupy but little space and

rapidly grow into flowering size. With proper attention to root and top trimming, most of the plants will grow into excellent stock for forcing, and from a comparatively small piece of ground all that was needed in this line of supply could be obtained every Fall by selecting the most perfect and best promising of the plants. There is this prime advantage in following this plan, that the stock need not be dug up until the wood has attained proper maturity and that it can be potted up right after being lifted from the open ground. The florist who relies mainly on his own self-reared stock for forcing purposes need not pot up such as had to do its ripening of flowering wood after being dug from the field and under conditions during transit not greatly favoring the process.

Although, of course, all evergreens proper and shrubs of a semi-deciduous and somewhat tender nature should be potted up or boxed quite early, if intended for indoor culture—as should also all the imported stock of this kind of whatever nature—it is best to leave the truly hardy, deciduous flowering shrubs, home-grown for indoor forcing, as long in the open ground as this remains in condition for the spade to be easily driven through. The dropping of their leaves is not to be taken as a sure indication of thorough maturity of wood, which never comes to the point of entire finish until long after the foliage has fallen. To be correct here and timely is not to pot up early, but to do the lifting and potting as late in the Fall as ever possible. There will then be little to fear from shriveling of wood or drying back while the stock remains dormant and is stored away in its Winter quarters. Nor is there any great danger of doing wrong by pruning down those kinds that require it right now before being stored away, which means a great saving of time and room.

None of these shrubs can be considered good stock, or should be potted up as such, unless the well-ripened wood is studded with eyes that will develop either into flowers or flowering shoots when under forcing, according to character of variety or species. And none should be forced in a comparatively high temperature unless well supplied with active roots. Cool quarters, until started anew, suits all of them, and any of the plants thus carried through the Winter and again out of doors—also in pots—during the Summer will the following Winter prove the finest for early forcing. FRED. W. TIMME.

DECORATIVE AND FORCING STOCK

PANDANUS UTILIS. 2 1/2 in., \$5.00 per 100, 3 in. \$10.00 per 100.
FERNS FOR DISHES. Short, stocky 2 1/2 in. pot plants of durable Pteris varieties, \$2.50 per 100.

ASPARAGUS PLUMOSUS. 3 in. strong, \$6.00 per 100.

ASPARAGUS SPRENGERI. 2 1/2 in., \$2.50 per 100.

BOSTON FERNS. 2 1/2 in. strong, \$1.00 per 100, \$30.00 per 1,000; 5 in. pot, \$35.00 per 100; 6 in. pot, \$50.00 per 100.

NEPHROLEPIS ELEGANTISSIMA, WHITMANII, and SCOTTII. 5 in., \$35.00 per 100; 6 in. \$50.00 per 100.

LATANIA BORBONICA. Strong bushy plants, 6 in. \$75.00 per 100; 7 in. \$1.00 each.

KENTIA BELMOREANA. Good value at \$1.25 and \$1.50 each.

BOUGAINVILLEA GLABRA SANDERIANA. Compactly trained plants 4 in. pots, \$2.75 per dozen, 5 in. pots, \$3.50 per dozen.

CARNATIONS, ROOTED CUTTINGS. Cool grown, and guaranteed to arrive in good condition.

BEACON and VICTORY. \$5.00 per 100; \$40.00 per 1,000.

WHITE PERFECTION. \$1.00 per 100; \$30.00 per 1,000.

ROSE PINK ENCHANTRESS. \$3.00 per 100; \$25.00 per 1,000.

LADY BOUNTIFUL. \$3.00 per 100; \$25.00 per 1,000.

THE STORRS & HARRISON CO., Painesville, Ohio

ERICA FRAGRANS, exceptionally fine, better than ever, from \$1.50-\$2.00, \$3.00-\$4.00-\$5.00-\$6.00 and \$8.00 each.
POINSETTIAS, 3 in. a pan, 75c, 4 in. a pan \$1.00; larger plants, \$1.50 and \$2.00 each.

JERUSALEM CHERRIES, \$4.00-\$5.00-\$6.00 and \$9.00 per doz.

HOLLY pyramids, well berried, 5 to 7 ft. high in tubs at \$5.00 to \$10.00 each.

ARDISIA CRENULATA, ripe and well fruited, \$12.00-\$15.00 and \$18.00 a doz.

ORANGES, fine shapely bushes and standards, well ripened, from \$1.50, \$2.00 to \$10.00 each.

AZALEAS, novelty, Van der Cruyssen color, \$6.00 and \$9.00 a doz.; also Simon Mardner, small plants at \$6.00 a doz.

AZALEAS, pyramids, red, white and pink, \$5.00 and \$6.00 each.

CYCLAMEN persicum in all colors mostly red and pink, \$6.00-\$9.00-\$12.00-\$15.00 and \$18.00 a doz. A few plants, \$4.00 and \$5.00 a doz.

PRIMULA Obconica, fine new variety, lavender, \$2.50 and \$3.00 per doz.; 6 in. pans, \$3.00 a doz.

DIACAENA Terminalis, well colored, \$6.00-\$9.00-\$12.00 and \$15.00 a doz.

DIACAENA Amabilis, red, white and yellow, \$2.00 each.

DIACAENA Regina, green and white, \$1.00 each.

ANTON SCHULTHEIS, 316 19th STREET, COLLEGE POINT, L. I., N. Y.

DIACAENA Massangeana and Linden, green and yellow, \$18.00 a doz.

DIACAENA Fragrans, green, \$9.00 and \$18.00 a doz.

CATTLEYA Trianae, in 7-8 in. pans with hangers supplied, in full bloom, \$5.00 to \$10.00 each.

BEGONIA Lorraine, 7 in. pans, \$12.00 a doz.

ARAUCARIA Excelsa, \$6.00-\$9.00-\$12.00 and \$18.00 per doz.

ARAUCARIA Glauca, \$18.00 per doz.

ARAUCARIA Robusta compacta, \$18.00 per doz.

ARAUCARIA Plumosa, \$18.00 per doz.

ABIES Kosteri, blue spruce, 6 and 6 1/2 in. pots, \$9.00 per doz.; 7 in. pots, \$12.00 per doz., larger plants.

Write for price list on the following fine stock of plants.

Rubbers, Nephrolepis Whitmanii, Scottii, Pteris, Small ferns, Cyas, Boxwood bushes, standards and pyramids, Bay trees, Cyathium, Cycas, Ivy, Phoenix, Kentias, Aspidistras, Asparagus plumosus and deflexus, aucuba aurea, variegated, Euconymus, Livistonas, Croton, Pandanus nittis, Veitchii, Sanderne, Rhipis, etc.

Cash, postal money order, N. Y. Draft or certified check must accompany the orders.

Death of Secretary Hauswirth, S. A. F. O. H.

The blow which struck Chicago on Wednesday morning, December 4, 1907, on the announcement of the self-inflicted death of Philip J. Hauswirth, secretary of the S. A. F. O. H., was a most severe one, and as the news reaches further points the feeling and surprise will be quite as intense, as he was one of the most esteemed men in the trade in the country. While his health had not been of the best for some months, no evidence was seen or fear felt of his breaking down, and he had readily assumed and executed the large amount of work falling upon him, of which he was so well known to be capable. The strain in connection with the recent Chicago flower show, followed by the trip to the St. Louis exhibition where he was a judge, and the continued hard work since, gave little evidence to his friends that his constitution was giving way. He appeared to be in his usual health on Monday and Tuesday, but on Wednesday morning he went to his store at the Auditorium Annex, and proceeding to the basement, settled himself on a bench and placed a revolver so close to his heart that the sound of the report was not heard on the floor above. It was thought for a while that he was asleep, but finally when an endeavor was made to awaken him, it was discovered that he had committed suicide. The revolver was found under his coat.

The coroner's inquest was held at Rolston's undertaking rooms at 2 o'clock in the afternoon, the verdict being that death was due to the shock and hemorrhage caused by a wound inflicted in his left breast by himself while temporarily insane.

The obsequies were held in private at the family residence at one o'clock on Friday, followed by public services at the Rosehill Cemetery Chapel.

Mr. Hauswirth was born in Germany on December 18,

1861. He came to this country when a boy, in company with his aunt, who in 1871 married Charles Reisig, one of the pioneer florists of Chicago. He began work in the establishment of Mr. Reisig in 1873, and continued in his employ for almost 18 years, both in greenhouse and store. In 1892 Mr. Hauswirth succeeded his uncle, who was then well advanced in years, in the conduct of the store connected with the Auditorium Hotel, where he was located at the time of his death, and where he carried on a thriving and lucrative business, in which he was assisted by his amiable wife and son Edward J.

For many years Mr. Hauswirth was associated with the S. A. F., in the sporting branch of which he took great delight. He was a keen bowler, and acted as manager of the convention tournament on several occasions. He was elected secretary of the society at the Dayton (O.) convention in 1906, succeeding William J. Stewart of Boston, Mass., in that office. The position was one which he himself was reluctant to assume, and he only gave his consent to become a candidate for it on the earnest solicitation of his friends. His first year's service in that capacity gave entire satisfaction to the membership. Previous to his election as secretary he had been several times favorably spoken of as a man worthy of presidential honors in the organization.

Mr. Hauswirth creditably managed various flower shows, among them the World's Fair Exhibition at St. Louis in 1903, and the show of the American Carnation Society in Chicago, in 1905.

For years he had been an active member of the Red

The Late P. J. Hauswirth

Men, and was chairman of finance in the Great Council of the United States. As such, accompanied by Mrs. Hauswirth, he went to San Francisco to distribute relief to the brethren in the stricken city. He was also a prominent Elk.

As we have stated, no one in the business was more universally esteemed and respected than Phil. Hauswirth. He was everybody's friend, and his chief pleasure seemed to be in trying to make his fellow man happy. Visitors to Chicago were always sure of a hearty welcome from him, and could at all times count on the utmost courtesy and attention being shown them. He was an indefatigable worker in the promotion of everything that tended to the betterment of his chosen profession. He was president of the Chicago Florists' Club in 1906, an office which he filled most acceptably.

It may be remembered that several years ago Mr. Hauswirth suffered from a mental breakdown, which incapacitated him for some time; and no doubt the duties of his new office added to the already heavy work he had to perform in connection with his own business and otherwise brought on a recurrence of the previous malady, terminating in his unfortunate and sad demise.

He was a most generous, sociable, lovable man, and we feel sure the deepest sympathy of the entire trade will be extended to Mrs. Hauswirth, his son and daughter and his two grandchildren, who are left to mourn his untimely end and great loss.

President Stewart of the S. A. F. O. H. advises us that Willis N. Rudd, Chicago, has been appointed secretary of the society pro tem.

Obituary

George E. Davenport.

George Edward Davenport, one of the leading authorities on ferns in this country, died suddenly from an attack of heart disease while out for a walk with his three grandchildren on the afternoon of Friday, November 29, in the woods of the Fellsway west boulevard near his home in Medford, Mass.

Mr. Davenport, who was 74 years of age, had not been feeling well of late. The death of a close friend Lucien M. Underwood, professor of botany at Columbia University, recently, disturbed him greatly. The attack of heart disease which resulted in his death was brought on by the climb up the high hill leading from his home to the woods above Molasses rock.

Mr. Davenport was born in Boston, back of Boylston street, August 3, 1833. He was the son of William F. Davenport, a cabinet maker, and Deborah Skidmore, one of the old Boston families. He received his education in the Franklin school and was later graduate from the Boston high school.

Early in life he showed a great love for nature and a desire to roam about in the woods, collecting flowers and specimens of ferns. He spent his spare time out of his business hours in his art and picture framing store at 8 Hamilton place, studying and reading on the subject of the ferns of New England and America, becoming one of the leading authorities on their name and classification early in life. It was he who first named the now well-known *Nephrolepis bostoniensis*. His fame as a student of ferns spread all over America and reached even into Germany. He received specimens from Harvard college, Yale and the Smithsonian institute, sent to him for examination and classification by the professors of botany. He assisted Professor Daniel Cady Eaton of Yale to write his work on the ferns of North America. His scientific analysis of ferns won for him the greatest distinction, notably in his contributions to the National Herbarium, "The Fern Bulletin," and in a series of monographs on the principal species of ferns in North America. At the time of his death he was at work on what he regarded as the great task of his life, a manual of the ferns of North America, as well as a less technical work for use in the schools.

Mr. Davenport was a member of the school committee and although known chiefly as a botanist, he was also writer of historical, anti-slavery and labor articles. He wrote a number of poems on the woods of which he was a great lover since his boyhood.

He was a leading member of the New England Botanical Association, besides being honored with a mention for the chair of botany at Cornell. Mr. Davenport was chosen a fellow of the American Academy of Arts and Sciences, January 12, 1898, in recognition of his service on the subject of ferns. At the time of his death he was a member of many other botanical societies, the St. Botolph Club and the Medford Historical Society.

He was one of the founders of the Middlesex Field Club, which later developed into the Middlesex Institute, and was for a time one of its officers. In 1872 he joined the Massachusetts Horticultural Society and three years later presented it with his collection of ferns now known as the Davenport Herbarium. In acknowledgment of this gift he was voted the Appleton gold medal and a life membership in the society in April 1886. He was one of the principal advocates of the preservation of the beautiful Middlesex Fells, near Boston. A widow and eight children survive him.

Charles Cook.

Charles Cook, a well-known retired florist, died Monday night at the University of Maryland Hospital, Baltimore, as the result of being kicked in the stomach by a horse about five weeks ago at Maple Grove, his home near Catonsville.

He and his father, the late Anthony Cook, conducted a florist business at Mulberry street and Carrollton avenue. He was born in Baltimore and was a member of the Shield of Honor.

Two sons, Messrs. Charles Edward and Carroll D. Cook, and one sister, Miss Cornelia Cook, survive him.

The Revue de L'Horticulture Belge et Etrangere in its November 15 issue pictures a plant of *Hydrangea arborescens* var. *sterilis* in a pot, and in an accompanying note states the hydrangea in question forces easily and will be an excellent acquisition for pot culture.

OUR READERS' VIEWS

Registration of a Hydrangea.

Editor Florists' Exchange:

One reads with unabated interest your editorial in the Florists' Exchange of November 30, 1907, under the heading of "Registration of a Hydrangea." So durable a plant as this newly introduced hydrangea, one that is sure to become immensely popular and to give a great run, most certainly ought to have a good name with an attractive and appropriate name. The present controversy as to priority in regard to the name could lead to much good, as it is most necessary to get this matter so righted that uniformity can be followed in the forthcoming 1908 catalogues generally.

E. G. Hill Company's registered name "alba grandiflora" is in the writer's opinion a suggestive and attractive one and he sees no reason why such a name should suit in any confusion. On the other hand, the word "sterilis" is at best unattractive, giving no suggestion of luxuriance, freedom of bloom, or beauty, which are characteristics of this newly introduced plant. By the way, the writer sees nothing of the priority of the name "sterilis" even inferred in Bailey's *Cyclopedia of Horticulture*, 1901 edition, page 784, which reads "—*r. sterilis*, Torr. and Gr. Almost all fls. sterile. Known as Hills of Snow." The name "sterilis" is, of course, botanically correct to describe this variety, but certainly lacks all the attributes of a popular appellation; and, further, there is no physical reason why various sterile forms should not from time to time make their appearance, which would all be equally entitled to be known as "sterilis" botanically, whereas this particular form which is being sent out is entitled to a quite good name. And if priority only is to be considered in deciding this question "Hills of Snow" as mentioned by Bailey (if it is certain he referred to the particular variety now being sent out) has a just claim to the name. However, if as is stated this interesting form has been grown for a number of years in various localities, it probably has a great many popular local names, which, aside from the fact that Mr. Bailey happened to refer to the one mentioned above in describing its form, have an equal right with it for consideration.

Why not adopt the name registered by Mr. Hill—"alba grandiflora?" So far the largest part of the publicity given this new plant through catalogues, etc., is under this name. It certainly has the merit of being suggestive of luxuriance, freedom, beauty and rarity.

It is highly essential that this matter be settled with a little delay as possible, and whatever the name finally decided upon, let us all adopt it uniformly.

Conn. E. F. C.

Campbell's Sulphur Vaporizer.

Editor Florists' Exchange:

In reference to the trouble with Campbell's Sulphur Vaporizer (page 727), I would say that I have had a great deal of experience with this article. I find that it is dangerous to use it when it gets out of order. It takes the leaves drop and checks the growth to a considerable extent.

In the first place, care must be taken to have the receptacle thoroughly cleaned. It seems the only way to do this properly is to put it near the furnace, which will burn the sulphur scale completely off. It is quite important that the center wick be clean, using a new piece often. The small holes in the burner should also be clear, so as one can see through them. Trim the outside wick to the mark one inch below the burner.

I use methylated spirits over 60 proof, and find 8 ounces of sulphur sufficient to kill mildew in a rose house, 5,000 square feet, in one night.

If W. P. will follow these instructions he will soon get his burner as good as new.

ALEXANDER LOTHIAN.

Great Neck, L. I.

Editor Florists' Exchange:

I have used Campbell's Sulphur Vaporizer with marked success and have found the same difficulty at first, as V. P. states, which was caused by putting too much sulphur in the receptacle, thereby not leaving room for it to vaporize. I have tried kerosene oil, wood alcohol and pure alcohol. The kerosene would not heat at all; wood alcohol did so fairly well, while pure alcohol did first class, and though more expensive is cheaper in the end.

I would also advise W. P. to be very careful when vaporizing always to lift off the receptacle holding the boiling sulphur before removing his alcohol lamp, as the fumes of sulphur have a tendency to draw the flame into the receptacle causing a bad blaze not easily extinguished, as I learned from painful experi-

ence. W. P. will have no trouble with his vaporizer if he fills his receptacle three parts full with fresh sulphur and uses pure alcohol for heating.

EXPERIENCED.

In One Issue.

The sub-joined communications have been received from various correspondents dealing with the unreliable nature of the information distributed in one issue by one of our esteemed Western contemporaries. We submit the letters without comment; they speak for themselves.

Editor Florists' Exchange:

The humorous contributions of "Phil." in the Weekly Florists' Review never fail to add to the gaiety of nations, but unfortunately, they sometimes savor of the ridiculous. A case in point is his latest effusion on the new rose, Mrs. Jardine. In his narrative concerning a recent visit to the American home of this variety, where he and two other well-known gentlemen were in the party, he remarks that one of these "will grow" the rose; the other will "distribute" the rose; while "Phil." arrogated to himself the task of "describing" the rose. The records show that there is nothing amiss regarding the information "Phil." imparts relative to the grower and distributor of the rose; but when it comes to the work of the "describer," we are presented with a huge joke. Either Phil. is color blind, or is woefully ignorant of his ability to pose as an authority on rose colors, otherwise we would not have been treated to the following tid-bit in color description. He says: "The color is a soft pink, on large, full flowers of an orange shade, beautiful under artificial light."

Intending buyers of Mrs. Jardine had better be guided by the color description of the introducers—"a bright rosy pink, shading in the outer petals to salmon pink"—which is much nearer the mark than the abortive attempt of the self-constituted color authority—Phil., who should receive as a Christmas present a box of paints and a palette, along with some good book on the subject of colors.

HUES.

Editor Florists' Exchange:

You will doubtless have noticed in the Weekly Florists' Review of Chicago an extract from the Horticultural Advertiser of England headed "Ampelopsis Japonica Poisoning" in which the Japanese ivy, *Ampelopsis Veitchii* (called also japonica and tricuspidata) is made synonymous with the poison vine, *Rhus radicans* or toxicodendron. There is no relationship whatever between these two vines; and the insertion of the extract, without comment, shows how little the Review folks know.

Another thing: What is said in the "Nursery News" of the same paper regarding the *Crataegus crus-galli* berries being of a "bright red color" is far from the fact; at least, I think the hawthorn named the least worthy of all in that respect, the color of the berries being a very dull red.

It seems to me that lots of what is correct in your contemporary's "Nursery News" column is to be credited to what the paragrapher picks up in *The Florists' Exchange*; e. g., "Protecting Evergreens," appearing in the Review of November 28.

COMMON SENSE.

"Water Lilies and How to Grow Them."

Editor Florists' Exchange:

I have just read your criticism on the new book "Water Lilies and How to Grow Them," and I can substantiate all you say. I recently obtained a copy of the work in question, and have not gone through it all, but I did notice plate II and thought what a blunder. You might have gone farther and called particular attention to a still greater error. I would refer you to plate XX, purporting to show a flower bud of *Victoria Cruziana* (V. Trickeri). On page 143 it says, "Older plants of the two species may be most readily distinguished by the sepals, which in the regia are spiny almost or quite to the tip, while the sepals of *Cruziana* are smooth, except at the base." This description is correct, and I will leave you to judge which of the two *Victorias* the illustration represents. (The flower bud pictured is that of *Victoria regia*.) There are other dissimilarities between the two species that might be given when a distinctive line is drawn, but they are omitted here.

VICTORIA.

We beg to acknowledge receipt of a copy of "The Orient Magazine." It is profusely illustrated and deals with subjects not usually found in our present day periodicals, namely those referring to the peoples and customs of the East, as well as several of the occult sciences. The magazine is published by the Orient Magazine Publishing Company at 1923 Broadway, New York.

BOOKS RECEIVED.

INSECTS INJURIOUS TO VEGETABLES. By Professor F. H. Chittenden, Assistant Entomologist, United States Department of Agriculture, Washington, D. C. Publishers, Orange Judd Company, New York. Cloth. 300 pp. Profusely Illustrated. Price \$1.00.

The author of this book, Professor Chittenden, stands in the forefront of the world's best authorities on the subject of insects injurious to vegetable crops, and their remedies, and he has rendered an admirable service to all who make their living from the soil, as well as to those who cultivate garden crops for home consumption, by assembling in this very practical volume all the available information on the subject upon which he writes. The book contains the results of ten years' experience and study in economic entomology, and can be recommended for its thoroughly exhaustive and informative character. One of the fundamental requisites in dealing with the expensive insect problems confronting cultivators is an intimate knowledge of entomology; and as assisting toward the acquisition of this the author has furnished a very instructive chapter in which the various harmful insects are classified, described and illustrated, the different orders being fully explained. This is followed by some pertinent suggestions on the subject of preventing the spread of the pests by good farming methods; mechanical methods of destroying insects or preventing injury; insecticides and their uses, with apparatuses employed in their application. General crop pests are then dealt with, and separate chapters are devoted to specific insects injurious to certain crops, such as asparagus, beans and peas, beets and spinach, cabbage and other cruciferous crops, cucumber, melon and related plants, celery, parsnips, sweet corn, potatoes, sweet potatoes, etc., the whole forming an excellent and complete ready reference book.

Copies of the volume can be procured from this office at the price named above.

PAMPHLETS RECEIVED.

ROSELLE; ITS CULTURE AND USES.—By P. J. Wester, Special Agent, Bureau of Plant Industry, Department of Agriculture, Washington, D. C. Farmers' Bulletin 307.

The roselle (*Hibiscus sabdariffa* L.) or Jamaica sorrel, as it is sometimes called, is an annual from the tropics of the Old World, belonging to the large family Malvaceae. The plant is adapted for culture in the tropical and sub-tropical regions of the United States, and should, says the bulletin, be especially valuable in Southern California, Florida, the tropical islands of the United States, and in the Canal Zone. It is used in the South very much as the cranberry is used in the North, and is especially valuable for the making of jellies. It furnishes the roselle fiber of commerce and is closely related to several genera containing fiber-producing plants: sida, malva, althaea and lavatera. Its most important relative is cotton (*Gossypium* sp.). Of vegetables, okra (*Hibiscus esculentus* L.) is related to the roselle. Among related ornamental plants may be mentioned species of abutilon, hibiscus, althaea, and malva.

The habit of the roselle is similar to that of the cotton plant; the stem is reddish, branching profusely. As usually planted—that is, in February and March—the roselle attains a height of from 5 to 7 feet. The calyx is the part which is utilized for food.

Being a plant of recent cultivation and one that only to a slight extent has been exploited for commercial profit, except as a fiber plant, it having been grown mostly as a curiosity in gardens, it is only natural that no cultural varieties of the roselle have developed. The department has, however, secured a variety, which has been named Victor, and which is an improvement over the common kind. The plants of this new sort are inclined to be a trifle more dwarf than those of the type, but the foliage is similar.

Full cultural directions for the plant are given in the bulletin, which states that the roselle will thrive on any soil that is moderately rich, or that is supplied with the necessary plant food in the form of commercial fertilizers. The method of harvesting and marketing the calyxes is also explained.

The roselle is, as said, an annual, consequently seed must be saved every Autumn for planting the next Spring. It blooms late in October, regardless of the time when the seed is planted, which fact has restricted its cultivation to tropical and sub-tropical regions. It is, however, assumed that this feature could be overcome by persistent effort, and that the roselle, like so many other plants which have yielded to changed climatic conditions, would adapt itself to the shorter Summers of a higher latitude. With the object in mind of breeding an early-ripening variety of the roselle, the breeder might find it expedient to harvest some of the seed before it is fully mature, as it has been shown that plants from green seeds—tomatoes, for instance—have a tendency to mature fruit earlier than plants from ripe seeds.

New White Carnation Marchioness.

The accompanying illustration is made from a photograph supplied by L. E. Marquisee, Syracuse, N. Y., and shows his new white carnation Marchioness. The picture was taken November 10 by Harry Bellamy, the foreman, who has for some years been trying to produce a white seedling that would surpass Enchantress in productiveness and size of bloom, and he has succeeded beyond his most sanguine expectations. It should be stated that several hundred blooms were picked from the plants before the picture now shown was taken. The wealth of flowers and buds as seen in the illustration shows clearly the productiveness of the variety under the most adverse circumstances.

In the first place, Mr. Marquisee's greenhouse plant is situated in a residential part of the city, and is surrounded by tall dwellings on all sides, thus excluding a great deal of light; then again, the weather has been exceptionally dull during September, October and most of November. Owing to extensive repairs the house could not be planted till August 29, which clearly proves that Marchioness is very quick to take hold and is of most vigorous habit.

There is not a doubt in my mind but that Marchioness will prove the greatest money-maker for the trade of any white carnation ever disseminated. I saw the first plant flower and have watched it very closely ever since, and know whereof I speak; and my impression is confirmed by all the local florists who are constant visitors to its home. It will well repay any of the trade interested to come and see it for themselves. It requires cool treatment, 60 degrees day; 48 to 50 degrees night temperature, which means a great saving in the coal bill—a very important item to every florist.

H. Y.

Evelution of White-Blomed Cannas.

There are many species of canna, natives of tropical and semi-tropical Asia and America, but no really white flowered ones are found, with the possible exception of *C. liliiflora*, from Peru, a plant of difficult culture producing a few blooms of muddly white, quickly turning brown. It has proved useless as a breeder, the light color being overcome by the deeper tints of the other varieties with which it has been crossed. The other kinds are all strongly colored with red or yellow, generally in mixture, except *C. iridiflora*. The natural blooms are rosy crimson in color.

Hybridizations of *Iridiflora* made over 30 years ago by a Swiss florist resulted in several striking new varieties, among which was the large, drooping crimson-flowered *Canna Ehmanni*, so widely grown by the older generations of gardeners, and the *Alba rosea grandiflora* used in our early trial. The first distinct advance made by Mr. Wintzer (of West Grove, Pa.) in growing crosses of the latter was the vigorous and popular *Alsace*, with abundant creamy white flowers, much larger than those of its immediate parents. Myriads of seedlings of *Alsace*, both cross-bred and self-pollinated, were then raised, a superior one, since named *Mont Blanc*, finally appearing. It is without

Carnation Marchioness
Grown by L. E. Marquisee

the shadow of a doubt the best "white" canna that has appeared in commerce. The habit is dwarf and compact, and the growth is vigorous and healthy. The blooms are large and broad, well set in a fine truss or panicle and are produced with the utmost freedom. The color is not as pure as could be desired, but is a great improvement on *Alsace*, in which the young flowers open very pale yellow and whiten as they grow older. Four generations of seedlings of *Mont Blanc* have been raised with steady improvement. Those blooming the present season are great advances on any before seen.

Other Fine Cannas.

The best cannas were formerly produced by European breeders, but with the exception of *King Humbert*, which was raised in Italy and is a superb example of the giant-flowered race descending from *Canna flaccida* of our southern swamps the finest new varieties are of home production. Mr. Wintzer has bred a host of splendid kinds, many in absolutely new shades of rose and pink as well as brilliant reds and yellows. A collection of 18 varieties of his production, tested on the trial grounds of the Royal Horticultural Society of London, England, received more awards of merit than those of growers in any other country, a greater range of color being shown than in any other collection. Eight awards were made as follows: *Gladiator*, red and yellow; *William Saunders*, scarlet; *Uncle Sam*, vermilion; the *Duke of York*, crimson, and *Venus*, rosy pink, and for three unnamed seedlings—W. V. F., in Rural New Yorker.

Sweet Peas.

The National Sweet Pea Society of England, in connection with its work of testing the various varieties of this flower, has issued the following recommendations for the guidance of growers, which will, we feel sure, also be found of service to sweet pea enthusiasts in this country.

Too-Much-Alike Varieties.

The following varieties have been bracketed as too much alike. "Not more than one of the bracketed varieties shall be shown on the same stand at any exhibition of the National Sweet Pea Society." Priority is given the first name:—

{ Etta Dyke	{ John Ingman
{ White Spencer	{ George Herbert
{ Queen Alexander	{ E. J. Castle
{ Scarlet Gem	{ Rosy Morn
{ Her Majesty	{ Rosie Sydenham
{ Splendor	{ Mrs. W. King
{ Lord Rosebery	{ Phyllis Unwin
{ Cyril Breadmore	{ Flora Norton
{ Mrs. Collier	{ Miss Philbrick
{ Mrs. Felton	{ Modesty
{ Dora Cowper	{ Duchess of Sutherland
{ Ceres	{ Sensation
{ Yellow Dorothy Eckford	{ Countess of Aberdeen
{ Captain of the Blues	{ Princess Victoria
{ Bolton's Blue	{ Pink Gem
{ Lady Grisel Hamilton	{ Countess Spencer
{ Countess of Radnor	{ Paradise
{ New Countess	{ Enchantress
{ Princess May	{ Olive Bolton
{ Duke of Sutherland	{ Codsall Rose
{ Monarch	
{ Lottie Eckford	{ Gorgeous
{ Maid of Honor	{ Miss B. Whitley
{ Ivy Miller	{ Mildred Ward
{ Black Knight	
{ Stanley	{ Countess of Lathom
{ Boreatton	{ Coral Gem

Classification.

The committee recommends the following as the best in their colors:—

White	Dorothy Eckford and Nora Unwin
Crimson	and.....
Scarlet	King Edward and Queen Alexander
Rose and carmine	John Ingman
Yellow and buff	Mrs. Collier
Blue	Lord Nelson and Romolo Piazzani
Blush	Mrs. Hardcastle Sykes
Cerise	Cocinea
Pink	Countess Spencer
Orange shades	Helen Lewis and Henry Eckford
Lavender	Lady Grisel Hamilton and Frank Dolby
Violet and purple	Duke of Westminster
Magenta	George Gordon and Captivation
Picotee edged	Dainty
Fancy	Sybil Eckford
Mauve	Mrs. Walter Wright
Maroon and bronze	Black Knight
Striped and flaked	(red and rose), Jessie Cuthbertson
Striped and flaked	(purple and blue) Sutton's Marbled Blue
Bicolor	Jeannie Gordon
Marbled	Helen Pierce

Excluded Varieties.

With a view to establishing a basis for the elimination of old and inferior varieties, the General Committee has, on the recommendation of the Florist Committee, decided to exclude the following from the society's trials in future:—

Sensation	Lady Mary Currie
Duchess of Sutherland	Lottie Hutchins
Katherine Tracy	Venus
Lord Kenyon	Mrs. H. K. Barnes
Colonist	Blanche Ferry
Lady Skelmersdale	Grey Friar
Lovely	Princess of Wales
Mrs. Knights Smith	Sadie Burpee
Queen Victoria	Mrs. Sankey
Salopian	Primrose
Mars	Countess of Radnor
Lady Penzance	Duchess of York
Countess of Aberdeen	Emily Eckford
Her Majesty	Waverley
Mrs. Dugdale	Boreatton
Cyril Breadmore	Fashion
Prima Donna	Countess of Powis
Mrs. Gladstone	Oriental
Mrs. Eckford	Gorgeous
Lady M. Ormsby Gore	Gracie Greenwood
Firefly	Marchioness of
Dorothy Tennant	Cholmondeley
Lady Nina Balfour	Stella Morse
Golden Gate	Mrs. Joseph Chamberlain
Admiration	Pink Friar
Countess Cadogan	Blanche Burpee
Shahzada	Emily Henderson
Monarch	Queen of England
Calypso	The Invincible Varieties
Chancellor	

NURSERY EMPLOYEES' UNION.—We understand, says the *Journal of Horticulture*, London, Eng., that this union has been formed. The objects are: (1) the cessation of work at one o'clock on Saturday (with the exception of those who must stay to do the necessary work); (2), leveling up of wages; (3), increased efficiency of the workman by means of meetings arranged for the discussion of cultural details, etc.; (4) protection of the workman against unfair and harsh treatment, and the finding of employment, if possible for those members out of work. Entrance fee, 6d. contribution, 1d. per week; quarterage, 3d. per quarter.

House of Carnation Marchioness

Grower and Originator, L. E. Marquisee, Syracuse, N. Y.

FOR THE RETAILER

For reproduction on this page, we solicit from our readers engaged in the Retail Trade, good, clear photographs of subjects that are of general interest, such as store interiors, designs of different classes, new delivery wagons, etc.

Flowers for Debutantes.

December, besides being Christmas month, is now looked upon as the season of the debutante, and usually means good business. The daily increasing call for pink roses, lily of the valley and, in fact, all the choicer flowers spells "debutante."

Years ago, the opera season formed the banner days for the florist, when the "diamond horseshoe" would not be considered complete unless every lady carried her hand bouquet; but now all that is over, the bouquet de corsage being the only thing permissible, and even that is gradually being eliminated. But the debutante will receive as many flowers as ever, and may she go on receiving as long as there are flowers to sell and florists to dispose of them.

There is really nothing very new seen at the receptions. Pink roses are still the favorites for these occasions, but there are few flowers that do not find their way into bouquets, and many artistic combinations are the result. There is a general tendency to loose natural effects, and the mutilation of flowers in the matter of wiring and fixing is being almost entirely done away with, which is as it should be. All first-class flowers are grown with stems that will support them, and after the ribbons are removed the blossoms may be put in water and give pleasure for several days.

A bouquet of English wallflower, associated with large fronds of *Adiantum Farleyense*, was somewhat novel. This bouquet was tied with pale yellow ribbon, with a shower of narrow ribbon of the same color, throughout which were tied small bunches of violets without foliage. Another arrangement was formed of *Vanda cœrulea* and *Adiantum Farleyense* tied with pale blue ribbon.

Lily of the valley is being used largely this season. Bouquets loosely made, either round, half-round or empire style, are the vogue. They should, however, be relieved with clusters of orchids. Lily of the valley and cattleyas are very handsome together. *Cypripediums* are also popular flowers for this work, as they are always plentiful at this time of year; they are especially attractive with lily of the valley and also make a pretty cluster with Killarney, Mme. Abel Chateau or any other pink rose. The interesting formation of the flower and the unusual colorings are bound to attract. Richmond roses with lily of the valley, tied with a rich green ribbon, or Richmond with Bride roses, tied with a good rich red ribbon, also form a good combination.

A bouquet made with gardenias and *Cattleya Dowiana*, with a fringe of *Adiantum Farleyense*, was very rich. Violets are used largely for these occasions, and should be suggested where the amount to be spent is limited. Single violets are mostly in demand, and should be made up loosely. A large, loose bunch of Sunrise roses showered with narrow violet ribbon and single violets, with a large cluster on one side, was very striking. *Perle des Jardins* rose makes a beautiful presentation bouquet. *Adiantum Farleyense* will bring out the color of the rose. They should be tied with pale blue ribbon.

Carnations also play a prominent part on these occasions. *Enchantress* taking first place in popularity. *Adiantum Croweanum* goes well with them. Carna-

tions and mignonette also make a pleasing combination.

Pink *bouvardia* is very pretty in large bouquets. A large bouquet of *Adiantum Farleyense* with a cluster of white orchids, *Dendrobium formosum*, or any other choicer flower, is extremely rich and quickly put together. A bouquet of pink *camellias* was a little unusual. They were cut when about half open, on long stems, with several buds showing; the leaves were polished, making a rich contrast, no other embellishment being used. They were tied with broad apple-green ribbon.

D. RAYBUN.

Preventing Frost in Show Windows.

The ventilation system is advocated by the big dry goods stores as being a simple, clean, practical, and effective method of keeping glass in its usual condition in cold weather, and is based on certain inflexible physical properties of the atmosphere, which are well established in science and by some methods easily applied. The Dry Goods Reporter says: If the temperature inside a building is 70 degrees, and it is 32 degrees out-

Design Made for a Member of the Master House Painters and Decorators' Association by Gude Brothers & Co., Washington, D. C.

side, the temperature of the glass will be about 50 degrees. If the air inside was only 60 per cent. saturated, the glass would become fogged with moisture at this temperature. If the temperature was 6 degrees below zero outside, and 70 degrees above inside, the temperature of the glass would be about 32 degrees. This would cause the windows to frost, and any lower outside temperature would add to the accumulation of ice.

To prevent this, the glass must either be warmed to a degree which is above the saturation point of the surrounding air, or the surrounding air must be made so dry that it will not deposit moisture on the glass at the temperature of the latter. The particular ventilation system advocated provides for a heating apparatus and the show windows to be enclosed. This is now customarily done to keep dust and dirt off the goods on display, but is especially necessary for retaining the heat with this system. The temperature within the enclosure can be raised to any degree necessary according to the atmospheric conditions.

For example, the glass in an ordinary 20-foot front will take up about 13,500 heat units per hour in

DIRECTORY OF RELIABLE RETAIL HOUSES

The retail florist firms advertising under this heading will accept and fill orders for flowers and floral designs forwarded them by mail, telegraph or telephone, the usual commission of 25 per cent. being allowed.

\$25.00, payable quarterly in advance, will entitle the advertiser to a four-line card, under this heading, for one year, 52 insertions. For every line additional to four, \$5.00 will be charged. Four lines will average 32 words; each additional line, 9 words. Each advertiser receives one copy, free, of our Florists' Telegraph Code.

New York.

YOUNG & NUGENT, 42 West 28th St. We are in the theatre district and also have exceptional facilities for delivering flowers on outgoing steamers. Wire us your orders; they will receive prompt and careful attention.

MYER, 611 Madison Ave. My facilities for delivering flowers for any and all occasions are unexcelled. Can give prompt service to steamer and theatre trade. Telegraphic orders solicited. Telephone, 5297 Plaza.

Kansas City, Mo.

SAMUEL MURRAY, 1017 Broadway. I will deliver orders for flowers in Kansas City and vicinity promptly. A first-class stock of seasonable varieties of flowers always on hand. Wire me your orders.

Detroit, Mich.

JOHN BREITMEYER'S SONS, Broadway and Gratiot Avenue. We cover all Michigan points and large sections of Ohio, Indiana and Canada. Retail orders placed with us will receive careful attention.

Denver, Colo.

THE PARK FLORAL CO., 1706 Broadway, J. A. Valentine, Pres. Orders by wire or mail carefully filled; usual discounts allowed. Colorado, Utah, Western Nebraska and Wyoming points reached by express.

Cincinnati, O.

HARDESTY & CO., 150 East Fourth, sell the best grade of flowers grown. Retail orders from distant points for delivery in Cincinnati or surrounding territory will receive prompt attention. Telegraph us.

Dayton, O.

W. G. MATTHEWS, FLORIST, 16 West Third Street. Flowers in any arrangement for all occasions for Dayton and vicinity. Personal attention given to all orders. Long distance telephones.

Dallas, Texas.

LANG, THE FLOEIST, the largest flower store in the South. Floral designs and all flowers in season; personal supervision and prompt service in Oklahoma, Texas, Louisiana. Mail and telegraphic orders solicited.

Louisville, Ky.

JACOB SCHULZ, 644 4th Avenue. Personal attention given to out-of-town orders for Louisville and surrounding territory. Have a choice line of seasonable flowers always in stock; delivery facilities perfect.

Indianapolis, Ind.

BERTERMANN BROS. CO. Our facilities for executing orders in an efficient manner are unexcelled. Our shipping territory includes the surrounding states. High grade flowers; expert workmanship.

Albany, N. Y.

EYES, 11 North Pearl Street, cut flowers or floral designs delivered to any part of Albany and vicinity on telegraphic order. Personal attention given and satisfaction guaranteed.

Chicago, Ill.

HAUSWIRTH, The Auditorium Florist, 232 Michigan Avenue. The quality of our work is of National repute, and we are prepared to execute commissions in first-class style in Chicago and its environs.

Retailers desiring a share of out of town trade should be represented by a card in this column.

zero weather. If the enclosed window space is to be kept at 70 degrees, the air admitted from the heating apparatus must be about 90 degrees. The apparatus employed to do all of the above consists outwardly of a steel box about 4 feet square and 6 feet high, with a small blower and direct connected electric motor on one side at the bottom. It is a compact unit mounted on one base. Air enters the top through a pipe connected to some convenient source of fresh air supply. On its course downward, induced by the fan suction, it passes through an air filter which eliminates the dust and dirt from the air. It then comes in contact with the heating surface of a steam radiator. After passing over the radiating surface, it strikes a fan by which it is discharged through a bell-mouthed pipe directly on to the glass. In the floor of the window are long narrow registers as close to the sash as possible for the entrance of air, while in the back of the enclosure there are other registers to allow the air to escape.

In new windows or windows that are to be remodeled another style of ventilation may be installed, which permits the cold air from the outside to enter at the base of the window, and then escape through openings at the top. Then there is a newly patented window construction in which the plate glass rests in a patented molding at the bottom of the window. In this molding is a series of holes that permits not only the air to enter into the window, but any water in the window—from the cleaning of inside of glass, etc.—to escape outside. After this is installed there is no expense attached to keeping the windows ventilated.

There are several variations on the above patented device which almost anyone can put in without much expense and which will prove fairly satisfactory. In putting in the windows, whether the frames be of wood or iron, a row of ventilating holes should be provided below extending all across the window front. These holes should be broad and set low down with the idea of causing a wide current of air to enter the window so that the same may spread all over the whole front of the window. Above the level of the panes, but still within the casing of the window, should be provided hinged ventilators to allow the heated air in the window to escape out into the street. A row of holes similar to those underneath will be insufficient, owing to the increased volume of the heated air, and on this account the upper opening must be of larger area in order that the circulation of air within the window may be intensified. This ventilator must be mounted right at the top of the shop front, and open inward and upward, since otherwise it would oppose the outflow of air and thus lead to a mist on the upper part of the window. Furthermore, the inlet holes must not be surmounted by anything that can deflect the flow of air. The inflowing air must ascend close to the glass and escape without hindrance. This scheme is pretty near perfect for an enclosed window, but with any of these variations it is essential to keep heat from the window. Dry, cold air is necessary to prevent freezing under these schemes. Even lighted gas jets in the window will heat the air more rapidly than the ventilator can carry it away, the result being a deposit of moisture on the pane.—Metal Worker.

Conway's Aster.

F. A. Conway & Company, Indianapolis, Ind., have a fine white aster which has been tried by several local florists, including Bertermann Brothers Company, and found to be a first class commercial white of good form and stem. About 115 pounds of seed were obtained from the field (photograph of which is herewith shown) this season. Mr. Conway states that the demand for the seed has been most gratifying. I. B.

The Retailer's Position Toward the Wholesaler.

Read before the Florists' Club, Philadelphia, by Charles H. Grakeloir, on Tuesday evening, December 3, 1907.

The retailer of to-day is a much harassed man, as, with endeavoring to realize the constantly increasing opportunities of the business, trying to adjust the prospective customer to the ever-varying prices of grower and commission house, and a desire to hold and add to his most valuable asset, his customer, his is an unenviable lot. Wholesaler of cut flowers, temper your prices with the knowledge of past sales and the possibilities of the future, and at the first sign of scarcity do not make advances so rapidly that the retailer stands mutely by thinking it a Shakespearean drama and expecting to hear that world-famous quotation: "Lay on, Macduff, and damned be he who first cries hold, enough!" A slight knowledge of the conditions of the market and the orders entered on the book, which are paid for and waiting to be delivered, educate the retailer to the advance; a duplication of last week's effect for the same amount or a slight increase, if any, is all the prospective customer can see.

The Thursday before Easter Sunday last year a little girl asked your humble servant for 15c. worth of cut flowers. "Mamma did not wish too many of one kind." Another instance: Carnations are 35c. per dozen. "Give me three and put them in a box; add plenty of wax paper, so that they won't bruise, as I am taking them across the mountains."

Will some wholesaler kindly advise the best method of handling the retail trade? Gentlemen, I know this is the extreme and it is simply quoted to give you a slight idea of the troubles a retailer encounters without advancing prices. Help us to educate the customer to a more generous use of flowers; do not discourage us, as our business is in its infancy and abnormal profits today will not meet all the obligations of the future.

Agitation of car fare charges is something worthy of consideration. In the case of large purchases, some are gladly filled; car fare is ignored (?). Now then, when the occasional short notice, non-important order (except for the knowledge of the value of the customer in the past and the prospects of future business) comes along, should not the wholesaler pleasantly share our misfortune as well as our prosperity? While no doubt unreasonable demands are made upon you, fixed rule in this case is not practical; the wise man measures his cloth to fit the customer. The amount saved by the wholesalers by a united stand for thirty days' credit only would more than meet the car fare charges and assist the legitimate florist by effectually removing the "take-the-order-at-any-price" retailer. The small, occasional payments on a constantly increasing account enable him to take an order at almost any price and still figure on 100 per cent. profit. That which he does not pay for can be sold at any price and with a handsome profit.

Laxity in credit invites men of no stability to embark in any business, making unequalled competition for the paying men and a sad experience, when the inevitable failure takes place, for the wholesaler. Give the small fellow the same attention as the big fellow, as our baby of to-day is our man of the future. Keep in close touch with your consignors; impress on them the necessity of shipping, when requested, the stock desired, so that the poor retailer does not have to substitute and thereby lose a good customer. When stock is scarce, out-of-town orders strong, before filling orders on file ask yourself, "Where were the shipping orders when the Summer glut was on?" Then fill according to your judgment, realizing that the high dollar policy is not always the most profitable in the end.

Whether the "fakir" is the godsend to the business that the wholesaler would have us believe is a question in my mind. That he instills in the heart of the public a desire for flowers is true, but would not more good be derived by the business in the future by allowing the storekeeper to purchase at the same price as the "fakir" does, when the glut is on, thereby enabling the former to run a special or use the extra quantity (which he would purchase at the reduced figure) to make a window display? Attention would be attracted to that store, and this would incidentally create a heavier demand from the wholesaler by reason of the increased patronage which the retailer would receive. True, the "fakirs" move stock we couldn't; but is it right that we should pay a higher price than they for the good stock we so often see upon the street, when we in Winter pay the prices which they will not? The up-to-date retailer, if given a chance at low-priced stock, will consider a display of same a good form of advertising. You claim they move stock which would otherwise stand; when next overstocked give us a chance to do a little moving and the result will, I think, be a pleasant, profitable surprise.

The retailer is a grateful but an independent man, and does not desire something for nothing; he only asks the same desire to serve him in January as is displayed in July, and his sun will always shine bright. Discuss all subjects with your retailer that concern him; inject into every club meeting a social feature, and the distrust now existing throughout the trade will give way to a better feeling between wholesaler and retailer, and good fellowship will be the stepping stone to a better understanding of each other.

Our London Letter.

By A. Hemsley.

WINTER-FLOWERING BEGONIAS. — Messrs. Clibrans, Altrincham, have added some good hybrids to these useful Winter subjects; at a recent meeting of the Royal Horticultural Society they staged a good group, which included hybrids of *Socotrana* × *tuberosa*. Miss Clibran, with double flowers of a bright pink, gained an award of merit; Winter Glow, a variety with smaller flowers of bright scarlet and neat foliage, and Bowden Beauty, rosy red, were promising varieties.

NEPHROLEPIS SUPERBISSIMA from Messrs. F. R. Pier-son Company, Tarrytown-on-Hudson, N. Y., attracted much attention, and gained a first-class certificate. The plants arrived just in time to be submitted to the committee, but they had traveled well, and were in splendid condition. Its distinctness from other plumose forms was commented on by the market fern growers. Messrs. H. B. May & Sons happened to have most of the other plumose varieties in a group of choice ferns, and this afforded an opportunity for comparison.

An exhibit of upward of 100 dozen carnation blooms from W. H. Page was an interesting feature. The blooms, which were all of high quality and included most of the newer sorts, were well displayed. All the English growers speak highly of Winsor, and Beacon is another favorite. White Perfection takes the lead as the best white yet.

Field of Asters of F. A. Conway & Co., Indianapolis, Ind.

HARDY PLANT NOTES

Fall and Winter Work Among Hardy Phlox, etc.

All uncompleted work in the hardy garden or border should now be nearly finished for this season and if covering has not already commenced preparations should be made with that object in view. Personally I never care to cover until the ground is well frozen, as then the work can be much better done with far more ease and expedition and, I always think, with better results to the plants, as then the covering material can be better got to its destination without cutting up the lawns, grass borders and edgings, and with less disfigurement of the place in general. Before covering, if plants be in a bed or border, I prefer to spade up the soil between the plants in a very careful manner, leaving the surface of the soil as rough as possible, excepting that close to and around the plants, where I make the soil as fine as it can be made, taking care to cover up all surface roots that may have been made during the Summer and Fall.

Many herbaceous plants make an abundance of surface roots, as, for instance, the perennial phlox; these I always think are the most important roots to care for, in order to secure best results in flower production for the coming year, especially on plants that stand for several years in the same place. Upon observation below these surface roots we generally find a vacant spot on the stem of the plant where few or no roots are produced. Then again, at the base we will generally observe another large cluster of roots, but these are of a quite different texture from the ones near the surface; they are hard and woody, while those near the surface, being in a later and more active state of growth, are more tender, consequently are in a better condition to take in the foods which we give them and for which they are reaching out near the surface. So see to it that these roots are not damaged, and give them care by covering them, so that Winter's frost does not injure them, and food by well-decayed manure being spread over the surface around them.

I always do my digging in the border with a fork, not with a spade or shovel, as these latter implements are likely to do very serious damage to the roots. I prefer covering the crowns of the plants with loose materials, using loose light strawy manure or leaves, holding them in place with a few evergreens or other small branches of trees or trimmings from trees.

If large numbers of phlox are needed, plants should be dug at once if this has not already been done. They may be stored for potting in a frostproof place or they may be potted up at once and set in a similar place until room can be had for them in the greenhouse in January or February if to be increased by top or green cuttings, in the old and usual manner; or when dug they may be divided to single stems and these may be again redivided. If but a small portion of the root be left with

each eye, or series of eyes, these may either be potted up singly or replanted, as exigencies or circumstances may demand. If wanted for Spring sales, by all means pot them up; if for home adornment or personal increase of stock, plant them out and cover them up well. It is really surprising how early in Spring these plants commence to reappear and make new roots.

If the varieties are new and very

ture, consequently very susceptible to moisture, which if supplied either artificially or naturally in the cutting state caused the bark to rot.

It is claimed by some writers that the phlox is a bog plant and that it will grow in association with water plants and make a good show. It must be planted, for best results in this rela-

placed in a too warm position. When two or three inches high they should be potted up, and the strongest of them can be grown on into 3-inch pots by May. This method is a very desirable

Phlox La Cygne, Flowering on July 12

Photo by J. F. Johnston.

Phlox Cocquillet

Photo by J. F. Johnston.

choice, the wood of this Summer's growth may be used, and thus the stock may be materially increased by being treated in much the same manner as tender hardwooded shrubs are used—cut up into short lengths or as the condition of the wood may allow, which any good propagator can determine, and placed in boxes of sand. The sand must be clean and the boxes well drained; then put in the cuttings in the usual way and keep them in a cool place, preferably a rather dry one, supplying moisture when needed. A too damp place and too much moisture often prove fatal to them; in this condition they are rather slow, but with proper care a large percentage will grow.

I have also seen the plants very successfully grown in cold frames in much the same manner. One of the chief causes of failure by this method is on account of the outer bark of the plant being of a rather soft or spongy na-

tion, on the banks or close to the edges of banks, growing naturally. I found *P. maculata* last June in a wild state flowering beautifully and in full leaf right to the base, showing not a sign of mildew or disease; the stems were beautifully spotted, and altogether I have not seen a phlox looking more healthy and robust than that specimen. One had five large heads of bloom on it. It was growing in a low, wet meadow along with coarse-growing grasses, goldenrods, asters, prunellas, eupatoriums and other herbage. Asa Gray in his Manual quotes this plant as being found in rich woods and on river-banks, while *P. paniculata* is given as found in rich woods only. Around Philadelphia we are all well aware that during the months of August and September, when humidity runs high, our phloxes often are sorry looking sights from mildew. The past Summer the *P. decussata* types fared very badly with me on this account, in a rather stiff, moist, retentive soil; while the *suffruticosa* types, which seem to take more or less after the *P. maculata*, as evidenced in the one most popularly known as *P. Miss Lingard*, stood unscathed right in between several varieties of the former. This would naturally lead me to think that the *maculata* or *suffruticosa* section would be best adapted for waterside or bog planting. My best results with the *decussata* section have always been obtained by planting in a good, rich well-drained soil, mulched in Summer to prevent undue evaporation, and in dry weather copiously supplied with water and moved or divided every second or third year.

Another method of propagation, one which the past six or eight years has been used with much success, is when digging the plants to lift them very carefully and get all the roots possible with each individual plant, dividing after digging where possible and cutting off all surplus roots. These are saved and if long enough are cut again, for almost any piece any length will grow. These are sown, or spread, on the surface of soil, in boxes or trays, and covered with soil from one half to one inch deep. If thought advisable the trays may be placed under a bench in the greenhouse where, of course, they can be seen and care given them as regards watering, until they commence to grow, when they must be brought up to the light. They soon grow, consequently should not be

one for those who wish to raise large quantities, as these plants planted from 2-inch pots and put out into the field in May, will nearly all flower the first season and make a glorious show in August, September and October when other phloxes are long past their best. Besides this, they make the very best and most desirable of stock to sell or send out to a customer. Some prefer a larger clump and are willing to pay a higher price, but if they only knew it, they get much inferior results. If room cannot be spared in the greenhouses the plants may be stored in much the same manner as tulips and other bulbous stock, being brought in at such periods as time, room and exigencies or wants may be determine.

To those who have not greenhouse room I would say, results equally as lasting, if not more benefiting as regards natural methods and the constitution of the plants are concerned, may be had by well preparing a cold frame; dig up and make smooth the surface of the soil in the frame, on which evenly sow the cut up roots and cover with good, light, friable preferably sifted soil to the extent above indicated. Cover with leaves or straw for the Winter, placing sash over these to prevent too much moisture and also add protection. Some attention will be necessary as regards ventilation during bright open weather in Winter, and in early Spring the plants will require watching and perhaps part of the covering removed very early, but conditions of growth and the season, its earliness or lateness combined with the instinct and knowledge of the operator, will carefully suggest and aid in these matters. These plants may be either potted up for convenience or carefully removed right to their blooming places in the field, border or bed, with results as regards the blooming period practically the same as by the greenhouse treatment, perhaps a trifle later in the flowering. Slight freezings during the Winter, in the frames, do not seem to hurt the stock very much.

Phlox carolina may be increased in much the same way as the foregoing, and it seems a pity that this dwarf, bright, cheerful little plant is not more used than it is. It is always very attractive, both in foliage and flower, and will repay any attention given to it by its large pink flowers, not only in June when it is at its best before other larger

Phlox Canadensis, Flowering May 10

phloxes are in bloom, but if the old, withered flower heads are removed, not permitting it to seed, it will continue to give bloom more or less during all the growing season.

Two other of our native phloxes are seldom or never seen at their best excepting during the early Spring months; these two are wonderful in their struggles and powers of adaptation. Both of them are natives of rocky and damp woods. I have found *P. divaricata* growing abundantly and profusely flowering in black muck in low, dense woods. *P. reptans* I never saw in its natural home, but I am told it also grows in damp woods. How often do we see them right out in the open sun during the most trying period of their existence—the Summer—looking miserable, and yet each Spring how they, especially the former, spring up and produce an abundance of their lovely flowers, standing out in the early Spring in such striking colors as to win our admiration. If they do this under such adverse conditions, what would they not do under better ones? HERBERT GREENSMITH.

FIRMS WHO ARE BUILDING.

BERLIN, CONN.—A. A. Weldon will erect one large greenhouse in the place of the two small ones he is now operating.

DIGHTON, MASS.—Josiah T. Place is building another large greenhouse at the Dighton Nursery. He intends going to Florida later and leaving the business in charge of his brother, William Place.

STREATOR, ILL.—Thomas Johns is erecting three greenhouses, one of which is nearly completed; work on the others will be pushed as rapidly as possible. The houses cover an area of 45 x 150 feet. Mr. Johns expects to raise cucumbers and other vegetables. He has five acres of land. The part not covered by greenhouses will be planted to fruit.

THE EXHIBITIONS

Texas Flower Shows.

There were more flower shows in Texas this year than in any year since the first flower show of the State about fourteen years ago. Cities which never before attempted an educational movement of this character made their first attempt, all with more or less success, due to the fact that when the chrysanthemum is depended on with a reasonable effort on the part of the growers, there is at least plenty of flower color to make a kaleidoscopic display. Among the towns and cities holding exhibitions this year may be mentioned, Beaumont, Bowie, Paris, Denison, Tyler, Ennis, Waco, and a few others.

It was unfortunate that Houston, the city in which the first chrysanthemum show was held in the State, was not able to have its annual exhibition. This was due to the carnival being held in the city at the time, which embraced so many counter attractions that a suitable hall could not be secured in time, and the demand on the local florists was so great for homegrown stock that there would have been but little available for show purposes. There were a few Northern chrysanthemum growers who indicated their desire to send exhibits, but it is hoped that they will come in next year, when a large show has been promised.

Texas State Floral Society.

The flourishing little city of Waco, situated on the precipitous banks of the Brazos river, has been foremost in flower shows in Texas for some years. It may be truthfully said that no organization in America has so continuously for many years offered so extensive and flattering a premium list as the Texas State Floral Society. It is not particularly a State organization as the name would indicate; further than that exhibits may be sent to Waco from anywhere, and the membership is composed almost entirely of Waco people and embraces a very large list. Everything floral or ornamental in plants and flowers that is at all seasonable is solicited, and this year, as in years past, the response has been most gratifying. There were also hanging baskets, decorated reception

tables suitable for holiday occasions, where competition for supremacy was keen. For the latter florists C. H. Mayer and Miss Annie Wolf won first and second respectively. Best original design in cut flowers was won by Mrs. J. Park. Adrian, Mich., was again represented by Nathan Smith & Son, whose success in competition from year to year is becoming proverbial. They won first prizes in each instance for 15 white, pink, and yellow chrysanthemums. Joseph Vestal from Arkansas won first on 15 blooms in variety. A long list of local growers was among the winners for home-grown products in chrysanthemums and other plants, and a distinctive line was drawn in the competition between the home people and the outsiders, so that there could not be competition among them. The most successful Waco winners were W. L. Reese, Jr., Wolf, Chas. H. Mayer, J. W. Barnett, D. A. Saunders, C. A. Kaserman, Jas. Mohan, Mrs. Plunkett.

A special attraction in the competition was the best decorated booth for schools, universities or colleges, being won by the South Eighth street local school; it was an exact reproduction of the building, with walks and grounds, and all the flowers and shrubs used in the decorations were taken from the school grounds. Another point of interest was the competition in booths by clubs, societies, etc.; this was won by the Switchmans' Union of North America, being a floral illustration of a section of railroad track over the Brazos river, with ties, engine, rails, engine crew and every detail pertaining thereto worked out in flowers. Beneath the bridge were boats in the river.

There were large and varied collections of palms and cycads, ferns in great variety, rustic stands of growing plants, begonias and geraniums in bloom, displays of decorative plants in 16 feet square of floor space, and a variety of general floral attractions too numerous to mention in detail. The Autumn Queen, of course, was always foremost in general interest and the displays were large and very creditable, especially those of the out-of-town growers which always create a variety of euphonious adjectival exclamations. The show was held November 13 to 16 inclusive, and the placing of all the awards was entirely in the hands of J. Robertson of Fort Worth.

In speaking of the general success of

this show for many years, it serves as an object lesson in unity of purpose as well as much sacrifice on the part of the flower growers of this locality, most handsomely supported by the business men of the place, when occasion warrants it. They possibly regard the enterprise as one of the Fall business assets of the community, in drawing people to the city, bringing a most healthful stimulus of activity, which is as essential to the practical as well as the artistic side of life. It is safe to say that the affair will be continued from year to year and, probably, as the most successful venture of the kind in America.

S. J. MITCHELL.

St. Paul.

Trade Notes.

Thanksgiving trade beat all previous records and must be counted as one of the big days in the florist's calendar. Colored roses, violets, carnations and chrysanthemums were in good demand, but everything was pretty well cleaned up by the end of the day.

Chrysanthemums are now about all gone; their season this year has been short and the growers are well pleased, as everything sold well. Owing to the death of several prominent people the demand for funeral flowers has been exceptionally heavy.

Holm & Olson gave a supper to their employees at the Norden Club rooms on Friday evening, November 29. There were twenty-one at the table. The business of this firm has grown by leaps and bounds until now it is one of the largest in the Northwest.

A. N. Kinsman of Austin is sending in some of the finest Bridesmaid, Bride and Killarney roses ever seen in this market.

P. Clausen & Son of Albert Lea are the premier growers of single violets in the State and are daily shipping most excellent flowers. VERITAS.

BOONE, IA.—The downtown offices of the Boone Greenhouse, which have been in the room between the Wells Hotel and the Welch Drug Store have been removed to the north side.

Prices Advertised in these Columns are for THE TRADE ONLY—When Writing Please Mention THE FLORISTS' EXCHANGE.

We can furnish everything in new material to erect any size house. Get our prices.

METROPOLITAN MATERIAL CO.

Greenhouse Wreckers

1398-1408 Metropolitan Avenue, BROOKLYN, N. Y.

STERLING, ILL.—The Sterling Floral Company has completed the erection and finishing of the new addition to its plant and is now occupying the same. The new addition is of brick, and is 65x38 feet in dimensions, and divided into three parts, in addition to the basement under the entire building. The front part of the building is the office, the salesroom and the waiting room. It is 24x26 feet in size, splendidly ventilated, plate glass windows, handsome fixtures, and illuminated at night by a score of electric lights. The fixtures are of quarter sawed oak. The workshop, desk and telephone room, combined in one, is at the rear of the waiting room. This is 15x40 feet. The palm house, which is new, adjoins the workshop on the south. It is 11x46 feet. Ground glass is used. The heating plant has been rebuilt, a new boiler installed, and a smoke stack erected.

Chicago.

News Notes.

John Assa of Bowmanville road has purchased the material for two new houses to conform with the size of those constituting his present range, expecting to have them ready to plant in the early Spring.

The genial smile of Ed. Benthey will be missed behind the desk at the Benthey-Coatsworth Company's store.

Captain Schuenemann of the Northern Michigan Evergreen Nursery reached port on Friday of last week, a few days late, owing to having been tied up in a fog, but with a good stock on hand and, as usual, will be found at the Clark street bridge.

A. L. Vaughan returned from his Southern trip much delighted with his visit to Little Rock, where he was judge at the recent successful show, and the extended journey to his former home and birthplace in Louisiana.

Miss Moore is about the market again as lively as ever, after her recent illness.

The first snowstorm on Saturday last was not heavy enough to make good sleighing, but the clouds from the lake hung over the city and its environs all day and gave the growers the first dark day of the season.

Under the firm name of H. W. Metz & Company the senior member, who is well known to the trade, has opened a retail store at 252 Ashland boulevard.

F. W. Herendeen of the manufacturing company bearing that name in Geneva, N. Y., was visiting his old friends in this city last week.

P. J. Foley says that although he bought a larger turkey this year than ever before the last addition to the family said she would not help him diminish the size of the bird.

J. E. Jensen reports very satisfactory orders coming in for Defiance, and the appearance of the flower growing unquestionably justifies all that has been said about it as a "bread winner."

C. M. Dickinson of the E. H. Hunt Company reports an active sale of the Tobakine Products, "that kill bugs," throughout the country and is much pleased with the results of the insecticide.

An informal dinner was tendered to the Park Board officials at the Union League Club on Monday evening last. President B. A. Eckhart of the West Park Board was the host and Jens Jensen and W. Carlys Zimmerman were the guests of honor.

Don't forget the club meeting and rose night at Handel Hall Thursday evening next, when it is expected that E. G. Hill of Richmond, Ind., and other noted speakers will be present. Be sure to turn out and give them a good reception.

A. F. Longren, who has been suffering from an attack of blood poisoning, is reported from his home in Des Plaines as progressing very favorably.

J. A. Budlong continues to cut an especially fine line of carnations.

C. W. McKellar is still handling a choice line of orchids and is increasing his list of varieties.

A. L. Randall Company reports a continued brisk business in its supply department.

Peter Reinberg is just at present cutting an especially fine and heavy crop of Uncle John roses.

Vaughan & Sperry are making a specialty of violets and late chrysanthemums.

Fred. Weber is getting a heavy crop of medium length and short American Beauty roses.

The E. F. Winterson Company is making a strenuous effort in the Christmas green business.

W. K. Wood.

NEW BEDFORD, MASS.—Napoleon Lemay, Hillman street, met with a very painful accident on Wednesday, November 27; one of his steam boilers burst, scalding him very badly over the body.

J. V. Soule opened his new store on Saturday, November 30.

MILWAUKEE, WIS.—The Holton & Hunkel Greenhouse Company has been incorporated with a capital of \$50,000; the incorporators are Fred. H. Holton, Herman V. Hunkel and Anna E. Brown.

WESTPORT, CONN.—The Fillow Flower Company is installing new boilers in their greenhouse plant here.

ANDREW CARNEGIE

Pittsburg.

Trade Notes.

Business in cut flowers the last two weeks was somewhat unsatisfactory. Not much was expected for Thanksgiving Day, but it turned out better than was looked for. Good flowers sold freely. There is still an abundance of stock of all sorts and prices are about the same as they have been for the past few weeks. Chrysanthemums were sold lower this season than for some years; there seems to be too many in the market, and prices were forced down, so that the grower hardly made expenses. Roses and carnations are coming in of good quality.

A few plants were offered for sale, but the cold weather has stopped trade a little in that line. Bulb sales have dropped off considerably; quite a lot of some sorts are yet unsold and are offered at low prices.

John Bader received his azaleas this season in fine shape, perhaps better than ever before, and will have enough to supply the home demand. Some of his import orders of palms were almost eight weeks in coming and arrived in bad condition. Ferns are grown by him by many thousands, from small seedlings to large size plants; N. Whitmani seems to be the leader and is well done here. N. Amerpohli is also grown in quantities and finds ready sale. A nice lot of latanias and ficus were noticed, of which Mr. Bader has been selling quantities for many years.

J. A. Peterson, Cincinnati, was in town last week and sold some of his plants as usual; he has some nice Begonia Gloire de Lorraine this year.

Fred. Burki and family returned from their vacation in Virginia; during their stay they visited the Jamestown Exposition.

The Florists' Club meets this week—the last meeting of the year, which will be devoted to Christmas ideas, plants, decorations, and so forth.

E. C. Ludwig has received a nice lot of plants, such as boxwood, aucubas, laurus, etc.

Christmas greens and other goods are already arriving and will likely be as plentiful as usual. E. C. REINEMAN.

New Carnation **DEFIANCE** Brilliant Scarlet

This sterling novelty is the result of a cross between ESTELLE and a seedling with MACEO and DAYBREAK blood in it, and was originated by W. N. Rudd, Mount Greenwood, Ill.

The color is a most beautiful scarlet, brighter than anything seen in carnations heretofore; size, three inches and over; habit and form ideal. It is a very rapid grower, and has no tendency to produce surplus grass, every shoot advancing rapidly and producing a perfect flower. If you did not place your order already, we would advise you to do so without delay, so as to insure early delivery. **\$12.00 per 100, \$100.00 per 1000.** Usual discounts on larger orders.

There may be other red carnations, but there is only one scarlet, and that is DEFIANCE. Come and see it growing and be convinced.

THE FLORISTS' EXCHANGE

Plant Notes.

CYPERUS ALTERNIFOLIUS is a very easily grown and useful plant. It will be found, as it no doubt has been in a great many cases, especially useful to retail florists, both because of the ease with which it can be rapidly grown into a salable size, allowing it to be disposed of profitably at a low figure, and its adaptability to all forms of window and other interior store decoration. The most practical method of propagating umbrella plants, as cyperus are commonly called, is by cutting off the tops, leaving about an inch of stem, which should be inserted in sand, taking care to rest the crown after the tips of the leaves are cut off, on the sand. New plants will soon start from the axils, and when they are well formed they may be potted up and grown on into large, medium or small specimens, just as the demands of business warrant.

REX BEGONIAS.—There is always a good demand for well-grown, medium-sized plants of Rex Begonia. Now is a good time to propagate a stock of these, although better earlier. Well-developed leaves may be placed on the sand in the propagating bench, pegging them down to keep them in place; or the leaves may be cut up into inch pieces all along, an opening being made in the sand after the manner of preparation for rose or carnation cuttings. When the young plants are fully formed they should be removed and potted singly into small pots.

STREPTOCARPUS.—The reason, perhaps, why streptocarpaceae are not more generally grown than they are is the impression that they are difficult subjects to manage successfully, which they are not, requiring in fact no more exacting care than that indispensable to success with a great many other plants of inferior merit and more extensively grown. S. Wendlandii is probably the best and finest all around of the genus, in that it sends up long spikes of a very pleasing and useful shade of blue flowers, which are not only very decorative in conjunction with the unique characteristics of the plant, but it is also decorative and of much practical utility as a cut flower, keeping as it does in good condition for several days after being cut. Streptocarpaceae are for the most part grown from seeds, which should, if the plants are desired to be in flower around Christmas, be sown in January. The seeds are very small and should be covered but slightly in sowing. The seedlings in early stages are somewhat liable to damp off, but careful watering and a light situation will do much to prevent that. The plants should be kept in a continuous growing condition from the time the seed is sown until it becomes evident that their usefulness is past, which will be apparent when they have finished blooming. They are not worth the room they take up after that.

D. M. CROTONS.—There are but few retail florists and growers, no matter how small their greenhouse capacity, who would not find such handsome foliage plants as crotons profitable in their business in one way or another. These plants are not hard to propagate, neither is their subsequent cultivation any more difficult than that of many things more commonly grown. It is true they require a greater degree of heat, when such has to be given by artificial means, than some other plants grown in greenhouses do, but as fine crotons as I have seen in many years were wintered in a house where the temperature often went down to 55 degrees, although for the making of growth a higher temperature is necessary.

Now that in most places sufficient bot-

THE TRADE ONLY—When Writing Please Mention THE FLORISTS' EXCHANGE.

NEW CRIMSON CARNATION HARVARD

THE color of this novelty is a very rich crimson. The blooms are of the finest as to size and quality and the habit is free and continuous, every shoot producing a flower with a calyx which we guarantee as non-bursting. Blooms borne on long, wiry stems from 24 to 30 inches and over. Price \$12.00 per 100, \$100.00 per 1,000. Usual discount on large orders.

NEW CARNATION FAUST (BRILLIANT SCARLET)

This novelty is very fine for commercial use owing to its extreme productiveness; a fine one for Christmas trade. Color, form, stems, habit and productiveness all that can be desired. Price \$6.00 per 100, \$50.00 per 1,000. Usual discount on large orders.

ADDRESS ORDERS TO JAMES D. COCKCROFT, - - NORTHPORT, L. I., N. Y.

tom heat is available, it is a good time to start rooting of croton cuttings. These should be taken from healthy, clean, old plants, selecting wood that is not very hard. The cuttings should be placed in the sand, which should be well firmed and well watered immediately after the cuttings are put in, and from then until they are rooted the sand should never be allowed to become dry. The foliage of the cuttings should be frequently sprinkled. A glass cover, or a case with a sash for a cover, will aid materially in the successful rooting of crotons, as it will with numerous other things. In about three weeks, under favorable conditions, the cuttings will have made sufficient root formation to require their removal from the sand and potting into small pots in soil composed of free fibrous loam and a sprinkling of sand. The young plants on being potted should be returned to the case, over heat, and the foliage kept on the moist side and slightly shaded until they get established in the pots.

PALMS.—The cramped condition of palms in their pots may at this time make it appear that a repotting would benefit them, but in general it is much safer to resort to an occasional feeding of these plants with liquid manure than to disturb them to such an extent as repotting would mean. If, however, sufficient heat can be kept up without interruption until in the regular order of things nature comes in to aid, young palms in severe need of more pot room may without any fear of disastrous results be shifted. If a night temperature of 65 degrees or even 60 degrees can be kept up, along with a moist atmosphere, young kentias can be increased considerably in growth before Spring. The same can be said of young arecas; the latter always do better when the temperature is not lower than 60 degrees. Kentias, even young plants, will keep in good condition in a temperature a few degrees lower at night, but little is gained by subjecting them to a low temperature. Sometimes it unfortunately happens that young palms are received in such a condition of root and branch that their only means of salvation is that of turning them out of their pots, freeing their roots of all soil and thoroughly washing the roots as well as the leaves, otherwise they would remain in an unsatisfactory condition indefinitely. When the plants are made clean in that way, potted up in good sweet potting soil, and placed in a house where sufficient heat and moisture can be maintained, they will push ahead and change in appearance surprisingly in a short time. GARDENIAS.—It means something to have a large number of gardenias in such promising condition now that a good crop of flowers is almost a certainty, but in growing gardenias for Winter cutting

there is always an element of uncertainty present, almost up to the time the flowers are ready for cutting, and only by the exercise of skill gained by experience can it be to any extent eliminated. A growing temperature of about 70 degrees is indispensable to success with gardenias while they are making growth, but it sometimes becomes necessary, because of their reluctance to show flower buds, to check slightly their growth by lowering the temperature a trifle and in a like degree reducing the moisture, but not to such an extent in either particular as would cause a shock to the vitality of the plants. If the formation of buds, as should be the case, follows the slight interruption of growth, a higher temperature is from that on a necessity, 70 degrees is about right. Watering and the manner in which it is done has more perhaps to do with the success, or the reverse, with gardenias than any other item in their culture. The soil should always be in such a condition as regards moisture that the roots will never experience a drouth or drenching. The buds will drop off the plants if the soil is allowed to get dry, and a wet, soggy condition of the soil is invariably the cause of the yellowing of the foliage, which is ruinous to the plants. Gardenias stand hard syringing, which is perhaps the safest method of keeping the plants clear of mealy bug, their arch enemy. In last week's issue of The Florists' Exchange the conclusion of the notes on dracaenas should be "and a degree or two less will not work injury" instead of as it appeared. D. M.

REVIEW OF THE MARKET

NEW YORK.—The cut flower market is very much on the quiet side just now. Crops are not so very heavy, still there are a great many more flowers coming in than can be disposed of satisfactorily. As regards American Beauty roses, while a few occasionally bring 25c., 20c. each is far more than they will average, as so many of them are left over after each day's business, which finally have to be cleared out at a figure less than 20c. Of Bride and Bridesmaid, while a few have reached 8c., it has only been in small lots; there are many more specials coming in than can be disposed of at our quoted prices even. Number two grades find a readier sale, which is a clear indication that the demand for roses is not coming from the high-class stores.

Carnations are more than plentiful enough for the demand and prices not nearly so good as those obtained last week. Orchids, just now, are not very plentiful, though there is every indication of good supplies in the near future. Gardenias are abundant, and all kinds of prices are prevailing.

There is still a good supply of chrysanthemums, and from the prices obtained it does not seem that late chrysanthemums this year are very necessary. Violets are bringing anywhere from 35c. to 75c. per 100, an occasional lot of specials reaching the dollar mark.

It is always understood that the first two weeks in December are rather quiet in the flower business, but this year this condition seems to be much more apparent than usual.

CHICAGO.—Last week for the few days immediately preceding Thanksgiving, the market took on a very lively aspect and business was much better than had been anticipated, stock generally cleaning up well, especially in American Beauty roses and fancy carnations, the former going to \$5 per dozen and the latter to \$5 and \$6 per hundred. Since the holiday business has kept up remarkably well and it seems quite a pleasant change from the conditions which prevailed a week or two earlier. There seems every reason to believe now that it will hold up in good condition for the present at least.

PHILADELPHIA.—Business conditions in the cut flower market are still below the average; the wholesale houses are handling much more stock than at this time last year, but their receipts are not in the same proportion. First class American Beauty roses are selling at \$3 per dozen. Tea roses, a few choice, bring \$10, but most of the choice stock only realizes \$8 per 100. Chrysanthemums are a trifle firmer owing to the main crops being cut out; they sell at about \$2 to \$3 per dozen for the best stock. Lily of the valley is much more plentiful and ranges in price from \$2 to \$5 per 100.

Cattleyas are firmer at 75c. each. Violets, good doubles, are selling well at \$1 to \$1.50 per 100; large singles bring 60c. to \$1 per 100. Paper White narcissus fetch \$2 to \$4 per 100; stevia, 25c. per bunch. Gardenias are scarcer at \$6 per bunch.

DAVID RUST.

CINCINNATI.—Thanksgiving trade in this city was more than any of us expected, and all the wholesale and retail stores sold out more stock of all kinds could have been used, which, to my mind, speaks well for Cincinnati at a time when the money market could be in a much better condition. Since Thanksgiving, chrysanthemums have been much in demand; but are now very scarce. Roses and carnations are jumping to the front. Violets are also selling well, especially singles. Paper White narcissus are coming in and fetch 4c. Prices in roses and carnations are advancing.

Many of the craft are now busy getting ready to handle holly and roping and several already have good orders booked. The produce commission merchants of this city handle the bulk of the holly and laurel wreathing shipped to this market. Boxwood, leucothoe, sprays, galax and ferns are all handled by the cut flower commission men. Boxwood sells at 25c. per bunch or 15c. per lb. Galax, \$1.00 per 1000; ferns, \$1.50 per 1000. Red immortelles are selling well at 25c. per bunch, \$2.50 per dozen.

The general outlook for Christmas business is good. E. G. G.

BOSTON. Thanksgiving trade in this city was better than had been expected. Flowers sold very well although the prices of former years were not maintained. There was a large lot of chrysanthemums which had to be moved before there was much demand for other stock, and as there were many grades of chrysanthemums prices varied a great deal, but the general run brought from \$4 up to \$16, although extra fancies realized better than that. Carnations were plentiful and sold fairly well. Roses went better than expected, especially American Beauty, the best grades of which brought \$3 and \$4 per dozen. Violets sold for 50c., 75c. and \$1.

Since Thanksgiving the market has been steady and there has not been such a raft of chrysanthemums. Roses sell fairly well at from \$3 to \$12. American Beauty remaining at the prices mentioned. Carnations bring \$3 and \$4 for the best grades, a few fancies exceeding these figures. Violets go at 50c. and 75c. Callas sell well at \$1.50 per dozen; lilies bring the same price. Lily of the valley sells at from \$2 to \$4. Quite a lot of bouvardia is seen around and some of it is exceptionally good. Smilax brings \$15 per 100; and asparagus remains at prices previously quoted. J. W. D.

INDIANAPOLIS.—The decrease in the size of individual sales was a distinct feature of Thanksgiving business. No doubt a larger number of sales were made than ever before. The way the public took to the small and medium, showy but inexpensive flowers, though, made the dealer realize that the customers were in a mood to obtain the most for their money. Plungers in violets, orchids, American Beauty, or other fancy flowers were conspicuous by their absence. Modest priced bunches of violets, at say, 50c. to \$1, sold fairly well. A majority of the retailers were as well supplied with long American Beauty the day after as before the holiday. Chrysanthemums, colored ones, that retailed at \$1 to \$3 a dozen sold above everything else; show flowers at \$6 to \$9 were admired but not bought. Bridesmaid, Bride and Killarney roses at \$1.50 to \$2 per dozen were among the best selling articles.

Potted plants, too, Gloire de Lorraine begonias, cyclamen, narcissus and primroses, at 50c. to \$2 each, decked many Indianapolis tables. All the carnations obtainable were closed out at fairly good prices, which were in most cases 75c. and \$1 a dozen; \$3 to \$4 a hundred prevailed in the wholesale markets. Stevia, Roman hyacinths, poinsettias, bitter-sweet berries, with holly, all give evidence that the Yuletide season is close at hand.

Funeral work and decorations, mostly small ones, are keeping apace with former seasons. I. B.

ST. LOUIS.—Thanksgiving trade was good only in spots. Business during the entire week was reported dull. The supply of stock, particularly roses, was large, but the quality was hardly up to the average. There seems to come to this market a great deal of stock in roses that should be kept out for the general good of the trade. Funeral work, too, was slow. Quite a few small weddings took place Thanksgiving Day, which used up some stock. In roses American Beauty demanded top prices, \$4 to \$5 per dozen; other roses from \$2 to \$6 per 100. The supply of first-class grades in roses was limited; shorts were very plentiful at job lot prices.

Chrysanthemums are about out of this market; only very few are coming in now and nothing fancy. Carnations bring from \$2 to \$4 per 100; these are in fairly good demand and of extra good quality. In bulb stock longiorum lilies realize \$12.50; lily of the valley, \$3 and \$4; Paper White narcissus, \$2 and \$3; callas \$8 and \$10 per 100. Violets are fine, and sell well at 75c. and \$1 per 100 for the best. All greens are on the market at usual prices and in plenty. ST. PATRICK.

DETROIT, MICH.—Thanksgiving is a thing of the past and so are all the chrysanthemums. A canvass of local growers shows good returns for this flower this season. The usual shortness of stock is more troublesome than the selling of flowers. Counter trade for Thanksgiving was not quite up to that of last year and might have been felt badly had it not been for several decorations. A fair idea of what some of our Western debutantes demand from local florists may be gleaned from the statement that one firm supplied

Indianapolis.
News Notes.
Tomlison Hall Market reports a very fair Thanksgiving trade; not so heavy as usual. Much was wholesaled on the days preceding, so no trouble was experienced in cleaning up on Wednesday, the heavy market day.
Several of the local growers have come to the relief of the green goods market with quantities of smilax and asparagus.

The seed houses are well stocked with Christmas decorations and are about as busy as possible making preparations to deck the commercial part of the city in holiday attire. Huntington & Page, The Vail Seed Company and Bash's Seed Store are headquarters for this line. Rabbits are destroying many fruit trees for the Smith & Young Company; Nimrods, especially florist friends, are cordially invited.

Mr. and Mrs. W. W. Coles and daughter of Kokomo attended the Shriners Convocation this week.

A visit to the surrounding growers discloses many good things in store for the holidays. Gloire de Lorraine begonias are plentiful, so are good cyclamen. Much bulbous stock should be on hand in profusion. A fine batch of Primula obconica is already ordered. The violet supply is not as large as formerly, but outsiders are keeping the market well supplied. Poinsettias are generally grown and will be popular with the store men.

I. B.

For Winter Use.
A lady farmer planted a garden. She was very proud of her prospective peas, but when her husband asked if they were ripe, she said: "Oh, they haven't come up yet."
"Haven't come up yet? Why, the season's nearly over!"
"Yes," she said, "but I planted canned peas; I think they come up a little late."—New York Sun.
When Writing Please Mention THE FLORISTS' EXCHANGE.

Philadelphia.

Club Notes.

The Florists' Club meeting on Tuesday evening, owing to inclement weather, did not bring out a large attendance; but, like most small meetings, those who were present were well rewarded, as the discussion on Charles H. Grakelov's paper evolved some good points. While the paper was aimed hard at the wholesalers, they took it in good part, and a very friendly debate resulted. The wholesale men present stated their willingness to sell to the retailer surplus stock in quantity, and would treat him more courteously than they would the street merchant, but the retailers appeared to be averse to purchasing in quantity, saying they could not move the stock. One retailer stated that he had bought stock in quantity as cheap as the street peddler and had advertised reduced rates on given days, but the business done did not warrant keeping it up.

A special effort will be made to have exhibits of new plants and flowers at the January meeting of the club; all growers having novelties will be asked to send something.

Among Growers.

Godfrey Aschmann has his place looking in fine condition at the present time. He has a good stock of desirable plants. One house contains a large block of *Araucaria glauca*, also a block of *A. robusta compacta*, all in 6 and 7-inch pots, in very good condition. A side bench is filled with *Begonia Gloire de Lorraine* in 6-inch pots in perfect shape for Christmas. Another side bench contains *Solanum* well berried. The azaleas for Christmas are a very even lot. Some good specimen *Neprolepis bostoniensis* in 7-inch pots and *N. Scottii* in 6-inch are very desirable stock. There is also a well-grown lot of *N. Whitmanii* in 6, 7 and 8-inch pots; likewise nice plants of *Pteris Wilsoni* in 5-inch pots. The center bench of one house is filled with *Araucaria excelsa* in 6-inch pots, all in good condition, the side benches being occupied by small *araucarias*, this year's importation, in 5-inch pots; another house is filled with *kentias*, mostly *Belmoreana*, in 6 and 7-inch pots, well-furnished plants. We also observed some specimen *N. bostoniensis* in 8-inch pots—a good lot of plants. The *Primula chinensis* are well flowered.

Two houses are entirely filled with azaleas for Easter, while outside many frames contain thousands of pots of bulbs also for Easter. Shipping business keeps up well, and the duplication of orders shows that customers are satisfied.

The wholesale commission houses have got together, and started a protective association. All their statements on the 1st inst. bore a stamp to the effect that all bills are due and payable on the 15th, and if not paid by the 25th, cash must be paid for further orders.

Robert Scott & Son are again making a success of gardenias; they are now cutting quantities, and the outlook for Christmas is very good.

DAVID RUST.

SCRANTON, PA.—The Scranton Florist Supply Company has purchased the property located at 201 Seventh street. The consideration is said to have been \$4,500.

CLIMBING ROSES.—At a recent lecture on "Gardens of Roses" delivered in England, one of the gentlemen participating in the subsequent discussion pointed out that the word "climbing" in connection with roses was entirely misplaced, as none had really a climbing habit proper, but merely spread and intermingled with other plants by virtue of redundant growth, and the more this was encouraged the better the display of bloom. One drawback to most of the brilliant rambling tribe was that they only bloomed for a comparatively short period, and it should consequently be the aim of the rosarian to obtain perpetual bloomers, such as we so happily possess in other sections. Another point was the necessity for maintaining the perfume so characteristic of the rose, the finest form of flower falling far short of perfection if odorless.

months ago he underwent an operation for appendicitis and later suffered a severe attack of inflammation in one of his eyes. His many friends here will be glad to know that he is recovering nicely.

Karl Wehn, formerly with the J. M. Thorburn Company, has met with a severe loss in the death of his wife, who succumbed to injuries she received in an accident on the Third avenue elevated road a short time ago. Two children are also left to mourn her loss—a daughter 16 years old and a son 11 years old.

A. L. Young & Company has secured a judgment against C. R. Scallen, retail florist, for \$436.

J. K. Allen, 106 West Twenty-eighth street, has secured a judgment against B. Silvester, a Brooklyn retail florist, for \$85.

Frank E. Rue, seedsman, Peoria, Ill., was among the visitors in town this week. L. Wood, of Wood Brothers, Fishkill, N. Y. and wife, and L. Zeigler, Newport, R. I., were also in town.

Boston.

News Notes.

The next meeting of the Gardeners and Florists' Club on December 17 will be Ladies' Night, and President Westwood and his assistants are getting up an attractive program for that evening. The club will hold an outing on the 14th inst. among the growers of Framingham going there by Boston and Worcester electric cars.

W. H. Elliott has at his New Hampshire establishment an extra fine lot of Richmond and Killarney roses. The old-fashioned Bon Silene and Safrano are also specialties with him there. At his Brighton place he is cutting some grand Bride and Bridesmaid; and he has a superb crop of asparagus for the holiday trade.

Henry M. Robinson & Company are busy these days getting out orders of hardy evergreens for Christmas for the fine quality of which stock they have a reputation.

George Boyan Doyle, son of W. E. Doyle, one of Boston's old established florists, was married Saturday, November 30, to Miss Pauline Janet Prendergast of Brookline, the wedding being one of the fashionable events of the season in that town.

A number of the old schoolmates and friends of Penn Brothers entertained them at dinner at the Boston City Club on Tuesday evening of last week in honor of their success in business and the vast improvements they have recently made in renovating their store.

The Waban Rose Conservatories are having an extra fine cut of American Beauty roses at present, which will continue in right season for the Christmas trade.

Daniel B. Long, Buffalo, N. Y., was in town this week.

Welch Brothers are handling large quantities of very fine boxwood at present.

Charles Roberts, who has been in charge of Lord Duncan's estate at Nahant, is now in charge of the plant department of Edward Macaulkin.

George E. Davenport, a well-known botanist of this locality, died suddenly while strolling in the Middlesex Fells Park, November 29.

Peter Fisher, Ellis, has recently installed Morehead traps for the return of condensation to his boilers and is highly pleased with the satisfactory manner in which they do the work.

Welch Brothers will be headquarters for Christmas holly and other hardy evergreens, which they will commence shipping next week.

Robert Cameron of the Harvard Botanic Gardens has been on the sick list for the past week, but we are glad to note is able to attend to his duties again.

J. W. DUNCAN.

News Notes.

At a meeting of representative nurserymen, seedsmen and florists of Southern California, held in the Mayor's office of Los Angeles, the subject of a Spring flower show was discussed, and the conclusion reached by unanimous consent that we shall have one. The time and place were not decided upon. Everyone present is a member of our horticultural society, and while all maintain the idea that the society should remain in existence, the opinion prevails that the method of the management of past shows of the organization were such that the best interests of all branches of horticulture in Southern California have not been met. A debt has been incurred of considerable magnitude, members have become disloyal to the board of directors, a feeling of dissatisfaction exists, yet the sentiment prevails that in this beautiful Southland, where a greater range of plant life grows to perfection in the open air than in any other part of the world, and where more new homes established by people of culture and of wealth because of delightful climatic conditions than in any other part of the United States, we should have two flower shows each year that prospective planters and home builders may see the products of the gardens already established, thereby learning in the shortest possible time what plants, trees, vines and flowers suit their tastes and meet their requirements in the embellishment of their homes. Since it is impossible to convey to the minds of those who would plant trees and palms, their size and appearance when fully grown, pictures of fine specimens of the different subjects will be displayed on canvas with the stereopticon at the Spring show. This is to supplement and be a part of the botanic display that has been an attractive feature of past shows to the student of plant life. The secretary of our Chamber of Commerce was present at this meeting and assured us that they would get the people to the exhibition if we would get up a fine exhibit.

An organization was effected by electing Dr. A. D. Houghton, chairman; F. M. Warner, secretary; John J. Reeves, superintendent of arrangements. A committee was appointed to represent the different interests of the community as follows: Growers of flowers under glass—Geo. C. Watson, superintendent of the Wolfskill plant; plants and nursery stock—Edward H. Rust, proprietor of the Palm Nurseries; the florist trade—Morris Goldensen; the seed trade—Charles Winsel. It was decided that twenty-five per cent. of the receipts of the show should be set aside to be applied to the indebtedness of the Southern California Horticultural Society, and the gentlemen named to look after that part of the business are: Edward H. Rust; Jacob Dietrich, treasurer of the society; and John G. Morely, superintendent of parks. The writer was appointed to look after the botanic display. Every one present—there were fifteen—left the meeting in a hopeful frame of mind, and with the purpose in their hearts of making the coming exhibition the best ever held in the "Land of Sunshine and Flowers."

P. D. B.

Washington, D. C.

Trade Notes.

Thanksgiving Day brought fine returns to all the Washington florists. Weather conditions were ideal, a requisite feature lacking last year. There were lots of fine chrysanthemums and other flowers, and pretty much everything sold at a good price. The new wholesale and commission house located at 1312 G street had large consignments, and by 2 p. m. all was sold. This new industry is meeting with phenomenal success; the store is being improved by the addition of zinc-covered tables, large ice-box, and electric lights.

J. H. Small & Sons had the Root-Grant wedding on November 27. The decorations in the bride's home were of white chrysanthemums and ferns, the mirror being draped with asparagus, while baskets of cut flowers were freely distributed about the spacious rooms, these latter being sent by the Diplomatic Corps and different legations.

William Marks, formerly with Bove of New York, has accepted a position as decorator with Z. D. Blackstone of this city.

St. Louis.

The Week's News.

The Horticultural Society of Southern Illinois held its annual meeting in Belleville, November 26 and 27. This society takes in thirty-three counties in Illinois from Vandalia south. It has been in existence for the past twenty-five years, and its annual meetings have been of great importance to horticulture throughout the State. Demonstrators for this meeting were H. C. Irish, superintendent of Shaw's Garden, and Professor J. C. Blair, chief of horticulture of the Illinois State University. The meeting opened Tuesday, November 26, and the delegates were welcomed by Major Kern. Three sessions were held daily to which the public was invited. There was a fine display of apples from all parts of the State. Officers were elected as follows: President, H. P. Schmarhorn, Kimmunity, Ill.; first vice-president, C. B. Heaton, New Burnside, Ill.; second vice-president, Dr. A. S. Halsted, Belleville, Ill., and Mr. Mendenhall, who for the past fifteen years has held the office of secretary and treasurer, was re-elected.

S. H. Hibbert, of the Hibbert Floral Company, De Soto, Mo., visited the city the past week, buying supplies for Thanksgiving orders.

W. C. Smith and W. J. Pilcher were daily visitors at the chicken show the past week. Mr. Pilcher had a number of birds on exhibition and won a number of firsts. He runs a chicken farm in connection with his greenhouse plant at Kirkwood.

The St. Louis Florists' Club will next Thursday afternoon, December 12, hold its regular monthly meeting in the Burlington Building at 2 o'clock. President Young hopes for a large attendance, as the trustees have provided a social program that will please all who attend. G. H. Pring of Shaw's Garden will entertain with a lecture on and stereopticon views of the Kew Gardens, England. Chairman Schoenle of the trustees says he has other surprises in store for this meeting, also several new applications for membership. He states the membership will be 150 by next August.

Rochester, N. Y.

Trade News.

Business here is quite brisk. Trade for Thanksgiving was exceptionally good, all the downtown stores being practically cleaned out, and closed by noon.

The annual football game held here is the main outlet for many chrysanthemums, yellow being the color. At this writing all the local growers have cleaned up what is fit to sell, not without some misgivings that if stock had been in better shape, much better returns would have been secured. Nothing extraordinary in prices was heard of, except, perhaps, the fact that on Saturday special American Beauty were offered as low as \$15 to \$20 per 100. Other roses are to be had in fair quantity at from \$5 to \$7 per 100 for top grades. Violets sold fairly well, also lily of the valley. Carnations hold up remarkably well, good prices being realized for the best stock, of which there seems to be an unlimited local supply, at \$2.50 to \$3.50 per 100.

All the stores are now taking on a Christmas holiday appearance, and this coupled with the earlier arrivals of holly and pine wreathing opens our eyes to the fact that the festive season is very near. Several novelties appear, especially in the basket and other material for decorating plants, but more of these anon.

J. B. Keller Sons have a fine block of Salvia Zurich in full bloom, and this will be watched with interest by local men, as if it proves all right it will be a valuable addition to our Christmas flowering plants. Handsome baskets of Gloire de Lorraine begonia, a gorgeous mass of bloom, are a new departure in this line, 10-inch baskets being offered for \$5 to \$10 each. Considerable care is necessary in the handling of these, as the blooms hanging over the side in large clusters cause some uneasiness about the delivering to customers. Many fish globes are to be seen filled with green moss and the red berried Gaultheria nummularoides, and as in former years a good demand has been apparent for them.

The sympathy of the trade goes out to the relatives and friends of Ed. Lacey, manager of the South avenue cut flower store, who died after a short illness on December 2, 1907.
COCKNEY.

TARRYTOWN, N. Y.—The regular monthly meeting of the Horticultural Society was held Friday evening, November 29. President Howard Nichols in the chair. The monthly prize was won by Mr. Nichols with a fine vase of Golden Gate roses. The essay on "Outdoor Vegetables," by Mr. Nichols, winning the Peter Henderson & Company prize at the November exhibition, was read, and considered by all a very able paper. James Ballantyne will open a discussion on "Greenhouse Roses" at the December meeting.

The secretary reported that upward of \$600 in prize money was won at the November exhibition, besides five silver cups, one silver pitcher, and a silver medal.

Nomination of officers for the coming year was in order; election at next meeting.

Thanksgiving Trade.

All the florists are well pleased with Thanksgiving trade, which was quite up to the average. A few years ago only chrysanthemums were wanted for that occasion, and it was almost useless to have any large number of roses and carnations in bloom. That is changed now, for there was a very heavy call for the latter. There is no doubt that the discontinuance of the chrysanthemum show has much to do with the decline in popularity of the Queen of the Autumn. Another noticeable thing is the very few pot chrysanthemums to be seen in the windows of private residences and stores. It is to be hoped that in the near future efforts will be made to reorganize the old society, which was the means of doing a vast amount of good in stimulating the love of the chrysanthemum.

The florists very wisely decided not to advance prices, which doubtless tended to a much heavier trade; roses brought \$1 to \$3 a dozen; carnations, 75c. to \$1; chrysanthemums, \$1 to \$3; violets, \$2 to \$2.50 per 100.

P. R. Quinlan in his two stores had a very fine display of seasonable stock. Autumn foliage was used with very good effect. Henry Morris and the Burt stores were also very attractive.

L. E. Marquisee had an immense crop of carnations; his beds of Marchioness were a sheet of white, but by noon time they were all gone and orders had to be turned down. Enchantress, Pink Lawson, Winsor and others were also in full crop. The roses too are doing splendidly in solid beds; in fact, I have never seen them look so well at this time.

Mr. Marquisee has not yet fully recovered from his accident, and is still confined to the house.
H. V.

WORCESTER, MASS.—W. L. Lewis of Boston and Marlboro, opened on November 25 at 424 Main street, one of the finest stores in the city, most thoroughly equipped for carrying on a large business. On the opening day he had a force of four men, three boys and two ladies; of the latter Miss Anna Berglund, for a number of years with H. F. Littlefield, will act as head clerk. With electric signs, a wagon of striking appearance, and boys in livery, Mr. Lewis, who is only 29 years old, started in on a blaze of glory. In Boston Mr. Lewis may be found at Music Hall; and in Marlboro, where he has 60,000 square feet of glass, his place is known as the Lewis Conservatories.

CHANGES IN BUSINESS.

WORCESTER, MASS.—W. T. Lewis has opened a flower store at 424 Main street.

PETERSBURG, O.—Hiram Heck, formerly of Monrovia, intends starting a greenhouse, which is much needed here.

ALLIANCE, O.—Reisch & Barber, florists, have bought the Joseph Urig greenhouse plant. The purchase includes two acres of land along with the buildings. A. Barber, Jr., will manage both places.

ST. JOHN, N. B.—W. H. Duncanson has purchased the greenhouse at the horticultural grounds and has removed it to his premises on Willow avenue, where he intends conducting the greenhouse in connection with his other business.

NASHVILLE, TENN.—The Joy Floral Company has filed an application for a charter; Thomas C. Joy, Michael Stauch, Casper Bohnenstiel, Thomas C. Joy and C. B. Harrison are the incorporators, and the authorized capital stock is \$40,000. The purpose of the company is to plant, grow, buy and sell flowers, vines, shrubs, ornamental plants, fruit trees, shade trees, etc.

INDIANAPOLIS, IND.—A new nursery company has been organized at Indianapolis and has been incorporated under the name of the Indianapolis Forest and Nursery Company. The president is William H. Moore, the vice-president, Elijah A. Henby, and the secretary and treasurer, J. R. Carfield. The capital stock is \$20,000. The main office will be in the city of Indianapolis.

Business Next Year

for florists should be as good as this year, if not better. The florists are conservative in their business methods and careful in planning for the future, for which reason we can expect that in 1908 steps will be taken to increase the supply of greenhouse products to meet the excessive demand, which is sure to come after the huge crops of this year have been moved and the great bulk of money commences to move throughout the country. The wise florist will not be found without oil in his lamp next summer and we suggest now, that you begin at once to plan for next year's addition to your plant. You'll get plenty of orders, so be sure that you can fill them. Let us get together now and plan the new house. Send for our catalog--it's your first move.

The cut in wooden brace

The L. & B. round steel brace and tie.

SASH SENSE TALK

NO. 4

NOW that you see from our other three talks, that sash made with open mortise joints can't stand the weather or the wear and tear, let's take a look at the question of center bracing. A brace that braces right should strengthen and support the sash bars and bind the sash together. A wooden brace cut into the bars weakens instead of strengthens, and makes needless shade.

The L. & B. round steel rod brace is the strongest, neatest and most enduring. It does not weaken the bars, and casts least possible shade.

Hold these bracing points in your mind, and all the time keep remembering the condition of the nine-year-old sash of another make, and the eighteen-year-old L. & B. sash that were shown in Sash Sense Talk Number 2, in the issue of November 23rd.

Send for circular and prices. Lord & Burnham Co. New York Offices, 1133 Broadway, Cor. 26th St. Boston Branch, 819 Tremont Bldg. Philadelphia Branch, 1215 Filbert St.

THE FLORISTS' EXCHANGE

We are a straight shoot and aim to grow into a vigorous plant

A WEEKLY MEDIUM OF INTERCHANGE FOR FLORISTS, NURSERYMEN, SEEDSMEN AND THE TRADE IN GENERAL

Vol. XXIV. No. 24

NEW YORK AND CHICAGO, DECEMBER 14, 1907

One Dollar Per Year

We desire to call attention to our large and fine stock of

Nephrolepis Piersoni Elegantissima, Whitmani, Etc.

These are **SPLENDID SELLING PLANTS FOR THE HOLIDAYS**. We offer exceptionally good value in the 6-in. and 8-in. sizes. Plants are in perfect condition and are exceedingly good value at the prices quoted. You will find no better selling plants than these beautiful ferns, and we offer them at lower prices than ever before.

2 1/4-in. pots, \$6.00 per 100; 3 1/4-in. pots, fine perfect little plants, \$15.00 per 100; 6-in. pots, 50c. and 75c. each; 8-in., \$1.00 and \$1.50 each; 10-in., \$2.00 each; larger specimens, \$3.00 to \$5.00 each, according to size.

NEPHROLEPIS SCOTTII. Fine plants, 6-in. pots, 50c. each.

NEPHROLEPIS BOSTONIENSIS (The Boston Fern). 6-in. pots, 50c. each; 8-in., \$1.00 each.

SMALL FERNS FOR FERN PANS

There is nothing that sells better during the entire winter than small ferns for fern pans. We have a splendid stock of extra strong plants in 2 1/4-in. pots in the hardiest and most useful varieties for this purpose. Our stock will be found very strong and very nice.

\$4.00 per 100, \$30.00 per 1000.

SURPLUS BULB STOCK

We offer what remaining bulbs we have at bargain prices. The only cheap thing about them is the price. The bulbs are of first-class quality and in perfect condition. Bulbs planted in December, and even as late as January, can be had in fine shape for Easter; and as Easter is late

this spring (April 19th), they can be planted later than usual. If you have not all the bulbs you want, this is the last opportunity to get them. We offer an exceptionally fine lot of hyacinths, tulips, and the choice varieties of narcissus at bargain prices. **Send for surplus list.**

WINSOR CARNATIONS

We have a splendid stock of strong rooted cuttings ready for immediate delivery. In order to get the best results from Winsor, it should be planted early. Now is the time to get gilt-edged stock. We have a splendid lot of cuttings ready for immediate delivery, and can also furnish strong established plants from 2 1/4-in. pots, fall propagations.

Strong rooted cuttings, \$6.00 per 100, \$50.00 per 1000.

GERANIUMS

New Varieties In New Varieties we make a special offer of one plant each of one hundred varieties, 1905 and 1906 introductions, for \$10.00. This is acknowledged to be the finest collection of New Varieties ever offered in this country. Coming as they do from such noted introducers as Brunt, Lemoine, Rozain-Boucharlat, and Cannell is endorsement enough that among them will be found represented the highest development of Geraniums at the present time, some of wondrous beauty in solid colors, others of the most exquisite combination of colors that defies successful description and would make grand acquisitions to any collection, and possess special merit of such sterling qualities that we are satisfied they are destined to become the standards in their several different classes.

Standard Varieties In Standard Varieties we offer an immense stock in prime condition for immediate shipment, in the very best sorts, at from \$2.00 to \$4.00 per 100. We will send one thousand, fifty each of twenty varieties, our selection, single and double, for \$18.50; five hundred for \$9.25.

Pelargoniums in a good assortment including such sorts as Galatea, Countess of Crewe, Purity, Countess of Warwick, Gloriosa, Tommy Dodd, etc., \$1.50 per doz., \$6.00 per 100.

Dahlia Roots We are booking orders for Spring or immediate delivery, whole field clumps at prices ranging from \$1.00 per doz., \$5.00 per 100 up; can still offer over 100 varieties. Send for list. We have a few thousand of mixed, all colors and classes, at \$35.00 per 1000.

JAMES VICK'S SONS, Rochester, N. Y.

"Quality is remembered long after price is forgotten." What Quality Means.

Quality means the best and finest types procurable in their respective classes. We go to specialists for our flower seeds. Our customers, the florists, the private gardeners demand the highest grade. We have no cheap catalogue trade. "Quality" may mean a little higher in price. "Quality" in fact, means "Quality" and we know that when you buy from us you get it, and our customers know it, too. Catalogues now in press; 40 pages. Write for one; it's free. We sell bulbs too.

Seed Trade Report

AMERICAN SEED TRADE ASSOCIATION

George S. Green, Chicago, Ill., president; M. H. Duryea, New York, first vice-president; F. W. Bolgiano, Washington, D. C., second vice-president; C. E. Kendel, Cleveland, O., secretary and treasurer; Leonard H. Vaughan, Chicago, assistant secretary.

The Massachusetts State Board of Agriculture at its meeting last week discussed the advisability of endeavoring to secure legislation which will bring about the inspection of seeds by state or national officials, who will guarantee their vitality at the time they are sold by the seedsmen.

IMPORTS OF SEEDS, ETC.—December 3.—Weeber & Don, one case seeds. December 4.—O. G. Hempstead & Son, one case seeds. December 5.—H. Frank Darrow, one case plants; McHutchison & Company, 10 cases plants; Davies, Turner & Company, seven bags seed; J. L. Hopkins & Company, 10 bushels seed. December 7 and 8.—E. F. Buckingham, one case flower seed; Ferd. Murgie, two packages seed; Maltus & Ware, 30 cases lily of the valley pips; McHutchison & Company, 57 cases lily of the valley pips; J. M. Thorburn & Company, 33 cases lily of the valley pips; Yokohama Nursery Company, 88 cases lily of the valley pips; Maltus & Ware, 22 cases garden seed, 103 cases plants, 13 cases trees and shrubs, two cases bulbs; J. M. Thorburn & Company, four cases plants, 30 packages grass seed; P. H. Petry & Company, one case plants.

Seed Trade Notes.

The general snowstorm we have been having, accompanied with the coldest weather so far this season, has practically put a stop to bulb planting. My fears that the Japanese bulb stock would not arrive in time to be planted this Autumn seem to have been well founded, as the first of the Japanese stock has only just reached us, and it is now too late to plant any large amount of it this Fall. It is always a disappointment to seedsmen and to customers when the speciousness and auratum lilies as well as the Japanese irises and other Japan bulbs do not arrive in time to be planted in the Fall. Carrying them over till the Spring not only entails extra cost upon the seedsmen, but adds a large item to Spring work; however, as our Japanese friends have not made their shipments this year sufficiently early, we can only make the best of an unfortunate situation.

I have during the last few days received further reports regarding the sweet corn crop, and am sorry to say that they are much more discouraging than anything that has gone before. That some varieties of sweet corn will change hands at wholesale at \$10 per bushel before the season is over, I think there can now be no doubt; and that many varieties will retail at fifty cents a quart seems assured. Good strains of Stowell's Evergreen and Early Crosby sweet corn are very scarce. Holders of good stocks can practically name their own figures.

An interesting sweet corn contract came to my notice this week wherein the grower had agreed that in consideration of ten cents per bushel, he (the grower) would deliver to his seedsmen customer the entire contract of sweet corn. In other words, each and every variety would be delivered to the seedsmen in full as called for in the contract. One of the items in this contract was 250 bushels of Stowell's Evergreen, and I think any of us would be glad to pay ten cents a bushel extra this year to re-

Stokes Standard Seeds.

I am a **MARKET GARDENER'S SEEDSMAN.**

Wholesale list ready soon.

Stokes Seed Store.
219 Market Street, PHILADELPHIA

ceive such a quantity of that sweet corn that would net us at least \$5 per bushel more than the contract price. I have seen a number of such contracts during the last few years, but as I do not believe them to be fair either to the seedsmen or to the grower for that matter, I most heartily disapprove of them.

As has all along been expected, garden peas have turned out very short indeed. Early Alaska would seem to be worth \$4 to \$4.50 per bushel in any quantity that it is possible to obtain them. The canning trade are eager buyers, and I think will pay more before they secure their requirements. The whole list of peas is, as I explained last week, being held at greatly advanced rates; but at this time it is the demand for canners' varieties, and particularly for Alaska, that is most urgent.

Appearances now indicate that our seedsmen as a whole have made a great effort during the past few months to well advance their catalogues in order that the same may be mailed very early in the year to their customers. I think the catalogues as a whole will be in the hands of customers much earlier than they were last season.

As regards seed novelties and specialties, while there do not seem to be as many as there are sometimes, still those offered will, I think, prove good sellers. I have already described some of the more prominent ones of our seedsmen; and there have also been published in *The Florists' Exchange* descriptions of the leading European seed novelties and specialties, so that I feel that this matter has been pretty thoroughly gone over.

In these days when the consumption of lawn grasses of all kinds is so enormous, I cannot but feel that any process that will cause more perfect lawns interests us all. If you are not already familiar with the worm-killer (which is also a fertilizer) being manufactured by the firm of Messrs. Carter, Dunnett & Beale, London, England, I think that you will do well to investigate same. Owing to an improved process and new machinery, this concern has produced a material, which, if applied at the rate of half a pound per square yard, will kill worms in golf links, lawns, croquet grounds, tennis grounds, and wherever else a perfect piece of grass is desired. It is practically impossible to keep a handsome piece of lawn where the soil is infested with worms, as the movements of the worms continually keep the surface soft, and this results in many bare spots continually appearing. I think another Spring this worm-killer will be offered by many of our leading seedsmen.

If it has not already done so, the advertising question should very soon receive our most careful consideration, and our plans should be arranged for the coming season's campaign. Speaking of advertising, I could not but notice last week in some of our prominent trade papers that one or more large advertisements were still running asking customers to purchase now for "Thanksgiving." Such an oversight is unpardonable, being not only a waste of money for the space used, but because of the example and idea of slackness which is very detrimental to any business, particularly to the horticultural trade, where the greatest exactness and care are necessary that the customer should feel every safeguard is thrown around the filling of his order.

We have now broken well into December, and every day that passes is bringing inquiries for catalogues and quite a few advance orders. Not a moment should now be lost to put everything in proper shape for the active season that is before us. It will only be a very few weeks until the opening of the season of 1903 is a reality. In my judgment it will be

one of the most lucrative seasons that the seedsmen of this country have ever experienced. V.

Awards at Jamestown Exposition.

Editor *Florists' Exchange*:

We notice in a recent issue of your valuable paper a reference to those firms that were granted awards at the Jamestown Exposition. We thought it might interest you to know in this connection that the Children's School Farm, a New York institution organized for the purpose of creating an interest in gardening among school children, had been awarded a gold medal at the Exposition and that the seed used had been supplied exclusively by

J. M. THORBURN & COMPANY.

European Notes.

The most miserable month of a miserable year has wound up like the darkey's holiday with "sunshine, snow and rain" and left seed growers and their crops thoroughly washed out and shipping almost at a standstill.

Red clover in the north and Lucerne in the south will yield no late crops, that much is certain. As regards the quantity and quality of the seed now in stock nothing definite can be said at present, but so far as Lucerne is concerned the result of recent threshings is to raise the value of good seed fully 25 per cent. Even at this advance buyers are far more eager than sellers for an entire clearance.

As regards vegetable seeds the demand keeps brisk for almost all lines. Beet, radish, the Italian onions, parsley and parsnip are easily sold at good prices. European varieties of onion are a drug in the market and prices have dropped fully 30 per cent. during the past three weeks. One reason for this is that owing to the absence of sunshine onion bulbs are not keeping well, and the rush to sell has caused such a drop in the price that gardeners are disgusted with the culture and do not order seed. There are two self-evident reasons why 1907 crop onion seed must be sold quickly, hence the rapid decline in the price.

The outlook for 1907 crops of brassicas is not encouraging. The American varieties of cabbage are always more difficult to grow than the European, and as the work of transplanting has been much later than usual, owing to the delayed harvest, very few of them are likely to survive. Turnips and rutabagas delight in moisture (up to a certain point) and, if no very severe frost occurs, may yet pull through.

Of beets and mangels it is too early to say anything definite, but as regards the former not a pound will be carried over, while, if advance orders already booked are to be filled in full, a record harvest will be necessary.

Flower seeds for the present season cause us much anxiety, asters in particular. It is to be feared that the germination of the seed of late varieties will not be strong.

The trade in nasturtiums is quite brisk, and the crop, except in the case of the yellow and variegated leaved varieties, is fairly good but not too plentiful. Sweet peas are even worse than last reported and dealers who offered at ruinous prices early in August are amusing themselves by buying in at fully 50 per cent. advance.

The list of failures in the European Seed Trade is rather a heavy one this year. It is not very difficult to determine the cause.

A Special Light Mixture of GLADIOLI for Florists

¶ You cannot duplicate the quality for several times the price.

¶ There are varieties in this mixture you would not sell for fifteen dollars per hundred.

¶ The vitality and power of multiplication is exceptional.

What Do You Think of This UNPARALLELED OFFER?

1908

ARTHUR COWEE, Gladiolus Specialist
Meadowvale Farm, Berlin, N. Y.

Dear Sir:

Herewith find \$_____ for which you may enter
my order for _____ thousand of your Meadowvale
Florist's Light Mixture to be shipped via ^{freight}_{express} about
_____ F. O. B. Berlin, N. Y.

This order was given by ^{me}_{us} and taken by you with the understanding that if given proper soil and cultivation, we can, after blooming this season (1908) conscientiously say we have not received full value ¹_{we} can, at harvest time, return the stock, together with its increase in bulbs and cormels to you via ^{freight}_{express} and you will refund the above amount paid.

If returned ^{freight}_{express} charges will be paid ^{me.}_{us.}

Name _____

Town _____ County _____

State _____

This order has been accepted and entered under the above Conditions.

Berlin, N. Y., _____ 190

¶ For forcing I can recommend it as being almost equal to the best named varieties generally used for that purpose.

¶ It contains named novelties of merit and hybrids bred especially to supply the needs of Florists requiring light colors.

HAVING for many years experimented extensively to the end of supplying a White and Light Mixture especially adapted to the Florist's trade, for Funeral and Decorative Work where light colors alone would be appropriate, I am now prepared to furnish my Meadowvale Florist's Light Mixture, which I can guarantee to contain the best quality obtainable in the world at the price. There is such a variation in Florist's Mixtures, as generally offered, that I do not wonder at the frequent disgust of the purchaser, and in my preparation of this stock I have endeavored to eliminate every variety with which the most critical Florist could find fault.

This Mixture was offered Spring, 1906, for the first time and over 500,000 were placed and not one complaint received, a sure indication that it was favorably received by the Florists. For this season, 1907-1908, it will be sold only by me and in lots of not less than 1,000 or more. Price \$15.00 per thousand F. O. B. Berlin, N. Y., cash with order, and will be sold subject to the conditions on above order blank.

This offer will hold good as long as the stock lasts and orders will be entered in their turn, although shipment may not be required until later.

When the stock is all sold, this offer will be withdrawn, without further notice, therefore do not delay and miss it.

May I not have the opportunity of demonstrating that I have a Mixture which, after growing one season, you would not part with for double the price paid? If so, fill out the order blank and send to me with remittance; I will sign and return duplicate to you.

Illustrated Catalogue of other collections, mixtures and named varieties will be mailed upon application.

NURSERY DEPARTMENT.

Conducted by Joseph Meehan.

AMERICAN ASSOCIATION OF NURSEYRMEN.

J. W. Hill, Des Moines, Ia., president; C. M. Hobbs, Bridgeport, Ind., vice-president; George C. Seager, Rochester, N. Y., secretary; C. L. Yates, Rochester, N. Y., treasurer.

TORONTO, ONT.—Brown Brothers Company, Limited, nurserymen, have increased their capital stock from \$75,000 to \$150,000.

VINEYARD, GA.—James D. Husted, well-known horticulturist and originator of the Early Michigan and Admiral peaches, died here recently, aged 78. He was a native of New York, lived about 15 years in Lowell, Mich., where he was engaged in horticulture, and moved to Georgia 30 years ago.

DISSOLUTION OF PARSONS & SONS COMPANY, LIMITED, Flushing, N. Y.—Friday afternoon, December 7, 1907, at a meeting of Parsons & Sons Company, Limited, held in the temporary office of the company in the Klemm cottage, Rose street, Flushing, N. Y., it was voted to dissolve the corporation, after which the meeting adjourned sine die. We reproduce from the Flushing Daily Times the following particulars concerning the firm:

"So far as finances are concerned, the closing of the business is not gratifying. Among the liabilities are an unsatisfied mortgage for \$21,000, held by the estate of Herbert Parsons, who was the son of the founder, while the visible assets, it was said, do not exceed \$2,000. It was Herbert Parsons who practically financed the nurseries during the closing years of existence.

"It was the dream of Samuel B. Parsons that the city would some time acquire the nursery property for a public park, and it is unfortunate that he did not live to see his wish gratified. He established the Kissena Nurseries in 1872, after dissolving partnership with his brother, the late Robert B. Parsons. Patrick H. Lawlor, now of 206 Barclay street, planted the first tree in the Kissena Nurseries, later became the superintendent, and a member of the Board of Directors, and remained in that capacity so long as the nurseries continued doing business. Mr. Lawlor's two sons, Theodore P. and Leo, were reared in the same business, and Theodore, who, as president of the new Flushing Nurseries, has practically succeeded to the business of Parsons & Sons Company, undoubtedly has a wider and more practical knowledge of the propagation, characteristics, and care of ornamental trees and shrubs, than any other man in the business.

"Scores of new ornamental trees and shrubs were introduced by the Parsons, among them the pink-flowering dogwood, Sargent's weeping hemlock, and many others. The Parsons were the only propagators of hybrid rhododendrons, oft-times grafting as high as 25,000 in a single season. The Parsons introduced and were the first to offer for sale the Japanese maples. They were also the largest growers of magnolias, hardy azaleas, and many other celebrated shrubs. Among the visitors at the Kissena Nurseries in their palmy days were many who came even from foreign countries to learn of the Parsons methods of propagation and culture.

"The higher development of these methods and the excellent results of the late Mr. Parsons' careful training are seen to-day at the new Flushing Nurseries, which comprise six and a half acres on the North Hempstead turnpike. Here Mr. Lawlor has all the splendid specimens which brought international fame to the Parsons, and in addition many new specimens which have been imported or propagated."

Ilex Cassine (Yaupon).

Although it does not as often appear in florists' supplies for Christmas as the common holly does, yet this species, *I. Cassine*, is not altogether unknown at that season. It is a beautiful holly, bearing pretty, red berries and possessing bright evergreen leaves; and it may be that it cannot be had in large quantities such as florists would require, accounting for the little of it seen North for decorative purposes.

Its common name is given in botanies as yupon, but collectors call it yaupon. Its leaves are small, not over an inch in length, smooth and not prickly as the common holly is. It may be that its foliage does not bear the ill treatment that that of the common holly does, and it is the foliage of the last named as well as its scarlet berries that makes it so much sought after for Christmas.

There is another evergreen holly native in the South, the *Ilex Dahoon*, making three species in all, and it, too, has red berries.

The common holly, *I. opaca*, is not confined to low ground, as the other two are. *I. Cassine* likes to be near salt water, while *I. Dahoon* is found on the borders of pine barren ponds and swamps through the South.

It is not probable that either of these, the *Dahoon* and the *Cassine*, would prove hardy North, though the former has been reported as wild in Maryland; but what bright looking ornaments both would ap-

pear if grown in pots and used for Christmas decorating!

There are many native shrubs with bright berries that could be so used, but while so many kinds can be had from Europe, already prepared for the purpose, there seems little disposition to work up our own.

Berberis Aquifolium.

Florists find the *Berberis aquifolium* very useful for Christmas sales and a great lot of it comes in at that season from Oregon and Washington, where it grows wild and where it is known as Oregon grape. It is better known as mahonia, its older name, and in the trade this is the name it is mostly sold under. Its green leaves of Summer become of a bronze color in Autumn, and as they change they are very pretty. Then, too, there is much of the true holly look in its foliage, and, like the holly, it is of a lasting nature. There are two sorts of it—one a variety of the other, the variety being of a somewhat procumbent habit, meriting its name, *repens*.

Besides its merits as "foliage" for Christmas, these herberries are fairly hardy in the Middle States. When grown close together where one shelters the other, they hold their foliage all Winter, as they do when in positions not too exposed.

In early Spring *Berberis aquifolium* displays beautiful racemes of yellow dowers in almost erect heads.

Ilex Verticillata, Deciduous Holly

Deciduous Hollies.

Besides three native hollies of an evergreen character, there are three deciduous ones—*Ilex decidua*, *I. monticola* (ambigua) and *I. verticillata*. Two of these grow North as well as South, to some extent, *monticola* and *verticillata*, but the decidua is more decidedly a Southern species, though it succeeds in the Middle States when in a sheltered situation.

These hollies are very attractive when well set with their berries in late Summer, Autumn and Winter, for some of them, *verticillata* for one, are usually much more crowded with berries than are the twigs of the common evergreen one, *I. opaca*.

In the North, the berries do not lose their bright red color until heavy freezing weather comes, while in the South the display is undiminished even at the close of Winter.

In the forming of festoons and wreaths for Christmas the berries of *I. verticillata* are often used when

those of the evergreen one are scarce, and only experts can tell the difference in the berries; and then the one used is a true holly, anyway.

What a pretty bush *Ilex verticillata* is in Autumn may be gathered from the photograph, herewith shown, of a small branch of it cut from a bush in late October. At that time its foliage was still perfect, but this feature does not count in its use when cut, as the foliage of these deciduous hollies quickly dries up when the branches are cut from the bush.

In the same way as evergreen hollies, not every bush of these deciduous ones are berry-bearing. In a lot of seedlings the risk is run of what they may be fertile or not, so in nurseries where propagation is practiced berry-bearing ones are grafted on common seedlings, not to run the risk of what the seedlings might be.

Not every one knows this deciduous holly under the name of *ilex*—nor even under its older one of *prinos*, for among collectors and dealers it is better known under the title of red Winter berry. It is abundant in Michigan and adjacent States, but our illustration is made from a photograph of twigs grown on a wild Pennsylvania bush.

Pruning Hollies.

The great demand made on our florists at Christmas for hollies would make possible the selling of large numbers of our native one, *Ilex opaca*, were they to be had of good shape, in pots or boxes, and

of the berry-bearing sort. The beautiful specimens imported from abroad every year show what can be done with the holly when one is so minded. These specimens are the result of several years of care. There is root pruning, branch pruning and transplanting; besides that, it is seen to at first that the plant in hand is a berry-bearing one, though often when it is a pistillate form berries are produced by fertilization. Whether or not such plants of our native holly, *I. opaca*, will ever be produced here remains for our folks to decide. Perhaps so long as the European holly can be had as readily as it can now no attempts will be made to grow along our own. The English holly has foliage superior to ours, but then it is not quite as hardy. In positions sheltered from the sun in Winter it may be said to be hardy at Philadelphia, especially when near the rivers. The leaves are of a lively green, while those of our native one are of a dull green.

Any one living near where the hollies are wild should select some plants showing berries and not over large. These should be dug around and all roots chopped off at not a great distance from the main stem—say, from 12 to 18 inches, according to the strength of the plant. At the same time prune back the branches well, looking to the forming of a good shape. A holly will stand hard pruning. In fact, a good severe pruning makes safe the transplanting of many hollies. After a year's growth fol-

lows the pruning of root and top, the trees may be dug up and potted and with ordinary care they will live.

But those who would go into this as a business would need to take more time than a year to produce such well-shaped and well-berried plants as those with which the Europeans supply us; but the hardness of the native one would be much in its favor.

JOSEPH MEEHAN.

THE CHRISTMAS TRADE this year promises to be up to its usual high standard. In preparing for it, get in touch with our advertisers, whose offerings appear in this week's number. They are all reliable firms, and can be depended upon to give satisfaction. Send in your orders early.

HARDY PLANT NOTES

Eupatoriums.

Last Spring my only stock of *Eupatorium coelestinum* (mist flower, or hardy blue ageratum or what is known by some as *Conoclinium coelestinum*) consisted of only a few rather poor plants in 4-inch pots in which they had been grown the previous Summer. Wishing to get the best results from them and to greatly enlarge my stock for future use, late in May I shook them out of the pots, freed them of all dirt and very carefully divided them to single stems with as much root attached to each division as it was possible to get. Then they were carefully potted into 2½ and 3-inch pots, while the strongest ones were carefully transferred to the open ground. Both lots soon commenced to grow rapidly, but seemed rather weak and spindling, so when they had made their second pair of leaves I pinched out the leader with the object of getting a good growth into the roots. The smaller plants were soon transferred into 4-inch pots, growing on apace. For the second time I adopted the pinching process on the lateral shoots formed from the first pinching, and in like manner later on I pinched them back again the third time. This caused the plants to assume a rather flat or partially prostrate growth, which was much more pleasing than the general stiff, upright growth that the plant usually makes; and when they came into flower during the month of September the growths were not more than 10 inches high. Usually, in good soil, this plant attains a height of two feet or more on simple erect stems. The result was a dwarf, stocky, spreading growth, which very much resembled a bed of well-grown ageratum; in fact, many times were they mistaken for ageratum both during their growth and flowering period.

As a hardy plant the flowers of this plant, grown in a natural way, are very useful for cutting and can be used in much the same way as ageratum, with the decided advantage of a much longer stem. Propagation is effected by division of the underground stolons. For commercial purposes these should be potted up in Spring and allowed to grow in 3 or 4-inch pots all Summer. They may be plunged in the open ground or in a frame where they will then need but little care. The advantage of this is, you have a nice ball of stolons, or roots, to offer then to a customer who is much more pleased than he would be were he to receive so many disintegrated stolons dug up from the open ground. My experience with this plant has been that soon after the tops die down decay sets in around the base of the woody stems and soon spreads out into the stolons, sometimes very seriously, making it almost impossible to dig up a presentable piece to send to a customer.

The Joe Pye weed, or *Eupatorium purpureum*, so often seen along our roadsides in swampy places in August and September, makes a splendid plant for the background of the border. When given plenty of room and a good rich soil it makes a very bold, conspicuous plant and is both exceedingly showy and attractive, especially when in bloom, with its pink or crimson flowers on large, leafy purple-spotted stems 6 to 8 feet in height.

Perhaps the best known and most useful member of this family is *Eupatorium ageratoides* or snake root. The white flowered form, which comes into bloom during August and September, produces its large masses of useful flowers on stems 3 or 4 feet tall.

Eupatorium serotinum is a rather strong, coarse-growing plant, which we sometimes think we can dispense with on account of its weedlike growth during Summer, but when Autumn comes and it produces its large masses of small feathery inflorescences we feel we can not readily do without such a useful adjunct for associating so beautifully with other flowers. Like the preceding one, we relegated it to a back but prominent position in our borders to stay.

There are several other species that have from time to time appeared in our borders and lists, such as *E. cannabinum*, a flesh or reddish colored form; *E. Fraseri*, white; *E. Kirilowii*, flesh or white, a very pretty thing, but not hardy. With the exception of the first-named they are all easily raised, either from seed sown in early Spring or from division in either Spring or Fall.

HERBERT GREENSMITH.

A New Experiment Station.

Editor Florists' Exchange:

Your readers will undoubtedly be interested in the fact that, through the combined efforts of the truck growers in the vicinity of Norfolk, Va., and the State Board of Agriculture, there has been established, just outside the city of Norfolk, in Princess Anne County, an experiment station devoted exclusively to the interests of truck growing. This station has been placed under the immediate charge of Professor T. C. Johnson, formerly of Cornell and of the West Virginia University. The station is located upon characteristic trucking soil of the region and embraces some 58 acres which will be improved and devoted to the cultivation of various truck crops, and the solution of the many problems involved in the fertilization, harvesting, marketing and improvement of such crops. Seven thousand five hundred dollars have been set aside by the Southern Produce Company for the purpose of equipping this tract with suitable buildings for conducting the work. The State Board of Agriculture devotes \$5,000 of its funds to the maintenance of the work, and the Department of Agriculture at Washington, and the State Experiment Station at Blacksburg, Va., both co-operate with the above named organizations in carrying on the work.

While no experimental work has yet been inaugurated, the ground is being improved and prepared

Eupatorium Purpureum

Photo by W. H. Waite

for the work of actual experimentation. It is hoped that as the Spring opens areas will be available for extensive fertilizer and variety tests, as well as the beginning of some systematic breeding work with standard vegetables.

This is a notable undertaking, in this respect, that it is the first experiment station to be organized in the United States exclusively devoted to the interests of truck growing of any locality. The organization is to be congratulated in having secured the services of a careful, conservative and well-trained man in the person of Professor Johnson, and all possible success is hoped for the undertaking. It is a new field of work and will, of course, present innumerable problems, a few only of which can be taken up and solved at once. It will be necessary to devote years of careful study and research to this industry which has sprung up and grown to such gigantic proportions in comparatively few years; that is, the many problems peculiar to itself which have never been touched upon by the regular experiment station workers of the country, and it is fortunate that this station has been established in a region so pre-eminently devoted to trucking as is the territory in the neighborhood of Norfolk and Portsmouth, Va.

Department of Agriculture, L. C. CORBETT,
Washington, D. C. Horticulturist.

The Holly Improved Circulators.

Editor Florists' Exchange:

On invitation of E. P. Holly, president of the Holly Steam Engineering Company of New York, attended a test of one of the firm's improved circulator machines, in the establishment where they are being made in Boston. A proper description of the machines would take up too much space, but, briefly, the machines are built to meet hard service, being constructed on proper lines, the material used being of the very best that can be had. The No. 4, with which the test was made, has a double propeller on a shaft composed of Fort Hill bronze and running in Phosphor bronze bearings, two of the hardest bronze metals in use, making the frictional resistance almost nothing. By a swing attachment of the No. 4 top, the machine can be put at any angle horizontally. An adjusting device for horizontal alignment is one of the great improvements, a right and left screw being used to adjust the shaft for the outboard bearing or for the motor. A three speed pulley attachment is another device to suit weather conditions and decrease the amount of power used. The No. 4 is direct-connected, making 2,000 revolutions per minute and discharging 450 gallons at the same time.

In 1812, Davy, in his Elements of Chemical Philosophy, told us that "The immediate cause of heat is motion." In 1907 we have found that to be true; but don't wait for the natural law of gravitation to bring about the motion when by assisting an passing the water quickly over a heated surface the heat is generated more quickly through the whole mass. This is what the circulator for greenhouse heating was built for.

To return to the test. The machine was set up on the floor, both ends of the machine being 12 inches diameter, one end being bushed down to 3 inches and connected to a tank filled with water, the other end bushed to 2½ inches and rising vertically eleven feet, crossing over and dropping again to the tank. I may say this was a pretty hard test to which to put the machine. Electric power not being convenient, an anchor was put on the end of the shaft and a belt to the shafting for power. The machine proved for the inventor its ability to handle water quickly and well, a steady stream from the 2½-inch pipe running into the tank at the time.

A still harder test for steam plants was made. The water in the tank was lowered so that it just showed at the bottom of the 3-inch intake. The plug, where the thermometer is attached, was taken out to show that the water was only in the propeller cylinder. The machine pumped over the same course in one minute, actual time, one glass or one half pint of water. This, I consider, the hardest test to which a machine could be put.

I always have thought, and an expert some time ago told me, that the machine in steam plants would run itself to pieces after the return water was pumped into the boiler; but neither he nor I had thought that the propellers would still be working against the water, which would be from the boiler to the machine; and any small condensation that came along in the return pipe would be picked up and passed into the boiler. Thus, the machine working under adverse conditions proved to me that my theory and that of the expert before mentioned was wrong.

Two types of these machines are being built, Junior and Standard; the latter with a controlling device, the former without the device and, of course much cheaper. But for up-to-date greenhouse use I think the one with the controller the better.

I think Mr. Holly has earned his laurels, not only on paper, but also in the practical workings of his machine. He is one of those inventors who make little fuss about what they do, but he does things well, as can be proved by the results he has already attained.

R. T. MCGORUM.

Natick, Mass.

NEW JERSEY FLORICULTURAL SOCIETY.

At the annual meeting held in Elks' Hall, the election of officers resulted as follows: President, Malcolm MacRorie; vice-president, Henry Halbig; secretary, Orson A. Miller; treasurer, Wm. Reid; members of arbitration committee, Albert F. Larson, Phillip Cox and Walter M. Gray. It was decided to hold a smoker on the night of February 7, 1908 and an invitation to attend same will be extended to neighboring societies.

The exhibits included standard chrysanthemum plant from Peter Duff; carnations from Wm. Reid chrysanthemums and Paper White narcissus from Max Schneider, and vegetables from A. T. Caparn. Orchids were shown by Thomas Jones, Julius Roehr Company and Jos. A. Manda. A large vase of the new rose Mrs. Jardine was exhibited by Robert Scott & Son, Sharon Hill, Pa., receiving a first-class certificate.

H. HALBIG, Secretary.

Cultural Directions

Are leaflets written by practical men especially for the use of amateur customers.
If you have a counter trade, either in plants, seeds, flowers or bulbs, you should have a supply of these leaflets on hand to present to your customers when they seek cultural information about their purchases.
(The leaflets embrace over forty subjects.)
We can supply them at \$2.60 per 1000, or 800 for \$1.60, and can make a reduction of these prices on large quantities.
At a small extra cost we can put your imprint on each leaflet.
Try a thousand and see what a help they are in selling goods.

CALENDARS RECEIVED.

Arthur I. Vesceilus, Paterson, N. J., is the first in line with calendars for 1908, which he is distributing. The calendar is in four pages, tied with scarlet ribbon, each page containing three months, and adorned with copies of paintings by Paul de Longpre. The first three months are illustrated with a spray of white lilacs and violets, the second with a bunch of American Beauty roses. Two Summer months and the first Fall month have marguerites and goldenrod as the appropriate illustration and a bunch of deep red poinsettia in bloom are the flowers for the cold weather days on the calendar.

FIRMS WHO ARE BUILDING.

WOBBURN, MASS.—Adam Foster is making preparations to build two more new greenhouses on the land he recently purchased.
SIMSBURY, CONN.—Miss M. Bullock, who recently bought the Frank Alford place, is erecting a greenhouse and will make other extensive improvements in the Spring.
NEW BEDFORD, MASS.—Business is very quiet here just now. All the florists report a very satisfactory Thanksgiving trade. Prices were fairly good with an ample supply of flowers. Carnations are now selling at from 50c. to 60c. per dozen retail; roses, \$1.50 per dozen; violets, \$1.50 per hundred retail. Paper White narcissus have made their appearance; they sell at 50c. per dozen retail.
H. A. Jahn is cutting some fine flowers from his new carnation seedlings; he has put his white on the market, under the name of the Lloyd. Wm. Mosher is cutting some fine violets at his new place on North street.
The regular meeting of the Horticultural Society was held December 9. The topic for discussion was "Christmas Decorations," by David McIntosh, secretary of the Newport (R. I.) Horticultural Society.
Peddlers of Christmas green have made their appearance here.

CARNATIONS

Routed Cuttings

JACOB KOL, EAST NUTLEY, N. J. Walnut Street and Avondale Road

CHANGES IN BUSINESS.

AUGUSTA, ME.—Z. D. Wiles has opened a branch store on State street.
SPRINGFIELD, MASS.—Henry Barton is removing his place of business from the east side to the west side of Elm street, where he will have greater facilities for his increasing trade.
HOWELL, MICH.—The Howell Greenhouse Company has been incorporated. The incorporators are Myra A. McAfee, Nellie R. Chamberlain, and Newell L. Chamberlain. The amount of the capital stock is \$10,000.
MT. TABOR, ORE.—L. G. Pfunder has sold his greenhouses and stock to Rahn and Herbert and leased the ground for a term of years. Both are well known in Portland. They will grow plants and cut flowers for wholesale and retail trade.
NEW YORK.—The Sheridan-Oest Company, has been incorporated to engage in horticulture, vine culture and agriculture in Cuba; capital, \$100,000. Incorporators: Alfred J. Oest, 130 Hewes street; John R. Sheridan, 837 Gates avenue, both of Brooklyn; Lester S. Abberley, 220 Broadway, New York.

ROSES

The season thus far has been a good one for the grower, so far as the weather conditions are concerned, the plants producing fine stock very freely. Principally, perhaps, on account of the financial flurry, prices have ruled very low, but the tide is bound to turn soon.

It is very easy to know about what the crop will be for Christmas, but it would be folly to try to rush the plants in order to get a few more buds, thus weakening the plants and injuring the prospects for the early months of the new year, which are really the grower's harvest. Still a few degrees rise in the temperature on bright clear days, if done gradually, will not harm the plants, but the night temperature should be kept near normal.

With an abundant supply of roses in sight it is to be hoped no grower will resort to the ancient custom of "pickling." Blooms that are kept more than 48 hours before being shipped in most cases have lost most of their substance and indirectly injure the grower, because the purchaser of such stock seldom buys again. Then a few days before December 25 the stock could be disposed of at a fair price, while on Christmas Eve there is a lot sold at a sacrifice.

Propagating will soon again demand our attention, therefore some fine sharp sand should be procured and either placed at once in the bench or, where this is as yet unavailable, the sand can be kept in some place free from dirt. A rather coarse, clean sand is preferred, as in it the cuttings make much stronger roots than in sand of finer texture.

The manetti stocks will soon be arriving and where grafting is followed these should be now procured, potted, well-watered and placed in a temperature just above the freezing point. Here they can remain until wanted. Stocks of about 1/4-inch diameter are most desirable; pot in 2 1/2 or 3-inch pots, the latter preferred.

PENN.

TWO YEAR OLD

Everblooming Roses

Own Roots

THESE are strong well-branched plants. They have been potted for some time and are well equipped with roots. Packing can be done very light and they will carry safely to any part of the country.

AFTERGLOW

Bright Rosy
Cerise Pink

The highest scored seedling at the Toronto Meeting of the A. C. S.; winner of the Craig Cup at Philadelphia, for best seedling; and has scored 91 points at quite a number of prominent cities. It is a very healthy and vigorous grower, early and continuous bloomer, and the predictions are that it will take the place of Lawson. Afterglow has been grown for the past season—and is doing universally well—by the undersigned, by whom it is offered. Orders now booked to be filled in rotation, for well grown, well rooted cuttings at \$2.00 per dozen; \$12.00 per 100; \$100.00 per 1,000.

A Criticism of Critics.

Editor Florists' Exchange:

The two anonymous censorious scribblers, who, in your last issue, page 753, and in a style peculiarly like that of Job himself, find fault with matter appearing in the columns of one of your Western contemporaries are to be commiserated with. "Hues" evidently knows as little about color in flowers as "Common Sense" does of color in fruits, for he is unable to give us any of his own ideas, merely quoting what others say and assuming that one must be "much nearer the mark" than the other, which is, at least, open to question.

It is pleasing to note that "Common Sense" knows that *Ampelopsis japonica* and *Rhus toxicodendron* have no relationship, even though a writer in a British trade journal evidently labored under the impression that they were. He continues: "What is said in the 'Nursery News' of the same paper regarding the *Crataegus crus-galli* berries being of a 'bright red color' is far from the fact; at least, I think the hawthorn named the least worthy of all in that respect, the color of the berries being a very dull red."

Bailey's *Cyclopedia of American Horticulture* says of this *crataegus*: "A very decorative species of distinct habit; handsome in bloom and with showy bright red fruit, remaining on the branches often until Spring." Nicholson's *Dictionary of Gardening* calls the fruit "scarlet." Ellwanger & Berry, who are perhaps as reliable a firm of nurserymen as any in America, call the fruit "bright red" in their catalogue, and I could quote others if required. As I write this note, a glance through the windows of my office shows a specimen of this fine hawthorn brilliant with fruit. "Hues" should hand over his box of paints to "Common Sense," for he evidently needs them much more than "Phil"; he should know what a color is, not think it "a very dull red."

From what issue of your paper did the writer of the article on "Protecting Evergreens" in the *Florists' Review* pick up his knowledge?

North Easton, Mass. W. N. CRAIG.

Registration of a Hydrangea.

"The ex-secretary of the National Society, who is also the editor of our Boston contemporary (accent on the last five words)" protests in his paper that we are "scolding" him because we had the temerity to refer to S. A. F. O. H. registration methods generally and the recent hydrangea case in particular; and he seems to regard as very important, in connection with the latter affair, the fact that in our recital of the matter we overlooked the publication in our columns of an illustrated article bearing the title, "Hydrangea Arborescens Alba Grandiflora—the Snowball Hydrangea."

We had not overlooked the fact to which our esteemed contemporary calls attention; and no doubt the discovery of it by himself affords him a good deal of pleasure in being thus enabled, temporarily, to draw attention from and cloud the real issue.

By way of explanation (not as an excuse) of the appearance in *The Florists' Exchange* of the illustrated article referred to, we would state that the manuscript and photograph were sent to this office by one who is regarded at all times as a very careful writer, and the title of the article was allowed to stand as furnished to us, because we had in our possession at the same time, the official registration entry of the name, sent us by the secretary of the S. A. F. O. H. We considered this sufficient "authority" for the use of the appellation; and if there has been any "falling into a pit," it has been because we were following an unreliable guide. It is, however, some comfort to us to know that we were in good company, as the "editor of our Boston contemporary" (don't forget the accent) was floundering in the same excavation simultaneously with ourselves. (See *Horticulture*, page 53, issue of July 21, 1906.)

But we must confess that we fail to see wherein the publication in our columns of the article in question assists the "Brother Registrar" of the S. A. F. O. H. in his present plight.

However, adjustment and not useless and foolish recrimination is now in order; and if the S. A. F. O. H. is to maintain confidence in its registration and nomenclature department, immediate steps should be taken by the society to settle definitely the matter in dispute. Toward this desirable end we again urge that the "new" name be withdrawn by the old and reliable firm registering it, thus setting an example in this respect tending to smooth working all around.

Getting Together.

The New York Florists' Club at its meeting on Monday evening last had under consideration the subject of closer relations with the Horticultural Society of New York. Each of these organizations, working along its own particular lines, has been doing considerable good work, but it is felt that by a combination of endeavor something can be accomplished that will be representative of the horticultural interests, and of which they are worthy, in the Metropolis of the United States and vicinity.

The result of a recent conference between committees of the two associations referred to was a tentative proposition on the part of the Horticultural Society to inaugurate an associate membership which will allow the New York Florists' Club as a body to become affiliated with the society as associate members, the club paying one dollar per head.

The Horticultural Society, as explained by its secretary, Leonard Barron, is distinctly an educative body; its membership is largely a sustaining one. It has the support of many of the wealthy people of New York, as well as many proprietors of country estates. It holds meetings monthly and gives two or three exhibitions a year, but so far the latter have not received the general support of the trade in this vicinity. Some of the best work done by the society has been the instigation and carrying out of two important horticultural conferences in the city, one on "Plant Breeding," the other on "Plant Hardiness and Acclimatization." In fact, as Mr. Barron said, the stimulus given to plant breeding in America in these days can be attributed to the success of the conference on that subject promoted by the Horticultural Society of New York. The society also acted as host to the American Peony Society on the occasion of its meeting and exhibition in New York.

Mr. O'Mara put the matter in a nut-shell at the meeting on Monday night when he stated that the best exploitation of horticultural art comes through exhibitions. Now, it seems quite feasible that by unity of endeavor on the part of the two organizations named, New York could give flower shows that would entitle her to take her rightful position in the horticultural world along that particular line. It is in this respect that, we think, the greatest good will proceed from the merging of the two bodies. The moral influence that would be imparted by the Horticultural Society in connection

with such shows would be considerable, having in mind the status of the society's membership. For after all is said and done, the fine exhibitions given by the New York Florists' Club in the past have been regarded more or less as trade ventures, both by the press and the public, and have suffered accordingly. It is, therefore, on the common ground of holding flower shows that, we believe, the blending of energies by the two societies can accomplish the most, and New York certainly needs some stimulating power with respect to exhibitions.

The position taken by some of the speakers at the meeting referred to in regard to the funds of the club being applied to the purpose of securing associate membership in the Horticultural Society was a quite natural one, and it may be that some other arrangement can be made than the one now tentatively proposed looking toward the closer linking of the two bodies without any monetary expenditure by either. At all events, the co-operative movement is an excellent one, and should, if possible, be pushed to a conclusion that will be satisfactory to all the parties concerned.

Reflections on Current Topics.

MR. EDITOR.—I have at last finished my protracted reading of the several reports of the recent S. A. F. O. H. convention held at Philadelphia. Nothing of any great moment to the florist trade seems to have been accomplished at the meeting. The docking of the tail that, judging from subsequent correspondence arising out of your editorial on the subject, wants to wag the dog, appears to have injected a little life into the proceedings, and the society has now got nearer to its original designation, which is a good thing. It is a name of which no one need be ashamed, and has stood the test of two decades with credit to itself. Then why a this wrangling concerning an honored and respected cognomen? It is worthy of remark that the president had nothing to say in his address about the proposed change of name of the society, and here he displayed greater wisdom, I think, than he did in his closing remarks regarding the bowlers and their influence on the organization. I hope the private gardeners and other "ornamental" horticulturists are now happy, relieved of their descriptive character in the society's title.

* * *

There was one organization, perfected at Philadelphia, in the work and scope of which I am greatly interested. I refer to the Ladies' Auxiliary. It is a pleasure to see the girls assert themselves in the way they are doing in this respect. Everyone knows the influence that the women folks exert in the conduct of the home—at least, I do; and am just wondering how far that influence will extend to the S. A. F. work. Will "closer relations" be the order of the day? Just imagine the effect the women's votes would have on an election of officers! The antiquated candidates, unless exceptionally attractive, like Carmody, would have no show—and by the way, this would put such old fogies as John Birnie and myself out of the running. Youth and beauty would be the factors that told. I notice the ladies showed wonderful sagacity in providing all the offices considered essential to progress and harmony in their organization. And judging by the postprandial remarks of the S. A. F. president, the girls appear to have had something to do with retaining the title of the national society, which proves that they had heads more level than eleven, at least, present, and a few more absent, male members. My own opinion is, that the acquisition of the Ladies' Auxiliary by the national society, would be a splendid thing—in some ways; for example, additional membership, helpful suggestions, especially in the line of entertainment, and as a matter of course, more talk; only I hope that none of the latter would require to be expunged from the records, as was the case with the masculine performers at Philadelphia, according to reports.

* * *

I notice that John Birnie, as usual, goes analytically into Brother Cameron's now famous letter. It is astonishing how much of value besides venom, John discovers in that wonderful epistle, and I for one am obliged to him for clarifying what never at any time was an obscure presentation. Birnie, however, refrained from touching on the most vital point in the letter in question—the Scotch phase injected into it. I presume he does not like to be classed among those who have forgotten their Shorter Catechism—John G. Esler will please note—although Burns, when in his bacchanalian vein, and probably Scott, in his adoration moments, appear to be at John's tongue-end, when suitable occasions arise for a display of his familiarity with these classic writers. Birnie's knowledge of the Scriptures has often been exemplified in your columns. And now we have a taste of his acquaint-

ance with Linnæus and his system. It will come rather hard on the admirers of this "great man," to be informed that their idol's work is now obsolete. This statement of Birnie's convinces me of the correctness of my attitude, that only those whose labors endure should have monuments erected to them.

Another revelation of Birnie's is that the private gardeners sell through New York commission houses, products inferior to those of the commercial florist. This shows that the backing of wealth—and a craving for more, for, of course, the proceeds of the sales of the low grade flowers go to swell the already large bank accounts of the gardeners' employers—has nothing to do with turning out good stock; and would lead us to infer that to do things well, one need not be out of the class fairly well described by the proverbial turkey of

JOB.

Horticultural Schools and Experiment Stations.

By Dr. A. C. True, Director of U. S. Office of Experiment Stations.

Read before the Congress of Horticulture, Jamestown Exposition, Norfolk, Va.

In the United States education and research in horticulture are mainly carried on in connection with the State agricultural colleges and experiment stations and the United States Department of Agriculture. Some horticultural work is done by all of the sixty experiment stations in the continental United States and in Alaska, Hawaii, and Porto Rico, except in the State of Wyoming, whose station is located more than 7,000 feet above sea level and has thus far undertaken work on only a few restricted lines of plant production. As reported to the Office of Experiment Stations for 1906 the stations employed 101 horticulturists. The station work in horticulture covers a very wide range. It includes all branches of horticulture and a great variety of horticultural plants, both in the greenhouse and in the field. It ranges from an attempt to select and develop plants suited to arctic conditions, as in part of Alaska, to experiment with mangoes, cacao, coffee, and numerous other tropical plants, as in Hawaii and Porto Rico. Practically all kinds of horticultural plants suited to temperate and semi-tropical conditions are receiving some attention. As regards its character, the work varies from scientific research of a high order on fundamental problems, for the determination of general principles of underlying causes, to the simplest practical tests of varieties and cultural methods. In addition, our stations are doing a considerable amount of work in chemistry, botany, vegetable pathology, and anatomy directly relating to horticulture.

All but six of the stations are organized as departments of the agricultural colleges and are thus brought into close relations with, and in fact are usually in organic union with, the horticultural departments of instruction in these colleges.

The methods and results of station horticultural work are therefore easily and naturally brought to the attention of students of horticulture in these institutions and many of these students have some participation in the station work. The progress of agricultural research in horticulture in foreign countries, as well as in the United States, is systematically reported every month to our horticultural investigators, teachers and students through the Experiment Station Record so that on its information side at least there is little excuse if instruction in horticulture in this country does not keep pace with the progress of horticultural research throughout the world.

Extent and Scope.

Practically all the agricultural colleges give some instruction in horticulture. The extent and scope of his instruction varies greatly in different institutions. We have yet at least one living example of such a monstrosity as a professor of agriculture, horticulture and botany, and in a number of colleges, and even in University, one man has plenty of room to recline at full length on the settee of two such vast subjects as horticulture and forestry. But we are doing better than we used to in this respect, and in recent years the general movement for the differentiation and specialization of agricultural subjects and instructors has affected and greatly benefited horticultural courses in our colleges.

Fourteen colleges announce four-year horticultural courses in connection with which an effort has been made to systematize instruction in horticulture and coordinate the work in this subject with that in other subjects in the curriculum so as to make a more or less satisfactory technical course.

In addition, several State universities have broad elective courses and offer a sufficient number of courses in various branches of horticulture to enable the student to arrange quite thorough technical courses and even to specialize to a considerable extent in some horticultural line to which he proposes to devote himself as a profession.

In some of the colleges the course which horticultural students must pursue in seeking a bachelor's degree is prescribed during two or three years, and electives are offered in the third and fourth year in such a way as to enable the student to specialize in horticulture at least to a certain extent.

Short courses in horticulture are offered by 19 colleges. These courses vary in duration from two years to two weeks.

At the University of Illinois, where the elective system prevails, 29 courses are offered under the head of horticulture, besides a somewhat elaborate professional course in landscape gardening. Five of these courses are of a general and somewhat elementary character, 19 are for advanced undergraduates and graduates, and five are exclusively for graduates.

Among the special courses in this list are those in spraying, viticulture, nut culture, evolution of horticultural plants, experimental horticulture, amateur floriculture, and landscape design. Two courses in forestry are also included under horticulture.

The horticultural faculty proper includes one professor, three assistant professors, and one instructor. There is no professor of horticulture, but a professor and assistant professor of pomology, assistant professor of olericulture, assistant professor of landscape gardening and an instructor in floriculture. The professor of botany and two field assistants in pomology also take part in the horticultural instruction.

Cornell University offers 13 courses in horticulture and the horticultural faculty consists of one professor, one assistant professor and two instructors.

The University of Missouri offers nine courses, given by one professor, one assistant professor, and two instructors.

Michigan Agricultural College offers 17 courses (two of which are especially for women), given by one professor and four instructors.

Massachusetts Agricultural College offers nine courses, given by one professor and three instructors, and is making special effort to develop work in landscape gardening.

The University of California, with a horticultural faculty of two professors, two assistant professors, and one instructor, offers eight courses, two of which are for graduate students.

The University of Ohio and the Texas Agricultural College, with one professor and one assistant professor, each offers thirteen courses in horticulture.

While there are certain advantages, as regards the higher lines of work, in the organization of horticultural courses in connection with colleges and universities, the instruction in such institutions will inevitably be largely of a theoretical and severely technical character. It should, therefore, be supplemented by the establishment of special horticultural schools in which young men and women may be trained for the practical business of horticulture. Some attempts have been made to do this in this country, but we have not as yet any horticultural schools of this character which will compare with those at Ghent and Vilvorde in Belgium, or the National School of Horticulture at Versailles, France.

Work of Station Horticulturists.

The station horticulturists are doing a large amount of useful work and they enjoy in large measure the confidence and esteem of practical horticulturists. With the increase of the resources of the stations they are getting better facilities for work, and are enabled to specialize more and to undertake more substantial enterprises. They are now giving more attention to problems connected with a broader organization of their work and with the conduct of more fundamental investigations. On the one hand they desire to cover more completely the field of horticulture and on the other to establish the practice of horticulture more securely on a rational and scientific basis. To accomplish the first of these objects, the necessity for more workers and increased specialization is apparent. To attain the second there will be required the multiplication of more thorough investigations and the acquirement more largely of the scientific spirit and attitude.

A Few Suggestions.

Besides the special studies made by individual workers there should be a broad inquiry, preferably by some organization of horticulturists, with a view to determining in a general way the scope and limitations of scientific horticultural work. In other words, there should be an organized effort to define and establish a science of horticulture, differentiated from, but indissolubly linked with the practice of horticulture. This is all the more important because the great body of practical horticulturists embraces more intelligent and progressive men than any other great group of workers in the general field of agriculture. I have lately heard of one of our leading scientific horticulturists expressing his difficulty in keeping pace with the professional advancement of practical horticulturists, and doubting whether there were any subjects to be discussed among scientific horticulturists which

might not be just as well discussed in assemblies of practical horticulturists. I do not believe that he expected to be taken too literally, but there is food for thought in this remark.

(To be continued.)

Officers-Elect N. Y. Florists' Club.

(See portraits, page 788.)

PRESIDENT-ELECT CHARLES B. WEATHERED, was born in New York City on December 11, 1859, and is the son of the late Thomas W. Weathered. He was educated in New York and in Germany where he was graduated from the Volksschule, Bremen. He took a course in engineering and later became associated with his father in the manufacture of greenhouse boilers and the erection of greenhouses in 1878, in which work he has continued ever since. The business of the firm is now carried on in Jersey City under the style of Weathered Company.

Mr. Weathered is a charter member of the New York Florists' Club, and was its treasurer during almost the whole of its existence, until last year, when L. E. Wheeler was elected. Mr. Weathered stands very high in the esteem of the members, and has been a hard worker for the welfare of the organization. When he states that the same interest that he has taken right along will be continued, the success of his administration during the year 1908 is assured.

VICE-PRESIDENT W. E. MARSHALL was born in Edinburgh, Scotland, in 1872, and has been for 20 years connected with the seed and nursery business. He served his apprenticeship with John Downie of Edinburgh and afterward was employed by the agricultural seed house of McClure & Company of the same city. Since his arrival in this country he has been employed as greenhouse assistant under his uncle, Thomas Emerson, Staatsburg, N. Y., and for the following 10 years has filled in his time in the seed houses of Peter Henderson & Company, J. M. Thorburn & Company and Weeber & Don, New York. He is now head of the firm of W. E. Marshall & Company, dealers in seeds, plants, bulbs, etc., at 146 West Twenty-third street, New York, which business he started almost five years ago, his sole partner being A. E. Wheeler, who is also well known to the New York seed trade.

TREASURER-ELECT J. K. ALLEN was born in Wippany, Morris County, N. J., and received his educational training in the Morristown schools. Subsequently he was engaged with Joseph Towell, florist, at Paterson, N. J., for several years. In 1882 he embarked in business at Garfield, Passaic, N. J., as a florist and horticulturist. During the past twenty years he has been engaged in the wholesale cut flower commission business in New York City, where he has built up a large trade, due to his energy and ability combined with fair dealing and integrity.

While he has devoted his time mainly to his business, he has also taken an active interest in public affairs in the town of Kearny, N. J., where he resides. He is a member of several societies, among them the F. and A. Masons of Arlington and the Royal Arcanum. He has served on the Board of Education and is at the present time a member of the Free Carnegie Library commission. For seven years he served in the Kearny fire department, holding responsible positions at various times in that organization.

It is safe to say that the finance department of the New York Florists' Club will be directed on conservative and business principles by Mr. Allen. He has been a member of the club 17 years, and is also a member of the S. A. F. O. H.

SECRETARY JOHN YOUNG needs no introduction to our readers. His re-election to the office he has filled so acceptably for so many years speaks volumes for his ability and faithful service.

Trustee E. V. Hallock, Queens, N. Y., is well known to the seed and florist trade as a dealer in bulbs, etc. W. B. DuRie is a plant grower with an establishment at Rahway, N. J. A. J. Rickards is a member of the seed firm of Rickards Brothers, New York, and A. J. Guttman is a wholesale florist in this city.

National Flower Show Premiums.

The premium list for the National Flower Show to be held in Chicago in the Fall of 1908 is now undergoing final revision. Suggestions regarding the same, as to premiums to be offered, rules and regulations to be adopted, and other matters of the kind, are requested. Such suggestions, however, should reach the undersigned within ten days from this date in order to be considered.

W. N. RUDD, Chairman Premium Committee.
Morgan Park, Ill.

AMONG THE GROWERS

Anton Schultheis, College Point, L. I.

Considerable preparation has been made for Christmas trade at the establishment of Anton Schultheis, College Point, L. I., and a visit to the green-houses at this season well repays any one interested.

A house full of *Erica fragrans* is to be seen, all the plants being in full bloom. In size the plants

upon the stock as far as size is concerned. The ardisias are fine and shapely, well berried, and have been grown in such a manner that they have reached the necessary point of perfection without checking.

Azaleas are to be seen in one house wholly devoted to them, in the pink of condition. Many pyramidal plants appear to be unusually perfect in form. A novelty of the color of Mme. Van der Cruyssen, and Simon Mardner, are the varieties flowered. A house of *Cyclamen persicum* is a beautiful sight, the plants well flowered and the flowers long stemmed; and in the same house is noticed a nice batch of *Primula obconica*. Other houses are devoted to araucarias and dracenas, the latter including some well-colored *D. terminalis*; *Begonia Gloire de Lorraine*, and Jerusalem cherries well fruited. Some fine pans of poinsettias were also observed.

Mr. Schultheis is rather fortunate at this season to have a house of *Cattleya Trianae* in good cut. The plants are of good size and profusely flowered. There is also a house of gardenias in good crop.

Combination pans of plants are again a feature at this establishment, and a handsome stock is shown. Crotons, *Dracena terminalis*, small kentias, Whitman ferns, marantas, *Asparagus plumosus* and, of course, poinsettias, are used largely in the make-up of these pans. Another attraction is a cool shed containing a large group of holly pyramids, exceptionally well berried, running from 5 to 7 feet high.

Hollies From Seed.

Holly berries, native, foreign and the deciduous kinds, will soon make their annual appearance again, if not on trees in our grounds on imported twigs. Those who wish to raise seedlings would find the commission houses good places from which to obtain a supply of seeds.

The usual mode of preparing the seeds is to mix them with sand, first sifting it, letting them lie in this state long enough to well soften the pulp. They are then washed free of pulp and again mixed with sifted sand, placed in a box and allowed to remain there until the Autumn following, when they should be sown in a bed outdoors. When Spring comes the plants should appear.

There is no telling whether seedlings will be berry-bearing or not. Some nurserymen graft or bud the berry-bearers on seedling stock so as to be sure of having what they want. Grafting may be done on potted plants indoors in Winter, or on outside plants in Spring. Budding is performed in Spring or as soon as the bark will part to admit the bud. Hard wood buds set in the nature of a graft in Spring are often successful.

The English holly is worthy of appearing in every

garden. It is a beautiful object, more so than our own, having shining green foliage.

When in a sheltered situation and yet one where its wood ripens well, this holly is hardy about Philadelphia.

Many of the plants sold for Christmas use could be utilized by planting them in one's grounds when Spring came.

North of Philadelphia the *Ilex cornuta*, a North China species, is hardy, and it is in every way a beautiful plant, having the true "holly" leaf, and produces red berries of great size. This species survives even at Philadelphia when in a sheltered position.

*Ilex Aquifolium*

Grower, A. Schultheis, College Point, N. Y.

run from those in small pots to specimen plants in 12-inch pots and even larger. Mr. Schultheis thinks he never had a finer lot of these popular Christmas plants.

Another house is filled with Otaheite oranges and *Ardisia crenulata*. The orange plants are exceptionally well fruited and cover a range of sizes in bushes and standards to meet almost any demand

*Erica fragrans*

Grower, A. Schultheis, College Point, N. Y.

The Use of Sand in Planting.

As an adjunct of the packing house and of the cold storage house everyone having the package of trees and shrubs to do knows the value of sand; it would in fact be a very great hindrance to the work of the nurseryman and the shipper could they not procure it. For the temporary holding in of stock, whether for the purpose of present shipment or for a period some months hence, sand is the one necessary article to ensure the success of the operation.

But it is rather aside from this line of use that these words are penned. It is more to call to mind the great value of sand in the planting of trees and shrubs. Everyone knows it has been impressed on him always how important and actually necessary it is that when planting a tree the soil should firmly clasp the roots to be successful. And everyone knows, too, the hard work he has had in ramming in the soil to bring about this close contact of soil with the roots. Well, if a heap of sand be handy and used for the first covering of the roots, there need be no hard ramming to get the roots and it in contact. It will find its way into all interstices, clasping every root the tree has, doing its work better than any other material that could be used. If in addition to the sand a bucketful of water be thrown in when the roots are well covered with the sand, it will carry it just where it should go. In the case of small trees having no thick roots nor masses of roots, water will not be necessary; but whether it be sand or soil, the writer has great faith in pouring in water when the hole is half filled in.

Referring again to ramming the soil, although not called for to get the roots in contact with it when sand is employed, it is of advantage when trees are large in steadying them against high winds. Whenever ramming is done it should be before watering, as it cannot be performed while the soil is soggy.

In sowing seeds and in planting cuttings, it is much the same as in tree planting. There is nothing like sand for the first covering. It has always been known that sand should be used for this purpose, but hardly one of us, who, as youngsters, was taught its value knew that a great part of its virtue came from the firmness with which it closed about the seeds and the cuttings.

JOSEPH MEEHAN.

House of *Erica fragrans* for Christmas

Grower, Anton Schultheis, College Point, N. Y.

FOR THE RETAILER

For reproduction on this page, we solicit from our readers engaged in the Retail Trade, good, clear photographs of subjects that are of general interest, such as store interiors, designs of different classes, new delivery wagons, etc.

Decoration of a Detroit Dance Hall.

A feature of recent interest was the decoration of Strassburg's Hall by John Breitmeyer's Sons, Detroit, Mich. This is the most fashionable dance hall in Detroit, measuring 130x60 feet. The sides of the gallery were covered with trellis, at proper intervals, coming down to the floor. Twenty-eight large frames, latticed with broad strips of cotton, were raised to the ceiling. At the farther end of the hall a pergola was built. The back wall was covered with white cloth laid in folds. The pergola and a few convenient spaces were covered with smilax, as were also the sides of the galleries and the frames which formed the ceiling. Throughout deep yellow

CLUB AND SOCIETY DOINGS.

NEW YORK FLORISTS' CLUB.—The regular meeting of the club held on Monday evening, December 9, 1907, was well attended, it being election night. President Totty occupied the chair, which he has done regularly throughout his whole term of office. Patrick O'Mara, for the committee on closer relations with the Horticultural Society of New York, made a report on the recent conference of the committee with a committee of the latter organization. Mr. O'Mara, in outlining the purpose of the conference, stated that there had been a feeling in the club that something ought to be done whereby the body would achieve to its fullest the prime object for which it was organized; namely, the carrying forward of horticulture in the Empire State as far as it was possible to do. He urged that by unity of action the combined horticultural organizations of the city could accomplish a great deal more than it was possible for each to do separately, and cited as an example of the club's inability to cope single-handed with the existing conditions, the fact of New York having to forego the national flower show under the auspices of the S. A. F. A great many had felt that the club, brilliant though its achievements had been, was, in a measure, getting away from its prime purpose, and that an effort should be made to start afresh upon the right track. This, he thought, could be done by merging with the Horticultural Society of New York, and that body had suggested that an associate membership in it might be established whereby the New York Florists' Club could be elected as a body as associate members at a dollar per head. Mr. O'Mara then referred to the assistance given to the Massachusetts Horticultural Society by the Boston Florists and Gardeners' Club, by the Philadelphia Florists' Club to the Pennsylvania Horticultural Society and by the Chicago Florists' Club to the Chicago Horticultural Society, and pointed out that as the best way to exploit horticultural art was through exhibitions, the suggested combination of effort would be likely to insure flower shows in New York that would be representative of the horticultural interests of the city. This associate membership in the Horticultural Society of New York would entitle the club members to all the privileges of the latter organization, except that of voting.

Mr. O'Mara's remarks were freely discussed by Messrs. Stewart, Butterfield, Barron, Jaenicke, Lenker, Nash and Nugent. There seemed to be a feeling among some of the speakers that the club should not pay out any of its funds to the Horticultural Society, but the consensus of opinion appeared to be that a merging of the two organizations would be productive of great good in the furtherance of

horticulture in New York City. The discussion of the matter was postponed until the January meeting. Meantime, it is requested that the members give the subject their best consideration.

The exhibition committee reported the result of its visit last week to inspect the rose, Mrs. Jardine, at the establishment of Robert Scott & Son, Sharon Hill, Pa. They found the rose in excellent condition and free from disease, and scored it 92 points. The committee recommended that a first-class certificate be awarded.

F. W. Wagenführ was elected a member, and the following gentlemen proposed: S. A. Woodruff, A. E. Wheeler and B. Suzuki.

Election of officers was then proceeded with, the by-law of the club providing that only members in good standing should be entitled to vote being rigidly enforced. Previous to the balloting, Mr. Totty, whose name had been listed by the nominating committee as a candidate for president, declined to stand on account of his business and other affairs demanding his entire attention. W. Duckham also withdrew, as did Mr. Weathered. Finally the latter was persuaded to allow his name to stand, and was unanimously elected president. He received a great ovation and made a neat speech in which he stated

DIRECTORY OF RELIABLE RETAIL HOUSES

The retail florist firms advertising under this heading will accept and fill orders for flowers and floral designs forwarded them by mail, telegraph or telephone, the usual commission of 25 per cent. being allowed.

\$25.00, payable quarterly in advance, will entitle the advertiser to a four-line card, under this heading, for one year, 52 insertions. For every line additional to four, \$5.00 will be charged. Four lines will average 32 words; each additional line, 9 words. Each advertiser receives one copy, free, of our Florists' Telegraph Code.

New York.

YOUNG & NUGENT, 42 West 28th St. We are in the theatre district and also have exceptional facilities for delivering flowers on outgoing steamers. Wire us your orders; they will receive prompt and careful attention.

MYER, 611 Madison Ave. My facilities for delivering flowers for any and all occasions are unexcelled. Can give prompt service to steamer and theatre trade. Telegraphic orders solicited. Telephone, 5297 Plaza.

Kansas City, Mo.

SAMUEL MURRAY, 1017 Broadway. I will deliver orders for flowers in Kansas City and vicinity promptly. A first-class stock of reasonable varieties of flowers always on hand. Wire me your orders.

Detroit, Mich.

JOHN BREITMEYER'S SONS, Broadway and Gratiot Avenue. We cover all Michigan points and large sections of Ohio, Indiana and Canada. Retail orders placed with us will receive careful attention.

Denver, Colo.

THE PARK FLORAL CO., 1706 Broadway, J. A. Valentine, Prest. Orders by wire or mail carefully filled; usual discounts allowed. Colorado, Utah, Western Nebraska and Wyoming points reached by express.

Cincinnati, O.

HARDESTY & CO., 150 East Fourth, sell the best grade of flowers grown. Retail orders from distant points for delivery in Cincinnati or surrounding territory will receive prompt attention. Telegraph us.

Dayton, O.

W. G. MATTHEWS, FLORIST, 16 West Third Street. Flowers in any arrangement for all occasions for Dayton and vicinity. Personal attention given to all orders. Long distance telephones.

Dallas, Texas.

LANG, THE FLORIST, the largest flower store in the South. Floral designs and all flowers in season; personal supervision and prompt service in Oklahoma, Texas, Louisiana. Mail and telegraphic orders solicited.

Louisville, Ky.

JACOB SCHULZ, 644 4th Avenue. Personal attention given to out-of-town orders for Louisville and surrounding territory. Have a choice line of seasonable flowers always in stock; delivery facilities perfect.

Indianapolis, Ind.

EERTERMANN BROS. CO. Our facilities for executing orders in an efficient manner are unexcelled. Our shipping territory includes the surrounding states. High grade flowers; expert workmanship.

Albany, N. Y.

EYRES, 11 North Pearl Street, cut flowers or floral designs delivered to any part of Albany and vicinity on telegraphic order. Personal attention given and satisfaction guaranteed.

Chicago, Ill.

HAUSWIRTH, The Auditorium Florist, 232 Michigan Avenue. The quality of our work is of National repute, and we are prepared to execute commissions in first-class style in Chicago and its environs.

Retailers desiring a share of out-of-town trade should be represented by a card in this column.

Decorations of Strassburg's Dance Hall, Detroit, Mich.

By John Breitmeyer's Sons.

artificial chrysanthemums were carelessly interspersed. On each of the six columns holding the gallery was fastened a basket filled with long-stemmed yellow chrysanthemums. Back of the pergola were a few graceful kentias. Japanese tables and chairs formed the furnishings, being enhanced by three electroliers covered with yellow chrysanthemums. On each side of the entrance to the pergola were two green wicker vases, thirty inches high, each containing seventy-five large Major Bonnaillon. Near the entrance were two large screens covered with wild smilax on which the various floral gifts of the debutantes were fastened. All around the hall was a garland of wild smilax, festooned with an occasional wreath of yellow paper roses. The side lights and table lights were covered with large yellow butterflies.

W. E. Marshall
Vice-Pres.-Elect, N. Y. Florists' Club

John Young
Re-Elected Secy., N. Y. Florists' Club

that his best efforts would, as always, be given to the interests of the club, and that he would expect the support of all the members in the carrying on of the work. Other gentlemen proposed for the presidency and who declined were Messrs. Robert Simpson, A. J. Manda and J. B. Nugent, Jr.

The contest for vice-president was between A. Jaenicke, Henry Weston and W. E. Marshall, the latter being elected. For secretary Messrs. Butterfield and Shaw declined to stand, and John Young was unanimously re-elected. For treasurer Messrs. Miller and Sheridan withdrew their names, and J. K. Allen was elected to the office. The voting for three trustees to serve two years resulted in the election of Messrs. E. V. Hallock, W. B. DuRie and A. J. Rickards. For trustee to serve one year, A. J. Guttman was elected. Each of the gentlemen elected, present at the meeting, promised their best endeavor on behalf of the organization.

President Totty appointed as a committee to draw up resolutions of condolence on the death of Mrs. A. M. Henshaw, Messrs. O'Mara, Shaw and Miller. He also appointed a committee to draw up resolutions of sympathy with the widow and family of P. J. Hauswirth, secretary of the S. A. F., Messrs. Stewart, Young and Traendly.

During recess, Mr. Nugent and his aides, W. E. Rickards and Robert Schultze, attended to the commissariat department in their usual good style, Mr. Nugent having provided two large roasted turkeys for the occasion. The meeting broke up at a late hour.

John E. Haines, South Bethlehem, Pa., exhibited a vase each of his two carnations, Imperial and Pink Imperial. These varieties have previously

been judged by the club's award committee, and anything further cannot be done in the way of giving them awards until the greenhouses of the grower

have been visited. The flowers were very much admired, especially Pink Imperial, which seems, if anything, to be improving all the time. Anton C. Zvolanek, Bound Brook, N. J., showed a vase each of sweet peas, Mrs. George Lewis, a white variety, to which the club awarded a preliminary certificate, and Mrs. Chas. H. Totty, a lavender streaked variety, for which the exhibitor was given a vote of thanks. Mr. Haines was also awarded a vote of thanks for his exhibit of carnations.

Obituary

Robert Faulk.

Robert Faulk, aged 59, one of the best known florists of Pittsburg, Pa., died at the home of his son, Benton avenue, North Side, on Friday, December 6, 1907. He was born in Manchester and had lived in Pittsburg all of his life except for a year when, in 1864, he enlisted in Company F, Eighty-seventh Pennsylvania Volunteers, at the age of 16. He was one of the youngest privates in the service and served until the end of the war, being in the battle of Petersburg and most of the other late battles of the war. For many years he was a member of the firm of R. Faulk & Son, florists. He was a member of the Observatory Hill Christian church, B. P. O. E. and Abe Patterson Post, 88, G. A. R. Besides his widow, Mrs. Elizabeth Faulk (née Bratt), he leaves three sons—William D., Frank Orr and Walter A. Faulk, and two daughters.

Stray Notes from Across the Atlantic.

Parcels Post.

I was interested in the account of the Burpee-Meyer dinner and the details respecting United States parcels post rates. Assuredly the United States is working on upside down methods. Here we have great stores in London and other cities, yet every provincial town swarms with shops. What prevents the mail order stores closing up the other traders? Again, every little village has its stores, yet the nearby towns cannot shut them up. Why? Simply because only a small fraction shop by post. The majority of people want their goods right on the spot, at a minute's notice, and they cannot get them by post.

There is not the slightest doubt that the parcels post is one of the greatest institutions we have. It has created a trade such as never before existed, and were it to stop, there would be a "bust-up" all round. Instead of piling on heavy postal dues, our Department reduces them, and it is only recently that the threepence the first pound and three halfpence every other pound, was lowered to one penny after the first pound. Further, our letter rate is one penny for every four ounces, instead of one penny for every ounce. The parcels post has enriched the Government, for millions of pounds are paid in postage and postal order charges. It has brought about a wonderful advance in advertising methods. Had it not been for the parcels post, the nursery trade in this country would not be what it is. People can get small plants, seeds and flowers brought to their door so easily that it has caused thousands to become enthusiastic gardeners, whereas previously they simply were played with by small local nurserymen, who did the trade no good. Yet despite this enormous postal trade, and there are thousands of firms who do practically all mail trade, every town has its quota of nurserymen and seedsmen, to say nothing of florists. And this is not surprising. When one finds about 80 per cent. of the householders all garden mad, what postal firm can hope to get all the trade!

Just you hammer away, all you progressives, and pitch out of Congress all those who vote against postal reform and vote for free seeds. Free seeds indeed! You'll never find an enthusiast looking for free seeds; he wants something that he can rely on!

Chrysanthemums.

I have been much interested in the chrysanthemum notes of late. Apparently there are plenty of enthusiastic chrysanthemum growers on your side, and it is instructive to learn their views. On this side there seems to be a falling off somehow; one does not find the bubbling enthusiasm of yore. From what I can gather the commercial man in America pays particular attention to foliage. Personally, I care not whether the leaf is large or

Araucarias for Christmas

Grower, John Scott, Flatbush, N. Y.

small, ugly or pretty, so long as the flower is good. Tastes differ, however, and in this country big blooms are not grown to any extent for market work. They would never pay, except in very classy centers, and in such quarters, big blooms are generally grown by the people who would otherwise be buyers. The medium-sized flower on a 2-foot stem will sell for a copper or two, but a bloom at 2 shillings or more would hang about a bit.

Perennial Asters.

As the note on page 593 suggests, perennial asters are becoming very popular over here, and there is no doubt that there are some beautiful things going. When I have shown collections at meetings, I have always observed a preference on the part of those present for the small-flowered sorts such as Delight, Horizontalis, Ericoides, Ophir, etc. The Novi-Angliae type, while giving fine flowers, are of no use for cutting, as they close up at night.

Lil Fardel, Rycroft Pink and Rycroft Purple are grand sorts, but they close up so that they become useless for evening work.

Sweet Peas.

It is surprising to find how great is the demand for the Burpee Spencer sweet peas. Still I dare

say we shall have enough one way and another. Purity and Etta Dyke will help on the White Spencer, and Clara Curtis will assist the Cream Spencer. The stocks are none too heavy, however.

What a time we shall have again next season! Novelties, novelties, everywhere, but scarcely any true! No, I won't say that, for a few sorts are guaranteed fixed, and that is a real blessing. Beauty is to prove a winner. It is a pale blush with buff pink shading. Regina and Blackbird are of the dark maroon shades; I guess they will not stand long. Neither are Spencers, but Beauty is.

Devonshire Cream and Finetta Bathhursts, the latter a white, are two advances in the plain type, but I reckon they won't win against the Spencers. Audrey Crier, if it comes anything like true, will be a fine pink for florists' work. Elsie Herbert is a Spencer Dainty, and it strikes me Florence Morse Spencer is akin to it. Morse says the latter is true, but I am wondering if Elsie Herbert will improve upon last year's antics.

M. A. Linzee is another deep pink Spencer, a grand flower, as is Prince of Asturias, which is chocolate and purple and the best Spencer dark pea on the market, but is it fixed? Dudley Lees, we can pass over. Vera Jeffries is creamy and pink, and there are several other Spencers near this for color. Fixity again is a moot point with them all; although Our Queen was said to be true this year. The others of somewhat similar color are Evelyn Hemus, Nell Gwynne and Constance Oliver. Take your choice here; any of them, if true, will beat every fancy yet out.

Princess Victoria is a glorious soft pink, and true, too. The Marquis is a rare fine deep mauve. Bang goes A. J. Cook now Marquis is up. True, or nearly so, Menie Christie is a pretty thing for those who like magenta shades, a rare fine Spencer as is the other pair just mentioned. St. George is so scarce that only five seeds are going for a shilling; it's worth it, anyhow. Evelyn Byatt is done for.

Four more Spencers—Horace Skipper, a deep pink, akin to Olive Bolton; Silver Wings, white splashed pink; Lorna Doone, soft pink, akin to Mrs. Hardcastle Sykes; Maggie Stark a brilliant Helen Lewis, a really grand color if it will only come true. Then Marjorie Willis is another Spencer of Prince of Wales color. Fixity? Well, just try it. Rosie Adams has been referred to before; it is really good, but fixity! I can't promise that. Herbert Smith is another of the orange shades. Not a Spencer! I guess it is time we left off raising this color in plain sorts.

A said-to-be improved King Edward is Miss Millie Maslin. Three more Spencers—Lady Althorpe, white, faintly tinted edge, quite true; Mrs. Tom Fagg, rich mauve, tinted pink; Mrs. R. C. Pulling, white, tinted red, very wavy; but I dare not hazard a guess as to the fixity of either.

There are a few more yet, not Spencers, but if I just mention their names it will be sufficient, I think. Acme, Bob, Winnie Cleve, Peacock, Keston Red, Florrie Crutcher, Mrs. E. Herbert, Negro, and Mrs. P. J. Foley. Up to time of writing this is the lot available, but there are plenty more coming.

The Commercial Growing of Cut Flowers

Read by F. R. Pierson, Tarrytown, N. Y., before the Congress of Horticulture at Jamestown Exposition.

The development in the commercial growing of cut flowers in this country during the last thirty years has been phenomenal. What might be dignified as the commercial growing of cut flowers practically had its beginning less than thirty years ago. Prior to that time the quantity of flowers produced was insignificant, the quality, compared with present standards, inferior, and the methods of culture crude in the extreme. With the increase of wealth, there has been a marvelous progress in the production of cut flowers, both in the quality and the immense quantities produced.

It seems incredible now that the writer, less than thirty years ago, was advised by one of the foremost florists of that time not to go into the cut flower growing part of the business, because it would soon be over-

baskets, bouquets, etc., in the most formal and artificial arrangement; in fact, the inferior quality of the flowers permitted nothing better. The best flowers then produced would simply be unsalable to-day, on account of their small size and short stems. At that time so few roses and carnations were grown that they were necessarily supplemented by French and Dutch bulbs, which in those days were forced in comparatively large quantities.

Comparison of Cultural Methods.

In the earlier days of the cut flower industry European methods of culture were in vogue. The few roses and carnations that were grown were cultivated mostly in pots, the greenhouses of those days being very primitive. Up to that time, the buildings erected for the production of cut flowers were very small and insignificant and comparatively crude affairs. With the introduction of some of the finer roses, like *Perle des Jardins*, *Cornelia Cook*, *Catherine Mermet*, *Bride and Bridesmaid*, a great impetus was given the cut flower industry, and then came the queen of all roses—*American Beauty*.

I believe that the present up-to-date methods of rose growing had their beginning in the vicinity of Madison, New Jersey. The old pot method was discarded, and roses were grown on shallow benches in light, sunny, airy houses, and the results obtained were exceedingly satisfactory and profitable. Large ranges of rose houses were constantly erected in that section, along the line of the Delaware, Lackawanna and Western Railroad, and at that time Madison, Summit, and other towns in that vicinity were known as the "rose belt of America;" but since then immense ranges of glass for the cultivation of roses have been erected in so many different localities around New York, Chicago, Boston, and other large cities that no one place in the country can boast of any particular supremacy.

The Carnation Industry.

The same development that occurred in the rose took place in the carnation, but at a considerably later period, and the present fine varieties of carnations that are now grown have all been produced within the last decade. First came Mrs. Thomas W. Lawson, which marked an epoch in carnation growing. This variety was the forerunner of such fine sorts as *Enchantress*, *Mrs. M. A. Patten*, *Beacon*, *White Perfection*, *Winsor*, etc. The trade was quick to discern that while these improved carnations could be grown in the old-time houses, they could be grown much better in the improved houses that were devoted to rose culture.

The Violet.

Another flower which has become one of the most important is the violet. In the earlier days violets were grown in cold frames, covered with sash and straw mats; and, of course, with our severe Winters, the supply was small and uncertain. The same improved methods of culture that have taken place with the rose and carnation followed with the violet; and to-day violets are grown in large numbers in light, airy houses—entirely under glass—a method of culture that fifteen or twenty years ago was unheard and unthought of. The violet business has been largely centralized for many years now in the Hudson River Valley, especially in the vicinity of Poughkeepsie and Rhinebeck, which has become famous as a violet-growing section, where the variety called *Marie Louise* is principally grown. *Princess of Wales*, the large single violet, which is not so difficult to grow, has been cultivated in other sections where *Marie Louise* has not been grown successfully or profitably. Immense numbers of *Princess of Wales* are grown, especially in the vicinity of Boston, and also in some of the large Canadian centers.

The Chrysanthemum and Lily Development.

One of the most phenomenal improvements that have been made in any flower has been in the chrysanthemum, which has been developed to such an extent that one who knew it twenty-five or thirty years ago would not recognize the immense blooms grown to-day.

Another very important flower for the florist is the Easter lily, which was grown only in very small quantities until the introduction of the Bermuda Easter lily twenty-five years ago. Prior to that time, lily bulbs were obtainable only from Japan and Holland, and the sources of supply were very uncertain, besides which, the bulbs often reached this market too late to force for Easter. Under those circumstances, the advantages of the Bermuda Easter lily were immediately recognized, as the bulbs could be brought here in July and August, so that it was possible not only to force them for Easter, but they could even be brought into flower by the holidays, so that the Bermuda Easter lily has become one of the most important flowers, especially for the Easter season, and is now grown in immense numbers.

I introduced the commercial culture of the Bermuda Easter lily in Bermuda about twenty-five years ago, and for many years I believe that one-third of the revenue of the Bermuda Islands was derived from the

culture and sale of this bulb. It has been grown there extensively, the normal output for many years being two million bulbs and upward, one year having reached as high as four millions. Unfortunately, with bad cultural methods, the quality of the bulb has deteriorated; still, the Bermuda-grown lily is an important factor.

But the Japanese bulbs have made great inroads into the demand for the Bermuda bulbs, on account of the lower price at which the former can be supplied, and the fact that by reason of more rapid steamers and transcontinental railroads, it is possible to bring the

Christmas Plant Arrangement

Artist, Sam Murray, Kansas City, Mo.

Christmas Basket

Artist, Sam Murray, Kansas City, Mo.

done. This seems the more astonishing when one considers that to-day many single establishments are producing more cut flowers than the entire greenhouse production of the United States probably amounted to at that time.

Some Old Time Favorites.

New York, which is one of the greatest cut flower centers in the world, thirty years ago depended on Boston for its supply of roses. The leading varieties of roses in those days were *Safrano*, *Isabella Sprunt* and *Bon Silence*, all of which have practically disappeared, having been superseded by improved sorts, and to-day these one-time popular roses are almost unknown. In carnations at that time the leading variety was *President Degrauw*. A long-stemmed carnation was then unthought of, as many buds being allowed to develop on one stem as possible, and the flowers were cut with no stems. Loose, long-stemmed flowers were then an unknown quantity. These short stemmed flowers were supplemented by wooden stems and wires, and made up into

bulbs here as early as September; so that the Bermuda lily does not occupy the important position to-day that it did fifteen years ago.

Lily of the Valley and Other Bulbous Stock.

Among other bulbous flowers, the lily of the valley is one that has held its supremacy. This always has been, and probably always will be, in great demand; while other bulbous stock, like tulips, narcissi, and especially hyacinths, do not occupy the prominent place to-day that they did in former years. In the larger cities, especially in the East, they are not very profitable. They are more largely grown in the West and in interior towns, where the supply of roses, carnations, and the other finer flowers is more or less limited. Bulbous stock is more largely grown in Europe than in this country, because, owing to the lack of sunlight there,

Azalea Trimmed With *Adiantum Farleyense*

Artist, Sam Murray, Kansas City, Mo.

Christmas Basket of Plants

Arranged by Gus Taepke, Detroit, Mich.

es and carnations can not be produced as easily as they are here, so that the Europeans are more dependent on bulbous stock; but, recently, English growers have found out that by following the American method of using shallow benches and building very light houses, very good results can be obtained. This is especially so with carnations. English growers having learned that they do much better with our improved American varieties than with the sorts they have grown heretofore; and there is beginning to be a large demand there for our newest and best carnations.

Progress in Greenhouse Construction.

In the character of the greenhouses devoted to the cultivation of cut flowers there has been a wonderful advancement in the past quarter century. Twenty-five years ago 11-foot houses were in the majority. Then came houses 18 to 20 feet in width, and, when fifteen years ago we built a range of four iron houses, each 300 feet, it was considered a model range, being well in advance of anything that had been built up to that time; but during the last five years especially, there has been a marked increase in the size of the houses erected, and to-day we believe that the best house that can be built is one ranging anywhere from 50 to 100 feet in width. We are now building houses 56 feet wide, running east and west, in which we use 12 x 24 glass and reinforced concrete sides, and we believe that houses of this kind are the most economical in construction and operation. While houses 56 feet in width are seldom seen to-day, I do not believe that the

finest flowers, especially during the short Midwinter days. In fact, I believe that in Midwinter, when flowers seem to bring phenomenal prices, they are actually produced at a loss, when one takes into consideration the capital invested, the fuel consumed, and the labor involved. Even with the prohibitive prices at the holidays, I doubt whether they return the grower an adequate return for the capital invested. Even in California, that land of flowers and sunshine, where nature is so kind, it is necessary to grow flowers of good quality under glass, so that there, where one would naturally expect that flowers would have little or no value, it costs considerable to produce stock of high quality. In the East, during Midwinter, when there is little or no sunshine and when the amount of fuel required is enormous, it is doubly so.

A Glance Forward.

Looking back at the progress that has been made during the last twenty-five years, and the improvements that have been made even during the last five years, one wonders what the next twenty-five years have in store for us. Certainly, the end is not yet, for we have reason to expect as much advancement in the future as has taken place in the last quarter century. Twenty-five years ago, any one could have gone into the florist business with little or no capital, and, if careful and industrious, failure could hardly result; but to-day, with

Our London Letter.

By A. Hemsley.

ROSES.—I find that most growers have worked up large stocks of all the Rambler type. We hear various opinions of Lady Gay; some declare that it cannot be sorted out from among Dorothy Perkins, yet though I have seen Lady Gay of a rather pale color from some growers, those who have the best selected stock can show a great distinction. It appears that this rose, like many other flowers that have sported, is inclined to reversion. If a little more attention was given to careful selection of plants for stock purposes we should hear fewer complaints. I have noted that with La France, which originated as a seedling, plants in the same bed will vary in color. The fact that we have so many of distinct colors which have originated from sports proves the necessity of care in taking stock. This is not only the case with roses, but many other flowers vary, perhaps none more so than chrysanthemums. As a rule, when a break occurs it will keep fairly constant, but take Framfield Pink, I find that with some growers it is almost a pure white this season, while those who have been careful in selecting stock have it a deeper color. The pink variety of Ivory is another which runs back; last season one grower told me that though he selected the stock plants himself, nearly all which should have been pink proved to be white when they flowered. I have found that the scarlet bouvardias vary. President Cleveland will sometimes come quite a pale color; and Dazzler, as we usually see it now, is not nearly so bright as when it was first sent out. King of Scarletts is another which is

Lady's Hat decorated with natural flowers

Good Luck "Clog" Shoe
Artist, Harry Hoffmeir, New York

of size has been reached by any means, and that tendency will be toward still wider houses. Large ranges have been built of the narrower ridge and furrow connected houses, in an effort to obtain large space under one roof, but we do not consider this style of construction as advantageous as the large, separate, detached houses. Ten years ago no one had any idea that such houses as are being built to-day were even practicable. To-day the tendency is to gather under one roof an area than ten years ago would have comprised an entire establishment. The reason for this is the tendency toward specialization and the growing of one or two varieties of flowers by different growers, one grower devoting his attention to one variety of roses, like American Beauty, one concern alone growing as many as a hundred thousand plants of this variety. The same remark applies to carnations, some concerns growing between one and two hundred thousand carnations alone; and, of course, with the increased quantities of one variety, much larger houses have become a necessity. The tendency here in greenhouse construction is to increase the size of the house and the size of the glass, and, by the use of steel rafters, to eliminate as much woodwork as possible in order to get the maximum amount of sunlight, thus enabling the grower to produce the largest number of flowers during the short Midwinter days when flowers bring the highest prices.

The Cost of Production.

To-day flowers are no longer considered a luxury, but rather a necessity. In this connection, we might say that few people realize what it costs to produce the

the large amount of capital invested in large establishments and the consequent ability to produce flowers more cheaply, larger capital is required, and first-class, up-to-date business methods must be practiced. A man cannot hope to succeed under the conditions that exist to-day as he would have been able to succeed in the earlier days of the business; in fact, the florist business, as it is conducted now in the larger establishments is fast assuming the proportions of a flower factory, and the same up-to-date business methods will have to be observed as in any other manufacturing business to ensure success.

In the future, the man who will make the most marked success is the man who is located in the right place; that is to say, where labor is plentiful, where he can obtain a supply of coal at the least possible expense—preferably near a large city, where the shipping facilities are quick and frequent—where an abundant supply of water is to be had, and where the soil is first-class. One of the most important considerations is the selection of a proper location. Heretofore most greenhouse establishments have been located without much regard to this, as they have been developed from small beginnings; but the proper location is a large element to be taken into consideration if one would be successful.

I believe that to-day America leads the world in the production of fine cut flowers, and, while we have many large establishments that we may well be proud of, the business is only in its infancy, and we may expect to see marvelous progress in the future.

inclined to lose its color. When I first grew pelargonium Fire Dragon, after the plants got vigorous some shoots would produce trusses of bloom which were identical with F. V. Raspail, from which it no doubt came as a seedling or a sport. Many other instances might be cited. And it has not been an uncommon thing for customers who have bought young plants to find that they have not had the particular color that they expected.

Seasonable Ideas in Cut Flower Display.

Among the novelties appearing in the New York florists' windows at this season are noticed two at the store of H. J. Hoffmeir, Broadway and Eighty-third street. One called the "Good Luck Clog" consists of a regular Lancashire clog shoe, with leather top, wooden iron shod sole, and brass toe-piece. In the opening is placed a tin vessel for carrying water, and in another opening cut in the leather near the toe is a small glass. When filled with flowers and decorated with greens and ribbon a pleasing effect is presented by the whole, and the piece attracts many as a suitable gift for almost any purpose where it is desired that an expression of good will should be accentuated.

Another novelty is a lady's hat of the Summer straw pattern, which carries a vase or other holder in such a manner that a pleasing arrangement of flowers may be made to form the hat crown, and with an artistic trimming of foliage and ribbon presents a floral hat, a design becoming quite popular with young people.

SOME CHRISTMAS STOCKS

Schinus Molle Berries.

Among the many beautiful berried branches and twigs that now find sale with our florists at Christmas, the *Schinus molle* has found a place. Like the yaupon holly and some other things, it is not greatly called for yet, but for a few Winters past it could be had from our leading supply houses. This *schinus* differs from nearly all other berried plants of the season in having rose- instead of red-colored berries—the color of all others, save the mistletoe, white; but this hardly comes in under the same class as the others in demand for the sake of the display the berries make.

Schinus molle is known to many as the Australian pepper tree, a misnomer in fact, as it is really a Peruvian tree. But like the California privet and the San José scale, the name has been wrongly attached to it. None of the three named belong to California, but happened to come to public notice in that State.

The twigs of *Schinus molle* as they appear in our dealers' hands are in lengths of about 18 inches, and they are used in dwellings in connection with holly for decorative purposes, for which use their beautiful rose-colored berries are a great addition.

The foliage of this tree, for tree it is, emits a pleasant fragrance, and in California, where it is used as a shade tree, it is said the air is perfumed by its odor after a shower of rain, the foliage parting with its scent then to a greater degree than at any other time.

Mistletoe.

The mistletoe of our country, though placed in the same natural order as the one of England, is of another genus. Ours is *Phorodendron flavescens*; the European one, *Viscum album*. Though it appears to prefer certain trees in certain localities, yet taking the whole region where it thrives the list of trees it grows on is a very large one. One writer says of it in this country "chiefly on elms, oaks, apples"; from Virginia a correspondent says, "ash and maple"; a North Carolina writer has observed it on "oak and locust" and adds that in some places "it takes to hickories." In England the apple is its favorite tree, though poplars, hawthorns, lindens, maples and mountain ash all carry it as well; and it has been found there even on the larch and the cedar of Lebanon.

Attempts to get it to grow have been made by amateurs here by crushing the berries on the bark of trees, tying a piece of cotton around it to prevent birds carrying it away, but it was not successful, for the probable reason that the seeds are unripe when the branches are cut for Christmas.

A dealer in New Mexico tries to make sales of mistletoe this season by offering a bird's nest naturally built in the twigs to every one buying \$50 worth. One nest in \$50 worth is not much of an inducement, still, no doubt, many would pay a good price for such, and many an old nest could be fixed in clumps of mistletoe to look quite natural.

Spray of English Mistletoe

Wreath of Statice

Leucothoë.

On account of its foliage the *Leucothoë Catesbaei* is of great use to florists, and large quantities of its sprays are sent up from the South. It is used in floral work the whole year through, but especially at the holiday seasons of Christmas and Easter.

What calls for its use is its leathery leaves, their bright green color in Summer and crimson hue in Winter, and their great lasting qualities. When kept in a moist, cool place the sprays are good months after being cut.

Although really a Southern shrub the *leucothoë* grows also in Pennsylvania, along the Blue Ridge, from which locality, its Northern limit apparently, it extends to Georgia, in the mountainous districts. As may be surmised, it is a hardy shrub, and when grown in the Middle States its beauty finds it many admirers. It needs an open position to get its best Winter color; then it is a treat to look on its bronze red leaves in Mid-winter.

Florists who are familiar with the cut sprays may often be asked what the plant is like, and if a few plants were in pots they should bring orders.

In older botanies this shrub is classed with *andromeda*. In North Carolina it is called "dog laurel," also hemlock, which shows how unreliable common names are.

Southern Smilax.

There are numerous species of *smilax* wild in the Southern States and quite a few also in the Northern ones, but in looking over the list of those given in botanical works it will be found the locality of most of them is given as New Jersey southward.

The one known as Southern *smilax* which is much used by our florists, is *Smilax laurifolia*, one of the evergreen sorts, which, owing to its value for festooning and all other purposes of decorating, is much in demand. Had it but red berries instead of black ones how very much more it would be valued! There is, in fact, a species with red berries and of evergreen character, *S. lanceolata*. In appearance it is much like *S. laurifolia*, but it is not sent to our florists in quantities as the other is, so, presumably, it is not so plentiful. Although classed as a red-berried one it is red only to a certain stage of ripeness, when the berries become quite black, behaving in this way as many *viburnums* do.

A true red-berried *smilax* is *Walteri*, but this is not a true evergreen, losing its leaves in the days of late Winter. There are two others—*S. sarsaparilla* and *S. peduncularis*—which have red berries at one stage of ripening, but change to pink red or almost black when quite ripe.

The Southern *smilax* of the florists, *laurifolia*, grows to a great height over bushes and lofty trees, affording long strings of its evergreen leaves, and as the foliage is of a leathery texture and its prickles are confined to its lower part, it is one of the staple articles florists use—loads of it at holiday seasons and some the whole year through.

JOSEPH MEEHAN.

Baby Dorothy Rose.

The advent of the Baby Dorothy marks a new epoch in pot rose growing, and florists who force roses for Easter may rest assured that this variety is among the best of all roses for this purpose extant. The accompanying illustration shows how well the rose forces, and what a showing it makes. It is very tractable, more so than Baby Rambler yielding well to any good treatment, and it will give no disappointments.

This new variety now gives us four dwarf or so-called Baby roses; and as there are in these crimson, pink, rose-pink, and white, we have all we need at present of these dwarf roses unless a rara avis makes its appearance, when, of course, it also would be wanted.

The committee of the Society of Horticulture, Orleans, France, awarded Baby Dorothy the gold medal of the society, after examining the plant growing in the field, and were very enthusiastic about its good qualities. It is a good free grower attaining a height of 20 inches, and is very free flowering. Its trusses of bloom are immense, carrying as many as 100 flowers each. It has bright clean foliage; its flowers are similar to those of Dorothy Perkins in color, but more bright and lasting, which has been cheerfully conceded by raisers, Messrs. Levavasseur & Sons, who hold the stock in Europe.

The Baby Rambler has been recognized as a worthy addition to our list of forcing and bedding roses, and continues to make new friends each season. We think, however, that Baby Dorothy is superior in every respect, especially in the persistence it has of holding its flowers for a longer time when forced, which is a great point in its favor with florists, who will expect to make good return from it as a forcing plant. We think this rose will give great results if potted up and placed into heat at once—a course that could not be followed except in the case of a few varieties. We see a few flowers—cut from plants we are drying to get them ready for starting again—to show the persistence of its bloom.

JOHN CHARLTON & SONS.

Rochester, N. Y.

Presentation to T. A. Weston.

On leaving for his new position at the establishment of Henry Eckford, Wem, Shropshire, England, T. A. Weston, who is well known to our readers through his notes on sweet peas and other matters that have appeared in our columns from time to time, was presented by the Folkestone Gardening Society, a handsome illuminated address, "as a mark of esteem and a token of his untiring energy and useful aid, especially in encouraging the cultivation of the sweet pea." Mr. Weston feelingly replied, expressing his appreciation of this evidence of good will. The address is suitably adorned with representations of sweet pea flowers around the top of it and on one side.

FERN S

MY SPECIALTY

150,000 assorted ferns for Jardinieres, excellent stock, in 15 of the best market varieties, including Cyrtomium Falcatum, Aspidium Tsussemense, Pteris Wimsetti and Mayil, in good proportion, from 2 1/2 in. pots, \$3.00 per 100; \$25.00 per 1000; 500 at 1000 rate.

CENTER PLANTS (Exact Size)
Cocos Weddeliana, 2 1/2 in., \$1.75 per doz., \$14.00 per 100.
Kentia Belmoreana, 2 1/2 in., \$1.30 per doz., \$10.00 per 100.
Assorted Ferns, 3 in., \$6.00 per 100, \$56.00 per 1000; 4 in., \$12.00 per 100, \$115.00 per 1000.
Adiantum Cuneatum, fine stock, 2 1/2 in., \$3.60 per 100, \$30.00 per 1000; 3 in., \$6.00 per 100, \$55.00 per 1000; 4 in., \$12.00 per 100, \$115.00 per 1000.
Adiantum Farleyense, 4 in., \$4.75 per doz., \$35.00 per 100; 5 in., \$5.50 per doz., \$55.00 per 100; 6 in., \$12.00 per doz., \$115.00 per 1000.
Adiantum Rhodophyllum, 4 in., \$2.50 per doz., \$20.00 per 100; 5 in., \$5.50 per doz., \$40.00 per 100.
Adiantum Gracillimum, 2 1/2 in., \$3.50 per 100, \$30.00 per 1000.
Adiantum Regina, 4 in., \$3.00 per doz., \$22.00 per 100; 5 in., \$6.00 per doz., \$45.00 per 100.
Cibotium Schiedel, 4 in., \$3.50 per doz., \$25.00 per 100.
Nephrolepis Scottii, 6 in., \$7.00 per doz., \$60.00 per 100; 8 in., \$15.00 per doz., worth the double.
Elegantissima and Piersoni, 5 in., \$5.50 per doz.
Fern Spores, gathered from my own stock, guaranteed fresh, 1907 crop, good, commercial varieties, 30c. per trade pkt.; \$3.00 per dozen.

J. F. ANDERSON, Short Hills, N. J.

DREER'S SPECIAL OFFER

of Decorative Plants for the Holidays

ARAUCARIA EXCELSA
An exceptionally fine lot of 5 in. pots, 10 to 12 ins. high, 3 tiers, 60c. each; a most desirable and popular size. In larger plants we can supply 6 in. pots, 14 to 16 ins. high, 4 tiers, \$1.00 each; 6 in. pots, 16 to 18 ins. high, \$1.25 each.

FICUS ELASTICA
6 in. pots, 15 to 18 ins. high, \$6.00 per doz.
4 " 8 to 10 " 3.50

ARECA LUTESCENS
4 in. pots, 3 plants in a pot, 15 to 18 ins. high \$3.50 per doz.
25.00 per 100

COCOS WEDDELIANA
A grand lot of plants in 5 in. pots, 18 to 24 ins. high, perfect in every way, a plant that appeals to the retail buyer, \$1.00 each.
Made-up plants in 5 in. pots, 4 plants in a pot, 18 ins. high, \$1.00 each.
3 in. pot plants, a nice size for fern dishes, 10 to 12 ins. high, \$2.00 per doz.; \$15.00 per 100.

KENTIA BELMOREANA
2 1/2 in. pots, 4 leaves, 8 to 10 ins. high, \$1.50 per doz. \$10.00 per 100
3 " 5 " 12 " 2.00 15.00
4 " 5 to 6 " 15 " 4.50 35.00
6 " 6 " 20 to 24 " 1.00 each
8 " 6 to 7 " 26 to 28 " 1.50
11 in. tubs, 7 to 8 " 36 to 42 " 5.00
11 " 8 to 9 " 6 to 7 feet " 20.00
7 to 8 " 25.00

KENTIA FORSTERIANA
3 in. pots, 5 leaves, 12 to 15 ins. high, \$2.50 per doz. \$20.00 per 100
4 " 5 to 6 " 15 to 18 " 5.00 40.00
6 " 6 " 24 to 28 " 1.00 each
7 " 6 " 30 to 32 " 1.50

10 " 6 to 7 " 7 to 8 " 12.50
12 " 6 to 7 " 8 to 9 " 17.50

KENTIA FORSTERIANA—Made-up Plants
7 in. tubs, 4 plants in a tub, 34 to 36 ins. high, \$2.50 each
7 " 4 " 36 to 38 " 3.00
8 " 4 " 42 " 5.00

LATANIA BORBONICA
Heavy plants in 8 in. pots, 26 to 28 ins. high, \$2.00 each

PHOENIX ROEBELENI
Beautiful plants in 7 in. pots, about 2 feet high, \$5.00 each

PHOENIX CANARIENSIS
7 in. tubs, 3 to 3 1/2 feet high, \$2.50 each
9 " 3 1/2 to 4 " 4.00
9 " 4 1/2 " 6.00

PANDANUS VEITCHII
A grand lot of well-colored plants, 24 ins. high, very heavy and of exceptional values, \$1.00 each.

HARDY DECORATIVE PLANTS
The following are in prime condition and of excellent values:

STANDARD OR TREE SHAPED BAY TREES
Stems about 30 ins. high, crowns 18 ins. in diameter, \$4.00 each
" 45 " " 24 to 26 ins. in diameter 6.00
" 45 " " 26 to 28 " 7.50
" 45 " " 30 to 32 " 10.00
" 45 " " 34 to 36 " 12.50
" 45 " " 40 to 42 " 15.00

PYRAMIDAL SHAPED BAY TREES
3 feet high, 16 ins. in diameter at base, \$2.00 each
4 1/2 " 24 to 26 ins. in diameter at base 6.00
5 " 26 to 28 " 7.50
6 " 30 to 32 " 10.00
6 " 32 to 34 " 12.50
7 " 38 to 40 " 15.00

BOXWOOD, STANDARD OR TREE SHAPED
Stems about 24 to 26 ins. high, crowns 12 to 14 ins. in diam. \$1.25 each
" 24 to 26 " 14 to 16 " 1.50
" 24 to 26 " 16 to 24 " 3.50

For complete list of Decorative Plants, etc., see our Wholesale Price List.

ADIANTUM FARLEYENSE
The finest plants we have ever offered, in excellent shape for the holidays.
5 in. pots, \$0.75 each
6 " 1.00
8 " 2.00

ADIANTUM CUNEATUM
3 in. pots, \$6.00 per 100
4 " 12.00
6 in. pans, 25.00

ADIANTUM RHODOPHYLLUM
This miniature A. Farleyense is in nice shape for fern-dish use.
2 1/2 in. pots, \$6.00 per 100
3 " 10.00

NEPHROLEPIS BOSTONIENSIS
6 in. pots, \$0.50 each
10 in. pans, 2.00

NEPHROLEPIS AMERPOHLI
6 in. pans, \$1.00 each

NEPHROLEPIS WHITMANI
10 in. pans, \$2.00 each

NEPHROLEPIS SCOTTII
6 in. pots, \$0.50 each

SELAGINELLA WATSONIANA
We have a fine lot of this comparatively new silver leaved variety, a novelty for fern-dish work, \$6.00 per 100.

Collecting Orchids In Their Native Wilds

John E. Lager, Summit, New Jersey, Tells His
Interesting Experiences.

There are many things intermixed with orchid collecting that to many people seem out of place; yet, often on these various things may depend the success of several months of labor.

In the countries where the orchids flourish everything is different from what it is in the northern latitudes—climate, people, and the invariable lack of transportation, except by mules or oxen, or by canoes, or rafts on the rivers.

Differences in Collectors.

I particularly refer to conditions such as they are in South America. (The East Indies it has not been my fortune to see.) Thus, in short, an orchid collector's life is not an easy one by any means; even under the best of conditions. There are, of course, several kinds of collectors; some have it or take it comparatively easy. There is, for instance, the man who is sent out by some house to secure a certain kind of plant; to get so many boxes full and return home. The locality in which to obtain the plants is possibly indicated to him, and the man as a rule follows the beaten tracks or highways to some town or village where he makes arrangements for a certain quantity of plants and returns home; the trip lasting six months, possibly eight or nine months. He has obtained the plants, and let us hope they arrived at their destination in good condition and everybody was satisfied. This kind of a collector is the one who has the easiest time, but he will know very little of the country, its nature, its geography and its flora in general, and he is not the man to find new fields. He will go where some one else has been before and opened up the way, if he changes place at all.

The other man is one who is in love with his work and one who wants to see the marvels of the Creator in all their splendor, and to satisfy this desire he must undergo untold hardships. No beaten tracks will serve his purpose, but he must plunge into the wilds on mule back, up and down streams and rivers, in canoes and rafts, and not infrequently on foot.

Exploration an Essential.

In looking for new fields exploring the country is absolutely necessary. It is not enough to know that plants can be obtained, but the collector must know his territory, the lay of the country, its rivers, its mountains, and hence he must figure out how the plants can be moved, without which his labors will be in vain. To illustrate this I will mention an incident, on one of my trips. I had struck my Eldorado in the form of a virgin cattleya district. No man before had ever robbed this forest of its jewels, and to the best of my knowledge no one has been there since. The plants and the varieties were superb, but the problem was how to get them out. The nearest I could get to a point from which I could secure transportation with certainty was fifty miles; but from where I was I could strike the same river at a point considered not navigable in about six hours. I reasoned that if there was water in the river, even if there were plenty of rocks in it, and the current strong, I could float my plants down in champañes (large canoes), and I set to work accordingly. I packed my plants at night in bags and sent twenty-five or thirty loads down to the river where I had tents pitched. The mules were unloaded and returned for more, until I had the entire lot moved. Now commenced the real battle; I had to go down along the river a considerable distance and try to induce some of the owners of boats to come up where I had the plants, but as they had not done so before they reasoned that it could not be accomplished. I was determined, however, and after considerable arrangement I succeeded in convincing two parties that it could be done, with the result that we started to ascend the strong current. I returned to my plants, waiting for the boats for several days, when suddenly a freshet came rushing down the river, swelling it out of all proportions. I had the plants on a knoll near the river; in a few hours the water cut behind us and we were on an island helpless; we had to abandon our tents, the water eating gradually toward the plants; and it seemed a question of

a few minutes and all would be lost. Suddenly the waters stopped advancing (this was during the night) and plants and all were safe. The boat were caught in the freshet and had to tie up to some rocks, and as the water rose in the river the party had to cut away trees and branches in order to save themselves. In the evening they arrived. We loaded the plants by candle light and started down stream early the next morning; everything went well, our champañes racing down the rapid current like feathers, missing stones or rocks by inches or less, but the net result was that I got the plants out.

Now, in working on these lines, the collector will get a fair idea of what the country is like, and in no other way. He will also know where and how most species grow, so that he can at any time put his finger on the map and point out where the different plants occur.

Securing a Base of Operations.

A very important matter for a collector in getting any kind of orchids is to find and select a good central place to serve as a base for his operations, a place as near to the mountains as possible and at the same time a place from which the plants can be moved when packed, without too much expense. It is also important to know that the varieties are good, as a shipment of plants of a poor type costs as much as that of a good type. To ascertain this will sometimes consume considerable time, but it pays as a rule.

For a base, any old building or ranch will do; if none is to be had one must be built in which to store the plants, make boxes, etc. Personally, however, I very seldom used buildings for this purpose, owing to the fact that in most instances I was in places where none could be had. I had large tents made and when these were not large enough to accommodate everything I bought cotton goods and mounted a skeleton of stakes and bamboos in the shape of greenhouses. Over this I stretched the goods, one piece overlapping the other, in order to shed water. This kind of structure I found to be very good in more ways than one, and I could work independently and be close to where the actual collecting was going on.

As soon as the base is selected lumber must be secured. This is a tedious operation, as it is cut by hand, and arrangements for it can not begin too soon. In places where I found it impossible to procure any, on account of scarcity of men to saw the logs into boards, I used coffee bags cut open and put two of these crosswise in a box without bottom, the box to serve as a form; then placing a good layer of palm leaves in the bottom I packed the plants in layers very firmly, and at the top as a last layer more palm leaves; then drew the bags together and sewed them with string. When taking the box away there remained a square firm package. In this way I moved the cargoes considerable distances to places where I could pack the plants in wooden boxes.

Collecting, Preparing and Packing Cattleyas

I will speak of the various South American countries chiefly, as they are the home for all of our cattleyas. These orchids occur all the way from Honduras, Guatemala and Costa Rica in Central America, and down through Colombia, Venezuela, Ecuador, some in Peru, and again in the Guianas and Brazil.

The collecting of the orchids and the preparing and packing them for shipment are more or less the same in any of the South American countries. Men are sent out in every direction, covering as large a territory as possible, in order to secure the plants in the least space of time. As a rule, two or three men band themselves together, and take provisions enough to last a week or more. They are armed with the indispensable machette, and axes, occasionally, also with shot guns; and carry string bags in which to bring out the plants. These men hurry themselves in the woods, and when plants are sighted the trees are as a rule cut down, unless the plants are found quite low down. To climb the trees is no easy task in the tropical forests where there is a network of climbers and other vegetation around the trunks. There is also the possibility of poisonous insects, snakes, and scorpions being hidden in the plants; hence very few men will undertake the climb; but, whatever mode is chosen, the plants are loosened from the trunk or branches by running the machette under the plants; when once loose they are tied together with some kind of string, put in the bag, and the march continued until another plant is found. Toward night the men return to their camp, where the plants are spread out under some tree to protect them from the sun, and at the end of the week's labor the plants are carried on their backs to the ranch. Here they are spread out on shelves made of stakes to await the proper time for the packing.

Rio Bache, Southern Colombia

The Most Important Fields.

The most interesting and most important fields for collectors are, undoubtedly, Colombia, first; second, Venezuela; and third, Brazil.

I place Colombia first because I believe its flora has no equal in the world, and taking the orchids especially I doubt very much if another region can be found where such great numbers of species occur.

We find in Colombia eight different kinds of cattleyas, namely: *Cattleya gigas*; *C. gigas Sanderiana*; *C. chrysotoxa*; *C. chocoensis*; *C. Trianae*; *C. bogotensis*; *C. Mendeli*; and *C. Schroderae*.

Cattleya gigas has a very large territory scattered over several mountain ranges of Antioquia; in some localities the types are superb, to say the least, while in others they are poor. In a few isolated places the beautiful *C. chrysotoxa* occurs, but in such small numbers that collecting it would not pay any longer. This cattleya grows on the lower slopes of the mountains in warmer places than *C. gigas*; also somewhat in shaded positions. *C. gigas* is found in perfection on grand solitary trees; here they always place themselves in such positions on the trunks or heavier limbs that they may obtain the full benefit of the breezes, also the sunlight; yet some branch will afford them sufficient shade from the sun sometime during the day, as to make their abode a perfect one.

I have seen this cattleya climb up the mountains until actually stopped by the cold; the plants in such localities are as a rule stunted. Struggling as they do for an existence, the front part of the plant somehow will push out new leads repeatedly, while the bulbs behind lose their leaves and die off. Then again, they are found descending the warmer slopes and in a few places join hands, so to speak, with *C. chrysotoxa*, and in such localities natural hybrids occasionally occur.

This particular region I found to be exceedingly interesting in orchids. The Andes or the part of the same called the Cordillera Central are here simply a maze of spurs and ridges in every direction forming great canyons, valleys, hollows, and precipices of every imaginable shape, and where every kind of climatic condition prevails, from the torrid to the cold paramos. The trails run along the mountain-sides, in some places at appalling heights, in places so dangerous that the only safe means of locomotion is to dismount and walk. But to return to the orchids again; what a storehouse this is for the orchid lover. In the lower hollows may be seen large patches of *Peristeria elata* in perfection, with bulbs of enormous size, and flower stalks six to ten feet high; then again a few *Miltonia Roezlii*; somewhat higher up is *C. chrysotoxa* modestly tucked away on a branch of a tree; and *Oncidium Kramerianum* nods here and there in more exposed places.

As we ascend higher we find the majestic *Cattleya gigas*, and still higher up we have a veritable botanical garden; among others we find here in great profusion *Miltonia vexillaria* (Josephita or pensamiento as this plant is called here). There are also lycopods in variety, *sobralias*, *oncidiums*, *anguloas*, *odontoglossums*; and *rodriguezias* and *masdevallias* in great varieties along the trail. On the banks and rocks, exposed to the full sun, the pretty *Epidendrum fimbriatum* grows in masses, the effect of which reminds one of our *Phlox subulata* in the Spring. Many more could be mentioned, but time will not permit.

Port of Magangul

From this region we will move southward going by mule back the entire length of Antioquia, following the highway leading almost exclusively over a high plateau with pretty towns and villages along its course. After twelve to fifteen days' riding we arrive at Cartago in the Cauca, situated at the foot of the Central Cordillera on the western side, and by traveling along southward a day or two more, we are right in the heart of the home of *Cattleya chocoensis*. This cattleya, unlike most of the others, occurs in forests on level land which is very swampy; the trees are as a whole small and stunted and overgrown with moss. Here, strange to say, I saw the most beautiful sight it has been my fortune to see; in these jungles the plants grew by the thousands; the trees being literally covered with them and in full bloom (end of August). I particularly remember that I got my mule under a tree and sitting in the saddle picked a large bunch of flowers; these were particularly fine and large, so different from what we see them under culture where they only half open. The treatment we give this plant under cultivation probably has something to do with this. Where they grow it is very warm and humid. I noticed in the early morning as soon as the sun reached the forest a dense mist would rise from the ground and envelop everything; this would gradually disappear as soon as the sun became stronger.

The western slope of this Cordillera is not abundant in orchids. I made explorations all along, going up several rivers and cañons, but with poor results. In one place I found five plants of *Cypripedium caudatum* Wallisii growing on one tree. I thought I had found a "bonanza" and the result was three weeks' constant labor and marching from one place to another, but not another plant could be found.

On this same trip I also found a most gorgeous *masdevallia*, the flowers very much like *M. Veitchii*, but larger and finer in every way; its leaves were long, swordlike and glaucous in color, some measuring twenty-four inches in length. I found about twenty plants of all sizes in one tree, but not another plant anywhere. As misfortune would have it, these plants never reached home alive. Some time after this I rediscovered it a considerable distance farther southwest toward the Pacific and gathered quite a number of plants, packed them and forwarded them to Buena-ventura. There they were retained for nearly two months on account of quarantine regulations and were consequently lost.

While in the Cauca, by crossing the valley westward, we find on the western Cordillera along the Rio Dagua the chaste *Miltonia Roezlii*; in fact, this is its home. True, it is scattered here and there along the course of the Rio Cauca through the Antioquian Mountains, but not in quantity. Here along the Rio Dagua it grows par excellence. The climate is extremely hot and very moist; in fact, it rains pretty nearly every day in the year and water oozes out of the rocks everywhere. On the ledges and rocks large clumps of

Cypripedium Roezlii may be seen in luxuriance. Leaving the beautiful Cauca valley and its mountains we will cross the Central Cordillera and steer the course toward the State of Tolima. We will do this by a southern route, instead of crossing the Quindio as is customary, and in this way we will take *Cattleya Trianae* by surprise in its southern haunts. The trail leads over a very inhospitable region, cold and dreary. The forest along the highest part of the road consists of shrubs and stunted trees covered with moss. For long tretché trees and shrubs give way to grasses and the inseparable companion of the high plateaus, a giant gnaphalium.

Along certain ridges on the trail, in clumps of trees, I noticed *Masdevallia racemosa* in full bloom; these grew in the thickets in semi-darkness and I am sure that the rays of the sun could never penetrate to their retreats; yet here they flourished unmindful of the cold and dreary atmosphere and darkness. Masses of scarlet and red colors could be seen when peeping through the thickets. Finally we have crossed the paramo and the descent begins through a labyrinth of gorges and precipices and at length we are down on the lower foothills on the eastern side of the Central Cordillera where any moment we can expect to get a glimpse of *Cattleya Trianae*.

In the extreme southern part of Tolima the three chains of Andes are very close to one another, and owing also to the continuous rise of the country from the Caribbean sea southward, we find here *Cattleya Trianae* scattered everywhere; on the lower mountain-sides, in the valleys, in hollows between grassy hills, or in fact in any place where there are clumps of trees. The variation of types is very great. Every little valley or stream has its own particular type, but owing to the long distance to a place of shipment these plants will be undisturbed for some time yet, or until everything within easier reach is exhausted.

In moving northward we gradually descend and the plants disappear from the valleys proper and follow the mountain-sides and its indentations at an elevation of 2,500 feet to 4,500 feet above sea level. It persistently follows the mountain slopes at this elevation for about 400 miles and possibly more.

The gathering, packing, and shipping are more or less the same as with other cattleyas.

Farther northward we come to Ibagué, famous for being the first place where *Cattleya Trianae* was collected. At the time I was there very few plants were left in the mountains, but along the Rio Combeima which flows through Ibagué I found quite a few plants, but not enough to gather in large quantities.

In about one day's riding southeast from Ibagué at a little village called Miraflores, I came across plants in sufficient quantity to gather a good shipment. The varieties were superb, but I found it very difficult to get the plants out, and the only solution consisted in moving the boxes on mules' backs to a small stream that, owing to the rain, had swelled to a considerable size. Here I built small rafts, about three and one-half feet wide and long enough to hold nine or ten boxes in single file. Each raft was manned by two men, one at each end, and when everything was ready we cut loose. The stream being full of large boulders, projecting rocks and branches of trees, it was a most perilous journey, and more than once we had close calls, but

everything went well and we reached Rio Chili. From the latter we emerged into Rio Saldana, which is a very large river. Here we tied all the rafts together, and then floated down toward the Rio Magdalena and on to Honda.

Before leaving this region I want to describe a little of the country around Miraflores. There are no valleys here to any extent, mostly high hills, with depressions between, also narrow openings along the streams. There are also a number of treeless hills covered with grass. On one of these I saw some of the most beautiful sights. The entire hills from foot to summit were literally covered with *Sobralia violacea* in full bloom, in all shades from pure white to dark lavender. The best time to see this show was in early morning, before the sun became too strong; with the night dew still lingering on the foliage and with the galaxy of colors on such a large scale, the sun finally rose higher and higher reflecting the colors in a way impossible for me to describe. Toward midday thousands of flowers began to drop off. This continued through-

In crossing the Magdalena River going northeast we find *Cattleya gigas Sanderiana* in the state of Cundinamarca. This cattleya is without a doubt the grandest of all the South American cattleyas. The enormous size of the flowers and as many as ten on a spike is a sight worth seeing. Unfortunately this cattleya is not at all plentiful and its territory is very small, that is to say of the true type, for on the same mountain chains toward Muza there are quantities of plants, but the type is inferior in every way.

In this same vicinity growing in somewhat warmer places than *C. gigas Sanderiana* we find along the streams *C. bogotensis*, although not in quantity; also several *stanhopeas*, *oncidiums*, etc. Still further northward in the State of Santander we find *C. Mendeli*, unfortunately very sparingly. It occurs in several places, but the long transportation is a being scarce the distance to the Magdalena River is considerable, and I doubt very much whether this plant has ever paid to extract. In this same state at high altitudes, *Odontoglossum Pescatorei* occurs,

trails, however, are abominable and the journey a hard one, so we will simply place ourselves on the other side in the immense and grand region of Cazanare. This region where we now are is without the slightest doubt the most wonderful on this entire hemisphere, if not in the world. Everything is here on such a gigantic scale as to inspire terror in man. Its flora is marvelous; plants occurring in other parts of the country are as pygmies compared to those found here; and even the animals are much larger than in the other parts. There are giant tapirs, pumas and leopards in the forests; the rivers are full of fish, alligators, rayfish, electric eels, etc.; and millions of waterfowl, etc. Here it is we find *Cattleya Schroderae* in all its glory. The first plants were taken out of this region in 1893; so it is comparatively speaking, a virgin region; and will remain so for some time for many reasons. *C. Schroderae* is to-day the most abundant of all the Colombian cattleyas. It is found from about the 3d degree northern latitude up to about the 7th degree, but, like *C. Trianae*, it runs along the lower edges of the woods. The plants are of extraordinary vigor and size and the varieties are superb. Vicencio, where plants are still gathered, it being compared with those of the older district of Villa a less risky region.

When the collector goes into the Cazanare he takes his life in his hands, so to speak. The only practical way to transport the plants is by rivers and there are a good many of these that can be utilized with more or less success; another thing to be reckoned with here is the seasons. Unlike the rest of the country we have here a six months' rainy season and a six months' dry season, with more or less variation, and here it is that several have failed who have tried to collect in this region. When the dry season is fairly advanced most of the smaller rivers dry up, even the larger ones become unsafe for navigation, and if the collector is unfortunate enough to be overtaken by the dry season in his journey he will be stranded somewhere in the wilds without any hope of rescue. On the other hand, during the rainy season, he cannot collect the plants, for during that time everything is inundated; the course of most of the rivers is gone and all appears like an inland sea. The plants must be collected during the dry season and everything in readiness at the first sign of the rains. If he can thus calculate all to a nicety everything is likely to go well, although the greatest dangers and risks are ahead on the rivers. Several of these may be used, but whichever course is chosen the trip is a long one. He may take Rio Cazanare, if he collects in that vicinity; from this river he emerges into Rio Meta and from the Meta into the mighty Orinoco. On his journey he will find two rapids, Trapichote in the Rio Meta and the great waterfalls of Cariben in the Orinoco. If the rafts are strong and fortune favors those on board they will emerge safe, but in all likelihood more dead than alive; and no one on board will know how it was done; and it is also possible that the collector will have to risk it alone, for while he can get men from certain places along the rivers, they will as a rule balk when Cariben is reached. There are also other dangers; certain territories through which our course lies are infested with wild Indians. The lower part of the Rio Cazanare is badly infested with them. The name of the tribe is Curvas (Cazanare Indians). They are very hostile to the white man and will attack him with their bows and arrows whenever they have an opportunity, and the only way to avoid conflict is to keep the course in the middle of the river and without tying up at night. It also goes without saying that here, if ever, the collector must be well armed. On the Rio Meta we find the Guahibos, or Meta Indians, and lower down the Yaruros, or Orinoco Indians.

Once we are below the Cariben, dangers such as rapids are over, and if the collector succeeded in keeping a few men on the raft he will now float down slowly toward Ciudad Bolivar, but if he is without help to manage his rafts and battle against the trade winds he will have no easy time. He may be fortunate to be seen by some steamboat and taken in tow; if so, he is safe.

Once in Ciudad Bolivar, if the plants are alive they can be embarked there for New York; the trip by that time will have taken about three months, so you see it is no child's play.

Haunts of Other Orchids.

Now we have taken in all the Colombian cattleyas and I would like to say a few words in regard to other orchids and their distribution. *Odontoglossum crispum*, as we all know, is associated with Pacho San Cayetano and other points around Pacho, in such a way that people do not seem to believe that *O. crispum* can be found elsewhere, but it is safe to say that not over twenty-five per cent. of all the plants imported these last few years come from

Cattleya Trianae

out the day, but early the next morning there was a new display. At the foot of these hills where the soil was rich and the plants partly shaded by trees they attained five to six feet in height. In ascending the hills the plants gradually diminished in height, until at the top they were only a few inches high. There was no difference, however, in the size very serious drawback. In addition to the plants of the flowers. Almost on the naked rocks would grow the beautiful *Epidendrum ibaguense*, also *Vanilla planifolia*; this latter one always seeking the companionship of a dwarf shrub, to which it would cling, and display its fine dull yellow catlike flowers.

also several fine *masdevallias* such as *M. Veitchii*, *M. Harryana*, etc. Also the pretty *Oncidium cucullatum*, *anguloas*, and many more.

A Wonderful, Dangerous Region.

From Santander I will take you across the Eastern Cordillera to Los Llanos de Cazanare. From where we are now, say in Malaga, we can cross the Cordillera in a straight line, but it will take us at least fifteen days, if all goes well, before we can set foot on the eastern side of the mountain. Four or five days of this time will have to be spent tramping eternal snow, so we will take a route farther south where the elements are more favorable. The

Pacho, for the simple reason that they are not to be had in such quantities any more, and before long the collector will have to look for other fields.

In my travels I made explorations all along the Eastern Cordillera for this purpose, as far south as Garzon, in the south of Tolima, and on the Central Cordillera as far as Pasto, with the result that I found *O. crispum* in several places on the eastern chain, and on the central chain in two places. Far apart, it is true, but in all likelihood I missed a good many places. I must admit I never found any great quantities, until Pasto in southern Cauca was reached; here are any amount; but of the type called Lehmanni, with the characteristic five spots on the lip. *Miltonia vexillaria* is another plant whose home is Antioquia, yet a few plants have been found in Tolima, and then we lose sight of it again, to reappear in a slightly different form in Ecuador, under the name of *M. vexillaria rubella*.

Another great genus of plants in the Colombian Andes is the *masdevallia*; Sonson, south of Medellin, is the region for these; here these plants occur everywhere in all shapes and colors.

Venezuela has four species of *cattleya*, namely: *C. Mossiae*, *C. Percivaliana*, *C. speciosissima*, and *C. Gaskelliana*; the two first mentioned are found in the Cordillera de los Andes. *C. speciosissima* is found in the Cuspenera Cordillera and *C. Gaskelliana* in the northeastern part.

Going southward to the Guianas we find *Cattleya Lawrenceana* in the Roraima Mountains, and farther south in the mountains above Pernambuco in Brazil the well-known *C. labiata*.

In looking at the map it will occur to some one to ask if there are not plenty of orchids in the immense territory lying between the Orinoco on the north and the Amazon on the south; the western boundary would be the eastern Cordillera in the west, and the Atlantic Ocean on the east; including such rivers, as the Rio Negro and its tributaries, Rio Guayabero, Rio Meta, etc.

Cattleya Schroderae is probably the only *cattleya* of any account in this region, although the greater part of this country is still practically unknown; but what is known has not produced anything surprising in orchids. Almost the whole territory is very uniform in climatic conditions, and without any high mountains, so we can reasonably expect that no great novelties are in store for us here.

Cattleya Eldorado is found in quantity along the northern banks of the Amazon beginning at Manaos; also along the Rio Negro; *C. superba* is also found here. This *cattleya* also occurs in several other localities, such as on the Cazancare, Rio Meta, Orinoco, and even south of the Amazon, while *C. Eldorado* does not cross the Amazon southward.

The Future of Orchid Collecting.

In conclusion I would say that the prospects for future orchid collecting are not bright; the constant hunting for these plants the last few days has led a number of natives to embark in the exportation of orchids which is in itself nothing wrong, but unfortunately it is done in many instances by individuals who do not have the least knowledge of plants, or of how to do the work right. The result is that the last year alone several hundred boxes (of *cattleyas* mostly) arrived in New York, the most valuable

part of which was the boxes; the plants through careless handling in every way were ruined completely. This in one year does more harm than the collector would do in ten years.

From Brazil now comes information that *Cattleya labiata* is getting scarce; a plant that we were led to believe would last to the end of time, and before long I fear that we shall hear the same complaint from other quarters.—From Transactions of Massachusetts Horticultural Society.

Fibrotta Ware at Jamestown Exposition.

It seems the Fibrotta ware line of florists' furniture "got there" at the Jamestown Exposition, carrying off a medal and diploma, the vases for cut flowers apparently making a strong impression on the judges. This is not surprising to those who know, as Fibrotta, which is simply the trade name for

PAMPHLETS RECEIVED.

THE RELATION OF CERTAIN BIOLOGICAL PRINCIPLES IN PLANT BREEDING. Bulletin 158 Connecticut Experiment Station, New Haven, Conn., by Dr. Edward M. East.

This is an exceedingly useful and instructive document of great value to plant breeders in general. Its scope and comprehensiveness may be gleaned from the following summary of the contents: The Evolution of Darwin and His Predecessors; Later Evolutionary Theories and Principles; Heredity, including Mendel's theory; Methods of Plant Improvement; Technique in Plant Breeding, etc. We hope to refer again to this bulletin in a future issue.

HOT WATER AND SEED GERMINATION.—It is well known that many seeds germinate more quickly if they are soaked in warm water before

Cattleya Gigas—33 Blooms

Indurated Fibre Ware, has long been recognized as among the best all-around material for plant tubs, vases and things of that sort. Fibrotta ware is made up into a variety of things useful to florists, including parlor plant tubs, vases for cut flowers, saucers for flower pots and rolling stands for pots and tubs. These are all molded seamless, with the exception of the rolling stand—a very compact, handy device, made up of an Indurated Fibre saucer carried on steel cross-pieces. These cross-pieces are equipped with castors so that the stand, carrying a potted plant can be easily trundled about the floor.

Fibrotta ware is made exclusively by Cordley & Hayes, 173 Duane street, New York, and sold by all live jobbing houses.

they are sown. M. E. Draps-Dom, writing in the Tribune Horticulteur, mentions that he obtained remarkable success with some refractory palm seeds by keeping them for some hours in hot water—so hot, indeed, as to be almost boiling. Thus a large sowing of 10,000 *latania* seeds germinated very evenly fourteen days after sowing. It is not likely that seeds would stand this treatment unless they fulfilled two conditions; viz., they must be dry to start with, and water under any circumstances must only penetrate them slowly; for anything like the temperature of boiling water would, of course, kill the embryo if its cells contained any moisture, while it is known that dry seeds can withstand a temperature (as long as their living cells remain dry) even higher than that of boiling water.—Gardeners' Chronicle, London.

New
Carnation

DEFIANCE

Brilliant
Scarlet

There are seven reasons why you should grow DEFIANCE and they are:

- 1st. It is by far the best color ever seen in a scarlet Carnation; it is the true velvety scarlet and not red; it will average 3 inches in diameter throughout the season.
- 2nd. It is unexcelled for productiveness by any Carnation in commerce to-day.
- 3rd. It is a clean and upright grower, producing an abundance of high grade flowers without any special treatment.
- 4th. It is in perfect health, and not subject to rust or any other disease, which is very prevalent among scarlet varieties.

- 5th. It is of perfect form; blooms are very symmetrical, center nicely built up and very full, but not so as to appear crowded; stems are very stiff and wiry, holding the flowers perfectly erect.
- 6th. It is a scarlet for the entire season; it comes into crop in October and continues through the entire season; it does not lose its color in bright sunlight, in fact, it improves in bright sun when other reds fade.
- 7th. It is the only scarlet to-day, and by growing DEFIANCE you will be satisfied, as it has no faults, is full of vigor and will do the work where other scarlets fail.

Strong, well-rooted cuttings, every one guaranteed, \$12.00 per 100, \$100.00 per 1,000

Usual Discount on large orders

New Crimson Carnation
HARVARD

THE color of this novelty is a very rich crimson. The blooms are of the finest as to size and quality and the habit is free and continuous, every shoot producing a flower with a calyx which we guarantee as non-bursting. Blooms borne on long, wiry stems from 24 to 30 inches and over. Price \$12.00 per 100, \$100.00 per 1000. Usual discount on large orders.

NEW CARNATION FAUST (BRILLIANT
SCARLET)

This novelty is very fine for commercial use owing to its extreme productiveness; a fine one for Christmas trade. Color, form, stems, habit and productiveness all that can be desired. Price \$6.00 per 100, \$50.00 per 1000. Usual discount on large orders.

Chrysanthemum for Name.—J. J. B., Mass.—The flower is Princess of Chrysanthemums, an old variety, and one that has been known under several names. I think it is one of the varieties imported by Peter Henderson & Company from Japan in the eighties. Frank Hardy (1896) was a sport from this variety, and was also known as Fuji Snow.

(93) **Insects in Rose Soil.**—I send you two samples of soil from our rose bed. One is infested with numerous little bugs; the other contains a dark-colored worm of the same length as the wire worm. We found this worm on the grafting joint of a Perle des Jardins rose plant which died down suddenly. On pulling up the plant we did not find any traces of club root, but have found that disease on other plants in the same bench. Kindly tell us how to eradicate the pests.

New York. G. W.

—The soil contained maggots that were probably introduced there by the bits of decayed wood among the manure. Lime water will destroy them.

The hard-shelled worm sent with the rose twig is well known where decayed wood or damp places are found. It belongs to the same family as the wire worm, but is not destructive to living plants, so the death of the rose plant cannot be laid to it. These insects have a disagreeable odor when crushed. They feed on dead matter and have a shell too hard to be affected by any poisonous powder that they may come in contact with, so that hand picking must be resorted to to destroy them. Removing all decayed wood and drying up the damp places is the best preventive.

(94) **Worms Eating Carnation Plants.**—We send you some worms that have been eating our carnation plants. Can you tell us the name of them and what will destroy them?

New York. GROWER.

—We find on examination that this is the common tomato worm, and would recommend dusting over the plants with Slug Shot to destroy the pest.

THE WEEK'S WORK

Timme's Timely Teachings

The Florists' Christmas.

To the florist all great festivals in their regular recurrence are anything but holidays in the sense of being days of exemption from work. Christmas of 1907, now so close at hand, is likely to bring as much—if not more—in the way of a rushing all-around good business as did any of its forerunners. It may confidently be expected that flowers and plants will this year more than ever assert their supremacy as the most appropriate of Christmas offerings. More also than at the holiday in previous seasons will the best class of patronage be known by the exercise of good judgment in the selection of gifts. Critical scrutiny and intelligent choosing on the part of the buyer will probably to a greater extent than in former years characterize most transactions in the business of this Christmas, if present indications are not altogether misleading.

Holiday Stock.

As the public from year to year evinces a greater knowledge in matters floricultural to the extent of being before long probably as fine judges of good stock as the professional florist could ever hope to be, so also will the necessity of good culture in the production of the stock become more and more imperative. This turn in the affairs of the business in flowers and plants, though highly gratifying to the good grower, has in recent years brought disheartening results to those who held to the belief that at Christmas at least anything, no matter how poor or second class in quality, would find a ready market.

But holiday shoppers of the better class, on whose trade florists must mainly depend, are fast becoming as discriminately exacting in their demands as could possibly be wished for by the best equipped and most completely stocked of retail florists. The hope for a rousing business at the coming Christmas-tide is most certain to be fulfilled, when based on the possession of excellent stock to be put forth for that occasion.

Assuming that the unusually fine appearance and the seemingly ample supply in all lines of Christmas floral offerings, as seen here, is typical of conditions elsewhere, another week of final preparation would enable retail growers and store florists to face the coming rush of business activity with serene confidence. Facilities for meeting a most diversified demand for what florists offer at the holidays have in late years been extensively widened, and as they continue to develop the task of being properly prepared for the occasion becomes less difficult.

While greenhouse products, expressly reared for this particular trade, show a notable gain in quality over what was considered fairly good holiday stock in years gone by, very little in the way of novelties—that is, plants and flowers regarded as strikingly new by the public—has it been possible to add to the list of what is grown now and which has been practically the same as regards range in variety for several decades. The Boston fern at first and then its retinue of greatly improved new forms are about the only novelties of prominence in the class of decorative plants; and what this nephrolepis since its introduction has done and is still doing toward increase of business will probably never be fully realized. But great things of strictly novel character in decorative foliage plants are promised for the near future. New forms

in dracaenas, ficus, araucarias, etc., have already made their appearance; more are likely to come and all will be gladly welcomed by grower and public alike.

In flowering plants for the Christmas trade no novelty of comparatively recent introduction can lay claim to having proved quite as valuable an acquisition as Begonia Gloire de Lorraine. It may not be the most profitable of Christmas plants, but it certainly is the most useful, and the grower of holiday stock has come to regard this finest of Winter-flowering begonias as indispensable and worthy of the best of care.

Poinsettias, cyclamens, azaleas, lilies and a few other early flowering bulbs head the list of what remains in the line of plants brought into bloom for Christmas, made a trifle more complete by adding a few ericas, some primulas, Baby Rambler roses, lily of the valley in pots and a sprinkling of acceptable plants from the general greenhouse stock, such as fuchsias, begonias, heliotropes and geraniums. Roses, carnations, some belated chrysanthemums, bulbous stock, cut poinsettias, stevias and little of anything else form the bulk of the Christmas output in cut flowers; and a big bulk it promises to be this year.

Nor does it seem that any great dearth in greenhouse grown or woodland gathered decorative greens need be feared at the coming holiday. Many ferns of nearly all varieties now under general cultivation, palms, also crotons, ficus, dracaenas, araucarias in particular, ornamental grasses and mosses, pandanus, peperomias and plants with green or variegated foliage of various kinds will all be found to be serviceable stock at Christmas.

Embellishment.

While the grower has found it rather difficult to bring about as great an increase in variety as in quantity of holiday output, the dealer in florists' requisites and accessories with keen discernment of what was needed mastered the situation to the entire satisfaction of everyone concerned. His wares, manifold in design, utility, size and price and constantly undergoing astounding changes in all of these points have been the means of promoting trade, and eventually heightening pleasure and profit accruing therefrom, to so great an extent that now they are the dominant feature in the business of the retail florist.

There is no doubt that even the simplest of these fanciful creations of quicksighted business ingenuity, rightly employed, add an almost irresistible charm to the living plant or floral make-up. The most perfect of either foliage or flowering plants, in a pot washed ever so clean, can be made more attractive—not to say beautiful—by neatly adjusted pot cover and artistically fastened bow of ribbon. If by this the value of the plant is enhanced to more than what the original cost of cover and ribbon amounted to, this easily gained addition to actual profit in the transaction is only the outcome of the far greater good accomplished by embellishment in having made plant and place more enticingly attractive and thereby made the sale possible, with probably many others brought about through the same means.

Where a high-class trade justifies the construction of elaborate holiday pieces and costly plant receptacles form a great part of the stock displayed, embellishment often falls to the lot of the living plant rather than the manufactured article. A five-dollar basket with a one-dollar plant in its bowl makes the combination a ten-dollar bargain. This sort of business may seem a too radical departure from accustomed ways in the traffic of the retail florists and may probably not meet with entire ap-

probation from the grower whose pride centers mainly in his own faultless product; but it is approved of by the highly pleased buyer, and that stands for a good deal when to please him must be our first aim. In my

opinion a transaction of this character seems less incompatible—if at all—with business integrity than the sale of a hopelessly shabby plant, its poor condition concealed by lavish trimming and gaudy ribbons.

Prices Advertised in these Columns are for **THE TRADE ONLY**—When Writing Please Mention **THE FLORISTS' EXCHANGE.**

ORCHIDS

WE are now booking orders for freshly imported **ORCHIDS** to arrive during 1908, of all the leading kinds, such as **CATTLEYAS, ONCIDIUMS, VANDAS, DENDROBIUMS**, etc. We will book your orders **now** at reduced prices, and supply you with extra fine selected stock. Beginning with January 1, 1908, we will not have any traveling agent on the road, and the expense incurred heretofore in this way will be applied to the lowering of prices of our goods, thus benefiting our customers as well as ourselves in a substantial way.

Write us for information as to kinds and prices of **orchids** we will import this coming year, and we assure you we will do our best to please you.

Our stock of **established orchids** of all kinds is very large, and we can supply pretty nearly everything in orchids worth growing. Also best **ORCHID PEAT**, live **SPHAGNUM MOSS** for orchids, and orchid baskets of all sizes. Address all correspondence direct to the house.

LAGER & HURRELL, SUMMIT, N. J.

Few florists, of course, will be called upon to practice either at the coming holidays. The abundance of good stock available removes the temptation of disposal of the unrepresentable under the disguise of artificial adornment, and not everybody is fortunate enough to cater to the highly exclusive of a well-to-do patronage.

But however modest his establishment may be and whether located in suburb or country town, the florist who neglects to lay in a goodly supply of ribbons in various shades, pot coverings of all makes, fern dishes—also good for pansies, lily of the valley and like material—pans, fancy and plain in several sizes, square and round boxes of birch-bark ware, not to forget an assorted dozen or more of moderately priced hampers, baskets and curiously wrought plant receptacles of fetching pattern, does not seem to care greatly for his own interest or that of the trade in general. He should, however, be sparing in the use of super-gaudy, grotesquely unique or suggestively fantastic designs in the make-up of holiday plant or floral offerings. If he be unpracticed in the use of the more appropriate of any of these helpful contrivances he should rely on his own good judgment rather in the filling of fancy dishes, hampers, boxes and baskets than attempt the reproduction of masterfully executed pieces, as put forth by adepts in this line of work. So also should he exercise his innate sense of beauty in the trimming and so-called dressing of plants, flowers and made-up pieces and rather practice cautious moderation than be too lavish in the use of accessories employed in embellishment. It is safer and also cheaper. The dressing of plants in particular, when overdone, ceases to be pleasing adornment, is looked upon as out of place and therefore offensive to a refined taste, may even appear ridiculous or at least daringly peculiar. But to try to get along without any of the aforementioned articles at all will never do, as the ducted nowadays and at all hazards should the retail florist patronized

by an appreciative public be well supplied in this line of goods.

Final Preparations.

Next to being assured that a good stroke of trade is coming is to be in perfect readiness when it does come. There is hardly more than a week before us in which to complete preparations. But much may be accomplished in even so short a space of time. The making up of plant combinations in pans, dishes and boxes will be part of the coming week's work. It can be done far better some days before than at any time during the rush of holiday activity. There is in any greenhouse establishment a great amount of suitable material—not necessarily of the holiday portion—which could here be used to advantage. In green and colored foliage plants of upright, spreading and trailing habit there is a plenty and they should be made use of quite freely. Besides ferns, palms, dracaenas, crotons, and the more expensive things from hothouse and greenhouse, there are a number of plants, weedlike multipliers, which might well be used with fine effect in plant arrangements of combinate character, such as tradescantia, panicum, lycopodium, coleus, alyssum, lobelia, myosotis, bronze and white variegated geraniums, all the better if in bloom and many other things with bright leaves or flowers and dwarf in growth. Ferns make a good setting for most flowering plants, should be unsparingly used in poinsettia dishes and as a fringe to broad-leaved foliage plants. In the filling of pans, baskets and hampers with such plants as pandanus, crotons, Begonias Rex and Gloire de Lorraine, cyclamens, primulas, pansies, Roman hyacinths and well-flowered, good-sized geraniums it is better to use only the one kind of plant in every case; one single plant, in fact, if sufficiently large, will, in the case of the first named five or six, produce the best effect.

Much also may yet be accomplished in bringing the regular Christmas stock to a perfect finish at the trade in flowers and plants is con-

CARNATION CUTTINGS

WINSOR (silver pink), one of the best novelties ever sent out; it is a money-maker for everybody. \$6.00 per 100; \$50.00 per 1000.

WHITE ENCHANTRESS (white), undoubtedly the best white in commerce to-day. It needs no further description than to say that it is a pure white sport of Enchantress. \$6.00 per 100; \$50.00 per 1000.

ARISTOCRAT (cerise), a very valuable acquisition to the dark pink class. It is far superior to Mrs. Lawson in every way. \$6.00 per 100; \$50.00 per 1000.

BEACON (red), a very prolific variety of a strong constitution. It is early, free and continuous and has no tendency to burst its calyx. \$6.00 per 100; \$50.00 per 1000.

VICTORY (red). As a good all-around red it is without doubt the best in its class in the standard varieties; it is a favorite everywhere. \$3.00 per 100; \$25.00 per 1000.

All of above varieties are ready for immediate delivery, or later if you desire. We have a large stock of all of them, and can guarantee you extra selected cuttings, well rooted and free from disease. Send us your order, whether it be large or small, or send for complete list of varieties.

JOS. H. BLACK, SON & CO., Hightstown, N. J.

proper moment. A reasonably higher temperature than has been maintained until now must be the means of pushing backward crops, intended for Christmas to a desired finish if their present condition justifies the hope of thereby attaining the end desired. Far more difficult will it prove to hold back at this the eleventh hour anything greatly ahead of time, to keep in perfect shape and salable condition a crop of bloom or a lot of superbly finished flowering plants, that prematurely reached their prime of beauty. Keep cool is good advice—of the cold storage kind—but a better one, also held over from last year, is to abstain from keeping salable stock until Christmas. If it can be sold before that date.

FRED. W. TIMME.

THE EXHIBITIONS

Chrysanthemum Show at Jamestown Exposition.

An exhibition of chrysanthemums was held at the Jamestown Exposition, Norfolk, Va., from November 25 to 30 inclusive. The night of the 30th flowers were given to all the ladies present. Mrs. Harry St. George Tucker, wife of the President of the Exposition Company, was given a very large bunch of American Beauty roses, grown by Mann & Brown, Richmond, Va.

J. H. Small & Sons, Washington, D. C., received first premium for best collection named, Wm. Nilsson, Woodlawn, N. Y., won the special premium offered by Mrs. Harry St. George Tucker, a silver and copper loving cup, in the class for largest collection; also third, for vase of fifty blooms, any color, and first in class for 25 blooms one variety, yellow.

Vaughan's Seed Store, Western Springs, Ill., took first for six blooms, one variety, white; first for six yellow with Golden Wedding. These had stems 5 feet long and came in fine shape.

Henry Eichholz, Wayneboro, Pa., was awarded third for six dark yellow; first for best blooms dark pink; first in class for six bronze; and first for vase of fifty, one variety of color.

J. D. Hooper, Richmond, Va., was first for vase of 100 blooms, one or more varieties. This exhibit consisted of Golden Wedding, Timothy Eaton, and A. J. Balfour. They were well-grown, large flowers, with clean foliage.

Mann & Brown, Richmond, Va., received the special premium offered by Mrs. Harry St. George Tucker, a silver loving cup, for the largest and best collection; second for vase of fifty, one or more colors; first in class for twenty-five, one color, white (Timothy Eaton); first for twenty-five, one variety, light pink (Wm. H. Chadwick); second for twenty-five, one variety, white; first for six, one variety, light yellow; first for six light pink; second for six, one variety, dark pink. These were the largest and finest flowers that were sent, being clean, well-leaved, of good color, and were "the talk of the town."

I wish to thank all my friends who have so kindly sent exhibits here, and I hope they will have a prosperous season in the year so close at hand.

JULIUS J. HEINREICH,
Superintendent Landscape Department.

Maryland Horticultural Society.

The annual meeting and exhibition of the Maryland State Horticultural Society, held at Baltimore, December 2, 3, 4 and 5, was the most successful in the history of the organization. The show extended one day longer than scheduled to gratify the wishes of the general public as well as the State Grangers and Corn Breeders' Association, which met during the week and had the use of the Fifth Regiment Armory Hall in conjunction with and by courtesy of the Horticultural Society. The exhibition, which was a free one, was attended by many thousands, especially on the second, third and fourth days.

The commercial exhibits of local and other firms were complete, interesting and instructive. H. A. Dreer, Philadelphia, Pa.; Henry F. Michell Company, Philadelphia, and the Herenden Manufacturing Company, Geneva, N. Y., all had good displays. Lord & Burnham Company, New York, showed modern greenhouse appliances and hoisted sash; E. A. Lord was in charge, assisted by D. T. Connor.

C. W. Ward, Cottage Gardens, Queens, N. Y., exhibited four exquisite new carnations for which he received a special certificate of merit. The varieties were Mrs. Tom Harvey, Mrs. C. W. Ward, Snowflake and Alma Ward, the flowers arrived in fine condition, and on the sixth day were in almost as good condition as on the first day.

Stevenson Brothers received a special certificate of merit for new pink (Lawson shade) carnation Splendor. H. Weber & Sons Company, Oakland, Md., Henry Fischer, George Morrison, J. H. Moss, F. C. Bauer, J. P. King and others had exceptionally good carnation exhibits.

The display of roses, while not so large, was of a high standard. Among the rose exhibitors were George Morrison, Andrew Anderson, L. H. Moss, Stevenson Brothers and John Cook, who showed his new pink rose, with red Cardinal and white Madonna, with others. Mr. Cook was given first prize and a silver medal for his new pink rose. The judges were: Messrs. G. Schaffer, F. H. Kramer and C. E. McCauley of Washington, D. C.

The executive board of the society recommended that a silver medal, with diploma, be given F. H. Kramer, Washington, for his rose, Queen Beatrice, of which he had several large vases on exhibition, which attracted much attention.

The exhibits of exotics and other ornamental and flowering plants were ex-

tensive and helped much toward covering a large portion of the immense floor space of 60,000 square feet. The Park Department of Baltimore assisted very materially by placing four large circular and oval beds, each of which contained rare collections of palms, crotons, ferns and other foliage plants; one oval was filled with late blooming varieties of chrysanthemums from Clifton Park.

The nursery exhibit of both ornamental and fruit trees was larger and better than ever before. I. H. Moss's display alone covered 2,000 square feet, 1,800 square feet of which were devoted to well-formed specimen plants of coniferous trees and shrubs in large pots and tubs. Messrs. Franklin Davis, J. G. Harrison's Sons, Berlin, Md., and others made very good exhibits. The society was especially indebted to the Franklin Davis Nursery Company, for bringing in over 150 large specimen spruce trees, ranging from 10 to 30 feet in height; these trees were used most effectively in the decorations of the hall.

Among local firms the Messrs. R. Vincent, Jr. & Sons Company, White Marsh, Md., had an exhibit of dahlia, canna caladium and other roots and bulbs together with pompon chrysanthemums, geraniums, etc. The chrysanthemums of I. H. Moss, Weber, Fischer, Bauer, the Pimlico Greenhouses, E. Bishop, W. J. Hannigan and especially those of George Morrison were very meritorious.

Seeds, bulbs, implements, fertilizers, etc., were shown by Griffith Turner Company, Belgiano & Company, and others.

The corn exhibit and samples of cereals produced in the State, as shown, were pronounced by experts from other States as of the very highest standard throughout; the same may be said of the fruit and vegetable exhibits.

The exhibition from an educational standpoint was most beneficial to the general public; and the success of future shows is assured, for the exhibitors and the public were most enthusiastic.

Strong efforts were made by various speakers to secure closer affiliation and combination of all horticultural interests in this country. Governor Warfield and Mayor Mahool of Baltimore both attended the exhibition and made addresses.

The banquet, which was held at one of our prominent hotels, was well attended. The Governor and Mayor were present, as were a number of the wives and daughters of horticulturists.

Orlando Harrison, the retiring president, presided over the meetings and the newly elected president, Chas. L. Seybold, acted as toastmaster at the banquet.

The newly elected officers of the Maryland Horticultural Society are: President, Chas. L. Seybold; Professor C. P. Close, State Horticulturist, College Park, is secretary and treasurer; and W. McCulloch Brown, Oakland, vice-president. About 30 county vice-presidents were selected.

The prizes awarded were as follows: J. P. King, Mount Airy, first for Mrs. Lawson carnations, for geraniums and for specimen geranium. Edw. Bishop, Roslyn, Md., first for pink chrysanthemums. F. C. Bauer, Govanstown, Md., first for Beacon carnations; second for mignonette. John Cook, Baltimore, Md., first for red rose, for pink rose (silver medal), for begonia, for best Begonia Rex and Begonia Agatha; second for white roses and for specimen fern. Pimlico Greenhouses, Park Heights, first for pink chrysanthemums. Richard Vincent, Jr. & Sons Company, White Marsh, Md., first for pompon chrysanthemums; second for six plants; special mention for canna, dahlia and caladium bulbs. A. J. Tourney, Baltimore, Md., first for mignonette; second for foliage plants. Andrew Anderson, Govanstown, Md., first for American Beauty; second for red roses. Stevenson Brothers, Govanstown, Md., first and second for pink roses. George Morrison, Uplands, Md., first for best American seedling foliage plant, for cypripedium, specimen begonia, specimen flowering plant, specimen orchid, best palm, any variety, best twelve crotons, best twelve ornamental plants, best white chrysanthemums, best fern; second for American Beauty roses and for Mrs. Lawson carnations. W. J. Hannigan, Catonsville, Md., first for yellow chrysanthemums, for violets; second for any color roses, for white chrysanthemums and best twelve crotons. Henry Fischer, Baltimore, Md., first for best American seedling chrysanthemum; second for white roses, for yellow chrysanthemums and for violets.

F. H. Kramer, Washington, D. C., was awarded silver medal and diploma for Queen Beatrice rose. H. Weber & Sons Company, Oakland, Md., first for twenty-four seedling carnations. I. H. Moss, Govanstown, Md., first for white roses, for twelve roses, any color, for twenty-four blooms carnations, twenty-four blooms white roses, best group coniferous trees and shrubs; and for best individual display of cut flowers he was awarded Gardeners' Club's prize.

Ward, Snowflake and Alma Ward, Stevenson Brothers, Govanstown, Md., were awarded special certificate of merit for new pink carnation Splendor. Special mention was given to the Park Department for groups of ornamental foliage plants and pot chrysanthemums, covering a floor space of nearly 4,500 square feet.

S.

Washington, D. C.

Club News.

The meeting of the Florists' Club was postponed from the evening of December 3, to December 6. President Peter Bisset by reason of his recent severe illness was hastened by his physician to Porto Rico; he left on Friday. The chair was occupied by Vice-President Z. D. Blackistone. A letter was read from Mrs. Florence M. Harding, thanking the club for the very generous donations of chrysanthemums and other flowers sent to the various hospitals from the recent exhibition. Everybody was still enthusiastic over the last flower show and one of equal merit is assured for 1908. Wm. F. Gude referred to the death of P. J. Hauswirth, secretary of S. A. F. O. H., news of which came as a great shock to Washington florists. Mr. Gude characterized Mr. Hauswirth as a gentleman well deserving the confidence of the people throughout the land, a capable and efficient secretary, a business man, and one that would be missed by all. A meeting of the executive committee was immediately called, and a handsome wreath ordered by wire from a Chicago house, to be sent by the Florists' Club to Mr. Hauswirth's funeral. A committee was also appointed to draft suitable resolutions on Mr. Hauswirth's death; this committee was composed of Wm. F. Gude, Jas. J. Harty, and Jas. L. Carbery. The resolutions follow:

Whereas, news has been received of the sudden death in Chicago, on December third, of P. J. Hauswirth, Secretary of the Society of American Florists and Ornamental Horticulturists. And

Whereas, Mr. Hauswirth was known throughout the length and breadth of the country as an enthusiastic fellow florist and admirer of things beautiful, devoted to the best interests of the society of which he was secretary, willing and anxious at all times to be of any possible service to his own or kindred organizations; a man beloved by all who knew him. And

Whereas, We, The Florists' Club of Washington, D. C., recall with pleasure the various occasions upon which our deceased friend was with us, and his keen interest manifested in all matters pertaining to our welfare; Therefore

Be it resolved: That these resolutions be spread upon the minutes of this meeting as an expression of the great shock with which the announcement of his death comes to us, as an evidence of the deep and heart-felt sympathy of the officers and members of this club for the family in the great bereavement which has come to their home. And be it further

Resolved: That the secretary of this club be directed to transmit a copy of these resolutions to Mrs. Hauswirth and the members of the family, and at the same time convey to them the sincere hope of the officers and members of this club, that the Divine Ruler of the Universe may be their comfort and support in this time of their sorrow. And be it further

Resolved: That copies of these resolutions be sent the Chicago Florists' Club, in which Mr. Hauswirth was so long an active and efficient worker, and also to the Society of American Florists and Ornamental Horticulturists, of which he was secretary at the time of his death.

The American Rose Company closed its stand in Centre Market last week.

The exhibition of The American Carnation Society is set for the third week in January.

A. E. Wilson, with Gude Brothers Company, was married on December 9. JAS. L. CARBERY.

Newport, R. I.

News and Trade Notes.

The condition of Carl Jurgens's establishment in general indicates a large output for the Christmas market. Carl Jurgens, Jr., is now taking a very active part in the management of this extensive concern.

It is expected that the plant trade this Christmas will show a marked increase over preceding similar occasions. With the exception of one or two lines the plants needed will be purchased from out of town.

The election of officers of the Newport Horticultural Society took place at the annual meeting Tuesday evening, December 10.

A noticeable dullness in the line of outdoor nursery and grading work caused an almost feverish scramble to secure the contract for the work to be done in improving the grounds of the Pembroke Jones estate. J. K. Sullivan finally got the contract. All the grading will be done as soon as possible to enable the planting, which it is understood will be quite extensive, to be started early in Spring.

All the Newport florists are making elaborate plans and preparations for Christmas. John W. Gibson of Gibson Brothers visited New York and vicinity last week on business connected with that occasion.

F. L. Zeigler is experiencing a period of unusual prosperity; in addition to his regular stand on Broadway and a Summer store on Bellevue avenue, a week ago he secured a lease of the store adjoining the one on Broadway wherein he has the largest line of Christmas novelties seen here in quite a while. He is at present making a run on Christmas bells.

John Marshall, for several years superintendent for Hon. Perry Belmont at "By the Sea Greenhouses," has leased these greenhouses from Mr. Belmont. As long as Mr. Marshall retains control of this place it will be run on a strictly commercial

basis. In the past, although most of the cut flower product was marketed the place was not generally known as being commercial. Mr. Marshall is well known as a pushy and skillful grower. He was particularly successful while in Mr. Belmont's employ with carnations and chrysanthemums; of the former he has raised several meritorious seedlings. One of Mr. Marshall's chrysanthemum seedlings scored quite high when exhibited recently in New York. D. M.

Los Angeles, Cal.

Trade Items.

Beery & Norris of the Ba Tree Nurseries, Troy, O., brought to this market a large consignment of bay trees of all sizes. They are all in fine healthy condition and present a beautiful appearance. Planted in the open this tree does fairly well in Southern California, but in tub they are a failure, and our nursery men who have learned wisdom from experience have ceased their importation. The great number of new homes that are being established by people of means from the East who have not yet learned that all kind of plants cannot be grown everywhere, buy this class of stock, but never purchase the same kind a second time.

The demand for ornamental stock of all kinds adapted to our soil and climatic conditions is unprecedented and that, too, at prices that will pay growers a good profit. Eucalyptus of different sorts is being grown by the million to meet the demand for planting the coming season for timber culture. The Santa Fe R. R. has planned to set out 8,000 acres in San Diego county, to grow their own railroad ties for the future. This large acreage will not all be planted at one time, but the planting will cover a period of four years.

CHRISTMAS Invitation Cards

Every retailer in the land makes special effort at Christmastide to draw the attention of customers and others to the choice stock of plants, flowers, etc., which he has provided for that festive occasion.

To facilitate the efforts of the dealer, the A. T. De La Mare Ptg. & Pub. Co., proprietors of The Florists' Exchange, have prepared a set of four invitation cards, each one printed in four colors, as follows:

No. 1—A wreath of Holly tied with red ribbon and showing holly foliage and berries in their natural colors.

No. 2—A bunch of Mistletoe showing foliage, berries and stem; all in their natural colors; the cut is vignettted and very attractive.

No. 3—A wreath of Boxwood tied with red ribbon and finished off with sprays of the Pussy Willow; all in their natural colors.

No. 4—A cluster of Christmas Bells pendant on a spray of Holly; all in their natural colors.

Delivery F. O. B. New York at the following prices:

100 Cards and Envelopes	\$5.00
250 " " "	10.00
500 " " "	15.00
1000 " " "	30.00

Each Additional 1000, \$25 00

Sample of No. 1 (Holly Wreath)

The cards are on the finest stock (size 4x5 ins.) and the printing is most excellent. Baronial envelopes of fine quality, unprinted, are furnished with each order. In addition, to make the work complete, we furnish any wording you wish on the Invitation, which latter will be printed in black ink, unless otherwise ordered.

On orders of 100, 250 or 500 we furnish your selection of any one design out of the four; additional designs, however, can be selected at an extra charge of One Dollar each. On orders for 1000 or over we furnish your choice of any two designs.

If interested, send at once for a set of sample Invitation Cards. They are the finest designs and the best money-makers that have ever been provided for the trade and, at the prices quoted, are very cheap.

We expect to be deluged with orders for these cards; therefore, would advise you to act promptly. Address

News of the Week.

Saturday last, December 7, saw the beginning and opening of a new plant market in this city, which, if it can be carried out successfully and according to the wishes of the originators of the scheme, will perhaps be the nucleus of a market here on the style of the Covent Garden in London. A temporary location has been secured at 43 West Twenty-seventh street, and there the growers are displaying their plants every day (Sundays excepted) from 8 a. m. to 12 noon. Growers represented there on the morning of the opening were John Scott, Brooklyn, N. Y.; H. C. Steinhoff, West Hoboken, N. J.; Herman Dryer, Newtown, L. I., N. Y.; The Hinode Company, Whitestone, N. Y.; H. Scholzel, New Durham, N. J.; Lehnig & Winnefeld, Hackensack, N. J.; Julius Roehrs Company, Rutherford, N. J., and Anton Schultheis, College Point, N. Y. So far, the growers speak very encouragingly of the business that has been transacted in the market and have every confidence that it will be continued.

The fact that the New York and New Jersey Market Florists' Association will probably have to seek new quarters for their market next Spring, leads some to think that that association will join hands with the newer society, and will procure a building large enough to accommodate both organizations for the Spring business. If this can be brought about, it would seem that the success of the plant market in this city will be assured, and without being under any obligations to the city authorities, who have been importuned a good deal for some years to erect a building suitable for market purposes.

Kurt Roehrs, one of the younger sons of Julius Roehrs, is quite ill with an attack of pleuro-pneumonia.

The moschosa does not seem to make as desirable a Christmas plant as was expected of it. The flowers are very similar to those of the *Spiraea japonica*, but the foliage and general make-up of the plant is not

half as pretty, and those who have provided specimens for Christmas are rather disappointed at its selling qualities.

Frank L. Moore, Chatham, N. J., left on Monday night for a short business trip to Washington, D. C.

A new flower store has been opened on Livingston street, Brooklyn, by Charles Trepel, which is to be known under the name of "The Blossom." This would seem a very appropriate designation for a flower store where the owner desired to have a catchy name for his sign.

The green goods men in Twenty-eighth street are rushing the season this year, their stores being decorated and festooned with green material of almost all kinds, including holly, leucothoe and princess pine.

The sympathy of the craft will go out to A. M. Henshaw, wholesale florist, whose wife died on Thursday, December 5, after a short illness of spinal meningitis. It was thought that Mrs. Henshaw was on the road to recovery until within a few hours of her death. The funeral services were held at the residence, 315 Macon street, Brooklyn, on Saturday. A wealth of flowers was sent, not only by Mr. Henshaw's fellow craftsmen in the wholesale trade, but also by many retail dealers, all of which testified to the grief and sympathy felt at his loss. The interment took place Sunday, December 8, in Greenwood Cemetery.

The Horticultural Society of New York held its regular monthly meeting on Wednesday, the 11th inst., in the rooms of the American Institute, 19 and 21 West Forty-fourth street. A lecture was given on "Summer School Gardens," by Ella S. Carter of Philadelphia, being illustrated by stereopticon slides.

The Greater New York Employment Agency (A. Hulsebosch, proprietor), with offices at 51 Greenwich street, has been opened for the supplying of greenhouse and florists' workmen. This is the first employment agency especially devoted to this purpose and it will, no doubt, fill a long-felt want.

Mengham & Westwood, two former employees of Thorley's Columbus avenue store, have gone into business for themselves, opening a store at 402 Columbus avenue.

Peter Bisset, Twin Oaks, Washington, D. C., has gone to Porto Rico, where he intends to stay several weeks for the benefit of his health.

Among the visitors in town this week were Wallace R. Pierson, Cromwell, Conn.; W. H. Elliott, Brighton, Mass., and John E. Haines, South Bethlehem, Pa.

Louis L. Sander of Sander & Sons, St. Albans, England, arrived in the city on Sunday on the Lusitania. This is Mr. Sander's first visit to America; he will remain in the country several weeks. Mr. Mellstrom, representative of the same firm, has been here since October last.

Cincinnati.

News Notes.

We were very agreeably surprised December 5 to receive a call from C. W. Ward and his friend Mr. Potter who were on their way from Michigan to the coal fields of Virginia. Only an hour earlier, we had received the sad news of the death of our esteemed friend, Phil. J. Hauswirth. Two of Chicago's most popular craftsmen are no more—James Hartshorne and genial Phil. Hauswirth. Their memory and their good deeds will long live after them. Words cannot be found to express our sorrow, especially for the dear ones left behind. A beautiful wreath, thirty-six inches in diameter, was sent to Chicago Thursday night. It was made at the establishment of J. A. Peterson and largely executed by that gentleman. The contributors were Mr. Peterson, Richard Witterstaetter, Albert Sunderbruch, Wm. Murphy and E. G. Gillett.

It was my pleasure recently to pass through Mr. Peterson's greenhouses and view the handsomest lot of plants I ever saw. Five houses are given up to Gloire de Lorraine and Agatha begonias, and many will be in elegant

shape for Christmas. Also Farleyense ferns, all sizes, grown only as Mr. Peterson grows them. But right here I cannot give him all the credit, for, while he was enjoying himself abroad, his sons, Rodger and Clarence, were busy at home growing his stock. Pandanus is here in all its glory, also dracanas, Boston and Scottii ferns, as fine as it is possible to do them.

I also called on G. Brunner's Sons, Price Hill. This firm consists of three brothers, Charles, Albert and Gus., all first class florists. Their stock for the retail trade is probably the best around our city. They have about 30,000 feet of glass. In four houses they grow about 10,000 chrysanthemums; two houses they have devoted to carnations; one to extra fine roses; two to ferns; one to poinsettias; one to palms and one to Gloire de Lorraine begonias and cyclamen.

I also called upon R. Witterstaetter and found him, as I had expected, in a house of Afterglow. That which interested me most was his experimental house—seedlings, in other words. He has some fine things. One is white, one lemon-yellow and one pink. There are also a lot of scarlet that look promising. In addition to carnations, he grows ferns of the different kinds. I noticed quite a number of pots of the Marguerite so largely cultivated by our esteemed friend, Wm. Nicholson, Framingham, Mass. It is well worth an florist's time to grow; it is beautiful and productive. Chrysanthemums Mr. Witterstaetter always did love and always grew them to exhibition size, but, alas, this year was the straw that broke the camel's back, and he says it is doubtful if he will ever grow another chrysanthemum. I was very much impressed with a bunch of white carnations—one of his new ones, and I believe when it reaches Washington, D. C., next month it will open the eyes of some of the trade. Mr. Ward seems to think the Washington meeting will be a record-breaker.

Other callers this week were Mr. Poague of Washington, Pa., and Chas. Dieterich of Maysville, Ky. E. G. G.

I CAN supply everything desired in the way of **Cut Flowers** for the **HOLIDAYS**.

For **CHRISTMAS** I shall have a superb stock of **Roses, Carnations, Narcissus, Lilies, Violets, Stevia** and all other seasonable flowers, and an excellent grade of **Smilax, Asparagus** and **Maidenhair Fern**.

One of my specialties is a splendid crop of **POINSETTIAS**, grown by Charles Hunt, Port Richmond, S. I., and which I can have shipped direct from the Greenhouses.

Quit.

Gossiping.
Fidgeting.
Grumbling.
Saying fate is against you.
Finding fault with the weather.
Anticipating evils in the future.
Pretending, and be your real self.
Going around with a gloomy face.
Faultfinding, nagging and worrying.
Taking offense where none is intended.
Dwelling on fancied slights and wrongs.

Talking big things and doing small ones.

Scolding and flying into a passion over trifles.

Boasting of what you can do instead of doing it.

Talking constantly about yourself and your affairs.

Thinking that life is a grind, and not worth living.

Depreciating yourself and making light of your abilities.

Saying unkind things about acquaintances and friends.

Exaggeration and making mountains out of molehills.

Lamenting the past, holding on to disagreeable experiences.

Pitying yourself and bemoaning your lack of opportunities.

Comparing yourself with others to your own disadvantage.

Work once in a while and take time to renew your energies.

Waiting round for chances to turn up. Go and turn them up.

Thinking that all the good chances and opportunities are gone by.

Writing letters when the blood is hot, which you might regret later.

Carping and criticizing. See the best rather than the worst in others.

Thinking of yourself to the exclusion of everything and everyone else.

Dreaming that you would be happier in some other place or circumstances.

Dilating on your pains and aches and misfortunes to everyone who will listen to you.

Belittling those whom you envy because you feel that they are superior to yourself.

Looking for opportunities hundreds or thousands of miles away instead of right where you are.

Speculating as to what you would do in some one else's place, and do your best in your own.

Gazing idly into the future and dreaming about it instead of making the most of the present.

Longing for the good things that others have instead of going to work and earning them for yourself.

All these "quits" come from a writer in Success.

REVIEW OF THE MARKET

NEW YORK.—The cut flower trade opened up this week very encouragingly, but the stormy weather on Tuesday seemed to put a damper on all business and affected prices considerably. On Monday things looked so bright that a general advance in values resulted. American Beauty roses went to 30c., and special Bride and Bridesmaid to 10c. Prices of carnations, also, were advanced materially. There is a plentiful supply of everything coming into the market. Gardenias, probably, were never so numerous as at the present time. Lilies, lily of the valley, mignonette and narcissus are all in heavy supply, and there is still quite a number of chrysanthemums seen on the market. Violets are selling at anywhere from 35c. to 65c. per 100; they do not seem to make much headway so far as bringing top prices go this year.

CHICAGO.—The market has tended toward a marked quietude here for the past week or more, along all lines of cut flowers, though in supplies and Christmas greens trade has been unusually active and the probable results now seem more favorable than was thought probable a week ago. There is a well-grounded feeling that Christmas business will be all that can be cared for, and as American Beauty roses, one of the main crops here, are now rather scarce, it is possible that the conditions of last year at this time may be repeated. The weather of late has not been very favorable to the grower and though Bride and Bridesmaid roses continue in good crop there would doubtless be a shortage if business was a little livelier.

Carnations continue on the short side, though the quality is generally good. It seems evident that weather conditions must improve to furnish a sufficiency of these flowers for the holidays.

The end of the chrysanthemum season is in sight, though there is still some good stock of these coming in.

Lilies are quite plentiful and good; callas are not any too numerous. Violets are in sufficient supply to fill demands. All greens are in good supply and of good quality. W. K. W.

BOSTON.—Market conditions are not so good as had been hoped; with the exception of the first of the week and Saturday, there seems to be a lull in business. An improvement is looked for soon. Prices have not changed a great deal. Roses are of fine quality and abundant; the same may be said of carnations. There are but a few chrysanthemums now, and some will linger till Christmas. Violets are not very plentiful. There are lots of other flowers such as bouvardia, stevia, Marguerites, etc., for which there is at all times a limited demand. Christmas green trade has commenced and promises to be brisk. J. W. D.

ST. LOUIS.—Conditions in this city have changed somewhat since our last report. We cannot say that trade is active, still there is always something doing in social work, transient trade and funeral work; and, as stock at present is not over plentiful, the local, with shipping orders about clean up the daily consignments received by our commission houses, which are handling some extra quality stock of everything in season. Should the prevailing pleasant warm spell of weather continue, there will be an over-production by the end of the week. The retailers say that this kind of weather is not beneficial to their business; cold weather is needed to place it on the basis where it belongs at this time of year.

In looking over the stock Monday morning, we found a scarcity in carnations of all varieties, Aristocrat, Enchantress, both Pink and Rose-Pink, White Perfection, Mrs. T. W. Lawson and Cardinal, are graded as fancy varieties and bring the top prices—from \$1 to \$5 per 100; others do not realize over \$2 and \$3 per 100. This market is well supplied with roses of all varieties. Bride and Bridesmaid are more plentiful than any of the others; the very best in these do not bring over \$5 per 100. Of Richmond, Ivory, Uncle John, Mme. Abel Chatenay and Killarney the stock is not quite so heavy, and prices range from \$3 to \$5 per 100, according to grade. American Beauty, fancy, with long stems are not much in evidence; \$5 per dozen is the best price. Short-stemmed varieties are in plenty at \$3 to \$10 per 100.

Chrysanthemums are over early this year; a few still come in, but poor in quality. Some extra good W. H. Chad-

wick arrived on Saturday and brought \$2 per dozen. Roman hyacinths and Paper White narcissus are selling well at \$2 and \$3 per 100; callas at from \$8 to \$10; sweet peas, 50c. and 75c. per 100. Violets are extra fine and are down to 50c. per 100 for the best.

All greens are in demand, especially smilax and asparagus.

ST. PATRICK.

PHILADELPHIA.—There has not been any change this week in the wholesale market; while the commission men are trying hard to get better prices, the demand will not warrant any increase. American Beauty roses realize \$4 per dozen, the top price. In teas, a few extra choice have sold at \$12, but \$10 is the best price on regular stock. Carnations run from \$2 to \$4 per 100; a few extra choice Beacon have sold at \$5. Chrysanthemums, while not so plentiful, are dragging; \$1.50 to \$2.50 per dozen is the best price obtainable for them. Lily of the valley is very plentiful, so much so that lots of it is seen on the street; prices range from \$2 to \$4 per 100. Violets, double, bring \$1 to \$1.50 and are not moving freely at those rates. Cattleyas are rather more plentiful at 75c. each. Gardenias go at \$4 to \$6 per dozen; Paper White narcissus, \$2 to \$3; white daisies, \$1 to \$1.50, yellow, \$2 to \$3 per 100. Mignonette sells at \$4 to \$6; sweet peas, 50c. to \$1; Lilium Harrisii, \$15 per 100. Asparagus brings 50c. per bunch; smilax, \$15 per 100.

DAVID RUST.

INDIANAPOLIS, IND.—The quiet prevailing generally before the holidays is more pronounced than usual. An optimistic view of the situation may be obtained from the large department stores, which are thronged with holiday shoppers and which state that business is fully up to other years at this period. Surely the florist will then receive his share of the custom in due time.

Flowers are not plentiful at this time. Carnations in particular are always ordered in advance at \$3 to \$4 a hundred; 75c. and \$1 a dozen is asked by the retailers. A few chrysanthemums remain at \$10 to \$20 a hundred.

The local supply of Bridesmaid and Bride roses is excellent, at \$5 to \$7 per hundred. This is augmented with shipped Killarney, Richmond, and Perle des Jardins, at market figures. American Beauty outsell other roses and bring \$5 to \$35 a hundred.

Home grown violets at \$1 a hundred are always acceptable. Michigan singles are much used at 75c. Harrisii lilies and callas are always obtainable at \$12.50 per hundred. Lily of the valley, mignonette, Paper White narcissus, Roman hyacinths, heliotrope and poinsettias lend variety to the market.

I. B.

CINCINNATI.—Business is good. In roses Bride and Bridesmaid are selling at 3c., 4c., 5c., 6c. and 7c.; Richmond, 5c. and 6c.; American Beauty, \$2 to \$5 per dozen. Carnations are scarce, at 3c. to 4c. Lily of the valley is in demand at 4c. to 5c.; Paper White narcissus, 3c. to 4c.; Roman hyacinths, 3c. to 4c.; violets, 50c. to \$1 per 100, both single and double. The single sell best in this market. Poinsettias are sold at \$3 per dozen; boxwood, 35c. a bunch; \$7.50 per case of 50 pounds. For fancy ferns, 15c. per 100 is asked; sprays, 50c. per 100; smilax, 10c. to 15c. per string; Asparagus plumosus, 35c. to 50c. per string or bunch; A. Sprengeri, 25c. to 35c. per bunch.

Collections are slow, which is about all we know of the money stringency here. I admit we are still getting "script" while the banks are loaning their greenbacks at 6 per cent.

E. G. G.

DETROIT, MICH.—Business in general is moving along nicely with a small supply of stock. Some fears are entertained as to the Christmas prospects owing to the prevailing, or better, passing crisis. However, Christmas is one of the few occasions when even the tightest pursestring is loosened up and that it cannot be celebrated without flowers is well known. If this present fear has a tendency to reduce the old habit of "pickling" stock, then spread the fear as much as possible. The buying public does not mind an advance in prices around the holidays, but they are entitled to fresh flowers. F. D.

OTTAWA, ONT.—On November 25 fire in the establishment of Graham Brothers did damage to the extent of \$2,000.

Prepare for Xmas LOOK!! Prices Slaughtered One-Half

Why? Because we want to make room to grow our extensive Easter stock. Down go the prices; can't be helped.

ARAUCARIAS, OUR SPECIALTY. were never so low in price in the history of Araucaria cultivation; everybody can afford to buy one.

THE TALK OF THE LAND

THE KISSING BUG OF THE WORLD makes everybody jump. **WHAT?** Don't you know? It is the Araucaria with its everlasting green. The only Christmas Tree that makes the gloomy happy. No home complete without an Araucaria at Christmas.

What is nicer than an **ARAUCAARIA ROBUSTA COMPACTA** or **GLAUCA** for a present for Christmas Day? This is the best species in the Araucaria family. Tie a bow of red, pink or lavender ribbon on one of these, about half way up, and put it in your store window, and you will have such a sight that everybody passing by your store will stand still, and it will advertise your business itself. Is it possible to sell such a fine plant, almost as large as a Christmas tree, worth a ten dollar bill, for only \$3.00? Yes, Aschmann does it. How is that? Because he has been a specialist in Araucarias for the last 15 years. Has them grown by an Araucaria specialist in Ghent, Belgium, under contract, who sends them to him every Spring by the ten thousand.

Who is that man—Aschmann? How do you spell it? **G-O-D-F-R-E-Y-A-S-C-H-M-A-N-N.** **GODFREY ASCHMANN**, the man who lives in Philadelphia at 1012 WEST ONTARIO STREET.

Every child, lady or man in the florist trade knows about him, from the Atlantic to the Pacific ocean.

He is a man who can give you bargains. Is that what you are looking for? Bargains in these hard times of business suppression? Thank you very much for your kind information. I shall write to him right away giving him an order.

LOOK AT THESE PRICES!!

ARAUCAARIA ROBUSTA COMPACTA and **EXCELSA GLAUCA**, the same in width as in height. Perfect Jewels in shape, as also in color. Have a house full and can meet all wants. Specimen plants, 6-7 in. pots, 6-year-old, 4-5-6 tiers, 28 to 40 in. high, usual price \$10.00, cut down to \$2.00; 6-7 in. pots, 6-year-old, 4-5-6 tiers, 25 to 28 in. high, usual price \$5.00, now cut down to \$2.50 and \$2.00; 6-7 in. pots, 5-year-old, 3-4 tiers, 18 to 25 in. high, usual price \$3.50, new cut down to \$1.50 and \$1.75.

ARAUCAARIA EXCELSA, specimen plants, 6-7 in. pots, 6-year-old, 5-6 tiers, 25 to 30 in. high, usual price \$2.00, now cut down to \$1.50; 6 in. pots, 5-year-old, 5 tiers, 22 to 25 in. high, usual price \$2.00, now cut down to \$1.00; 6 in. pots, 4-5-year-old, 4-5 tiers, 18-20-22 in. high, usual price \$1.50, now cut down to 75c.; 4-year-old, 3-4 tiers, about 12 to 16 in. high, 50c. to 60c. (In case we are out of the 60c. size when order arrives, we substitute 75c. size.); 2-year-old, good, bushy little plants, 2-3 tiers, 40c. **CAN FILL ALL WANTS.**

NEPHROLEPIS, such as **Whitmanii** and **Scottii**, also **Boston** and **Pierstoni** Ferns, all pot grown (not bench grown). Have them by the thousand, in all sizes, from 4 in. up to 8 in. pots.

NEPHROLEPIS AMERPOHII, small, 4 in. pots, 40c. to 50c.

AZALEA INDICA, 6,000 just arrived from Belgium, grown under contract for us, and never in my life have I received them in such a good condition as this time—well budded and with all their foliage on them. Have only well-known leading varieties, such as Deutsche Perle, Sima Mardner, Vervaeans, Apollo, Mme. Van der Cruysse, Empress of India, Prof. Wolters, Bernhard Andreas Alba, Niobe, John Llewellyn, Talisman, etc., price, 40c., 50c., 60c., 75c., \$1.00, \$1.25, \$1.50, \$1.75, to \$2.00 each.

AZALEAS in bloom for Christmas, subject to being unsold when order arrives, Sima Mardner, pink; Deutsche Perle, white; Vervaeans, rose and Mme. Petrich, pink, price 75c.-\$1.00-\$1.25 to \$1.50 each.

Oswego, N. Y., Dec. 4, 1907.

Mr. Godfrey Aschmann, 1012 Ontario Street, Philadelphia, Pa.

Dear Sir: The plants you shipped me via freight, November 26, arrived in good condition December 2. I am much pleased with them, as I consider I received good value for my money.

Yours truly,

W. H. WORKMAN, florist.

The good old day is dying, the dark days come;

No florist should be sighing o'er work undone;

Spring-like, with blossoms gleaming, fragrant and gay,

Should be both store and greenhouse for Christmas Day.

To Aschmann you should travel fast and buy the best,

Or mail your orders while they last; he'll do the rest;

Then when you balance up your book you all will say:

You never had more dollars booked than on Christmas Day.

News Items.
It is with much sorrow that we learn of the death of such a noble, generous and willing friend as Philip J. Hauswirth, Chicago. Probably no man among the American florists was better known than he. On all sides are heard comments, which, were it possible for him to have realized the warm regard in which he was held, would not have permitted his untimely end. The undivided sympathy of the craft is extended to Mrs. Hauswirth and children.
The seed houses are handling an immense amount of holiday decorations and report a fine business. A license is to be exacted from all street vendors selling holiday wares, so an increase in this line is anticipated by the shopmen.
Gloire de Lorraine begonias, cyclamen and poinsettia plants are not as plentiful as in former years; nearly all the available ones have already been ordered. Quite a few are to be shipped in, but, of course, this method is a hazardous one.
E. A. Nelson is growing lettuce in a part of his range this season.
Herman Junge is on the sick list.
I. B.

BALTIMORE.—Trade conditions in cut flowers have slightly improved. We had a good taste of Winter, with snow and plenty of ice, during the week. Chrysanthemums are nearly cleaned up, but good roses and carnations are coming in.
We were shocked to hear of the death of our friend Phil. J. Hauswirth. He had many friends in Baltimore.
The park department has planted over 50,000 pansy plants in the various squares and parks in the city.

Philadelphia.

Trade News.

While we are only two weeks from Christmas apparently there is nothing to indicate the approach of the holiday season. The retail trade is generally quiet. The florists' stores are buying very sparingly, and indications point to lower prices than are generally obtainable at the holidays. The prices of flowers are still against the grower, and even at the low figures prevailing stock is not cleaned up. The ball season opens on the 23d, with the dancing class composed of the season's debutantes. This class has a ball every two weeks during the season, the decorations being executed by the William Graham Company. Then we have a large private ball on the 26th, and the Benedicts' ball on the 27th; decorations for both will be by J. J. Habermehl's Sons.

Edward Keller of the Keller Pottery Company, Norristown, Pa., died on December 4, 1907, after a long illness.

A. N. Pierson, Cromwell, Conn., and Henry Pfister, Washington, D. C., were in town this week.

We find that several seed stores had orders, "given by private establishments," canceled this season; this has cut down the year's business considerably.

Orders for the decoration of department and small stores are offered at greatly reduced prices this year; several usually good orders have been refused by florists who have previously done this work.

Herbert Greensmith, formerly with the Andorra Nurseries, is now out of a position and open for engagement. Mr. Greensmith is an all-around plantsman, being especially well posted on hardy herbaceous stock. His present address is Flourtown avenue, Wyndmoor, Chestnut Hill, Philadelphia, Pa. DAVID RUST.

BUFFALO, N. Y.—John Schwegler, who has been with the Newlands for the past eight years, has resigned his position to go into business. He has bought the Pult place at Tonawanda, N. Y., and with his customary activity he will no doubt make a success of his new venture. W. H. G.

was released, and that was the end. But his memory will never be forgotten as long as the present generation of florists, Elks, Red Men, and associates of our late friend exist.

Trade Notes.

As the holidays approach bouquet green seems to weaken and holly strengthen.

Victor Thompson, an old Chicago florist, was found dead in bed at his home on South Park avenue a few days ago, death supposedly having been caused by heart disease.

The J. B. Deamud Company is well supplied with Michigan ferns and red berries for the Christmas season.

Vaughan's Seed Store is well prepared to fill all demands for Christmas greens, spiraea and manetti stock.

The W. W. Barnard Company suffered a slight loss by fire at Sturgeon Bay, Wis., last week.

Mr. and Mrs. Joseph Ziska celebrated their quarter century wedding anniversary on the thirtieth ultimo when their children and 150 guests and friends gave them a very happy surprise party.

August Poehlmann has been on the constant move since the recent show in Chicago, after which he left for St. Louis, then to Little Rock and after one or two days at home he went to New York, returning on Thursday last.

Mr. Swan, formerly with Mangel, has joined the force of the Iowa Seed Company, Des Moines.

C. M. Dickinson of E. H. Hunt's reports that his concern has taken the exclusive agency for Louis Wittbold's new cement bench and will soon be prepared to push this important invention.

Peter Reinberg, who is known as an ardent sportsman, recently returned with his brothers-in-law, the Messrs. Evert, from a very successful quail-hunting trip to the southern part of the State.

WM. K. WOOD.

Pittsburg.**Trade Notes.**

Red and green, the Christmas colors, already are being used to some extent in the appointments of various social events, and quite a few entertainments have been scheduled for the merry holiday season. It will be somewhat difficult to figure on trade for Christmas; it won't be of the best if the financial troubles continue. At the present time stock seems abundant, except carnations, which are in good demand and which have advanced a little in price. Chrysanthemums still hold out; some good ones are sold at fair prices.

Christmas trees and greens are in earlier this year, and from indications there will be an abundant stock. John Bader received trees the first few days of the month. Holly, so far, looks well. Ground pine wreathing is in fair demand.

Loew & Roehrig have secured a store room on Liberty street for the sale of greens, trees, etc.—a good location in the business district.

The Pittsburg Cut Flower Company is selling artificial poinsettias in various sizes, cut sprays and in pots, which can be used very effectively. This firm also handles a nice lot of boxwood, which has been much used the last few years.

E. C. Ludwig has made some changes in his store room in the Diamond, North Side. Fine office fixtures have been installed, and his clerical force will now attend to the business in the store room instead of the market house.

Club Notes.

The December meeting of the Florists' Club was not so well attended as the previous one. The subject for discussion was "Christmas Ideas in Plants, Flowers, etc." One new member was elected. Nathan Smith & Son, Adrian, Mich., showed some fine blooms of late chrysanthemums, several of which were much admired by our growers. Blind Brothers staged a small collection of plants suitable for Christmas trade, and the Schenley Park conservatories had some plants of poinsettias. A metal hotbed sash, fully glazed, was on exhibition, thoroughly examined and much discussed; Blind Brothers have the sale of it. Fred. Burki made a few remarks regarding what he had seen at the

ROBERT SIMPSON,
CLIFTON, N. J.

Jamestown Exposition. As to plants and planting he could not say much, as he was there too late in the season, but otherwise he was much pleased with the exhibition.

William Falconer suggested that it would be a good plan for the club to offer prizes for plants and cut blooms at our meetings and it was decided that a competitive display of carnations be held at the February meeting and prizes awarded for the best exhibit. A committee of three will be appointed by the president, who will make arrangements and likely report at the next meeting. A suggestion was made that the name of the club be "Pittsburg Florists' Club," omitting the word Allegheny, as the cities are now consolidated.

At the January meeting there will be an exhibit of roses; nomination of officers for next year will also be made.

Death of Robert Faulk.

Robert Faulk, who was widely known throughout the North Side as a florist in Allegheny market, died last week in his 59th year. He conducted a vegetable and flower stand for many years, but of late confined himself to the cut flower trade exclusively, which was managed by his two sons who, with one daughter, survive him. He had been ailing for several years. Funeral services were attended by several of the florists, and many floral designs were sent to the home.

E. C. REINEMAN.

Boston. The Week's News.

At the meeting of the board of trustees of the Massachusetts Horticultural Society on Saturday it was voted that the society become an affiliated member of the Chrysanthemum Society of America. The committees for the year 1908 were appointed and radical changes in the lists made. The following are the various committees: Finance—Walter Hunnewell, chairman, Arthur F. Estabrook, Stephen M. Weld; Library—Professor C. S. Sargent, chairman, Larz Anderson, R. M. Saltonstall, Dr. C. S. Minot; Lectures and Publications—John C. Olmsted, chairman; Miss Mary S. Ames, Miss Mary L. Ware, Wm. H. Spooner, Professor F. A. Waugh; Prizes and Exhibitions—J. K. M. L. Farquhar, chairman, Professor C. S. Sargent, W. J. Stewart, W. N. Craig, Edward Macmulk; Plants and Flowers—T. D. Hatfield, chairman, Duncan Finlayson, Thomas Roland, Emil Johansson, Joseph Clark; Fruits—Wilfred Wheeler, chairman, Wm. Thatcher, Edward B. Wilder; Vegetables—Josiah B. Shurtleff, Jr., chairman, George W. Moore, John W. Duncan; Gardens—Chas. W. Parker, chairman, S. M. Weld, J. H. Bowditch, F. L. Olmsted, A. H. Fewkes, W. P. Rich, Julius Heurlin, Robert Cameron, Thos. H. Westwood; Children's Exhibits—Mrs. R. G. Shaw, chairman, Miss Rose Hollingsworth, Mrs. E. M. Gill and Miss Helen Collamore.

The inaugural meeting of the society will be held January 4, 1908, and every Saturday during the months of January, February and March there will be lectures and discussions as in former years; the list of these will be ready for publication in a few days.

Ladies' Night at the Gardeners and Florists' Club will not take place at next meeting, December 17, as announced last week, so the members of the fair sex will pardon the misstatement and place it on the officials of the club, where it belongs. The club will go by special car leaving Park square at 12 o'clock to-day (Saturday) to Framingham to visit the various growers there.

The Massachusetts State Board of Agriculture held its Mid-winter meeting at Horticultural Hall on Tuesday, Wednesday and Thursday of last week. The sessions were well attended and much interest was taken in the discussions.

Welch Brothers are introducing a Christmas evergreen new in this city in the form of finely berried branches of the Japanese holly, Ilex crenata.

The market men, captained by E. Sutermeister, beat the seedsmen, captained by J. P. A. Guinereau, on Saturday in the liveliest bowling contest of the season.

"Innocents Abroad," by W. J. Stewart, will be the topic at the meeting of the Gardeners and Florists' Club, December 17. The landscape gardening classes of the club started on December 3 and are held every Tuesday and Friday at Horticultural Hall; about twenty members are attending.

Jackson Dawson has been confined to his home for several days.

J. W. DUNCAN.

DETROIT, MICH.—At its last meeting the Florists' Club had a busy time. Two propositions regarding the holding of a flower show in February of next year were considered, but no definite action was taken. During the evening the news of the death of Secretary Hauswirth of the S. A. F. O. H. was received, and resolutions of sympathy with his widow and family adopted and wired to Chicago.

J. A. Peterson, Cincinnati, O., was a recent visitor with samples of his plant specialties. James Scholes, Grand Rapids, Mich., was also in town.

WORCESTER, MASS.—On December 5 George D. Kelley, 30, a florist employed at Lange's greenhouses, was found in Hotel Warren with a bullet wound in his head. He registered at the hotel the previous evening under the name of Burns of Boston, and committed suicide during the night. He left a note saying he had seen both sides of life and there was nothing in it.

Heating Boiler Explodes.

The daily papers report a disastrous explosion of boilers at the plant of a florist in Missouri involving property damages estimated to be \$35,000. We are informed that the loss was not covered by insurance. We know nothing of the causes of the explosion—no details being given. In most greenhouses, however, low pressure boilers are used, and in this connection it is well to call attention in general to boilers of this class irrespective of the particular plant where this explosion occurred.

The common opinion is that low pressure boilers do not need insurance or inspection. Nevertheless, as a matter of fact they do explode and should be insured and inspected regularly for the following reasons: They are built to carry no more pressure with a given factor of safety than the buyer demands. Granting that the boiler is new, the factor of safety is between four and five, and this rapidly decreases under the conditions in which low pressure boilers operate. These conditions are usually not favorable to longevity. The boilers are out of service five or six months during the year and during this period rust and corrosion are very active if the boilers are not in condition to resist their action. When in service, the returns from the heating system are put back in the boilers, the water consequently being practically distilled. Water of this kind is one of the greatest solvents known and the result is an internal corrosion and pitting by which a boiler is ruined within a few years.

These conditions are certainly bad enough; but to make matters worse, the common fallacy that low pressure boilers will not explode leads to the employment of attendants who know little more than that a certain water level and steam pressure must be maintained. Second-hand boilers are frequently installed for low pressure conditions—being considered "good enough" for such purposes.

The conditions, in fact, are such that nothing short of expert inspection will afford safety. This and much else can be had by owners of low pressure boilers investing in our Steam Boiler Policy. Then their boilers will receive careful examinations by skilled boiler experts; their boiler attendants will be carefully instructed in the proper discharge of their duties; and suggestions and advice will be given for preventing corrosion.—Monthly Bulletin Fidelity and Casualty Company of New York.

St. Louis.

News Notes.

The Engelmann Botanical Club held a meeting on Monday night in the Central High School Building. The attendance was large. The feature of the evening was a paper by Dr. J. Arthur Harris of the Missouri Botanical Garden on "The Fertility of the Soil and Other Plant Food Problems." The attendance was largely composed of students from Shaw's Garden, who were much interested in the proceedings.

Charles and Harry Young of C. Young & Sons Company spent the past week on a hunting trip in Arkansas, both returning with a big lot of ducks and quail.

The news of the death of Phil. J. Hauswirth by his own hand was a great shock to his many friends in the trade here. Only a few weeks ago he was our guest as judge of the flower show, and attended the Florists' Club meeting. The club sent a floral tribute expressing sympathy to the bereaved family. The St. Louis Horticultural Society also sent a floral design as a token of condolence.

Henry Berning reports a large shipping trade in cut flowers and holiday supplies. He is handling a good quality of holly and green wreathing.

California violets are coming in fine and in abundance; a good supply of these is expected for Christmas sales.

Fred Ammann of Edwardsville is sending to this market extra stock in roses. His Mme. Abel Chatenay, Uncle John, Ivory and Richmond are in good demand at Kuehn's, who handles all Mr. Ammann's consignments.

J. F. Wilcox of Council Bluffs, Ia., is consigning to W. C. Smith & Company a lot of good Bride and Bridesmaid—also American Beauty roses. These are cleaned up pretty well each day.

A record-breaking attendance is expected at the Florists' Club meeting this week Thursday, as President W. Young and the trustees have made a special effort to bring the members out.

ST. PATRICK.

New Orleans.

News Notes.

Frank Rieth at St. Andrew and Camp streets, has made quite an addition to his store; he has also built a new greenhouse, 100x20 feet which will be devoted to the growing of plants. Mr. Rieth's chrysanthemums did not come in on time for All Saints' Day, but what was first looked upon as a misfortune has since proven to be a benefit, as they have been very handy since for various wedding and other decorations.

We have already been treated to several light frosts—not enough to do much damage.

Recent visitors to this city were Walter Mott, representing A. T. Bodington, New York; and Mr. Goudy of H. A. Dreer, Philadelphia.

CRESCENT CITY.

"Merry Xmas and Happy New Year"

WITH all the talk of hard times and financial troubles a Merry Christmas and Happy New Year is practically assured to everyone and we certainly wish all of you, customers and friends, the best of luck for the holidays and for the new year that is coming. We are confident that 1908 is going to be a year of prosperity, especially among the florist trade. The general public has been awakened during the past year to the fact that flowers are a necessity almost, and we can expect next year that people everywhere will buy more flowers than ever before. There is to be no shortness of money and the man who is able to supply the demand for good stock next season is going to get the business.

This year we have enjoyed a larger patronage than in any previous year and we want to thank all of you here for your many favors and valued orders. We feel sure that you will want a new house next year if you have used our material and we are going to be ready for you with a large stock of lumber and increased facilities in every department of our business. Don't wait until summer, though, to get your material, for we'll be awful busy next year after the first warm spring weather—let us talk it all over now and then you'll be ready on the dot. Let us wish you again the best of success for next year and that your Christmas will be all that it should be—a happy, enjoyable day full of thankfulness for the year's blessings and full of hope for the new year.

A WEEKLY MEDIUM OF INTERCHANGE FOR FLORISTS, GARDENERS, AND THE TRADE IN GENERAL

Vol. XXIV. No. 25

NEW YORK AND CHICAGO, DECEMBER 21, 1907

One Dollar Per Year

We desire to call attention to our large and fine stock of

Nephrolepis Piersoni Elegantissima, Whitmani, Etc.

These are **SPLENDID SELLING PLANTS FOR THE HOLIDAYS**. We offer exceptionally good value in the 6-in. and 8-in. sizes. Plants are in perfect condition and are exceedingly good value at the prices quoted. You will find no better selling plants than these beautiful ferns, and we offer them at lower prices than ever before.

2½-in. pots, \$6.00 per 100; 3½-in. pots, fine perfect little plants, \$15.00 per 100; 6-in. pans, 50c. and 75c. each; 8-in., \$1.00 and \$1.50 each; 10-in., \$2.00 each; larger specimens, \$3.00 to \$5.00 each, according to size.

NEPHROLEPIS SCOTTII. Fine plants, 6-in. pots, 50c. each.

NEPHROLEPIS BOSTONIENSIS (The Boston Fern). 6-in. pots, 50c. each; 8-in., \$1.00 each.

SMALL FERNS FOR FERN PANS

There is nothing that sells better during the entire winter than small ferns for fern pans. We have a splendid stock of extra strong plants in 2½-in. pots in the hardiest and most useful varieties for this purpose. Our stock will be found very strong and very nice.

\$4.00 per 100, \$30.00 per 1000.

SURPLUS BULB STOCK

We offer what remaining bulbs we have at bargain prices. The only cheap thing about them is the price. The bulbs are of first-class quality and in perfect condition. Bulbs planted in December, and even as late as January, can be had in fine shape for Easter; and as Easter is late

this spring (April 19th), they can be planted later than usual. If you have not all the bulbs you want, this is the last opportunity to get them. We offer an exceptionally fine lot of hyacinths, tulips, and the choice varieties of narcissus at bargain prices. Send for surplus list.

WINSOR CARNATIONS

We have a splendid stock of strong rooted cuttings ready for immediate delivery. In order to get the best results from Winsor, it should be planted early. Now is the time to get gilt-edged stock. We have a splendid lot of cuttings ready for immediate delivery, and can also furnish strong established plants from 2½-in. pots, fall propagations.

Strong rooted cuttings, \$6.00 per 100, \$50.00 per 1000.

The FLORISTS' EXCHANGE, 2-8 Duane St., New York

"Quality is remembered long after price is forgotten." What Quality Means.

Quality means the best and finest types procurable in their respective classes. We go to specialists for our flower seeds. Our customers, the florist, the private gardeners demand the highest grade. We have no cheap catalogue trade. "Quality" may mean a little higher in price. "Quality" in fact, means "Quality" and we know that when you buy from us you get it, and our customers know it, too. Catalogues now in press; 40 pages. Write for one; it's free. We sell bulbs too.

B. Vandegrift & Company, 21 packages seed; J. M. Thorburn & Company, two cases flower seed.

Seed Trade Notes.

We have had by all odds a most discouraging week for trade; in fact, we have not had any business taking the country as a whole; it has snowed, it has rained and it has hailed, separately and together, consequently as regards orders there have been none.

As regards the bulb trade it is practically over, and it gives me the utmost satisfaction to say that, taking the business of the country as a whole, we have had perhaps the most successful season in recent years. As I stated last week there are some surpluses of bulbs in named varieties of early single tulips and a few other odd kinds which are classed as miscellaneous; but apart from that the market is very well cleaned up.

Work on the seed catalogues has advanced during the past week with great rapidity, and the advance sheets which I have seen of a great many of the most prominent editions that will be issued the first of the year, are certainly superb.

Regarding seed novelties and specialties for the coming season of 1908, I wish to say a word about foreign things. Our European friends do not seem to grasp the idea that they do not give us discount enough upon their seed novelties and specialties, especially in packets. The American seed trade cannot afford to give sufficient of the valuable space in their catalogues adequate to sell to any extent anyone's novelties and specialties, and obtain only from 25 to 33 1/2 per cent. of discount on the goods listed. We as a trade must have at least 50 per cent. discount in order to come out with a whole skin, if we are to elaborately catalogue these trade catchers to any extent. And I will make the statement here and now, that the seed house, be it American or be it European, that will introduce to the seed trade of the world good novelties for seed catalogues and give a discount of, say, 75 per

THE ELIZABETH NURSERY CO., Elizabeth, N. J.

cent.; or sell packets for, say, \$30 per thousand net, that can retailed for 10 cents each, will do the seed trade an everlasting amount of good, besides incidentally making money for itself. The seedsmen cannot afford to catalogue seed novelties and specialties unless the profit from their sales will at least recompense them in full for what the absolute catalogue space costs, in which such seed novelties are exploited.

As regards the wholesale prices of seed for the season of 1908, I have said considerable in past letters as to what is happening daily and what is going to happen. Garden peas are scarce to the tune of \$1 to \$1.50 per bushel advance over last year. Garden beans, while not quite so bad, are scarce enough. Of sweet corn there practically isn't any; there is a little worth about three times what it usually brings, but that will soon be all in the hands of retailers. Egg plant is worth in the popular varieties \$5 to \$6 a pound, as against \$1.50 to \$2.50 last season. Tomato seed is very scarce, but the preliminary price-lists of our larger seedsmen now being sent out explain these matters. Seeds are very scarce, and yet everyone in the trade has not fully grasped the idea, even yet.

I wrote last week regarding a sweet corn contract where the grower had agreed to deliver in full, upon consideration of 10 cents per bushel advance over regular contract rates, being paid him by his seedsmen customer. The thought has run through my head several times as I have considered these matters this week, as to how a settlement can be made with the buyer in such an instance, as the guarantee to deliver was an absolute one and it would be impossible for the grower this year to keep his contract. But I suppose neither grower nor seedman buyer looked at the matter seriously when the contract was made, further than that the grower should possess the right to freeze out ordinary customers should he so desire to do; in other words, to give this advance payer of 10 cents per bushel a special advantage. I do not believe in such contracts, and if no law suit comes out of it, I think all parties concerned will be very fortunate indeed. V.

European Notes.

December has come in fairly true to its traditions of frost and snow, but at present it is not of sufficient severity to do any serious damage to anything except the brassicas referred to last week. Of other cultures the plants of carrot, parsley and parsnip are very promising; but beets and mangels leave much to be desired.

In Southern France much of the land is still under water, particularly in the districts devoted to the culture of the flag leek and Lisbon onion, and latterly to field varieties of carrot. As the crop of all these is exceptionally good this year, the wholesale destruction of the young plants is not likely to affect anybody but the growers, and they will no doubt devote their energies to the cultivation of "Haricots verts," for which there appears to be an unlimited demand. Whether it is the prospect of a large demand of dwarf beans for this purpose or whether the crop owing to damage done by recent rains is as great as is reported, it is certain that the prices of seed beans have advanced from 10 to 30 per cent., and quotations recently issued by some German firms appear to be almost prohibitive.

The trade in peas continues to be exceptionally brisk and is all in favor of sellers. An exception must however be made as regards the early very dwarf wrinkled varieties, of which the supplies appear to be more

than double the demand. The Wonder family appears to be quite out of favor. Shipments are slow, for no grower will open his stacks with such uncertain weather.

Preston King of Northrup, King & Company, Minneapolis, who has been enjoying a holiday in Southern Europe, is making a stay in London before returning to America.

EUROPEAN SEEDS.

BROCCOLI SEED—CAULIFLOWER SEED.—In the protest of the Portland Seed Company against the assessment of duty by the collector of customs at the port of Portland, Ore., before Board 3 of the General Appraisers, December 3, 1907, the importers objected to the classification of broccoli seed under paragraph 254, tariff act of 1897, as seeds not specially provided for, contending that it was free of duty under paragraph 656, as cauliflower seed. The following opinion was rendered by Waite, General Appraiser: "The case is submitted upon a sample of the seed inclosed in a small illustrated envelope similar to the usual package in which garden seed are commonly sent out by dealers. The following printed description appears on the back of the envelope: *Broccoli*.—*** Taller and more hardy than cauliflower, but otherwise very similar to that delicious vegetable. Culture and use are identical with that of cauliflower."

It is very evident from the above description that these are not cauliflower seed. As broccoli seed are not specially provided for in the tariff act, we hold the collector's assessment to be correct and overrule the protest.

Breeding and Raising Garden Seeds.

Read before the Massachusetts Board of Agriculture, Boston, by Dr. William W. Tracy, of Bureau of Plant Industry, United States Department of Agriculture.

I am well aware that I am addressing a gathering of the best informed horticulturists of the country, yet I want to speak of some of the conditions and general principles underlying modern seed growing, not for the sake of giving information, for you all know of them possibly better than I do, but rather as a foundation for what I am to say.

The Influence of Cultivation.

All plants when subjected to the modifying influences of cultivation, or as a result of cross-fertilization through the flowers, tend to assume distinct forms which when of value for any particular purpose, or adapted for any special condition, may be developed into garden varieties of great practical value. Such varieties in the case of plants propagated asexually, as for instance, the Concord grape and the Baldwin apple, consist of parts of a single original plant, increased possibly through many propagative generations but always retaining the potentialities, limitations and tendencies of the original plant, indeed, are but a part of it; and in some of our courts it has been decided that a tree which though as far as can be discerned is identical in every particular with the Baldwin, cannot properly be called by that name unless it is such a part of the original tree. Neither does the character change; it was immutably fixed in the original tree, indeed, in the seed from which it was developed. The Baldwin of 50 years ago, of to-day, and of 50 years hence are identical in inherent character.

The Causes of Variation.

Variation may occur as the result of different environment, but we have only to interchange the different conditions to interchange the variation. The conditions are radically different in the case of varieties propagated by seed; here instead of multiple parts of a single individual with identical potentialities and limitations of development, we have different individuals, each with distinct though possibly practically identical tendencies and limitations and because of this similarity we throw them together as a garden variety, but it is evident that in order to do this we should first have a very clear and distinct idea of the exact type of the plants which shall be so thrown together, and since the varietal name by which the plant is known is determined by its adherence to this ideal, the ideal may quite properly be called the variety. In cultivated plants which are propagated by seed we decide whether any individ-

ual plant shall be classed with any variety, not from its origin as with plants propagated by division but by its character. If from a pod produced on a typical plant of American Wonder pea we take seven seeds, six of which develop into plants of the exact American Wonder type, while the seventh developed into a tall plant like a Champion of England, we cannot properly regard this last as a seed of American Wonder though it was produced by an American Wonder plant.

The Ideal a Varietal Name Represents.

The ideal which any varietal name stands for may and often does vary with different people, often vary materially, while practically the same type is often known by different names, and there is always a tendency to change with time. The Hubbard squash of today is very different from that of 50 years ago and we can only guess what that of 50 years hence will be. These conditions have resulted in a multiplication of varietal names, and a great lack of uniformity as to the exact type which names stand for as well as a great want of uniformity of type in the seed sold under the same varietal name.

In Bulletin Number 109 of Bureau of Plant Industry, United States Department of Agriculture, we have a record of a critical test and study of garden beans bought from American seedsmen under 502 distinct names, but the author considers that there were among them only 164 really distinct varieties or types, and of these many were so nearly alike that one might have been developed from another by a very few years selection, indeed, it is known that some of the 164 lots counted were so developed.

In a recent trial of garden beets, samples bought under 214 different names from the most careful growers of Europe, where most of the garden beet seed used in this country is grown, and from the most reliable American seedsmen, were carefully studied and it was found that every beet in the trial could be classed under some one of 20 or 25 distinct types, and this could be done so that the beets so thrown together under each type would be more uniformly of that type and show less variation than those of most of the 214 samples of the trial. Indeed, there were none of the samples in which there was not from five to ten per cent. of the roots which were more or less distinctly of a different type from the rest, and in many of them there were two to five different types in so nearly equal numbers that it was difficult to decide what was the exact type the lot was supposed to be composed of. Again, in some cases seed of the same name was secured from as many as 12 different sources, and it was found not only that the individual samples contained different types but in such different proportions that it was difficult to decide which type the name should stand for, the majority of the roots in some lots being quite different in character from the majority of the roots in others. Often the only difference between two lots sold under different and quite distinct names would be that though the dominant type in each would be the same, the proportion of that type would be greater in one than in the other, or in other words, one was simply a purer and better stock of what was really the same variety as the other.

The varietal names used for different and even for identical types change with time. Phillips states that in 1822 some 30 varieties of lettuce were cultivated in the vicinity of London, England. In 1597 Gerard described eight distinct sorts as common at that time in English gardens. His descriptions of each of these corresponds with some sort still in cultivation, though not under the same name by which it was known to him. Goff in Report of New York Experiment Station for 1885 gives a list of 585 varietal names of lettuce, 257 of which were foreign ones not used in this country where the remaining 328 were in more or less common use. He found that these 328 names stood for not more than 87 distinct types, and many of these were so similar that they might easily be developed by a few years' selection from the same stock. Bulletin Number 69, Bureau of Plant Industry, United States Department of Agriculture issued in 1904, nine years later, gives 446 distinct varietal names, but 76 of which are identical with those given by Goff, and the author describes 114 sorts as distinct, of which only 28

were also described by Goff under the same name, though there is not more than a score of descriptions in the latter bulletin which were essentially different from some one given in the first. Of these 114 sorts described in the latter bulletin as distinct, many are quite similar, showing no greater difference than might easily be developed in a few years' selection from the same stock. In counting the number of varietal names in both bulletins every difference in names was counted as distinct, such as Early and Extra Early, Giant and Mammoth, Smith's Eclipse and Jones' Eclipse, etc., and it is probable that in some cases names so counted as distinct were not intended by the users to be so regarded, but it was difficult to avoid this, for in many cases such differences as Early and Extra Early were evidently intended to stand for material differences in type. Again, Goff may not have listed some names, which were actually in use in his time, and were included in the later list, but making ample allowance for all such cases we have in the later bulletin at least 150 names which were not in the first in any form, and which we may reasonably regard as entirely new ones introduced during the nine years which elapsed between the publication of the two bulletins.

(To be continued.)

ERICA FRAGRANS, exceptionally fine, better than ever, from \$1.60-\$2.00-\$3.00-\$4.00-\$6.00-\$8.00 and \$8.00 each.

NURSERY DEPARTMENT.

Conducted by Joseph Meehan.

AMERICAN ASSOCIATION OF NURSERYMEN.

J. W. Hill, Des Moines, Ia., president; C. M. Hobbs, Bridgeport, Ind., vice-president; George C. Seager, Rochester, N. Y., secretary; C. L. Yates, Rochester, N. Y., treasurer.

William C. Reed, the well-known nurseryman of Vincennes, Ind., was elected president at the meeting of the Indiana Horticultural Society at Indianapolis. The society will work for uniform packing laws, as many fruit barrels are said to be deceptive.

Blood-Leaved *Itea virginica*.

When giving an order to your collector for native shrubs, include a good lot of *Itea virginica*. It is a native plant of decided merit that has been greatly overlooked. It is but a small shrub growing six to eight feet high. In June it produces beautiful white flowers in drooping racemes three to five inches in length. While for its flowers alone it is a valuable shrub, its great attraction is its blood-red foliage in Autumn. It is so brilliant and striking as to place the shrub among the very best of those prized for their beauty in Autumn.

It is a moisture-loving plant, growing wild from Pennsylvania to Florida, and generally found along the margins of sluggish streams. As it covers such a wide range of territory it should be seen in more collections than it is, and it doubtless would be were it obtainable in more nurseries than is the case to-day.

A single plant is beautiful when in its Autumn color; a dozen of them in a group make a grand display.

Box Bushes.

Box bushes form one of the standard salable articles of the florist and nurseryman, and it is no surprise that the importation and sale of the bushes are so profitable. The bright green of their foliage, their slow growth and adaptability to so many different situations render them easy stock to dispose of. For city yards nothing is better. The red spider will get after them if in a dry place and poor soil, but when in rich, deep, moist ground no foes need be feared. No insect other than the red spider troubles them, and with a line of hose reaching to the plants, which many city yards have, the insect is easily kept in check. For tub growing as well as for planting much use is made of the box. Indoors or outdoors such plants can be used, shifted from one position to another, always green and pleasing to look upon. The importation of box bushes is increasing every year. A large number come in for Christmas as well as many later for Spring and Summer use. These imported plants are nearly all grown as pyramids, a form of growth that seems to please our people.

The kinds used are nearly all varieties of the English box as well as the type itself. *Buxus semivirens* is the English box, but there are a dozen or more varieties common in collections. All are valuable when the plants are vigorous and well fed.

Besides the pyramidal forms, standard shapes are now in some demand, and, of course, these find a place as well as the pyramids. They are grown to one stem and then allowed to head when from 3 to 5 feet in height. Importers find a good sale for these as well as for those of pyramidal form.

Propagating Evergreens From Cuttings.

Now that the rush of outside work is getting over it is a good time to commence the propagation of evergreens from cuttings, for the sooner this work is done the stronger are the young plants that result when Spring arrives. With the ending of the year the outside work and other duties which Christmas brings are over, and the making of cuttings can be proceeded with.

Such evergreens as retinisporas, Arbor vitae, junipers, cypress and the like root readily, and even pines, cryptomerias and spruce and firs can also be rooted, but they root less freely than those first named.

Cuttings may vary in length from two to three inches to six inches. The greater the length the larger the young plant if the cutting roots; but on the average a length of four to five inches is a good one.

Shoots for cuttings should be kept from drying from the time they are cut until inserted in the cutting box, for it is time wasted to proceed with a dried out cutting.

Boxes of a size easily handled should be used,

say two feet by eighteen inches in length and width, and of a depth of four inches. Filled with clean sand and then with the cuttings, the boxes are placed in a moderately warm greenhouse at first, when after the lapse of four to six weeks more heat can be given. Shade from the sun must be afforded until the cuttings are rooted, which they should be nicely by Spring.

If conveniences for them when potted can be provided, and these should be arranged for if at all possible, it is better to pot the young plants and grow them in frames the first Summer. They make better plants than if set out in the open ground direct from the cutting boxes. When late Summers are favorable, that is, damp and warm, the potted plants may be set out then and expected to do well, but it is a better way to keep them until Spring before planting them.

Protecting Rhododendrons

The best way to grow rhododendrons is in masses, then one protects the other in Winter, and kinds not entirely hardy come through much better than they would if standing singly.

Euonymus Sieboldianus

To get many of the bright colored flowers that some have it is necessary to plant sorts not as hardy as others, as in hybrids the brightest colors often represent the less hardy one of the parents. These beautiful but partly tender kinds endure the cold well when protected from sun, wind and severe freezings.

Rhododendrons make no large deep growing roots. All they have are not more than a foot or so under ground, and because of this freezing out and droughts catch them quickly. It is the foliage of rhododendrons and similar evergreens that renders them so liable to be injured in Winter. There is transpiration from the leaves all Winter long, more than in Summer on many days; and because of the frozen ground and lack of moisture in it the call for a supply from the roots cannot be met.

In Winters lacking in snow or rain the soil becomes dust dry, and this, together with the extra demand for moisture which the cold and wind make necessary, is what kills the partly tender sorts. Break the wind from the plants, shade them and see that the ground is moist, is all that can be done and all that is necessary to do.

Before Winter sets in, should the ground be dry,

soak it well with water. Then place a lot of forest leaves or some similar material over the ground around the plants, enough of the covering so it will both keep out frost and keep in moisture. How to shade the foliage and to keep the high winds from it can be worked out by those having the plants. Both sun and wind can be kept off to a great degree by placing evergreen boughs over the tops of the bushes. When in masses it is the outside plants that need the protection the most. When the plants are in bleak positions, gardeners sometimes build a fence of boughs of evergreens around them, or on the worst side at least. When one knows what facilities he has, and remembers that injury comes from dryness and freezing of the soil about the roots and too much wind and light on the foliage, he will know how he can best secure his plants from danger.

Euonymus Sieboldianus.

Where the Winters are no more severe than they are in Philadelphia the *Euonymus Sieboldianus* is a thorough evergreen. It is hardy much

farther north of that, but it will not hold its leaves through the Winter when subjected to severe freezings. The Winter of 1905-6 was such a favorable one that not a leaf was hurt on the plants even north of Philadelphia; but there have been Winters when not a leaf of it was green at their close, the cold being so severe. It should be classed as evergreen in sheltered places, and hardy anywhere in the Middle States.

As the illustration herewith shows, the plant is a beautiful evergreen bush in Summer. In late Spring there are clusters of greenish white flowers which are followed by berries that become of a bright red in Autumn. The bush is then highly attractive. Our photograph was taken when the berries were ripe, and readers will notice the great number of clusters on the bush.

Although of Japanese origin, there is but little resemblance in it to the well-known evergreen one, *Euonymus japonicus*, which has thick, smooth, shining leaves, while those of *Sieboldianus* are of thinner texture and larger, and are without the shining green of the other.

As a pot plant for Christmas uses this *euonymus* should prove useful. It is naturally a bushy grower, requiring but little pruning to form a shrub of pleasing outline. It is a fast grower as well. When outdoors, the red berries are destroyed by frosts before Christmas, but when under shelter it is more than probable that they would be in good condition until Christmas and later.

JOSEPH MEEHAN.

FRUIT SHOW AT PURDUE UNIVERSITY. Arrangements have been completed for the first annual fruit show to be held at Purdue University, Lafayette, Ind., during the week of the Farmers' Short Course, January 13-18, 1908. This move, which promises to be of great value to the fruit growers of the State, is the result of co-operation between the State Horticultural Society and the Horticultural Department of Purdue University. Cash premiums to the amount of about \$300 are being offered by the Horticultural Society for exhibits of fruit, and in addition to these several special premiums have been secured. The contest is open and free to every fruit grower in Indiana. All fruit shown must be grown by the exhibitor. For premium list and further information, write to C. C. Woodbury, Experiment Station, Lafayette, Ind.

At the meeting of the Southern Illinois Horticultural Society, held at Belleville, A. V. Schermerhorn and E. G. Mendenhall were re-elected president and secretary respectively.

CULTURAL DIRECTIONS

Specially written for the use of your amateur customers. Send Twenty-five cents for complete sample set, which amount will be deducted from order for first thousand.

The universal favor in which these Directions are held, as shown by the many orders received therefor, encourages us in the belief that these Leaflets are just the neat little factor to help promote business and establish better relations between the dealer and his customer.

TRY SOME!

BIG BUSINESS ASSISTANT

TO SAVE TIME, QUICKEN SALES, AND AID YOU PLEASE YOUR CUSTOMER, WE HAVE PREPARED

Cultural Directions

COVERING A NUMBER OF THOSE PLANTS AND BULBS MOST LARGELY IN DEMAND

THE "CULTURALS" have been written by experts; they are fuller, and contain more detailed directions than it is possible to embrace in a catalogue. Equipped with these, just hand one out with each sale, and save yourself considerable present and future trouble, as the customer will then be able to consult the directions, grow his plants, seeds or bulbs intelligently, and so receive satisfactory results, without having to continually resort to you for advice.

The following "Culturals" are now ready:

AMARYLLIS (Hippeastrum)	CROCUS, Snowdrop and Scilla Sibirica	MUSHROOM CULTURE
ANNUALS FROM SEED	DAHLIA	ONIONS
ASPARGUS	FERNS	PALMS, House Culture of
ASTERS	GERANIUM	PANSY
BEGONIA, TUBEROUS	GLADIOLUS	PERENNIALS, Hardy
BULBS	GLOXINIA	PRIMULA
CABBAGE and CAULI- FLOWER	HOT BEDS and FRAMES	ROSE CULTURE
CANNA	HOUSE PLANTS, Care of	SWEET PEA, The
CARNATIONS, MONTHLY	HYACINTHS, Dutch and Roman	TOMATOES
CELEBY	IRIS AND TRITOMA	TUBEROSE
CHINESE SACRED LILY	LAWNS	VEGETABLES
CHRYSANTHEMUM	LILY CULTURE for House and Garden	VIOLETS
CLIMBING PLANTS, Hardy		WATER GARDEN, How to make and Manage a
COLEUS, and other bedders		

PRICE LIST

500 Cultural Directions for \$1.50
1,000 " " " " 2.50

Printed on white paper, clear type, size 6 x 9 1/4 inches, in an assortment, your selection of not less than 100 of each, delivered carriage paid.

Sufficient space will be left at the bottom of each leaflet for your name, address, etc. If you desire this imprint (3 lines) we will put same on for you at 50 cents for 500, 75 cents for 1000. Special quotations will be made on quantities of 2500 "CULTURALS" or over.

A. T. De La Mare Ptg. and Pub. Co. Ltd.

Pubs. The Florists' Exchange. P. O. Box, 1697, NEW YORK

In addition to the Cultural Directions above offered we beg to advise that the following are now in course of preparation:

LETTUCE IN THE OPEN AND UNDER GLASS
MUSKMELONS UNDER GLASS AND IN THE OPEN—WATERMELONS
TOMATOES UNDER GLASS
CUCUMBERS UNDER GLASS
RHUBARB AND ASPARAGUS UNDER GLASS
CAULIFLOWER, RADISH AND BEANS UNDER GLASS
STRAWBERRIES UNDER GLASS
DECIDUOUS TREES AND SHRUBS
EVERGREEN TREES AND SHRUBS
SMALL FRUITS
STANDARD FRUITS

These four will include all the necessary directions as to when and how to plant, pruning, treatment, mulching, etc.

PLANT CULTURE Price \$1.00

The best book for the Plant Grower.

A. T. DE LA MARE PTG. & PUB. CO. LTD., 2 to 8 Duane St., NEW YORK

TORONTO, ONT.—George Vair, superintendent of the Normal School grounds, when returning to his home in Macpherson avenue on the evening of the 10th inst. was attacked by paralysis and expired before medical aid could be obtained. Mr. Vair was a native of Scotland and a popular member of the Toronto Caledonian Society, of which he was at one time president, as well as of the Horticultural Society, at the exhibitions of which he was a very successful exhibitor. He was in his 75th year, was twice married and is survived by his second wife. His funeral took place on the 12th inst. Interment was made in Mount Pleasant Cemetery in the presence of a large number of mourning friends.

HOW TO GROW MUSHROOMS

If you do not know how, procure that simple but complete and practical book called "How to Grow Mushrooms." The price is ten cents and it can be secured from this office

Special rates will be made to the trade who wish to supply their customers.

THE H. WEBER & SONS CO., OAKLAND, MD.

(95) **Thrips on Carnations.**—Please advise me as to the best remedy for thrips on carnations—what to use to get rid of them and how to use it?
New York. J. F. M.

—The best remedy for thrips is to get some good tobacco insecticide, dilute to proper proportions, and syringe the plants wherever affected. Do this repeatedly until the thrips are all destroyed.

(96) **Ants on American Beauty Roses.**—I am much troubled by ants eating my American Beauty roses. They climb the tallest stems in great numbers and quickly destroy the buds. I would be greatly indebted to you if you can suggest a remedy. Fumigating with tobacco has no effect on them. They appear to be the ordinary kind of ant.
Penna. J. H. B.

—A very good remedy for ants on roses has been found in the following: Carbolic soap, one ounce to a gallon of warm water; spray the plants thoroughly, and repeat the spraying in a day or two, if necessary.

(97) **Field Mice in Carnation House.**—Could you recommend any bait that will attract the short-tailed field mouse? I have tried all kinds of traps and baits, but cannot catch them. They are cutting off my carnations wholesale.
New York. J. M.

—A very good bait for field mice has been found in taking a can of sweet corn, mixing a dose of strychnine with it and scattering a few of the grains about the benches. Another way of getting rid of the mice is to introduce a good cat into the greenhouse.

(98) **Wrong Treatment of Cypridium.**—Kindly tell me what may be the trouble with the enclosed plant, and what will prevent it.
New York. J. A.

—The plant sent for examination is a cypridium and should not be potted in ordinary soil. The best thing to do with it would be to shake it out of the pot and plant it in a mixture of sphagnum moss and rough pieces of peat, in equal proportions, but before potting, fill the pot about half full of broken crocks, so as to ensure perfect drainage.

(99) **Sweet Peas.**—In planting sweet peas now, what kinds are the best and what temperature is required? When will the flowers be ready to cut?
G. A. C.

—The best temperature for sweet peas is from 48 to 52 degrees at night, with a raise of 10 to 12 degrees during the day, and plenty of air whenever weather conditions will allow. There are many varieties used for winter forcing, notably Christmas Pink and Christmas White, and the best way to get a selection would be to refer to the catalogues of the prominent seedsmen.

(100) **Temperature for Carnations.**—Should the temperature in my carnation houses be ten degrees higher by daylight? If not, at what time of the day should it be, and until when should I keep it up? H. & H.

New York.
—The middle of the day is the time when the carnation house temperature should be the highest. The raising of the temperature from night to day should be gradual, and not ten degrees higher at daylight than it has been in the middle of the night. The decrease in the temperature toward nightfall should also be gradual.

Under separate cover I send you some tips of carnations. Will you kindly tell me with what they are affected, the cause and remedy. The trouble started several weeks ago. Thinking it might have been caused by syringing and the plants not being properly dried over night, I stopped syringing, but notice that it is now spreading from where it started (from Mrs. F. Joost to Fair Maid). The plants are otherwise in a good, healthy condition. The temperature during the day is kept at from 65 to 70 degrees, clear ventilation, with 62 degrees day and 52-54 night. We hold a very even temperature. Queen Louise is also doing very badly in the way of bursting its calyx. Should the house be run warmer than 54 degrees? Is 52 to 54 degrees all right for Fair Maid and Mrs. Joost? I have the three varieties in one house.

Penna. A. SUBSCRIBER.
—The carnation tips sent for examination do not show any disease other than what has been caused by some local condition, but just what that is we are unable to determine. We would advise, however, a careful examination of the soil in the benches next to the bottom boards. It is just possible that the trouble arises from the water not having penetrated clear through the soil, which has caused a dying off of some of the roots, which in turn is affecting the foliage. It would be a good idea to examine the benches at several places. The night temperature of 52 to 54 degrees is all right for the plants, though we would not advise going any higher than that, even if some varieties burst their calyx. That trouble will, no doubt, be remedied when the days grow longer and we get better light.

(101) **Water Temperature for Carnations.**—Is water that goes down to 40 degrees too cold to water my carnations? Is it too cold to syringe them with? H. & H.

New York.
—Water at 40 degrees temperature is not too cold for carnations and will never hurt them, whether it is used for watering or syringing purposes.

(102) **To Take the Chill Off Water.**—Can you tell me of some simple contrivance for taking the chill off water? H. & H.

New York.
—Any device for taking the chill off water is unnecessary and any time spent in doing so would be wasted.

(103) **Trouble with Carnations.**—I send you a piece of a carnation plant, showing how about 2 per cent. of our plants are affected. We have had irregular temperature, running as low as 45 degrees at night and as high as 65 degrees in the day. We have fumigated with tobacco stems at regular intervals of about two weeks and given a very light fumigation of sulphur and lime mixed into a paste with linseed oil on the hot water pipes. Kindly inform me with what the plants are affected and how to treat them. J. A. T.

Kentucky.
—The carnation sent for examination is evidently troubled with what is known as dry rot. This seems to be a constitutional disease, for which there is no remedy, excepting to pull out the plants as quickly as the disease is detected in order to prevent it spreading through the house. As only 2 per cent. of the plants are affected, these can easily be spared without suffering much loss.

(104) **Chrysanthemum W. H. Chadwick.**—For the past two years I

have been growing both the golden and pink W. H. Chadwick chrysanthemums. The flowers of Golden Chadwick were fine and incurved. Of the Pink Chadwick the flowers were reflexed and petals drooping. The party I purchased the plants from had flowers incurved, like those of the Golden Chadwick, and much larger. I took the second crown bud on each variety after September 1. Should I have taken the first crown bud as it appeared the latter part of August? The cuttings were made early in April. I have written to several growers about this, but they could give me no reason for the difference. I consider it a fine flower to grow, and expect to grow it again next year. I would appreciate it if I could get the desired information through your paper. W. H. Chadwick is not grown around here at all.

Penna. M. H. B.
—Evidently, the trouble with the chrysanthemum in this case has arisen from taking the late bud. The proper thing to do next year would be to try some on both buds—say the one that appears after the 20th of August for part of the plants, and the next later one for the remainder.

(105) **A Bulb Trouble.**—I have planted tulips, Von Sion narcissus and Dutch hyacinths in flats, putting them on boards in the field and covering them with six inches of soil and eight inches of horse manure on top of the soil. Three inches of the ground froze before I put on the manure, but the bulbs are not in frozen soil. The tulips do not seem to root very fast; some have no roots, the others are starting to root a little. Please give me your opinion. We have had a heavy rain and the bulbs are quite wet. J. A. G.

Conn.
—No uneasiness need be felt about the tulips, hyacinths and narcissus that are buried under six inches of soil with eight inches of manure on top of that, although, perhaps, it would have been better if a trench had been dug and the bulbs had been buried below the ground to a depth of 18 to 20 inches. If the bulbs were all sound when planted, they will make good roots in due season. It is plenty early enough yet, and no uneasiness should be felt about their failure to make roots up to this time. They will be no worse for being wet after a heavy rain; that is to be expected, but if they happen to be located on low, wet ground which does not drain readily, it would be a good idea to cover the place over with boards in some way, so that a part of the rain, at least, will not strike them.

(106) **Where to Hang the Thermometer.**—Kindly tell me the best place to put a thermometer in a carnation house, and at what degree should I keep a house containing Victory, Enchantress, Nelson Fisher and Queen carnations? The house has two center and two side benches. It runs east and west and is three-quarter span; boarded well on north side and two feet of glass on south side. At present I have the thermometer leaning against an iron column, the bottom resting on a board box, which protects the column from the soil. I keep the temperature at 52 degrees at night, 60 to 65 degrees on cloudy days and at 70 degrees on bright days. The house is 19 feet wide and has a flow and two returns of two-inch hot water pipes underneath each bench. I also have a sash house, 10 feet wide, in which I grow California violets. I have the thermometer hanging on one of the rafters midway between the sill and ridge. Is 42 degrees at night and 55 to 60 degrees during the day, according to the clearness of the day, enough?

A GRATEFUL SUBSCRIBER.
New York.

—The best place for the thermometer in the greenhouse is about five feet from the floor and near the center of the house. If the house is very wide, have a thermometer in each of the paths. If the house is long, place the thermometer about one-third of the way from each end; then it will be possible to tell pretty near correctly the temperature of every part of the house. Fifty-two degrees at night is about right for the varieties of carnations mentioned, though two degrees either higher or lower would not hurt the plants in any way.

The thermometer in the violet house hanging from the rafter midway between the sill and ridge, and as near the middle of the house as possible, would be in the right place. The violets would probably do better if the temperature was run at

Always in Demand

ARAUCARIA ROBUSTA COMPACTA and GLAUCA

JUST LOOK! An ARAUCARIA ROBUSTA COMPACTA OR EXCELSA GLAUCA, worth a ten dollar bill, perfect shape and color, 6-7 in. pots, 6-year-old, 4-5-6 tiers, 28 to 40 in. in height, the same in width, only \$3.00; 6-7 in. pots, 6-year-old, 4-5-6 tiers, 25 to 28 in. high, \$2.00 and \$2.50; 6-7 in. pots, 5-year-old, 3-4 tiers, 18 to 25 in. high, \$1.50 to \$1.75. Excelsa, 6-7 in. pots, 5-6 tiers, 25 to 30 in. high, \$1.50; 6 in. pots, 5-year-old, 5 tiers, 22 to 25 in. high, \$1.00 to \$1.25; 6 in. pots, 4-5 tiers, 4-5-year-old, 18-20-22 in. high, 75c.; 2-year-old, 2-3 tiers, nice little plants, 6-8 in. high, 40c.

NEPHROLEPIS, such as Whitmani and Scottii, also Boston and Piersoni Ferns, all pot grown (not bench grown). Have them by the thousand, in all sizes, from 4 in. up to 8 in. pots.

WHITMANI, larger than 8 in. pot, planted in 7 in. pots, made up in June, three plants in a 7 in. pot, now as large as a bushel basket, price, \$1.25 to \$1.50 per pot; middle size, 75c.; very heavy specimens, \$1.00 per pot.

PIERSONI FERN 4 in., 25c.; 5-5½-6 in. pots, 35c.-40c.-50c.

PIERSONI WILSONI, 5½ in. pots, very handsome, much admired ferns, 20c.

Please mention if plants are to be shipped with or without pots. All goods must travel at purchaser's risk. Cash with order, please.

48 degrees during the night instead of at 42 degrees.

(107) **House for Chrysanthemums and Sweet Peas.**—I am about to build a greenhouse, 24x100 feet, and above a concrete mushroom cellar. The roof of the mushroom cellar, which will be the floor of the greenhouse, will be of concrete (cinder concrete), and the temperature of the room (cellar) below the floor will be constant during the winter months, at from 55 to 60 degrees Fahrenheit. I will build the side benches, of course, at the usual height above the floor for the heating pipes. Should the two middle beds be solid beds, or should they also be raised from the floor? Leave out the question of drainage, for this will be attended to. There will be head room above the middle benches of 8 to 11 feet. The immediate use of these beds will be for chrysanthemums, to be followed by winter sweet peas.

A SUBSCRIBER.
—In this case we would certainly advise the use of raised benches for the center of the house, as well as for the sides, as there is plenty of head room for the chrysanthemums and the sweet peas, and for winter-flowering of the latter the raised bench is preferable.

NEWPORT (R. I.) HORTICULTURAL SOCIETY.—The annual meeting of this society was held Tuesday evening, December 10, 1907. President Butterson in the chair. H. A. Jahn, New Bedford, Mass., had several carnation seedlings on exhibition; there was one particularly noticeable both because there was a greater number of that variety than of any other and because of the quality of the blooms. This was The Lloyd. The president appointed Messrs. A. S. Meikle, John T. Allan and James J. Sullivan a committee to judge the exhibits. This committee recommended that the society's silver medal be awarded to Mr. Jahn for the carnation The Lloyd and a certificate of merit for another white seedling known as No. 2. The recommendations were adopted by the society.

The reports of the various officers showed that a great deal of work had been accomplished and a great deal of money collected and spent during the year. The society was shown to be in a flourishing condition, with a membership continually on the increase. A vote of thanks was passed to those who held office during the year. The election of officers resulted as follows:

President, John T. Allan; first vice-president, Samuel Speers; second vice-president, James Robertson; recording secretary, David McIntosh; financial secretary, Daniel J. Coughlin; treasurer, A. K. McMahon; sergeant-at-arms, Wm. F. Smith. Auditors.—W. S. Sisson, Bruce Butterson, B. M. Anthony. Executive Committee.—Andrew S. Meikle, James J. Sullivan, Bruce Butterson, William G. Matson, B. M. Anthony, Alexander Fraser, Oscar Schultz, William F. Smith, Robert Patterson and the officers ex-officio.

The society voted to hold a ball on January 8, the arrangements for which were left to a competent committee under the presidency of Mr. Allan. Refreshments were provided at the meeting.

D. M.

BOOKS RECEIVED.

MISSOURI BOTANICAL GARDEN, Eighteenth Report, 1907.—Through the courtesy of Dr. William Trelease, Director, we have been favored with a copy of this, as usual, most interesting document. In his report to the Board of Trustees Dr. Trelease states that the rose plantings in the Garden have been increased the past year, and that among the additions made, an experimental garden has been formed. Around this in botanical order are compactly bedded 1,654 species of plants, chiefly hardy herbaceous perennials. There has also been planted a collection of 325 medicinal plants, grouped according to their reputed physiological properties. The chrysanthemum show this year was very largely attended, some 16,932 persons witnessing the display. The records show that 1,587 species or varieties were added to the collection of living plants during the year; the total at the end of the year being 17,072 in contrast with the 15,976 noted in the previous report. The total number of visitors to the Garden for the year reached 117,553, a figure not before equaled except in the World's Fair year.

The scientific papers included in the present volume consist of the following: The Literature of Furcraea, with a Synopsis of the Known Species, by J. R. Drummond; Branch Canker of Rhododendron, by Herman von Schrenk; On Frost Injuries to Sycamore Buds, by the same author; The Germination of Hydrastis canadensis, by Henri Hus; An Abnormal Odontoglossum Cervantesii, by the same author; Virescence of Oxalis stricta, also by Mr. Hus; Effect of Light upon the Germination of Spores and the Gametophyte of Ferns, by H. C. Life; Plantae Lindheimerianae (Part III), by J. W. Blankinship; Additions to the Genus Yucca and Agave macroacantha and Allied Eugaves, by Dr. Trelease. The volume is profusely illustrated.

Of special interest to fern growers is the contribution of Professor Life specified above, of which the following is a summary:

1. Under ordinary conditions spores of Cyathaceae and other ferns experimented with do not germinate in darkness when sowed upon leaf-mold.
2. Higher temperature than ordinary room temperature was not sufficient to induce germination of Alsophila pruinata and Aneimia phyllitidis in darkness.
3. Germination was best in light of medium intensity, about 0.075 sunlight.
4. Intensity of light affects form of prothallia, weaker light producing filamentous or ribbon-like prothallia, while strong light produces heart-shaped prothallia in all except Aneimia, which has a lateral growing point.
5. Strong light of intensity of 0.3 causes production of archegonia only in Alsophila pruinata, while in other ferns worked with, archegonia and antheridia were produced.
6. Weak light inhibits the production of archegonia and favors the production of antheridia.
7. Young stages of the prothallia of A. pruinata, Aneimia phyllitidis and Gymnogramme are strongly and positively heliotropic.

Cosmos Lady Lenox.

In the December 12, 1907, issue of The Weekly Florists' Review, W. N. Craig, writing on "A Visit to Madison, N. J.," makes the following statement in connection with what he saw at Mr. Duckham's: "Cosmos Lady Lenox, being extensively shown in the East just now, originated here and is a fine thing."

The place of origin of this handsome cosmos was Lenox, Mass., and the originator was A. Wingett, a gardener in that section. The seed of Lady Lenox cosmos was obtained in a packet supplied by A. T. Boddington, seedsman, New York. Mr. Wingett detected the distinct character and beauty of the flower, isolated the plants, and secured the seed from them. He grew the plant, which was named in honor of Lady Lenox, a friend of his employer, for five years before its dissemination by Mr. Boddington. Mr. Duckham received some seeds from the distributor for testing purposes; grew the plants and exhibited the flowers before the New York Florists' Club and elsewhere last Fall.

No doubt Mr. Craig's unfamiliarity with the facts in the case was accountable for his erroneous statement concerning the origin of this cosmos, as we feel sure his desire is not to deprive Mr. Wingett of the credit that rightly belongs to him, or to put Mr. Duckham in a wrong light in connection with the matter.

OUR READERS' VIEWS

A Criticism of Critics.

Editor Florists' Exchange:

Referring to W. N. Craig's remarks in your last week's issue under the heading of "A Criticism of Critics," it would seem out of place for him to try to excuse your Western contemporary for publishing without comment an extract from an English horticultural paper, in which the *Ampelopsis japonica* (Veitchii) is made synonymous with our wild poison vine, *Rhus toxicodendron*, on the ground that "a writer in a British trade journal evidently labored under the impression that they were"; for this is what Mr. Craig appears to wish to do. Surely he does not mean that! We certainly do not want the statement to go unchallenged that the useful *Ampelopsis Veitchii* is the same as our poison vine, *Rhus toxicodendron*, no matter what paper or person says it is. No *ampelopsis* is poisonous.

As to the merits of *Crataegus crus-galli*, it certainly has some. All red berried trees and shrubs have; but I agree with "Common Sense," inasmuch as, having in mind those in general cultivation, the cordata and coccinea being the most common in the North, for its ornamental berries "the crus-galli is the least worthy of all in that respect."

There are three native *crataegus* grown in large numbers by our nurserymen—the cordata, coccinea and crus-galli—and whatever may be the proper description of the color of the berries of crus-galli it is certainly, alongside of the brilliant scarlet of the other two, "a very dull red," as "Common Sense" says it is.

JOSEPH MEEHAN.

Editor Florists' Exchange:

Under the above heading W. N. Craig takes to task a correspondent for saying that the berries of the cockspur thorn are far from being a bright red. Notwithstanding the high authority of such men as Bailey, Nicholson, Ellwanger & Barry and Mr. Craig himself, the correspondent criticised is perfectly correct in what he asserts. The berries of many of the cockspur thorns are so dull and have so little color in them that they are not much brighter than black lead. In this section of the country and across the line in Canada in many places this thorn grows naturally almost as thickly as hairs on a dog's back, and with a strength and vigor that I have rarely seen equaled; so much so, that during the past Summer I took a day off on purpose to investigate them.

There is no question that many trees of this thorn produce highly colored fruit, but the majority that I have met with can best only be called of a dull color. Surely a man of Mr. Craig's attainments must be aware that soil and climate have a tremendous effect on the coloring of fruits. Take the grape for instance. At the Nurserymen's convention held in Detroit this year I remarked to an exhibitor, "How on earth do you get such color into your tomatoes? He immediately replied, "We have the kind of soil that will put such a color into them that you people can't get." Other instances might be cited if it were necessary.

I can go a few yards from where I am writing this and take berries from a large tree of this *crataegus* which was condemned as not worth keeping from the fact that there was little or no color in the berries. There are thousands of bushes in this vicinity and scarcely two are alike as to the coloring of their fruits; this is on account of their being seedlings.

H. J. CORFIELD.

Birmingham, Mich.

Registration of a Hydrangea.

Editor Florists' Exchange:

May I draw the attention of E. F. C., who offers a comment on the registration of one of the hydrangeas in your issue of December 7, to the fact that the European horticultural journals have already adopted the name *Hydrangea arborescens*, var. *sterilis*. On page 752 of the issue mentioned a note to this effect appears. In view of this fact and in view of the desirability of observing rules of nomenclature which have been accepted by scientists, practical fruit growers and florists, we could hardly justify the change of a name merely because the new one was more euphonious, or more attractive. There is no reason, however, why a common name, such as "Hills of Snow," should not be employed, and if future varietal distinctions of *sterilis* appear, they can be distinguished in the same way.

JOHN CRAIG.

Cornell University.

Hydrangeas and Critics.

Editor Florists' Exchange:

As a long time reader of The Florists' Exchange but a new contributor to the Readers' Views column you will pardon me for expressing myself on the various topics which appear in your valuable paper from time to time.

Your editorial and the subsequent letters on the naming of a hydrangea are, to my way of thinking, mainly a piece of free advertising for those who have the plant in question for sale. The editor of your Boston contemporary, not to be outdone by your giving the hydrangea a puff, also takes up the question in his editorial columns and tries to give yourself, Mr. Editor, a slap by way of flavoring. I have often noticed that the Boston editor is quick to grasp a thing—second-handed.

To a layman like myself it is plain enough that the name of the plant in question is *Hydrangea arborescens sterilis*, and that any great botanical collection like the Arnold Arboretum, Boston, Highland Park, Rochester, N. Y., or the New York Botanic Garden will have it so named. I am in doubt about the latter, though, after reading in a recent issue of The Weekly Florists' Review the flapping article on how the New Yorkers have their plants named.

That diversiform writer "Job," if my memory does not fail me, said at one time that a grower "had a right to call his progeny by any name he pleased whether they were boys or bouvardias." I agree with "Job" on this point, and think that whether *Hydrangea arborescens sterilis* is sold or bought under the name of *alba grandiflora*, *Hills of Snow*, or any other misnomer, it is a good thing and will give satisfaction.

W. N. Craig certainly does like to keep his name in these columns, but he had better take other authorities than Nicholson's Dictionary or Ellwanger & Barry's catalogue as his guides, and had better not look at the fruit through office windows, as sometimes glass changes colors materially, if he wants the correct color of the fruit of *Crataegus crus-galli*. "Common Sense" is right; the color of the fruit of this thorn is dull red. The most up-to-date work on *Crataegus* I have seen is Professor C. S. Sargent's Manual of the Trees of North America, and in it we find the fruit of this thorn described as dull red. I am sending you, however, Mr. Editor, some fruit of *Crataegus crus-galli* so that you can tell us what color you think it is, and then you might forward the berries to Mr. Craig and perhaps he will admit that those authorities who give the color as dull red are correct and that the article in the Review was as "Common Sense" tried to show in this, as are articles in many other instances in that periodical, incorrect.

LUKE A. ROUND.

[The color of the berries sent by our correspondent is certainly a "dull red." We shall forward the fruit to Mr. Craig as suggested. Ed. F. E.]

Getting Together.

Editor Florists' Exchange:

I was awfully pleased to read in your issue of December 14, 1907, that things horticulturally are waking up in New York City, and that it is proposed that the Horticultural Society of New York allow the New York Florists' Club to associate itself with it. I am not a member of the New York Florists' Club; I do not hold legal residence within a thousand miles of the location of the New York Florists' Club, but I know this, and I know it for a certainty, that if the Horticultural Society was to absorb the New York Florists' Club, and I was a member of the latter, it would be on some such conditions as these: member against member, dollar against dollar, position against position; in other words, as I read and know of the splendid conditions for good which exist toward horticulture in the New York Florists' Club, that if I, as a member, was going to cast my vote to consolidate with the Horticultural Society, I should make it very plain and sure before I voted for any such thing, that the basis of consolidation would in no way impair the splendid personality as a club which the florists of New York now enjoy, after so many years of excellent work.

V.

The Florists' Exchange would be pleased to receive, for publication, a brief account of how your trade during the Christmas holidays compared with that of former years; also the best selling stocks, both in plants and cut flowers, and an idea of the prices obtained as against the figures prevailing last year. If any novelties were presented this year, please name and describe them, and greatly oblige.

Peony Notes from Cornell.

The members of the American Peony Society need no introduction to the efforts making at Cornell University, Ithaca, N. Y., in reference to the nomenclature of the peony. However, for interested growers outside of the society a brief outline of our work the past season may be in order.

Working in conjunction with the American Peony Society we are striving to bring order out of the confusion which exists at the present time, in regard to the names and descriptions of our cultivated peonies. Up to this Fall we had between 1,900 and 2,000 plots, embracing nearly as many varieties, all of which have been sent here by the leading growers of both Europe and America. Included in this large number of plants there are naturally many worthless varieties; how they got on the market we will not venture to say.

All these inferior plants have only served as stumbling blocks in our endeavor to straighten out the names of our important varieties, which are worthy of commercial trade. Therefore, to lessen our burdens and to bring our efforts more quickly to a point, we have started a new collection, bordering on to the old one, and for this new plot have received about 850 roots this Fall. These roots have been sent us by various members of the American Peony Society and comprise only such varieties as the several members deem worthy of a place in the commercial world. These shipments have been composed of mature plants, most of which should bloom next Spring. Each consignment is by itself, as these plants are to be returned to their owners after the classification is complete. Every plant is staked with its name and number in plain sight, thus making comparison an easy matter.

Great confusion reigns at present, due to the same peony being sold under two or three different names, and in extreme cases we have found the same peony under twenty-five different names.

We have now, in the first, one of the most complete, if not the most complete collection of known varieties in the world, while this Fall's collection represents the cream of the commercial varieties grown in the United States.

At the annual meeting and exhibition to be held by the American Peony Society here next Summer, it is hoped that every interested peony grower in the country will attend, for this grand collection in bloom will be well worth traveling across the country to see.

Following are the growers who have contributed plants to the commercial collection set out this Fall: B. H. Farr, George Hollis, J. E. Rosenfield, Cottage Gardens Company, C. & M. Wild, Storrs & Harrison, Perennial Gardens, Jackson & Perkins, Ellwanger & Barry, Mrs. Sarah Peas, A. L. Gould, J. T. Lovett, Blue Hills Nursery, J. Charlton & Sons, C. S. Minot, and T. C. Thurlow.

Ithaca, N. Y.

L. D. B.

4,000,000 Christmas Trees a Year.

This is the time of the year when people feel it their duty to ask Gifford Pinchot, the United States Forester, what he thinks about the Christmas tree question.

"I have thought a good deal about this Christmas tree matter," said the Chief Forester, "and have finally reached the conclusion that trees are for use. There is no other use to which these trees could be put which would contribute so much to the happiness and good of mankind as their use for the children and families on Christmas Day. So far as endangering the future life of our forests is concerned the effect is infinitesimal compared with the destruction caused by forest fires and wasteful lumbering. It is estimated that 4,000,000 Christmas trees are used in this country each year, one in every fourth family. If planted four feet apart these would be grown on less than 1,400 acres, a good size farm. You see, the amount is utterly insignificant when compared to the other great drains on the forests.

"Trees suitable for Christmas trees do not grow in the old forests, where reproduction is most important, but in the open. Even if serious destruction were threatened the proper remedy would be not to stop using the trees but to adopt wiser methods. There is no more reason for an outcry against using land to grow Christmas trees than to grow flowers."

According to Mr. Pinchot the center of the Christmas tree industry lies in the big cities of the East. New York city and the New England States consume 1,500,000 trees, or nearly one-half of all the output. Maine, New Hampshire, the Berkshire Hills in Massachusetts and the Adirondacks and the Catskills in New York are the sources of supply for Boston, New York and Philadelphia and even for Baltimore and Washington. The swamps of Michigan, Wisconsin and Minnesota furnish the markets of Chicago, St. Paul, Minneapolis and Detroit. Throughout the States of Illinois and Ohio nurserymen supply the local demand with nursery grown Norway spruce.—N. Y. Sun.

Reflections on Current Topics.

MR. EDITOR: Once a man has earned a reputation for stirring up things and trying to make the world go straight, he is generally blamed for the attempts of others whose identity is bemasked and whose endeavors along the same lines may or may not be of a greater or less degree of importance to mankind. This seems to be the fate of President Roosevelt and myself. The fact regarding the latter personage was brought home to me on reading W. N. Craig's amusing effusion in your issue of December 14 last, in which he says the statements of the color critics of rose Mrs. Jardine and *Crataegus crus-galli* are written "in a style peculiarly like that of Job himself."

Now, sir, I take that Craig criticism as a decided compliment, as I feel sure those criticised will likewise do, in their case; but I disclaim being an authority on hues. Furthermore, color description, in my opinion, depends largely on the relation between the individual describing and the thing described. As an example of this I cite the following incident: After perusing the Craig contribution I asked Jemima the color of her hair. She replied, smiling blandly, "Why, Pap, it's light golden." Now, I have no doubt had "Phil." been the "describer" on this occasion, too, he would, perhaps ungallantly, have said that the lassie's locks were of an orange shade; while, to show my inefficiency as a color critic, I always have regarded Jemima's tresses as being sort of a delicate ginger—though I never said so to her face. Now, however much these individual descriptions may vary, there is at least one common basis of agreement, in that there is "a streak of yellow" self-evident in the color composition of the thing described.

So there you are. Had "Phil." been the distributor of the rose named, instead of, as stated, the self-constituted "describer," of it, I feel sure he would have had more "common sense" than to dub the color of the blooms "soft pink on an orange shade."

Coming to the color of the berries of the hawthorn, I observe Mr. Craig relies on the descriptions given by "authorities." He seems to be one of those fellows who can say nothing of any value unless they have some horticultural dictionary or other similar publication at their elbow. Why, if the colors to which he takes exception were not to his liking, did he not give us his own descriptions of these colors, thus showing he held personal views in the matter? I like the individuality demonstrated by your correspondent, "Common Sense," who shows he is not afraid to go against the dicta of so-called authorities; and, as far as I know (and Craig seems to be in a similar position), "Common Sense" is as "near the truth as the others."

One thing that strikes me as peculiarly funny in connection with this whole matter is Craig's readiness to jump into the breach and champion the cause of those whom the critics he criticises attack, while at the same time engaging himself in what he condemns in them.

Did the cap fit in the case of the hawthorn and the other items said to have been filched from your columns; and has "Phil." as little ability as a polemic as he has as a describer of colors that he needs Craig's assistance to help him out?

Also does Craig not know any better than the English writer that the Japanese ivy has no relationship to the poison ivy? Such crass ignorance as that could not be attributed even to Job or John Birnie.

And this reminds me, that on looking at the portrait of Mr. Craig which recently appeared in your columns, Jemima exclaimed: "Pap, that man looks just like you did when you were his age." I confessed to the verity of the similarity in appearance; and both of us seem to have been endowed with the same disposition—an inordinate desire to attend to other people's business, to criticise others captiously, and to pose in the limelight as often as we can—which, this being a free country, and your columns always at our disposal, is, I guess, our prerogative.

JOB.

American Carnation Society.

Variety Registered.

WHITE HELEN GOULD, by Simon J. Hider, Hillsboro, O. Sport of Helen Gould; white, center petals slightly pencilled with pink gradually turning to white as matured; calyx, stronger than that of Helen Gould; size 3½ to 4 inches across; stem, strong, 20 to 26 inches long; habit of growth, same as Helen Gould.

Registration is made subject to the approval of the Carnation Society at its meeting in Washington, D. C., January 28 to 30, inclusive.

Lancaster, Pa.

ALBERT M. HERR,

Secretary.

AMONG THE GROWERS

James D. Cockcroft, Northport, L. I.

One of the largest greenhouse establishments east of New York devoted exclusively to carnations is that of James D. Cockcroft at Northport, L. I., about 40 miles from New York City on the Wading River branch of the Long Island Railroad. There are eight houses altogether, one of them 120 by 13 feet, just erected, to be used for propagating purposes. A range of three houses of iron frame construction covers an area 100 by 156 feet; other houses are 130 by 15, 100 by 26, 125 by 33, and 90 by 12 feet. The houses are heated by hot water, from a large Kroeschell boiler recently installed,

The flowers run in size from $3\frac{1}{2}$ to 4 inches in diameter when at their best. It is a profuse bloomer, coming in crop early in September, cutting continuing until the middle of July, the last flowers, even with the disadvantage of the season, averaging $2\frac{1}{2}$ inches in size, and many running to 3 inches. It has a perfect calyx, regular in formation and well built up. The stem is stout and strong, and runs 24 to 30 inches in length. The plants show strong, vigorous and clean growth, and the flowers have excellent keeping qualities.

The new varieties are propagated in lean-to houses erected especially for the purpose, and especial care is taken to get strong well rooted cuttings. A full rooting period is accorded the cuttings, and only strong bottom shoots are selected for propagating.

Several of the popular commercial varieties are

Carnation Growing Establishment of J. D. Cockcroft, Northport, L. I.

which is giving very satisfactory results both as regards efficiency and economy. An excellent supply of water is obtained from an artesian well, and a supply of manure water is pumped to each house through the same water pipe system.

The new varieties of carnations now being disseminated by Mr. Cockcroft are the principal attractions of the establishment, and they may be seen under excellent growing conditions notwithstanding the handicap of unavoidably late benching of part of the stock. Three benches of Harvard are looking particularly fine. As the name implies, Harvard is a rich crimson variety of the true university color. It is the result of a cross between Prosperity and General Maceo, and throws symmetrical, well built flowers of a size averaging $3\frac{1}{2}$ inches, and many fully 4 inches. The calyx is excellent, and no signs of bursting are to be found under the most critical examination. The stem is long and wiry, and runs from 24 to 30 inches or more, uniformly throughout a season extending from early Fall to late Spring. The variety is a rapid and vigorous grower, free blooming, coming well into flower in September, every shoot producing a perfect bloom. Its keeping qualities are all that could be desired, and it is an excellent shipper. It has been a popular variety in the New York market for four years, where it always commands a high price.

Faust, a brilliant scarlet, is another variety being disseminated this season, and as seen in its growing quarters appears to substantiate all the claims made for it. Its extreme prolificacy makes it highly desirable for commercial use, particularly for Christmas trade. The stems are long and wiry, running from 20 to 30 inches. Its color is a shade brighter than that of Red Sport, and of Victory. The flowers are of medium size, well built up, and of very pleasing formation. The calyx is perfect. It is a strong, healthy and clean grower, comes early into bloom, and is free and continuous in its flowering throughout the season. Its keeping and shipping qualities are of the best. The variety originated from a cross between Mrs. T. W. Lawson and G. H. Crane.

Another new variety is Georgia, a beautiful pure fringed white, the result of a cross between Prosperity and Morning Glory.

Grower and introducer, J. D. Cockcroft, Northport, L. I. Photographed early in Dec., 1907.

Some Remarks on the Rose.

By E. G. Hill, Richmond, Ind., before the Chicago Florists' Club, Thursday Evening, December 12, 1907.

Your secretary did not state what particular phase of the rose question I was expected to discuss, whether the raising of new varieties, the general culture of roses, or to discuss somewhat the coming exhibition of the American Rose Society, which will shortly be held in your city, hence my apology for the present somewhat discursive effort.

"Anything new in roses?" is a question propounded much more frequently now than a few years ago, especially by the rose growers of our country, and the same question is asked with even more interest in Europe.

The Retailers' Attitude to New Varieties.

The rose growers charge the retail store men with being more largely responsible than themselves for the seeming indifference toward new varieties, and in this there was undoubtedly a considerable degree of truth; but it must be confessed a large number of florists—growers—held the same view. In the light shed on the matter of novelty by the milliner, the silk manufacturer, the dry goods man, and in fact by all the vendors of apparel, ornament and furniture, it is a wonder that we of the florist profession should have been the reactionaries in the matter of novelty in roses, but we will have to admit that such has been our past record. It was a leading society lady in an Eastern city who gave utterance to the protest against being compelled to use Bride, Bridesmaid, or American Beauty for her frequent functions; this was only too true and the lady in question simply voiced the general complaint concerning the world's pre-eminent flower, the rose. A change has taken place and new varieties are given a very different reception from that accorded a few years ago. It is well for the rose that such is the case, else the carnation would have continued its triumphant march to the point of disputing leadership with the rose.

Demand for New Roses Being Met.

Believing that a radical change has taken place and that novelty in roses is being sought, the question arises—will we be able to meet reasonable expectations, and can we provide new varieties so as to meet this greater interest? The answer is in the affirmative, and it is a pleasure to record that a considerable number of workers are endeavoring by hybridization and cross-fertilization to give to the rose-loving public new forms and types.

So many qualities have to be present in a rose that lays claim to favor as a forcing variety that the progress made will seem slow, but nevertheless it is within the range of possibility to gain entirely new and unique colors and form.

The Future Field.

I believe with Robert Simpson, the present president of the American Rose Society, that the forcing roses of the future will come largely from an admixture of *Rosa indica* with the present hybrid perpetual; in fact, do not the hybrid teas bear witness to this prophecy? Still the strong old Bourbon varieties, like Gloire des Rosomanes, should be made to furnish their rich scarlet tones to the newer sorts. Our task is to breed into the tea varieties the strength, vigor, length of stem, and the finer dark shades found among the hybrid perpetuals, using the tea section in order to secure freedom in flowering. The varieties of the future will not be the result of a single cross between the two sections named, but will be the result of patient inter-breeding extending through a series of years. I would not say that here and there a desirable new variety may not make its appearance as a result of a hap-hazard cross, but to get at definite results careful note must be made of the qualities present in the progeny, and then seek to breed those missing qualities into future seedlings.

We must not forget that *Rosa indica* is the one class that is to furnish the foundation for all our forcing varieties, and this is on account of its continuity of bloom. No matter how fine a rose, or what the tint or length of petal, unless it has the inherent power to produce buds and flowers freely it will prove practically valueless. We have every reason to hope that we may yet secure the ideal from the careful crossing of the hybrid perpetual and the tea. We have Richmond, Mme. Abel Chatenay, Liberty, Killarney, all undoubtedly from this source, hence it is within reason to hope for others in this particular line.

As to Cultural Requirements.

The new varieties appearing will perhaps require more careful, or at least different cultural treatment from that given our present forcing varieties. The new sorts will require study; perhaps some will thrive best grafted on certain stocks, or will do best in certain soils. A case in point is the variety Killarney. It was Benjamin Dorrance who discovered the peculiarities of this variety and who brought it into its present prominence. So it would be well to give new varieties a careful trial before casting them aside.

My conviction is that we have much to learn in regard to right cultural conditions. I am inclined to think that perhaps other valuable varieties have been lost

sight of by their not having had proper cultural treatment. We know that to grow American Beauty successfully requires the application of good cultural skill, and very often this variety fails to give best results in the hands of the most skillful growers. Great progress has been made in improved methods of culture, and you have some notable examples in this line in your own vicinity. I mention the cultural side of the question in order to show how important it is in order that new introductions may not be condemned too hastily.

Some fairly successful rose men still inveigh against Killarney and Richmond, because they cannot do them successfully, and it is only the fine showing made by a majority of our best growers that has given these varieties the position they deserve. Each new rose must be studied and results carefully noted, before its cultural requirements can be known; it is infinitely easier to master the peculiarities of two or three sorts, drop down into a rut with them and run along comfortably, than to experiment, and fail, and try again. Experimental work is seldom comfortable work, but buyers demand novelty and variety, and there is nothing for it but for us to take off our coats and get down to hard work.

Horticultural Schools and Experiment Stations.

By DR. A. C. TRUE.

(Concluded from page 785.)

The Station Men Should Lead.

To achieve and maintain leadership the experiment station horticulturists must be able to do certain things better than the practical men, and as I believe must chiefly depend on their ability to establish principles, to work out methods and discover causes or the rationale of practice. When they leave this field and put themselves in competition with commercial horticulturists they run great risks of failure. It is only in rare cases that experiment station horticulturists are likely to have the means to make tests and selections and to do other things done in commercial practice on as broad a scale as the commercial growers do. How often have experiments in horticulture, as well as other lines of agriculture, fallen into contempt because they are undertaken on too small a scale. The besetting sin of the station horticulturist has been the yielding to the temptation to undertake too many things at one time, to try this and that and the other thing in a picayunish way. His more or less valid excuse too often has been that many of these things were forced upon him by the imperative demands of his horticultural constituency.

Mutual Understanding Necessary.

Both parties must learn more thoroughly the proper functions and limitations of experiment station work in horticulture. The station man must come to see more clearly that his proper work is to attack problems which the practical man is not prepared to undertake, and the latter must recognize that it is folly to impose additional burdens on workers already overloaded and that his efforts should rather be mainly directed toward increasing funds and workers in horticulture at the stations. As an aid to the discussion of the problems connected with the establishment of the science of agriculture room was made for a course in horticulture at the National Graduate School of Agriculture held at the University of Illinois in 1906, and provision for a similar course is being made for the session to be held at Cornell University and the Geneva Experiment Station in 1908.

With the enlargement of the scientific basis of horticulture, mainly through the broadening work of the experiment stations, it should be possible to organize instruction in horticulture in a sounder pedagogical manner and to extend this instruction both inside and outside the colleges so as to reach many more students and benefit horticultural practice much more widely. The formulation and discussion of horticultural courses for different grades of schools should be encouraged. A valuable contribution in this line was made by Prof. F. W. Rane in his paper before the Association of American Agricultural Colleges and Experiment Stations at its meeting at Washington in 1905 (Office of Experiment Stations Bul. 165). The preparation of horticultural text-books, manuals, and illustrative materials should also be promoted.

More Thorough Organization and Equipment Needed.

Especially, efforts should be made to secure the more thorough organization and equipment of horticultural departments in some of the Agricultural Colleges, located in States where horticulture is a great agricultural industry. We need more of such specialization of development by agreement among our agricultural colleges. While all of them would do well to maintain respectable departments of agronomy, horticulture, and animal husbandry, one or the other of these lines might be properly emphasized in individual institutions in accordance with its relative local importance. Thus in New York and California and a few other States we

Carnation Enchantress En Famille

Grower, J. D. Cockcroft, Northport, L. I.

may reasonably expect the development of horticultural departments or schools more comprehensive and thorough than anything in this line elsewhere in the world. State boundaries should not prevent students from assembling themselves in large numbers where they can receive the instruction of the most competent specialists under the most favorable conditions.

I believe there is plenty of opportunity for every State agricultural college to make itself pre-eminent in some line of education or research, and thus while doing good service to its State also greatly benefit the nation.

Our London Letter.

By A. Hemsley.

CHRYSANTHEMUMS. We can hardly expect to get more novelties this season. At the last ordinary show of the National Chrysanthemum Society, which was held at the Crystal Palace on December 5 and 6, the only varieties gaining certificates were two singles, viz., *Blanche*, a pure white with florets of good substance, from Mr. Pagram of Weybridge; and *Dareen*, a good yellow, from Messrs. Wells & Company, Merstham. One of the best things I have seen is *Edith Jameson*, a large Japanese, with long, drooping florets of a pretty shade of pink. This has come quite a different shade of color to what it was last season. I find it is described as a creamy white in some catalogues, but as seen this season there is no trace of cream in

it. Madame R. Oberthur is one of the finest late whites; H. J. Jones had very fine blooms of it at the last show. Madame G. Rivol is a remarkable variety; we get it good all through the season. Its parent, Mme. P. Radaelli, has not been so prominent at the shows, but is a favorite for market work.

The incurved varieties are coming more and more into favor with our florists. It is worthy of remark that Mrs. Geo. Rundle, which was sent out by Adam Forsyth 30 years ago, is still a favorite. I find *Jardin des Plantes* and others catalogued by Mr. Forsyth in the Spring of 1867. The anemone-flowered varieties were favorites at that period, also the pompons, but no singles were grown. In all the arrangements for effect at the last show singles were a prominent feature.

In my notes published on November 23 where B. Ladds was mentioned it should have been Philip Ladds, as there are several firms of the same name (Ladds). This correction is important.

While these notes are on the way we shall be holding the last exhibition of the season; this will be the "market growers'" show, and one of the most interesting, for we see here what is really good for Christmas trade. In my next letter I will give a list of the best sorts in each color. On the same day we have the Winter-flowering Carnation Society's show. John Fotheringham, Tarrytown, N. Y., will act as one of the judges at this show.

THE NATIONAL CHRYSANTHEMUM SOCIETY'S ANNUAL DINNER.—There was a good gathering of members and friends at this function which took place on November 26 at the Holborn restaurant. C. E. Shea, Esq., presided, and in announcing his retirement from the presidency stated that he should still take an active interest in the society. Sir Albert Rollit, who is nominated to fill the vacancy, was present and signified his willingness to accept the post which I may say he has previously held with great credit to himself and to the benefit of the society. Sir A. Rollit is always brim full of good humor, and livens up a meeting whenever he gets up to speak. We are sometimes told that our horticultural meetings are dull, yet no one could say that of this meeting. Mr. Mc Kerchar, who responded to the toast of "The Ladies and Visitors," was most amusing. The treasurer (J. Green) was a little serious over the financial position, yet was able to announce that he had liberal promises of support, especially for the special premier prize class to be offered next season: £50 will be divided into three prizes, viz., first, £25; second, £15, and third, £10. It is hoped that this will induce some of the larger provincial growers to compete. Harman Payne who visits the continental exhibitions suggested that we did not show so much enthusiasm as our French friends do, yet this appears to be from the fact that our shows have become too numerous, and instead of being centered in one great display we have exhibitions all over the Kingdom; and, take London, each suburb has its chrysanthemum show. And it is the divided attention which spoils what should be the greatest meeting of the year.

CHRISTMAS STOCK.—In looking around the nurseries I find that supplies are likely to be plentiful for the Christmas trade, and there will be no big prices. *Ericas* are remarkably good. *Poinsettias* will be plentiful, and chrysanthemums will hold out later than usual. Nurserymen complain of a falling off of provincial trade, yet we find in most instances there are preparations for improvements and extensions.

A great deal too much has been made regarding the Corrupt Practices Act. It has been no secret that a commission has been given to gardeners, and there are few employers who are not acquainted with the fact. Sir Albert Rollit in speaking the other night said that there was no law which made the giving of Christmas boxes illegal, and stated that it was an institution which had been recognized for over two centuries, and he was satisfied that it could not be considered illegal to continue the ancient and time-honored custom.

THE WINTER-FLOWERING CARNATION SOCIETY, England, at its recent exhibition, adopted the following scale of points in awarding certificates of merit to new varieties. A variety must gain at least 30 points to entitle it to a first-class certificate, and 25 points to entitle it to an award of merit:

	Points.
Color	5
Size	5
Fragrance	5
Substance	5
Calyx	5
General appearance	5
Length and substance of stem.....	5
Habit of plant.....	5

DIRECTORY OF RELIABLE RETAIL HOUSES

The retail florist firms advertising under this heading will accept and fill orders for flowers and floral designs forwarded them by mail, telegraph or telephone, the usual commission of 25 per cent. being allowed.

\$25.00, payable quarterly in advance, will entitle the advertiser to a four-line card, under this heading, for one year, 52 insertions. For every line additional to four, \$5.00 will be charged. Four lines will average 32 words: each additional line, 9 words. Each advertiser receives one copy, free, of our Florists' Telegraph Code.

New York.

YOUNG & NUGENT, 42 West 28th St. We are in the theatre district and also have exceptional facilities for delivering flowers on outgoing steamers. Wire us your orders; they will receive prompt and careful attention.

MYER, 611 Madison Ave. My facilities for delivering flowers for any and all occasions are unexcelled. Can give prompt service to steamer and theatre trade. Telegraphic orders solicited. Telephone, 5297 Plaza.

Brooklyn, N. Y.

ROBERT G. WILSON, Fulton Street and Greene Avenue. Delivers anywhere in Brooklyn, New York, New Jersey and Long Island. Trade orders well cared for from all parts of the country, and delivered at Theatre, Hotel, Steamer or Residence. Telephones: Prospect 2840 and 4065.

Kansas City, Mo.

SAMUEL MURRAY, 1017 Broadway. I will deliver orders for flowers in Kansas City and vicinity promptly. A first-class stock of seasonable varieties of flowers always on hand. Wire me your orders.

Detroit, Mich.

JOHN BREITMEYER'S SONS, Broadway and Gratiot Avenue. We cover all Michigan points and large sections of Ohio, Indiana and Canada. Retail orders placed with us will receive careful attention.

Denver, Colo.

THE PARK FLORAL CO., 1706 Broadway, J. A. Valentine, Pres. Orders by wire or mail carefully filled; usual discounts allowed. Colorado, Utah, Western Nebraska and Wyoming points reached by express.

Cincinnati, O.

HARDESTY & CO., 150 East Fourth, sell the best grade of flowers grown. Retail orders from distant points for delivery in Cincinnati or surrounding territory will receive prompt attention. Telegraph us.

Dayton, O.

W. G. MATTHEWS, FLORIST, 16 West Third Street. Flowers in any arrangement for all occasions for Dayton and vicinity. Personal attention given to all orders. Long distance telephones.

Dallas, Texas.

LANG, THE FLORIST, the largest flower store in the South. Floral designs and all flowers in season; personal supervision and prompt service in Oklahoma, Texas, Louisiana. Mail and telegraphic orders solicited.

Louisville, Ky.

JACOB SCHULZ, 644 4th Avenue. Personal attention given to out-of-town orders for Louisville and surrounding territory. Have a choice line of seasonable flowers always in stock; delivery facilities perfect.

Indianapolis, Ind.

BEERTERMANN BROS. CO. Our facilities for executing orders in an efficient manner are unexcelled. Our shipping territory includes the surrounding states. High grade flowers; expert workmanship.

Albany, N. Y.

EYRES, 11 North Pearl Street, cut flowers or floral designs delivered to any part of Albany and vicinity on telegraphic order. Personal attention given and satisfaction guaranteed.

Chicago, Ill.

HAUSWIRTH, The Auditorium Florist, 232 Michigan Avenue. The quality of our work is of National repute, and we are prepared to execute commissions in first-class style in Chicago and its environs.

FOR THE RETAILER

[All questions relating to the Retail Trade will be cheerfully answered in this column. We solicit good, sharp photographs of made-up work, decorations, store interiors, etc., for reproduction here.—Ed. F. E.]

Christmas Dinner Decoration Suggestions.

Red of course is the most appropriate color for Christmas table decorations as well as for all others connected with that festive season. Well-berried holly, black alder, poinsettias, red roses and carnations are indispensable at Christmas. There are many other red flowers and flowering plants that have gradually crept into the market, but the foregoing are among the more showy things the florist has to offer. Holly, perhaps, is most generally used for the table.

Oval or round plateaux, as the case may require, according to the size and shape of the table, should be well filled with specially selected holly. If the holly is not well supplied with berries, sprigs of black alder can be added, or bows of bright red

Harry J. Hoffmeier's Florist Store
at Times Square Subway Station, New York City

ribbon with the long ends streaming over the tablecloth. Poinsettias, cut short and laid on the holly and around the table, make a bright bit of color. Natural holly frosted is also very effective for table work. The leaves may be painted white and the frosting thrown on while they are still moist; or the branches may be dipped in clear size, and the frosting sprinkled over them. Plateaux made in this manner and well filled in with berries are very showy.

Very pretty centerpieces can be made with Cypripedium insigne and red berries, with the addition of asparagus or some other soft green. Centerpieces done entirely with poinsettias are perhaps more showy than anything else, but they must be properly prepared for table use. This is best accomplished by submerging the ends of the stems in hot water, allowing it to drive back the sap into the upper part of the stem and flower or, properly speaking, bract. If this is well carried out there need be no fear of their wilting on the table at a critical moment. Poinsettias, however, will always behave best in water, even after they have been treated.

Centerpieces made with plants of Adiantum Farleyense, with a few large heads of poinsettia through it is very rich and effective. A very elegant centerpiece can be constructed with English

mistletoe; this should be made up very closely. A combination of mistletoe and the beautiful Richmond rose makes a gorgeous setting for a Christmas table. Electric lighting will add greatly to the effect; white frosted lights or red lights mingling with the foliage or flowers is most pleasing and should be introduced wherever practicable.

Scarlet carnations are much in favor for table work, and are really most satisfactory, although they are usually so high priced as to be prohibitive except for the very wealthy. A decoration seen last season might be repeated. The family silver was utilized for the occasion. A large punch bowl formed the center; this was filled loosely with scarlet carnations with a fringe of Adiantum Farleyense. Large loving cups were filled in the same manner and placed at either end of the table, while smaller silver pieces were placed promiscuously over the table and filled with the pretty, red, coral-like bouvardia, with two or three cypripediums in each. Bouvardia was also used for the finger bowls. The gentlemen wore red carnations, and the ladies' corsages were gardenias tied with red ribbon.

Ardisias can also be used with good effect, if the shorter plants are selected for the purpose; the roots need not be destroyed. An arrangement of ardisias, small crotons and mixed ferns makes a pleasing change; or ardisias and A. Farleyense.

White and red is appropriate for Christmas table work and combinations—lily of the valley, with red roses or carnations. White heather and poinsettias are very brilliant; and red and white roses in cluster effects with Adiantum cuneatum are hard to beat.

A display of red and white azaleas cut from the plant will please and makes a good low decoration for a long table. Euphorbia can usually be obtained at this season and nothing could be finer with Adiantum Farleyense, or the darker green of Asparagus plumosus.

Anthuriums with their grotesque formation of the flower are an interesting novelty and well adapted for high decoration, and the color is everything to be desired for the festive season.

Bright cheerful decorations should be the chief aim of the florist, and light airy effects are always more appreciated than stiff formal affairs.

D. RAYBUN.

CLUB AND SOCIETY DOINGS.

MORRIS COUNTY (N. J.) GARDENERS AND FLORISTS' SOCIETY.—The annual election of officers for the year 1908 took place on December 11 at the regular monthly meeting, with the following result: President, Percy Herbert, Florham Park, Madison; vice-president, H. B. Vyse, Glimpsewood Manor, Morristown; treasurer, William Duckham, Madison; secretary, Edward Reagan, Morristown. Executive Committee is as follows: A. Herrington, Charles H. Totty, William F. Lyons, Alexander Brown, Joseph A. Manda, William G. Badgley, David Falconer, A. R. Kennedy, Robert M. Schultze, Thomas Stokes, Otto Koch, Ernest E. Wild.

Arthur Herrington exhibited some very fine pans of Begonia Gloire de Lorraine; Wm. F. Lyons had some nice dishes of Stirling Castle tomato and several bunches of sweet peas Christmas Pink and Florence Denzer. The judges awarded a cultural certificate to each of the exhibitors.

The January meeting will be devoted to the annual smoker. This will be our twelfth annual event, and the committee instructed to prepare therefor consists of R. M. Schultze, A. Herrington, Wm. Duckham and C. H. Totty. E. R.

LENEX (MASS.) HORTICULTURAL SOCIETY.—The regular and annual meeting of this society was held Saturday, December 7, President Heeremans in the chair. The meeting was largely attended. Samuel Hudson was unanimously elected a member. The following officers were elected for 1908: W. Jack, president; R. Speirs, vice-president; Thomas Page, treasurer; G. Instone, secretary; and E. Marsh, assistant secretary. The various officers read their reports, which showed the society to be in a flourishing condition with a membership of nearly two hundred. Retiring President Heeremans thanked the members for their support during his term of office. Next meeting night there will be an entertainment.

James Scott, representing Scott Brothers, Elmsford Nurseries, N. Y., was in Lenox this week, and reports business good. G. H. I.

Retailers desiring a share of out-of-town trade should be represented by a card in this column.

THE "HORTICULTURAL HYGROMETER" is the name given by a firm of scientific instrument makers in London, England, to a device that foretells frost. The instrument is illustrated and described in a recent issue of the Gardeners' Chronicle, London.

FERNS

MY SPECIALTY

150,000 assorted ferns for jardiniere, excellent stock, in 15 of the best market varieties, including *Cyrtomium Falcatum*, *Aspidium Tausseense*, *Pteris Wimsetti* and *Mayii*, in good proportion, from 2 1/4 in. pots, \$3.00 per 100; \$25.00 per 1000; 500 at 1000 rate.

CENTER PLANTS (Exact Size)

Kentia Belmoreana, 2 1/4 in., \$1.30 per doz., \$10.00 per 100.
 Assorted Ferns, 3 in., \$5.00 per 100, \$55.00 per 1000; 4 in., \$12.00 per 100, \$115.00 per 1000.
Adiantum Cuneatum, fine stock, 2 1/4 in., \$3.50 per 100, \$30.00 per 1000; 3 in., \$5.00 per 100, \$55.00 per 1000; 4 in., \$12.00 per 100, \$115.00 per 1000.
Adiantum Farleyense, 4 in., \$4.75 per doz., \$35.00 per 100; 5 in., \$5.50 per doz., \$55.00 per 100, \$12.00 per doz.
Adiantum Rhodophyllum, 4 in., \$2.50 per doz., \$20.00 per 100; 5 in., \$5.50 per doz., \$40.00 per 100.
Adiantum Gracillimum, 2 1/4 in., \$3.50 per 100, \$30.00 per 1000.
Adiantum Regina, 4 in., \$3.00 per doz., \$22.00 per 100; 5 in., \$5.00 per doz., \$45.00 per 100.
Cibotium Schiedel, 4 in., \$3.50 per doz., \$25.00 per 100.
Nephrolepis Scottii, 6 in., \$7.00 per doz., \$60.00 per 100; 8 in., \$15.00 per doz., worth the double.
Elegantissima and *Pieroni*, 5 in., \$5.50 per doz.
 Fern Spores, gathered from my own stock, guaranteed fresh, 1907 crop, good, commercial varieties, 30c. per trade pkt.; \$3.00 per dozen.

J. F. ANDERSON, Short Hills, N. J.

CHRISTMAS FERNS

Do not delay. Order your Christmas supply of ferns at once. Then we can ship at just the right time when the weather is not too cold.

Our stock was never better, 50,000 fine, bushy plants to select from.

We will give you very liberal count on any order you may send us during the next ten days. The best of packing and prompt shipments.

R. G. HANFORD, NORWALK, CONN.

Plant Notes.

GARDENIAS.—Although it is possible if not probable that a successful grower of gardenias for Winter flowers will find the product on the whole more remunerative at that time than the growers whose requirements demand flowers during the Summer and early Autumn, it is still a fact that flowers during the latter periods usually bring a price which makes their cultivation well worth the care bestowed upon them by whoever is successful with them. The flowers are not in demand during the Summer for shipment to the great centers of population like New York, Boston and Philadelphia; they are rather used for the most part at such fashionable seaside resorts as Newport and Bar Harbor, where it often happens that a pronounced scarcity of these flowers causes very high prices to be offered for them by retail florists.

For the production of flowers during the Summer some growers carry over in the benches the plants planted early the previous Summer, and although these plants produce flowers of a kind on stems of a like kind it is very doubtful if as good results are on the whole obtainable by such methods as with plants propagated from cuttings and potted and grown on until fit for planting, which they should be when good stocky plants in 3 1/2 or 4-inch pots, and then planted in benches in January or February. Good drainage is an absolute necessity for the successful growing of gardenias, and the deeper the benches in which the plants are grown the more need there is for drainage material. But if the benches are four or four and a half inches deep, with good cracks between the boards, green sod with the grass side down placed over the boards makes a satisfactory beginning, and then the roughest of the filling soil on top of these. If the benches are much deeper, two inches at least of rough drainage material will be necessary, one inch of coarse ashes underneath the sod. The best gardenias I ever saw were grown in soil composed of four-fifths fibrous turf and one-fifth well rotted cow manure, with the addition of a sprinkling of sand. Leaf mold is very much to the liking of gardenias, but when it is used in quantity it seems to have the effect of causing soft, unreliable growth.

Before planting the soil should be made quite firm and when planting, the soil loosened in the operation should be made firm right up to where it comes in contact with the roots. The plants should be put in the bench just deep enough so that when finished a light firm covering of the bench soil will be over the top. When gardenias are planted in Winter for Summer flowering, or even when planted late in Summer for Winter flowering, they require bottom heat, and if it can be kept up without interruption so much the better. The temperature of the house should not fall below 70 degrees early in the forenoon. Syringing with good force of water keeps them clean. D. M.

CINERARIAS! From Benary, Cannell and Sutton's prize show flower saved, dwarf and semi-dwarf, giant flowered, finest shades and colors. We can supply any quantity fine, stocky plants—2 1/4 in., \$2.50 per 100. Cash with order.

SHELLROAD GREENHOUSES, Graego, Baltimore, Md.

VIOLETS VIOLETS

Marie Louise, ready August 1st, clean and healthy in every particular. 3 in. pots \$5.00 per 100. Cash with order.

Wm. J. CHINNICK, Trenton, N. J.

Rooted cuttings of all soft-wooded plants are in demand at this time by florists who do not propagate their own stock. Growers making a specialty of the rooted cutting business will find an advertisement placed in THE FLORISTS' EXCHANGE a very profitable investment.

ANDREW CARNEGIE

(Snow) **Scarlet Harlowarden.** The only variety that has the rich velvety scarlet; the ideal stem; the best calyx and is the best all-around Carnation on the market. Strong rooted cuttings January delivery \$12.00 per 100; \$100.00 per 1000.

CHICAGO CARNATION CO. A. T. PYFER, Mgr. Joliet, Ill.

New Crimson Carnation HARVARD

THE color of this novelty is a very rich crimson. The blooms are of the finest as to size and quality and the habit is free and continuous, every shoot producing a flower with a calyx which we guarantee as non-bursting. Blooms borne on long, wiry stems from 24 to 30 inches and over. Price \$12.00 per 100, \$100.00 per 1000. Usual discount on large orders.

NEW CARNATION FAUST (BRILLIANT SCARLET)

This novelty is very fine for commercial use owing to its extreme productiveness; a fine one for Christmas trade. Color, form, stems, habit and productiveness all that can be desired. Price \$6.00 per 100, \$50.00 per 1000. Usual discount on large orders.

VICTORIA

NEW SEEDLING, crossed by Lawson and Harry Fenn, the color of Lawson and the long stem of Harry Fenn; it is more prolific than either. Lawson is past. Victoria is better than Lawson ever was, and gave us last Winter from 20 to 35 per cent more blooms each month. It is very healthy and a nice grower. I have two houses of it, and it is a sight to see the buds and blooms. It brings more money in the market than Lawson. Read below what J. A. Budlong & Sons Company of Auburn, R. I., say of it. They are growing it this Winter. J. A. Budlong & Sons Company are one of the largest market gardeners in New England, also the largest rose and carnation growers in Rhode Island.

December 10, 1907.

Mr. J. H. Cushing, Quindnick, R. I.
Dear Sir: We have 1175 plants of your new seedling Victoria carnation which we planted in house the last of July. They

have made fine plants and we think now will produce as many flowers, if not more, than any carnation we ever grew. The stems are stiff and good length. The flower is also a good keeper.

We have sold these flowers in several instances to some of our best trade in Boston, who thought they were a long-stemmed Lawson.

Up to date, we have cut 4768 flowers from the 1175 plants, and there are as many buds in sight to-day as there have been any time since we started to cut. In other words, the cut has been very uniform and looks as if it would continue so throughout the Winter.

We do not think that you will make any mistake by putting this carnation on the market. Yours truly,

THE J. A. BUDLONG & SONS CO.

Price of Victoria rooted cuttings, \$75.00 per 1000; \$8.00 per 100; 250 at 1000 rate.

THE WEEK'S WORK

Timme's Timely Teachings.

Business Prospects.

If the fact that conditions of prosperity still exist in abounding measure throughout this country needed any additional proof it was furnished by the immense throng of eager holiday shoppers that have filled stores and streets to overflowing for weeks. All classes of tradespeople unite in declaring this year's pre-holiday business the largest ever experienced. This as well as the very excellent Thanksgiving trade enjoyed by florists should go a good way toward buoying up hopeful anticipation and in removing every cause for timorous uncertainty as to what the near future and the entire season, now fairly begun, will bring in the way of an all-around business to every one of us. The week just entered upon is sure to be an exceedingly busy one, and rather a decided increase than a noticeable falling off in the florist's line of trade throughout the coming season is the promise held forth by the present bright outlook.

A Thing or Two of Vital Importance.

The observant eye of the spectator, as he elbows his way through the surging crowds of humanity bent on the spending rather than the hoarding of money, sees more than merely a promising preamble for what is yet to follow in this enormous wave of holiday traffic. To him it is the embodiment of what signifies legitimate business sagacity, a gigantic object lesson set before the student of present-day commercial propaganda. Unless this spectator is unspeakably dull indeed, he must acknowledge that a great part of the immense business transacted in any one of our large cities and at any period of the year is called forth and impelled by means indefinitely more potent than mere reliance on adequate supply for possible demand. It is unquestionably due to attractive and artistic display, to enticing neatness, order, convenience and dispatch in the service, to a thousand and one devices calculated to draw trade and above all to liberal and systematic advertising. You simply can't keep the live business people from asserting themselves. It would do the others great good to sit up and take notice.

Advertising.

I repeat what in a former article I put forward as a business axiom for the acceptance of retail growers, that the most gratifying thought, next to being assured of a good and lasting demand for some time to come, is the conviction of being well supplied and fully prepared to meet this demand. But this is not sufficient, if entire success depends on the increase of patronage and widening of trade, not sufficient if keen competition must be fought and conquered. The fact that you are ready for business is no incentive to business unless you apprise the people of it—another good old truism, here polished up anew for the sole benefit of the retail grower, the country florist, retail and store-florists in general, hundreds of them, who never so much as bend a finger toward winning and widening of trade by advertising their wares, shy of anything that might serve to betray their whereabouts or the fact that they are on earth.

In this our age of frenzied business activity, even the smallest of industrial concerns is called upon to take part in the commercial battle waged on all sides. One of the weapons wielded in the strife—and none the least trustworthy—is advertising all too sparingly made use of by the majority of retailers in our trade. In their relation to the inter-trade commerce they are in the market as buyers only, complacently enjoying the greater share of the benefits derived from systematic and persistent advertising in the trade papers, a means employed by their brightly alert colleagues from the field of wholesale production, supply and dis-

tribution for the winning and furtherance of trade, which, infallible in accomplishing this end, has probably done more toward the advancement of our profession than it is accredited.

By following the shining example set by the enterprising wholesale grower, commission man, seed house and everyone closely or remotely connected with our trade, the retailer, to whom all these must look for disbursement of actual earnings, would in his own sphere of business obtain surprising results, unlooked for to him who as yet has never made any effort in this direction. Advertising, shrewdly practiced, is none of your slow-going business measures; it shows immediate effect. It stimulates demand and increases the volume of trade in a wonderful way; brings customers that before were never aware of your existence to your door; reminds others of what they had entirely overlooked, that a plant or a bunch of flowers would be just the thing. Proficient advertising has proved the means of salvation to many a retail grower's establishment in a location probably ill-chosen in the beginning, but by the use of this mighty lever raised to a position of prominence among the best paying of concerns. By all means let the world know you are alive.

There are many ways in which this may be done, all of them more or less effective and serving the purpose in view.

The catalogue, posters, handbills, neatly prepared folders, business invitation cards, mailing matter of various description, all work toward the same end, but none perhaps is less expensive and yet farther reaching than a well gotten up and conspicuously placed advertisement in the local papers. There are schools in advertising, I know, but the retail florist is likely to do finely without taking a course into the higher flights of the art. All that is really necessary for success in advertising is to bear in mind that truthful statement, plain talk, large type and conspicuous space are more apt to fix attention and inspire confidence than stinted space, small print, attempts at being funny in the wording, or statements calculated to convey the idea that what is offered is cheaper in price and better in quality than the same kind of goods offered anywhere else. Never promise more than you can give, correct and make frequent changes in display lines and general make-up. Should you run out of anything, look through the advertising columns of the trade papers and stock up again; never wait for your own stock, not yet ready, if it is a fast selling kind and can be had from others. Let your advertisement contain a short list of the new things in your line, also of the seasonable specialties, describe and commend as much as you like as long as it is truth, give prices if you think best, keep this up and never let false ideas of economy interfere with liberal advertising, for it will prove the best paying investment you ever made.

Display.

Some florists, whose show windows exhibit a superbly arranged array of flowers and plants at all other times but the holidays, believe this to be less necessary then, since time is precious and business booming anyway; while others hold to just the reverse, doing their utmost to be in line with the general holiday display all over, but sadly neglecting this feature of business solicitation all the rest of the year. These latter claim that florists, unlike people in other lines of business, are compelled to renew their window displays at least once a day, sometimes oftener, and that when business is dull and receipts meager the income would not justify the daily outlay for lavish and seemingly useless display. It is true that the store florist must buy all he sells, and all that he cannot sell, when owing to its perishable character it soon becomes unsalable stock if not disposed of while fresh, and that on this account elaborate display would rather add to the certain loss than to the possible gain at times when there is "nothing doing." And I am most willing to admit that whatever is

Prices Advertised in these Columns are for THE TRADE ONLY—When Writing Please Mention THE FLORISTS' EXCHANGE.

S. J. REUTER & SON, Inc., Westerly, R. I.

no cause for complaint, since it has not had the effect of diminishing receipts or profits; on the contrary, it has markedly increased the trade in some quarters, simplified business, and the loss through spoiling of material is nothing worth speaking of.

On the other hand, the expense entailed in effecting sales—that is, the time required in showing and satisfying the buyers—the trimming, packing and safe delivery of the goods, when finally decided upon, are larger than in the handling of cut flowers. More help is required to transact a large volume of trade to the satisfaction of all parties. A plant or a made-up plant arrangement, in its prime of beauty when its buyer selected it, must arrive in the same perfect state at its destination, and this means the greatest care in wrapping and transit. And here it may be proper to say that only prolonged experience in work of this character makes the common greenhouse hand a store assistant to be confidently trusted to do the work as it should be done, however willing he may be. No article of any kind should leave the store without being securely done up, and the wrapping as well as the contents when opened should present a neat appearance.

FRED. W. TIMME.

New Carnation, **PRESIDENT SEELYE**

The unexcelled white; a seedling of MRS. T. W. LAWSON × THE QUEEN; now in its fourth year.

A large, well-formed flower, free and fragrant, easy to grow and does best in a temperature of 50 to 52. Calyx does not split.

Long, stiff stems from the start; a constant bloomer. Every cutting guaranteed well rooted and free from disease. The trade is invited to visit the greenhouses and see it growing.

FRANK H. KIMBERLY 631 Townsend Avenue, New Haven, Conn

meant to attract buyers is bound to do just the reverse if allowed to demonstrate by wilting foliage and dropping petals its short-lived character. Dewy freshness, maintained only by frequent renewal, and enticing array of the finest samples of stock must distinguish the exhibit. This should be kept up at all seasons. Slack business should furnish no excuse for shabby appearance of store front and show window, for, while a single vase or two of perfect bloom, or a few well-finished specimen plants, a superbly filled basket, or a sample of something new in plants or flowers, a simple but tastefully arranged exhibit will serve the purpose fully as well as an overwhelmingly great variety of all sorts of material, completely filling every space available and difficult to keep in presentable shape. It is also a well-known fact that in periods when business is slow, stock is usually overplentiful and so frightfully low in price that the cost of material for window display can not amount to so much as to be considered needless expenditure, when thereby anything at all is gained in trade either directly or indirectly by keeping up respectable appearance.

Not only the store front, however, affords opportunity for effective display. The entire establishment of every retail florist should at all times have the appearance of an attractive exhibition rather than a workshop. The stock on hand will keep as well but will look twice as tempting if displayed in vases, urns and jardinières of artistic design, not necessarily expensive, but setting forth the beauty of plants and flowers more effectively than pots, pails and jars of the plainer type, good enough for the stock in the refrigerators or that handled by the wholesale commission house, but not for retail counter service. Sumptuous equipment is not as much of a drawing card as good stock neatly arranged and placed before customers in such a manner as to facilitate inspection and to give an idea of how it may be made to produce the greatest effect. This idea must be the ruling one in display of this kind. Made-up work and arrangements of plants and flowers, complete in form and embellishment, should also be represented in a few good sample pieces, at least during the holiday season, serving as prototypes for further work in this line as the business proceeds. The greenhouses of the suburban and country florist, dependent on retail home trade, should be in holiday trim the greater part of the entire year, open for inspection to everybody and invitingly clean for the best attired of lady customers.

The Selling.

Prices in our line of business vary so greatly according to season and market conditions that it very often proves quite a task to the one at the selling end to convince his patrons that the fault is not his. One can not wonder that even a customer of long standing deserts the florist at being asked two dollars for a bunch of flowers for which he paid but fifty cents a fortnight ago. The usual outcome amounts to a loss in trade generally; few people not in the trade will go to the trouble of more fully inquiring into the real cause of this startling state of affairs that the florist must take a hundred times in trying to explain. This wavering between absurdly low and miraculously high prices in cut flowers within barely a month has no doubt contributed largely toward the increase in the sales of plants as experienced in recent years. While the metropolitan florist reports no falling off in the cut flower line of trade, those farther removed from the hum and buzz of the large cities have come to consider plants the leading line in their business and this more especially at the holidays. This has been

CLASSIFIED ADVERTISEMENTS

Cash with order.

THE WORCESTER CONSERVATORIES,
L. C. Midgley, Mgr., WORCESTER, MASS.

FOR BEGINNERS

In a recent issue of The Florists' Exchange by way of preface to resuming his valuable and timely teachings Mr. Timme deprecated the tendency on the part of some growers to attempt to raise a great deal more than they are able to manage successfully. The tendency referred to is a very common one, especially with beginners in plant growing, and it may be solely attributed to ambition or over anxiety for rapid success in the grower's new venture. The idea that the quickest way to success is the raising of immense quantities of material in as short a space of time as possible is a mistaken one, particularly in the case of a young man whose reputation as a grower has yet to be made. When plants are grown in such numbers that there is neither room to house them properly nor sufficient help to give them the attention necessary to their proper development, the usual result is that only a portion of what an attempt has laboriously been made to raise is ever turned into cash, and very often what is sold brings much less than it would have brought if that portion only had been receiving attention from the beginning. Where more plants are attempted to be raised than the grower by reason of his capacity and resources is able to take good care of, there is confusion, crowding and needless worry continually without the satisfaction of an adequate compensation.

The chief aim of a beginner (as it has been of those who have been most successful) should be to grow good material, better if possible than his neighbors, in order that buyers can see it to be to their advantage to purchase from him in preference to others whose stock is of inferior quality; and then when he gets the confidence of buyers by such a substantial method and continues to merit it, there will be little danger of his stock remaining on his hands unsold. On the other hand, a man who starts in to grow as much material as he possibly can find room for, paying less attention always to quality than to quantity, has usually a harder time of it in disposing of his stock than he had while raising it, while invariably, in the event of his continuance of the same methods, his subsequent experience will be more disappointing and disheartening still.

There is another point that beginners should give some thought to and that is the importance of making a specialty of something. I don't mean by that to grow only one thing, but in the event of their being especially competent and likewise successful in the production of a certain specialty to direct their energies to the end that they will become known as the best growers of it. There are several well-known and successful growers to-day who owe much of their advancement to the attention they gave to specialties at opportune periods. John Scott for a number of years made a specialty of ferns, and he grew good ferns, which together with his lucky introduction of Nephrolepis Scottii, made his reputation and heaped his pocket-book to an extent that such notoriety as wearing the kilt every day, Winter and Summer, for a hundred years would not have accomplished. I could mention a number of other growers owing much of their success to their reputations gained by specializing and a determination that they should be counted as those to be relied upon.

Advertising as a means of finding purchasers for well-grown stock is another matter to which beginners should give consideration early in their careers. A grower may be known to be able to produce creditable material, but it may happen that when a would-be purchaser is in need of what the other has got to dispose of he directs his order to the one whose advertisement catches his eye. A young grower need have no fear of making a mistake when advertising in a prudent manner, because by that means he not only brings to the attention of buyers what he has at that time for sale, but also proclaims his existence, which otherwise would be unknown in parts where good markets might be found.

M. B.

Please stop my ad. of geranium cuttings. Could have sold them a half dozen times already. Nothing like advertising, if ever so small a quantity.
R. POWELL.

Buffalo, N. Y.
News Notes.
If the orders already booked for Christmas and New Year's are any criterion, we ought to have the best holiday business we ever had. While good holly is scarce, we generally have enough to go around, and if the prices stay up, the fakir will not buy.
The Buffalo Cut Flower Company has opened a store at 462 Washington street to do a wholesale florist business. Jacob Bailey, who has been connected with the Wm. F. Kasting Company for the past seven years, will manage the place. He is well known and well liked by the local florists.
S. H. Anderson's greenhouses on Elmwood avenue, under the supervision of Joseph Street, are in fine condition, one bench of Gloire de Lorraine begonia, a plant of which he makes a specialty during the holidays, is worth going miles to see. He also has a fine line of cyclamen, orange trees, poinsettias, etc.
Wm. Scott Company's place at the corner of Main and Balcom streets, is showing a fine line of poinsettias.
Chas. Richert on Genesee street has a good lot of poinsettias and cyclamen for the holidays.
S. S. Pennock and Leo, Niessen of Philadelphia were in town the past week looking up outlets for their larger Christmas stock.
W. H. G.

EAST BROOKFIELD, MASS.—Robert Miller, rose grower, whose establishment is at the head of Lake Lashaway, intends moving shortly to Salt Lake City, Utah, and engaging in the cultivation of roses there. On Thursday evening, December 12, Mr. and Mrs. Miller were entertained at supper by a party of friends on the occasion of their departure for Bar Harbor, Me.

GEO. B. HART, Wholesale Florist, 24 Stone St., ROCHESTER, N. Y.
Mr. Hart's Handy Handle.

Washington, D. C. News Notes.

There has been an unusual amount of dark weather of late which is disappointing to the growers, as Christmas stock is not advancing as rapidly as they would wish. Business with both the wholesale and retail trade has slackened up considerably, and good stock is not abundant, as much is being withheld for the holiday season.

G. E. Anderson, formerly foreman for J. R. Freeman at his Brightwood avenue range, has recently bought the Hess place at Ballston, Va., which he is improving by the installation of an adequate heating service with a view to growing high grade carnations, roses, etc. As he was late in getting possession for the present season only bedding stock and lettuce will be grown. Mr. Anderson during the absence of Peter Bisset, who is seeking health in Porto Rico, has charge of the range at "Twin Oaks." D. C. Mr. Bisset expects to return about the first of the year and we sincerely trust he will be restored to health.

JAS. L. CARBERY.

DAYTON, O.—The following resolutions on the death of the late William Kiefaber, Sr., were submitted and adopted at a recent meeting of the Dayton Florists' Club:

Whereas, Almighty God in His infinite wisdom has seen fit to take unto Himself our friend and associate, William Kiefaber, Sr.; be it

Resolved, That in his demise we lose one whose place in our hearts cannot be filled. A good citizen, a staunch friend, a worker for betterment always, his life was a source of helpfulness and inspiration to us all. As individuals and as members of this organization, we extend to his widow and family our heartfelt sympathy.

Resolved, further, That a copy of these resolutions be sent to Mrs. William Kiefaber, Sr., a copy spread on the minutes of this meeting and a copy furnished to the press of this city.

H. H. RITTER,
C. M. SCHAEFER,
HORACE M. FRANK,
Committee.

that Phil Hauswirth, probably the
most widely known member of the
profession, never had an enemy in
it.A committee on resolutions on the
death of Mr. Hauswirth was appointed
by the chair consisting of Messrs.
Vaughan, Rudd and Benthey.A letter was read from Benjamin
Hammond, secretary of the American
Rose Society, regarding the March
meeting of that society to be held in
this city, and August Poehlmann,
chairman of the local committee,
asked for instructions or suggestions
as to arrangements. E. G. Hill, who
was present, was called upon and
gave a detailed history of the Rose
Society and an optimistic view of the
possibilities of its future.Mr. Asmus spoke regarding hall
arrangements and the committee of
three was increased to seven with
full powers; it now consists of August
Poehlmann, chairman, and Messrs.
Kill, Schupp, Asmus, Benthey, Am-
ling and Vaughan.Letters of resignation on account
of removal were read from Paul M.
Holbrook now in Cleveland and H.
Hasebringer now in Cuba. The fol-
lowing proposals for membership
were read and laid over for action:
Thomas McAllister, A. F. Longren,
E. Bolinger, Wm. J. Klimmer, F.
R. Wiesgerber, Geo. A. Kuhl, and
George Schuman were elected as
members.It was voted that the club head a
guarantee list to the amount of \$100,
to insure defraying of rose show ex-
penses and that the club offer a
suitable trophy as a prize at the na-
tional show in the Fall.The committee appointed to nomi-
nate officers for the ensuing year
then reported the following list:
President, Leonard Kill; vice-presi-
dent, George Asmus; treasurer, E. F.
Winterston; financial secretary, J. E.
Jensen; recording secretary, T. E.
Waters; trustees, Messrs. Benthey,
A. Poehlmann, Fisk, Klimmer, and
Brun.Mr. Hill then read a paper on the
rose question, which appears else-
where in this issue, followed by a
few extemporaneous remarks to the
effect that he looked for some start-
ling varieties of new roses within the
next few years.A. N. Pierson, Cromwell, Conn.;
Paul M. Paley, Little Rock, Ark.;
and Mr. Hill were the out of state
visitors.The judges reported as follows,
the prize money as offered by the
E. F. Winterston Company to go to
the grower in the greenhouse in each
case, and not to the proprietor.First prize \$5, Princess, E. G. Hill
Company, 89 points, certificate; Jos.
Hill, grower. Second prize, \$3, Rhea
Reid, E. G. Hill Company, 88 points
certificate; Fred Lemon, grower.
Third prize \$2, Cardinal, Poehlmann
Brothers Company, 87 points, certi-
ficate; Wm. Kinel, grower. Mrs. Pot-
ter Palmer scored 83 points.Mrs. Marshall Field, Uncle John
and Sunrise roses from Peter Rein-
berg and Defiance carnation from
Jensen & Dekema had previously
been passed upon by this club and
so were not scored. Afterglow car-
nation, E. G. Hill Company, scored
87 points and received a certificate.Among the universal expressions
of sorrow at the decease of P. J.
Hauswirth there are few offered
with more feeling than that by
Charles Balluff of the Eaton Flower
Shop, who spent the first eight years
of his floral experience in the em-
ploy of Mr. Hauswirth and with
whom he has always kept up close
personal relations.Cauger & Gormley had an exten-
sive decoration for the reception of
Mrs. Jalke on La Salle avenue the
first of the week; orchids, American
Beauty, poinsettias and lily of the
valley being extensively used.Thomas McAllister, until recently
in the employ of Mrs. Ely on a pri-
vate place at Wheaton, has entered
the employ of Cauger & Gormley in-
tending to start into the growing
business on his own account next
Spring.Wm. Hagemann of New York was in
the city on Monday.

CORDLEY & HAYES,
173 DUANE STREET, NEW YORK.

an especially fine stock of well-berried
mistletoe and also are well supplied with
poinsettias for Christmas.

Though varying reports are offered
as to Christmas prospects, optimism
seems to prevail and certainly the re-
tailers in the Loop section as well as the
more select outsiders, such as Wienhoe-
ber, Smythe, Kidwell, Samuelson, Klun-
der, Wittbold, Schiller, Fraunfelder,
Bruins, Fisk, Hughes and many others
never presented more tempting offerings,
their establishments were never more
tastefully arranged and the feeling is well
justified that the people will appreciate
their efforts.

Fred. Sperry has recovered from his
recent attack of la grippe and appears
ready for the holiday fray.

C. W. McKellar never offered a choicer
or more varied assortment of orchids
than at present.

Andrew Anderson of Batavia, Ill.,
was in the city visiting his friends on
Monday.

So far as holly, bouquet green, and
Christmas trees are concerned business
is in such an uncertain condition that
any prophecy would be futile, as it is
now merely a gamble. To-day (Mon-
day) bouquet green (Princess pine) was
selling on South Water street at 3c. a
pound, which was less than it could be
picked for in the woods four weeks ago;
while holly held its own. The rest is all
conjecture.

W. K. Wood.

Kalamazoo.

News Notes.

Harry Fisher will early in Janu-
ary open a branch store in Battle
Creek, Mich., and is now busily engaged
getting his fixtures and stock ready as
he contemplates making it the finest and
most up-to-date establishment in that
city. Kalamazoo will remain his head-
quarters where, he says, business still
keeps up to his expectations. He is
distributing among his friends and cus-
tomers some very artistic colored plates
of roses, violets, etc., copied from the
drawings of Paul de Longpre.

G. Van Bochove and Brother are show-
ing a nice collection of pot plants, etc.,
suitable for the Christmas trade at their
store in town and are also cutting nice
blooms of the various new carnations in
which they have invested quite heavily.
A visit to their Rose Hill plant showed
the stock in first-class condition for a
good big pick during the season. This
plant consists of a block of five houses,
each 30x300 feet, devoted solely to roses
and carnations.

S. B.

SPRINGFIELD, O.—Alonzo Spar-
row, florist, aged 48 years, died at his
late home, 418 West Pleasant street, this
city, on the evening of December 11,
1907, after an acute attack of menin-
gitis of but a day's duration. A widow,
two sons and a daughter survive him.

EXCELSIOR, MINN.—Rev. C. H.
Crawford now has his greenhouse in
fine working condition. Mr. Crawford
started his greenhouse about the middle
of the Summer and is having good suc-
cess with it.

New York.

The Week's News.

Wednesday next will be Christmas Day, one of the banner days of the year for the florist business. The troublous times that have been experienced during the past two or three months have affected the florist trade to quite an extent in this city, and, so far as we can learn, in many other cities as well, and it is hardly to be expected that the Christmas sales this year will equal those of last year or for several years previous. Without being pessimistic or wishing to appear in that light at all, we might as well look squarely at the conditions as they exist at the present time, and by so doing in a measure be prepared for anything that may happen. If the Christmas trade should take on a sudden spurt and break all records, so much the better; at the same time, taking into careful consideration the conditions that have been prevailing in the flower trade during the months of November and December, we should be prepared to be satisfied if stock can be cleared out fairly well and at prices that are but slightly in advance over those ruling at ordinary times. Let everybody get their plants and flowers in the market in the best possible condition, and be satisfied with reasonable values and a clean-out.

On Monday afternoon this week the stock and fixtures in the store of C. R. Scallen, Broadway near Forty-second street, were sold at sheriff's sale on a judgment obtained by A. L. Young & Company. The proceeds of the sale amounted to somewhere between two and three hundred dollars. Many other wholesale florists are creditors of Mr. Scallen in varied amounts, and the possibilities are that with the closing up of the store the business is at an end, and there will be no means of the creditors collecting what is their due. We notice, too, that but a few days ago the New York Cut Flower Company obtained a judgment against Mr. Scallen for the sum of \$1,181. This is one of the unfortunate things that happen in trade, and all who know him will hear with regret of the sudden suspension of business by Mr. Scallen.

During the terrible windstorm that prevailed here on Saturday last a sign hanging directly over the plate-glass window of Ford Brothers, wholesale florists at 48 West Twenty-eighth street, was blown down and into their window, smashing it to pieces. The plate glass was fully insured. It is lucky that no one was hurt by the accident, as it happened during the afternoon when the people were in the store.

Wm. Elliott & Sons have been selling in their auction rooms at 201 Fulton street a consignment of rhododendrons and other evergreens from abroad originally consigned to the Graham Company of Philadelphia, who made an assignment a short time ago.

L. B. Coddington, the well-known rose grower of Murray Hill, N. J., is back from a pleasure trip to Europe, much improved in health.

The Stumpp & Walter Company of 50 Barclay street are showing some fine specimen hollies in tubs, the plants being particularly well berried and ornamental in every respect. Mr. Stumpp, who, with his wife and family, has been enjoying a tour in the South, had his vacation suddenly brought to an end by being called home to the store on account of illness among the staff. He was in New Orleans at the time, and came direct from there, arriving here last Saturday.

On January 21, 1908, the Greek American Retail Florists' Association will give a ball at the Palm Garden, Fifty-eighth street, between Lexington and Third avenues, for the benefit of a foundation fund for a Greek school. Tickets are 50c. each.

D. Smith & Company is the name of a new wholesale florist firm that will open at 111 West Twenty-eighth street. The company is capitalized at \$2,500, the directors being David Sokolsky, 1412 Fifth avenue; Pauline Israel, 130 West One Hundred and Ninth street; L. Irving Cohn, 61 Park Row, New York.

THE WHILLDIN POTTERY COMPANY
THE LARGEST MANUFACTURERS OF
STANDARD FLOWER POTS

PHILADELPHIA, PA. LONG ISLAND CITY, N. Y. JERSEY CITY, N. J.

J. C. Spencer of Utica, N. Y., and W. P. Craig of Philadelphia, Pa., were among the visitors in town this week.

St. Louis.

Club Meeting.

The last meeting of the Florists' Club for this year was held Thursday afternoon in the Burlington Building, and was the largest attended meeting of the year. George H. Pring's stereopticon lecture on "The Royal Gardens of Kew" was worth coming miles to hear. There was also quite an attendance of visitors, among them Walter Mott, Springfield, Mass., S. L. Bray, late of Evansville, Ind., and a number of students from the Missouri Botanical Garden. The officers were on hand early. President Young occupied the chair. A. S. Halsted, Belleville, Ill., and Charles Johan, Collinsville, Ill., were elected to membership. The following resolutions were read and adopted on the death of Phil. J. Hauswirth, late secretary of the S. A. F. O. Ill., ordered spread on the minutes and a copy sent to the family of the deceased and the trade papers:

Be it Resolved, That the St. Louis Florists' Club now in session extend to the bereaved family of our beloved friend, P. J. Hauswirth, our heartfelt sympathy, and be it further

Resolved, That we deplore the loss of a good and willing fellow-worker in our beloved profession, with the trade at large.

S. L. Bray was introduced to the members by C. C. Sanders, and stated that he wished to start a large pottery in St. Louis and desired the members to operate with him in the shape of a stock company. After a lively discussion the chair appointed a committee of five, consisting of C. C. Sanders, Emil Schray, F. J. Ammann, A. J. Bentzen and E. W. Guy, to look into the proposition and report at the January meeting.

The trustees were ordered to report at the next meeting on the advisability of giving an entertainment early in February for the members and their families. The stereopticon lecture by G. H. Pring was next in order. The pictures shown on the canvas and the lecture were most interesting and Mr. Pring was congratulated on all sides after the meeting was over. The trustees say they have another surprise in store for the members at the January meeting, when they look for even a larger attendance.

News Notes.

We had with us, the past week, young Mr. Peterson, son of J. A. Peterson of Cincinnati, O., looking after his father's interests in the plant line for the holidays. Walter Mott, representing A. T. Boddington, New York, was also a visitor. He has not been here for some years, and his many friends gave him the glad hand and a good many orders.

Frank Fillmore was quite rushed with Royal Arcanum work the past week, one of its prominent members having passed away. After the first of the year he will close up his retail store on Mercemec street and make up all the work at his Nebraska avenue place.

President James Young, of the C. Young & Sons Company reports a good trade the past week in all lines. They have ordered a carload of flower pots from the Keller Pottery Company.

St. Patrick.

Philadelphia.

Trade Notes.

With Christmas only a week off the conditions in the wholesale market do not improve as one would expect. While prices are advancing slightly, no one appears to know just what to quote for next week. There is still an abundance of stock of all kinds.

Growers of plants report good sales of Begonia Gloire de Lorraine, poinsettias and azaleas; of the latter there are more Mme. Petrick than usual. Robert Craig Company reports brisk sales of Dracena terminalis, both single plants and made-up pans, also of Picea pandurata, the sizes at \$3 to \$6 going very fast.

So far the holly seen is not as good as last year, not well berried.

At the meeting of the Pennsylvania Horticultural Society on Tuesday evening officers for 1908 were elected as follows: President, James W. Paul, Jr.; vice-presidents, James M. Rhodes, Henry F. Michell, Rudolph Ellis, Dr. J. Cheston Morris; treasurer, S. W. Keith; secretary, David Rust; Professor of Botany, Professor Stewardson Brown; Professor of Horticultural Chemistry, Dr. Persifor Frazer; Professor of Entomology, Dr. Henry Skinner; Professor of Biology, Dr. Ida A. Keller. Executive Council: Robert C. Lippincott, John W. Pepper, Edward A. Schmidt, Robert Craig, John McCleary, Dr. Robert Huey, and William Robertson.

The date of the Spring Exhibition was fixed for March 24, 25 and 26, 1908.

The Florists' Club will, as usual, have open house New Year's Day and will inaugurate the new year by starting tournaments in bowling, pool and shuffleboard; at the next meeting January 7, an exhibition of all the leading novelties in plants and flowers will be held, growers of these being requested to send samples for this meeting.

DAVID RUST.

JEFFERSONVILLE, IND. — John Meyer, florist, who came here on a business trip, has left for his home at Cheyenne, Wyoming, where he is connected with the Capitol Avenue Floral Company. He first went there last March and is greatly pleased with the place.

34 Union Stock Yards, Chicago

FIRES.

ANSONIA, CONN.—On the morning of December 13 fire in the greenhouse plant of the Ansonia Floral Company caused a damage estimated at between \$6,000 and \$7,000. The blaze started in the furnace room, and had its origin in an overheated pipe. There was no insurance.

LLANWELLYN, PA.—Wm. Bogan, son of M. Bogan, florist, has left his father's place here to accept a position under Supt. W. R. Smith at the Botanic Gardeos, Washington, D. C.

I AND CO

ABOUT SOME REPAIR HAPPENINGS

point. This is the sort of thing this man has been doing every year for the past ten, and he doesn't know to this day that his repair bills long ago amounted to more than the difference in expense between the cost of those wooden houses and our Iron Frame Houses. And see the shade casting traps he has, to meet in competition with growers having our light, enduring, up-to-date construction.

Forget the money you made in old wooden houses along in the seventies—things are different now—you have to be up-to-date or you are down and out. Write us.

HITCHINGS & COMPANY

GREENHOUSE DESIGNERS AND BUILDERS

Manufacturers of Heating and Ventilating Apparatus

1170 Broadway, New York

Boston. News of The Week.

The Massachusetts Horticultural Society's course of lectures for the season will be as follows: January 11.—The Concord Grape and its Originator, by Wilfrid Wheeler, January 18.—Commercial Apple Culture in New England, by Professor F. C. Sears of Amherst. January 25.—Annals and Biennials, by Robert Cameron. February 1.—The Treatment of Home Grounds, by F. L. Olmsted, Jr. February 8.—Vegetable Growing under Glass, by William Turner, Oceanic, N. J. February 15.—Planting of Conifers on Private Estates, by John Dunbar, Rochester, N. Y. February 29.—The Private Gardener, by Robert Craig, Philadelphia. March 7.—Agricultural Education in Public Schools, by Dr. K. L. Butterfield. March 14.—Fungi, by Prof. H. S. Jackson.

The Spring exhibition will be held March 21 and 22 and on March 28 there will be a discussion on grape growing by various authorities.

The committee on prizes and exhibitions expects to have the schedule for next season ready in a few days, and the committee recently appointed has already started work and expects to have the 1909 schedule out before May next.

About a hundred members of the Gardeners and Florists' Club attended the outing at Framingham on Saturday afternoon. The weather was stormy enough to be a small blizzard. The party left Boston by special car, which Mr. Goddard provided for the occasion, and visited the establishments of J. T. Butterworth, S. J. Goddard and William Nicholson. At the first mentioned place the catleyas and cypripediums, which were in fine shape, were the chief attraction. At Mr. Goddard's the fine quality of his carnations was evident; and at Mr. Nicholson's the many fine examples of growing special plants well were also in evidence.

The quarterly meeting of the New England Cemetery Association was held at the American House on Monday night with a good attendance. Instead of a regular lecture there were discussions on various horticultural topics by several members.

H. L. Cameron of North Cambridge is adding another house to his establishment.

Joseph White of Doyle's Beacon street store has been on the sick list for several days.

John McKenzie of North Cambridge has installed electric lights in his packing rooms and greenhouses.

The third annual conference on school gardens under the auspices of the committee on children's gardens of the Massachusetts Horticultural Society was held on Saturday afternoon with a good attendance. The principal speakers were Henry Saxton Adams, chairman, Miss Fannie A. Stebbins, Arthur C. Boyden, Miss Mabel E. Fletcher, Thos. Curley and Wm. P. Rich. J. W. DUNCAN.

St. Paul.

News Notes.

The Twin City Florists and Gardeners' Club was recently organized with the following officers for 1908: Theo. Wirth, Minneapolis, president; O. J. Olson, St. Paul, vice-president; S. D. Dysinger, St. Paul, secretary; R. A. Latham, Minneapolis, treasurer. Executive committee: E. P. Holm, A. S. Swanson, Thos. Hall and E. Nagel. Thirty-five members have signed the charter list, which is expected to number at least 50.

The first regular meeting will be held at Holm & Olson's store on Tuesday evening, January 14, 1908.

Trade has been excellent, with stock of good quality and fairly plentiful. Greens have made their appearance. The weather so far has been most favorable for a good crop of flowers for the holidays.

The Twin City florists sent a large wreath to Mrs. Hauswirth, Chicago, as an expression of their sympathy in her bereavement. Genial Phil. Hauswirth will always be kindly remembered by his friends and associates in the trade here.

A recent caller was Mr. Goldenburg, representing Ralph M. Ward & Company, New York. VERITAS.

Indianapolis.

News Notes.

The Christmas tree nurseriesmen are out en masse and the downtown corners take on the appearance of cedar groves. Indianapolis is considered an excellent point for this branch of the business.

John Rieman, A. Wiegand & Sons, William Billingsley, Bertermann Brothers Company and the other retailers have their flower shops well decorated for the holiday rush. Bells, red ribbon, artificial poinsettias and immortelles are much in evidence. The window displays, too, are most artistic.

Tomlinson Hall market reports a good business the past week, though most of the trade went to the retailers who bought all the good stock available.

Marton Braendlein is cutting extra good stevia and carnations.

Huntington & Page report a banner year for the green goods business.

Visitors: W. Mott, New York; J. A. Peterson, Cincinnati, O. I. B.

DES MOINES, IA.—The Grand View Nursery and Orchard Company has completed its fine new office building and warehouse at East Ninth and Hull streets and will occupy it shortly. Owing to the company extending its field of operations, the packing and shipping will commence earlier this year, lasting through January and February.

PLANT CULTURE

PRICE \$1.00

A. T. DE LA MARE PTG. & PUB. CO., Ltd.
2 Duane Street, New York

Last week we went through a large range of wooden houses, in which about every sixth bar was repaired at the eave line; fully half the wooden plate had been replaced and here and there, all along its length, pieces of iron had been screwed on, to stiffen a weak

point. This is the sort of thing this man has been doing every year for the past ten, and he doesn't know to this day that his repair bills long ago amounted to more than the difference in expense between the cost of those wooden houses and our Iron Frame Houses. And see the shade casting traps he has, to meet in competition with growers having our light, enduring, up-to-date construction.

Forget the money you made in old wooden houses along in the seventies—things are different now—you have to be up-to-date or you are down and out. Write us.

Plant Culture

By GEORGE W. OLIVER

OF THE BUREAU OF PLANT INDUSTRY,
UNITED STATES DEPARTMENT OF AGRICULTURE
LATE PROPAGATOR TO THE
UNITED STATES BOTANIC GARDEN,
WASHINGTON, D. C. AND THE ROYAL
BOTANIC GARDEN, EDINBURGH

A Standard Work Written by Request of the Publishers of the Florists' Exchange

A WORKING hand book of every day practice for the Florist and Gardener, and those who intend to grow plants and flowers, in the greenhouse or garden, as a means of obtaining a livelihood. Each and every article is written in concise, simple language, and embodies wholly and solely the experience of the writer.

The plants dealt with comprise those which are commercially handled by Florists, Gardeners and Nurserymen, and include Florists' Flowers, Stove and Greenhouse Plants, Hardy Herbaceous Plants, Annuals, Shrubs, Hardy and Tender Vines, and a chapter on miscellaneous subjects in connection with the above.

This reliable cultural book has been gotten up for use not ornament, therefore the price has been fixed at a figure within the reach of all, while it contains more real practical information for those for whom it is intended than is found in much more pretentious works costing five, ten and twenty times as much money. Cloth; strongly bound to stand rough handling and plenty of it. Price, \$1.00, by mail, postpaid. Send for sample pages, free.

Growing and Mar-
keting of Violets
for Profit

A Standard Work Written by Request of the Publishers of the Florists' Exchange

BY DR. B. T. GALLOWAY

CHIEF OF THE BUREAU OF PLANT INDUSTRY, UNITED STATES DEPARTMENT OF AGRICULTURE

THE ONLY COMPREHENSIVE WORK ON THE SUBJECT. Gives every detail necessary to success. Superbly illustrated with over sixty plates, plans, diagrams, including Working Drawings of Model Violet Houses; Plans for Complete Heating Systems; Photographs showing Methods of Handling Soil, Preparing the Beds, Bunching the Flowers, Packing for shipment, etc. Numerous illustrations showing the character of the more important diseases are also given. Elegantly printed on heavy wood-cut paper, and bound in flexible covers of royal purple and gold, 224 pages. Price, \$1.50, by mail, postpaid. Send for free sample pages.

A. T. DE LA MARE PRINTING AND PUBLISHING CO. Ltd.

Offices: 2 to 8 Duane St., N. Y.

Address P. O. BOX 1697, NEW YORK CITY

Detroit.

Trade Notes.

Business has been very quiet. Such articles as are used ahead of the season, like holly and ground pine, find a ready sale, the former selling at from \$5 to \$6 per case, while the price of ground pine has gone to smithereens and no definite figure can be given.

J. F. Sullivan inaugurated a sale of Boston ferns last week, which was quite successful.

Philip Breitmeyer and his son, Harry, went to New York last Thursday.

Very elaborate decorations have been looked for Christmas and New Year's week. Retail trade throughout the city has been very good. John Breitmeyer's Sons furnished a choice lot of palms, Ficus pandurata, fern baskets, etc., for the new conservatory of Mrs. T. D. Buhl, whose grounds are in charge of J. S. Hall. When fully completed this will be the finest and most artistic city home in Detroit. FRANK DANZER.

GLEN COVE, N. Y.—The Nassau County Horticultural Society has changed its meeting hour for the Winter, and now meets afternoons instead of evenings. The meeting on Wednesday afternoon was the annual meeting and election of officers.

Rooted cuttings of all soft-wooded plants are in demand at this time by florists who do not propagate their own stock. Growers making a specialty of the rooted cutting business will find an advertisement placed in THE FLORISTS' EXCHANGE a very profitable investment.

For Greenhouses, Grapes, not Beds, Conservatories, and all other purposes. Get our figures before buying. Estimates freely given.

FLORISTS' EXCHANGE

We are a straight shoot and aim to grow into a vigorous plant

A WEEKLY MEDIUM OF INTERCHANGE FOR FLORISTS, NURSERYMEN, SEEDSMEN AND THE TRADE IN GENERAL

Vol. XXIV. No. 26

NEW YORK AND CHICAGO, DECEMBER 28, 1907

One Dollar Per Year

We desire to call attention to our large and fine stock of

Nephrolepis Piersoni Elegantissima, Whitmani, Etc.

These are SPLENDID SELLING PLANTS FOR THE HOLIDAYS. We offer exceptionally good value in the 6-in. and 8-in. sizes. Plants are in perfect condition and are exceedingly good value at the prices quoted. You will find no better selling plants than these beautiful ferns, and we offer them at lower prices than ever before.

2½-in. pots, \$6.00 per 100; 3½-in. pots, fine perfect little plants, \$15.00 per 100; 6-in. pans, 50c. and 75c. each; 8-in., \$1.00 and \$1.50 each; 10-in., \$2.00 each; larger specimens, \$3.00 to \$5.00 each, according to size.

NEPHROLEPIS SCOTTII. Fine plants, 6-in. pots, 50c. each.

NEPHROLEPIS BOSTONIENSIS (The Boston Fern). 6-in. pots, 50c. each; 8-in., \$1.00 each.

SMALL FERNS FOR FERN PANS

There is nothing that sells better during the entire winter than small ferns for fern pans. We have a splendid stock of extra strong plants in 2½-in. pots in the hardiest and most useful varieties for this purpose. Our stock will be found very strong and very nice.

\$4.00 per 100, \$30.00 per 1000.

SURPLUS BULB STOCK

We offer what remaining bulbs we have at bargain prices. The only cheap thing about them is the price. The bulbs are of first-class quality and in perfect condition. Bulbs planted in December, and even as late as January, can be had in fine shape for Easter; and as Easter is late

this spring (April 19th), they can be planted later than usual. If you have not all the bulbs you want, this is the last opportunity to get them. We offer an exceptionally fine lot of hyacinths, tulips, and the choice varieties of narcissus at bargain prices. Send for surplus list.

WINSOR CARNATIONS

We have a splendid stock of strong rooted cuttings ready for immediate delivery. In order to get the best results from Winsor, it should be planted early. Now is the time to get gilt-edged stock. We have a splendid lot of cuttings ready for immediate delivery, and can also furnish strong established plants from 2½-in. pots, fall propagations.

Strong rooted cuttings, \$6.00 per 100, \$50.00 per 1000.

A. T. DELAMARE PTG. & PUB. CO., LTD.

2 to 8 Duane Street, New York

"Quality is remembered long after price is forgotten." What Quality Means.

Quality means the best and finest types procurable in their respective classes. We go to specialists for our flower seeds. Our customers, the florist, the private gardeners demand the highest grade. We have no cheap catalogue trade. "Quality" may mean a little higher in price. "Quality" in fact, means "Quality" and we know that when you buy from us you get it, and our customers know it, too. Catalogues now in press; 40 pages. Write for one; it's free. We sell bulbs too.

Cultural Directions

Are leaflets written by practical men especially for the use of amateur customers.

If you have a counter trade, either in plants, seeds, flowers or bulbs, you should have a supply of these leaflets on hand to present to your customers when they seek cultural information about their purchases.

(The leaflets embrace over forty subjects.)

We can supply them at \$2.50 per 1000, or 500 for \$1.50, and can make a reduction of those prices on large quantities.

At a small extra cost we can put your imprint on each leaflet.

Try a thousand and see what a help they are in selling goods.

Seed Trade Report

AMERICAN SEED TRADE ASSOCIATION
George S. Green, Chicago, Ill., president; M. H. Duryea, New York, first vice-president; F. W. Bolgiano, Washington, D. C., second vice-president; C. E. Kendell, Cleveland, O., secretary and treasurer; Leonard H. Vaughan, Chicago, assistant secretary.

LOUISVILLE, KY.—On December 13 a fire in the building occupied by the Southern Seed Company did damage to the extent of \$3,000, which is covered by insurance.

BALTIMORE, MD. — A verdict which will be read with interest by seedsmen all over the country was rendered by a jury in the Court of Common Pleas December 13, 1907, in the suit of Turner A. Winfield and R. H. Liggett, truck farmers of Florida, against Charles J. and Roland Bolgiano, trading as J. Bolgiano & Son, seedsmen, of this city, to recover for the failure of seed to produce the variety for which it was purchased. The verdict was in favor of the defendants.

In July, 1904, the plaintiffs bought of J. Bolgiano & Sons one pound of pepper seed, said to be of the Chinese giant variety. The seed were planted as Chinese giant pepper seed, but, according to the plaintiffs, the production was not Chinese giant pepper, but of a variety which had no market value whatever. Action was brought not only for \$400, which the plaintiffs declared they had expended in the preparation of the ground for the planting and cultivation of the seed, but also for the amount they would have realized from the sale of the crop had the seed planted been of the Chinese giant variety. The claim was for \$4,000 in all.

The defense was that the defendants were not liable for the failure of the crop, as in all their sales of seed they explicitly set forth that they did not guarantee seed to be true to name. They showed also that they were not alone in this stand, as evidence was brought forward to prove that there is a general usage in the seed trade to that effect and that the usage is thoroughly understood by the trade generally. Further, the defense endeavored to prove that the seed sold the plaintiffs were of the Chinese giant variety, and that the failure of the plaintiffs to secure a crop was due to climatic conditions. Witnesses who had bought of the same seed, out of the same box, were called and testified that they had harvested crops of Chinese giant pepper from the seed bought.

It is understood the case will be taken to the Court of Appeals.

IMPORTS OF SEED, ETC.—December 16.—H. Frank Darrow, 64 packages seed, two cases plants; McHutchison & Company, 30 cases plants, 110 cases lily of the valley pips; J. C. Metzger & Company, three packages plants; Maltus & Ware, 40 cases lily of the valley pips; J. M. Thorburn & Company, one case seed, 10 bags alfalfa seed; Vaughan's Seed Store, 21 bags clover seed. December 19.—American Express Company, 655 packages clover seed, etc.; J. M. Thorburn & Company, one case seed; Baker, Grand & Frunck, 29 packages clover seed; Vaughan's Seed Store, 100 packages seed. December 20.—H. F. Darrow, 60 cases lily of the valley pips; W. Hagemann, 362 cases lily of the valley pips; S. Stern, 222 cases lily of the valley pips; J. M. Thorburn & Company, one case seed; H. F. Darrow, 282 packages seed; Maltus & Ware, eight packages plants; F. B. Vandegrift & Company, 211 packages seed; Vaughan's Seed Store, 100 packages seed. December 23.—W. Atlee Burpee & Company, one case seed.

APPROPRIATION FOR FREE SEEDS.—The House of Representatives, on December 20, passed a bill making a deficiency appropriation of \$50,000 for the purpose of additional seeds for free distribution by the Government.

SAMPLES OF SEEDS FOR DEPARTMENT OF AGRICULTURE.—The following circular has been sent by the Treasury Department to officers of the customs: At the request of the Secretary of Agriculture, it is directed that, until July 1, 1908, 2-ounce samples of all importations of 100 pounds or more of grass, clover, and forage-plant seeds be prepared at the earliest practicable date after entry and forwarded to the Seed Laboratory, Department of Agriculture, Washington, D. C., labeled with names and addresses of consignors and consignees, name of seed as given in the invoice, and quantity of the consignment.

GROWING LILIUM HARRISII IN HAWAII.—A resident in Hawaii is making inquiry as to whether Liliium Harrisii bulbs could be grown successfully as a commercial venture in that region. Professor Massey is of opinion that such might be the case, and advises planting the stock bulbs in January or at such other time that the resultant crop can be brought to maturity in time for the bulbs to arrive in New York late in August or early in September. He also suggests that the raising of Roman hyacinth bulbs and the growing of palms for seed might also be found profitable, commercially, in Hawaii.

Seed Trade Notes.

Apart from the sales of Christmas greens among the seedsmen who make a more or less important side line of these goods, the seed trade as a whole is passing through what are always the duller days as regards real sales that we experience during the whole year. The continued fine weather has kept the bulb business still more or less alive, and what few surpluses there were are slowly but most surely melting away. A few advance general wholesale orders have been placed during the past week, but as a rule buyers are holding off quite a little in the mistaken hope that prices asked by the large seedsmen will show more concessions after the first of the year—a most forlorn expectation, as seeds cannot be manufactured at will; and the sooner, therefore, intending purchasers do secure their needs, the more money they will save, in my judgment. There are only just so many seeds to be had at any price, and the early buyers only will secure them.

The past week has seen issued a few advance copies of two of the leading general seed catalogues of our trade—namely, Henderson's and Burpee's. I could not but be very much impressed by the fact that both these superbly elegant books give more space than usual this year to old-time favorite varieties that have stood the test of time and not been found wanting. Especially is this return to giving very ample space to standard specialties very noticeable in the Henderson catalogue, where a whole page is devoted to their Ponderosa tomato colored plate, with text in adequate proportion. But I will not take your space to describe what every reader of your paper will very shortly see for himself. In reference to Burpee's catalogue let me simply say a word of praise in regard to the splendid way this firm puts sweet peas before our buying public—of course the White and Primrose Spencer sweet peas are most prominently listed.

The advance reports from those seedsmen and florists, in many prominent sections of the country both East and West, that deal in Christmas greens

would indicate that notwithstanding the "money panic" the final results of this line of trade will be the most satisfactory in many years. The greatest demand for holly, ever known, this season has seen; and at \$5 to \$6 per case for good stock all markets have been sold out clean. Everything else has experienced good sales; on the whole it has been a very satisfactory Christmas season.

Some little time ago I called attention to the fact that the seed catalogues, as a whole, would be sent out this season even earlier than in past years. Such will be the case, with the result that immediately after the first of the year we shall all see some very active business. I believe that the month of January, 1908, will end with by far the largest total of actual seed sales for many seasons; and for this reason, that so much has been said through our press regarding the bad growing season just closed, and so fully are the great buying public imbued with the seed shortage idea, that there will be, in my judgment, a very fine seed trade from the moment the catalogues are mailed until the very end of the seed season—or more probably until such time as the seed stocks, as a whole, begin to run low.

Always in a year of short seed crops, the growers come in for a large amount of adverse criticism regarding their very small deliveries of those varieties which are, of course, most in demand. But the unfortunate grower is in as bad or even a worse box than the seedsman. Suppose, for example, you are a grower of garden peas in a large way and planted, we will say, two to three or even more thousand bushels of valuable seed, with contracts all made with reliable seedsmen to take the crop. We have a growing season like the past, with the result that instead of a yield of five or six fold, you do not any more than obtain back the seed you planted—if you do that. Surely the unfortunate growers have much the harder time of it in a short crop seed year, for theirs is a most positive loss; while the seedsman's is, in a way, a more or less negative loss—a profit on goods that could have been sold if obtainable. At another time I shall have much more to say on this great question of seed contracting, a matter to which I have for years given a great deal of earnest thought.

I wish sincerely every one of my readers every compliment of the holiday season.

A NEW MALADY OF NARCISSUS.—Several horticulturists in the neighborhood of Toulon, France, who grow for the cut flower trade various sorts of narcissus, e. g., *N. Tazetta* fl. pleno, *N. aureus*, *N. papyraceus*, etc., have experienced a serious loss during the last season, owing to the damage done to bulbs by a destructive larva of some insect. The matter has been studied by M. Valéry Mayet, the distinguished professor of entomology at the Ecole Nationale d'Agriculture at Montpellier. He has reared the larvæ in question, and finds them to belong to a beetle named *Malacosoma lusitanicum*, belonging to the family Chrysomelidæ.

This insect is very abundant in the central region of France, and at the beginning of May is common on the flowers of various composite. It particularly affects those of *Croserium dalechampi*, which are sometimes literally covered by the beetles. The larval form has hitherto been unknown, but it seems likely that it normally lives on the bulbs of species of grape hyacinth, probably on those of *Muscari comosum*, although this has not yet been definitely ascertained.

The larva or grub is white in color, and is about 5-8 inch long and 1-12 in thickness. The head is small, and is provided with a couple of three-jointed antennæ and with mandibles, which are only adapted to deal with soft tissues.

Several of the grubs are often met within a single bulb, but sometimes, when the attack is a severe one, there may be more than a dozen living in a more or less decomposing mass. The larvæ enter on the pupal stage during the early part of April, and the perfect insect escapes about the beginning of May.

M. Valéry Mayet advises the taking up of the bulbs and a disinfection of the soil by means of bisulphide of carbon, applied at the rate of 24 pounds per acre.

As a further measure, it is recommended that the beetles themselves should be collected and destroyed, which can easily be done, as they do not readily fly, but allow themselves to be caught without any difficulty.—Gardeners' Chronicle, London, Eng.

European Notes.

As these are the last notes that will appear in The Florists' Exchange this year the writer would fain give them a cheerful tone, and so, although the floods are still rolling and storms raging; though shipments are at a standstill and our latest crops "are in the swim," he sends forth the dove and comforts himself and the raven with such seasonable cheer as befits the gay and festive time of Christmas. In the meantime orders come tumbling in from every quarter of the globe as the reports of shortages and delay are more widely spread. The sickly smile on the face of your humble correspondent as he peruses the list of fat lines offered him which cannot be accepted would make the fortune of an aspiring candidate for the throne of the Cannibal Islands. However, he still has sufficient pluck to wish his American friends the best of good things at this best of all seasons.

The English National Potato Society is to be wound up and dissolved. Founded at the time of the mad boom, it consisted of elements that were so diverse in character that they could not possibly work harmoniously together in times of peace and plenty, while in the face of recent disasters they had no more cohesion than a rope of sand. Judging by the conditions prevailing at present, potato growers have an opportunity before them to recoup themselves for the losses of the past two years; prices of standard sorts are fully 30 per cent. higher than last year, and the tendency continues upward.

Alfred Legerton, the London wholesale seedsman, whose failure was reported in this column some weeks ago, was found dead in his warehouse on the night of December 9. A meeting of his creditors had been held in the afternoon, when it was decided to wind up the business. The post mortem revealed disease of the heart, that organ being twice the normal size. Deceased was unmarried.

EUROPEAN SEEDS.

Breeding and Raising Garden Seeds.

BY DR. WILLIAM W. TRACY.

(Continued from page 824.)

Now a seed grower who is exceptionally familiar with varieties of lettuce as now grown in America and annually grows many tons of lettuce seed has stated that he did not believe that there were more than 25 really distinct sorts now grown in this country, and we think we are quite justified by the known facts in saying that during the more than 2,000 years which we know distinct varieties of lettuce have been grown, there has not been developed in the whole world more than 100 really distinct varietal types, at least not more than that number which were sufficiently desirable ones to warrant their continued cultivation, neither has there been a constant succession of distinct sorts the better ones taking the place of inferior. Some of the types which have been grown 50, 100, 500 years, but under different names being still in use, nothing really superior to them having been developed, yet the comparison of these two bulletins shows that in less than a decade we have at least 150 new names, more names than there has been really distinct types developed in 2,000 years.

We give as an illustration of one way in which this comes about, certain facts known to us, but withholding the name of the variety and dealers. A seedsman found in the hands of a German gardener a strain of lettuce which had been very carefully selected and grown by this family for three generations. For at least 75 years these people had grown only this one particular type, the description of which had been handed down from father to son, and they had very carefully kept it within their own family. Because of some special obligation the gardener gave some of the seed to the seedsman, who found that it was a remarkably uniform and even stock of a type, which had been introduced some 20 years before, and was then being extensively grown under the name A. He grew a stock from the seed the German gave him and to distinguish this from the other called it B, and under that name sold it to three different seedsmen, one of whom catalogued it as C, one as D and the other as E, each ignorant that it was being listed under other names, and thus a certain type which

had been in cultivation at least 75 years, and no one knows how much longer, was sold under at least four distinct and new names, and how many more we do not know. A well-known seed grower assured me that he used the same lot of stock seed to grow the cabbage seed, which he furnished seven different seedsmen to be sold under seven distinct names, and I might multiply such instances that have come to my personal knowledge indefinitely.

Evils of Existing Conditions.

Some of the evils of such a condition are evident, but there are others which, though less obvious, are still more injurious. One of these is the want of uniformity of type commonly found in any given lot as illustrated in the trial of 214 samples of garden beets already referred to. In more than half of the samples the roots varied so much in form and color that one could only guess at what type the lot was supposed to be composed of, and there was not to exceed a dozen samples, in which there were not from 5 to 20 per cent. of the roots which were distinctly different in some respects from the balance of the sample. One rarely sees a sample of cabbage in which there are not from 10 to 20 per cent. of the plants, which are materially different in form, color, earliness or some other respect from the others, and it is only in exceptionally good lots that one can pick out as many as 20 per cent., which could be said to be representative plants of the sort.

Importance of Uniformity of Type.

The use of seed which is uniformly of the type best suited for that particular "culture," (using the term as is done in Europe to signify any particular field of vegetables grown for some special purpose) is one of, if not the most, important factors in determining the satisfaction and profit to be derived from it, and this is true even if a variation is in itself desirable. It may be a gratification to one's pride and desirable for an exhibitor to grow a superlative individual plant, but a crop which is uniformly of a certain type and quality is far more profitable than one in which a small proportion is distinctly superior. If to a basket of tomatoes of uniform type and size we add a few larger fruits of distinct form and color, we will lessen instead of adding to the salable value of the lot.

In the case of early peas, a difference of a single day in the time they become fit for market will often determine profit or loss, but if to a stock which will mature in 40 days we add 10 per cent. of one which will mature in 35, though we have hastened the average date of maturity a day, we have not added to the value of the stock. For if we attempt to pick this 10 per cent. when they are in prime market condition, the cost of doing so and injury to the rest of the vines will more than counterbalance the additional price received for the extra early pods, while if you let them remain until the whole crop is fit and then pick them they will be so mature as to spoil the sale of the others. I think every experienced cultivator here will agree with me that in most cultures, if the best and the poorest, one-fifth of the plants were uniformly of the same character of growth and quality of crop as the remaining four-fifths, the cost of culture and marketing would be greatly reduced and the profit of the crop materially increased. The man who grows plants for fun or for his cake and pie desires variation, something new; that means surprise and pleasure, while he who grows them for his bread and butter desires uniformity, for that means profit.

I have tried to show the importance of uniformity of type and quality and the sad want of it in most commercial seeds, but I do not want to unjustly accuse our seed growers and dealers of dishonesty, or, at least, questionable practices. I have had a somewhat intimate acquaintance with men of the seed trade for the past 30 years, and I unhesitatingly say I certainly know of no class of business or professional men, not even doctors and ministers, whom I have known almost as well as seedsmen, who as a class are more honorable and upright in dealing than they are. They are no more responsible for the evil spoken of than are the seed users. They have come as a result of a general ignorance or neglect of certain principles of plant growth and of weakness of character, which are common to all men, the desire to get something for nothing, to buy at the lowest and to sell at the highest possible price regardless of real value. The contempt of familiar old

things and the desire for that which is new is not confined to seed growers or seed users.

(To be continued.)

CATALOGUES RECEIVED.

M. H. BRUNJES & SON, Brooklyn, N. Y.—Catalogue of Vegetable and Flower Seeds, Bulbs, Insecticides, Supplies, etc. A well illustrated, neatly printed and comprehensive catalogue.

JEROME B. RICE SEED COMPANY, Cambridge, N. Y.—Catalogue of Choice Garden and Field Seeds, Sweet Peas, etc. Onion Seed a specialty. The catalogue is profusely illustrated; and the firm states, "we offer nothing which has not been tested by ourselves and proven worthy of cultivation."

W. E. MARSHALL & COMPANY, New York.—Catalogue of Vegetable and Flower Seeds, Bulbs and Roots, Hardy Perennials, Bedding and Aquatic Plants, Conifers and Evergreens, Deciduous Trees, Shrubs, Supplies, etc., with a select list of Novelties and Specialties. A well printed and illustrated catalogue, of an embracing character.

BURPEE'S FARM ANNUAL, 1908.—This is one of the larger catalogues to reach us this season; and, as usual, is a most welcome visitor to our desk. We can always find listed therein the best standard varieties in all lines that are cultivated to-day as well as the newest and most meritorious sorts being introduced. The present Annual is fully up to the high standard of its predecessors in every respect. It contains 172 pages—and covers—replete with valuable and serviceable information. Some 20 pages are devoted to illustrations and descriptions of Burpee's New and Special Vegetables for 1908, features being made of the new "Burpee Improved" Bush Lima, and the Fordhook Bush Lima beans in color. Colored plates, from paintings by A. Lunzer, the well known artist, of Burpee's New Fordhook Musk Melon, and Burpee's New Lettuce, Earliest "Wayahead" are also provided. Other pictures in color show leaves of Burpee's Variegated Tall Nasturtium, flower of Variegated "Crystal Queen," flower of "Queen of Tom Thumbs" Scarlet, Burpee's Variegated "Golden Queen," and a bed of Burpee's "Garden Midnight" all new Nasturtiums; likewise Burpee's three new "Spencer" Sweet Peas—White Blossom, Primrose Spencer and Apple Blossom Spencer. Considerable space is required for the firm's offerings in Sweet Peas, both new and standard varieties, in which much valuable information is given concerning these very popular flowers. The back cover design of this year's Annual is exceedingly handsome, showing sprays, in natural colors, of four of the finest new Sweet Peas—Paradise, George Herbert, Queen Alexandra and Burpee's Brilliant Blue. Representations of the new Lima beans previously mentioned have been selected for the front cover design. The Annual is profusely illustrated throughout; and a perusal of it goes a long way to convince the reader that what is provided in its pages is confirmatory of the firm's assertion, that the Annual contains "The plain truth about the best seeds that grow."

CALENDARS RECEIVED.

We acknowledge the receipt of a beautiful calendar for 1908, from George E. Dickinson, 1 Broadway, New York. The subjects pictured in the colored plates are "All in a Garden Fair," "In a Land of Flowers," "Nature's Jewels," and "Garden Glories." We tender our thanks to Mr. Dickinson, who is American agent of E. T. Dickinson, Chateaufort, France, growers of nursery and fruit stocks, ornamental roses, French crab apple seed, etc.

FIRMS WHO ARE BUILDING.

MT. HOLLY, N. J.—J. Wardwell Shinn is erecting a new greenhouse on Ridgeway street.

MISHAWAKA, IND.—Mark Blackschmidt of South Bend has purchased three acres of ground here on which he expects to erect a modern greenhouse plant next Summer.

CHANGES IN BUSINESS.

GRAND FORKS, N. D.—The Wickler Floral Company has moved into the store building in the Ingalls House.

RUTLAND, VT.—F. H. Grimes has leased for eight months the greenhouse on Plain street belonging to Mr. and Mrs. Orlando L. Hill and will continue the raising of flowers which for the past two months has been carried on by Hill & Grimes.

BUSINESS DIFFICULTIES.

BOSTON, MASS.—Thomas F. Matthews has filed a petition in bankruptcy; liabilities, \$1,145; assets, \$26.

NURSERY DEPARTMENT.

Conducted by Joseph Meehan.

AMERICAN ASSOCIATION OF NURSERYMEN.

J. W. Hill, Des Moines, Ia., president; C. M. Hobbs, Bridgeport, Ind., vice-president; George C. Seager, Rochester, N. Y., secretary; C. L. Yates, Rochester, N. Y., treasurer.

Mulching the Stock.

This is the season of the year when the scattering of manure between the rows of nursery stock would be good work done. Nothing pays better than feeding young stock well. It gives strong healthy growth to the trees, and they reach a salable size a year or more in advance of those not so treated. The customer is pleased with the appearance of the stock, and the nurseryman has the space it occupied at his disposal a year or two in advance.

Manure should be gotten to the ground whenever it can be done now. Rows of trees are usually too close together to make practicable the using of a cart to haul the manure, but when the ground is hard a strong sled can be employed—and is so used in some nurseries—to carry the manure to where it is wanted. In this way much of the work can be done when the ground is frozen, when it is not practicable to do very much among trees. When the ground slopes considerably there may be some loss of manure if spread on hard frozen ground. Heavy rains, melting snow, may carry it to the bottom of the slope, but little of it getting into the ground. In case this would be likely to happen, the manuring should be done earlier, before freezings, or later, after Winter is over.

Seedless Persimmons.

A Maryland gentleman writing us concerning a seedless persimmon which he found and which he thinks of great value, leads the writer to say that the finders of such seedless trees—and many such trees have been found—are prone to think them of more value than they are. Seedless persimmons have been known and mentioned in horticultural magazines for many years past. The reason why such trees are of less value than supposed is because few persons care for the fruit of the tree.

Nurserymen would say that their sales of persimmon trees rank with those they sell the least of. Many of the common persimmons have considerably more pulp to the fruit than seeds, yet there is but little call for the trees.

Still the name, seedless persimmon, is attractive, and those who have them and would advertise them well would doubtless make sales of them, as new names in fruits always attract.

Persimmons of improved kinds have to be propagated by grafting. If stocks can be obtained the grafting may be done indoors toward the close of Winter; outdoors the work should be done as soon as the trees show signs of budding.

The Best Sweet Chestnuts.

The public demand for large fruits above all things causes the settling out of orchards of the Italian, or Spanish chestnut and its varieties and the Japanese rather than our native one. These sorts give very large nuts, the Japanese the largest of all; but when it comes to quality none is the equal of our own, the *Castanea americana*. The Japanese has some sweetness of nut; it is better than the Italian, while not as good as the American, and the nut is the largest of all the kinds.

Those who collect the nuts of the American chestnut often report trees bearing larger nuts than common, and when such a tree is found and it would appear that the large size is natural to the tree and not the result of extra good conditions, the tree should be propagated by grafting other trees with scions from it.

With a variety of our native chestnut bearing nuts of the size of the Italian there would be no demand for any other kind. As it is, every available nut of our native one is sold; and for several years past there has been a great shortage of them in the markets. It is no wonder nurserymen find a great call for the seedlings of this chestnut, so many recognize that the shortage will continue for years, to say nothing of the value of the tree for timber.

Beauty of the Crataegus Pyracantha.

When asked why they do not grow more of *Crataegus pyracantha* nurserymen say it is for the reason that there is but little demand for it. This lack of demand may come from want of knowledge of its merits. Seen as a shrub in leaf only there is not much to commend it beyond many other shrubs. It is for its bright orange scarlet berries it is so

valued by those who know of its worth in this respect. As it takes a strong plant to produce flowers and fruit, the small ones seen in nurseries are not tempting; and this is why the plants are not often called for.

The *pyracantha* thorn, as it is called, will grow well in the Middle States, enduring our zero temperature without injury, notwithstanding the shrub is from Southern Europe. It can be grown in bush form or as a half climber. It is not a climber, but when fastened to a low wall it is well suited, and when full of its orange scarlet fruit in late Summer, Autumn and Winter it is a great attraction.

This *crataegus* is evergreen, well fitting it for training to walls. When in good soil it will cover a space 10 to 15 feet in height in time, and when one of this height is in good display of its berries its beauty can be well understood.

For propagating purposes, hard and soft wood cuttings and seeds can be used. Hard wood is used for Spring settings, the cuttings being made in Winter, indoors. Soft wood cuttings are made in Midsummer, and rooted under glass. Seeds are gathered about New Year's, and placed in a box of soil outdoors, to remain a year or so, then to be sown, when seedlings may be looked for the Summer following.

Idesia Polycarpa

San José Scale.

Concerning San José scale, Geo. T. Powell writes in the Country Gentleman as follows:

In a recent trip in Missouri I found the San José scale had made great destruction of Missouri orchards. The parks of St. Louis have been invaded and much shrubbery is ruined, also many trees. The farmers are much discouraged with their orchards; have had but one good crop in five years. Many will not use the lime and sulphur spray. Experimental work with Scalecide is going on, and when it is proved, many plan to put out new orchards again. There is a large demand for a more readily prepared and efficient insecticide to be used upon the scale. A new mixture has recently been brought out by the Connecticut Agricultural College, which is claimed to be very inexpensive. The fact that several materials have to be combined, and 300 degrees of heat are necessary in the operation, makes this also impracticable with the great majority of farmers, who have not the facilities for making such mixtures. Farmers will not make much headway against the scale so long as mixtures are recommended that require the skill and knowledge of a chemist to prepare.

It is to the interest of every nurseryman to do all in his power to keep his trees clear of all insects and to spread the knowledge to others how best to keep their trees clean.

It is clear that sales of fruit trees will not be easily made to those who have already lost theirs by scale, etc., unless they can be assured that there are effectual remedies that can be applied to keep the trees clean. And, as Mr. Powell says, "parks are now invaded by the scale and much shrubbery ruined." Many beautiful flowering trees of the apple, pear and quince family are becoming ruined, while orchards of trees throughout the country have, in some cases, entirely disappeared.

The writer has no wish to recommend one mix-

ture above another. He has had trial of kerosene emulsion, lime and sulphur and Scalecide and has found the latter the most satisfactory. This is a mixture permitting of easy spraying; it can be bought ready for use, requiring but water mixed with it.

Trees infested with scale should be sprayed in early Winter, again in Spring, just in advance of the hudding out of the leaves; and those who have used various mixtures will know which one has previously given the most satisfaction.

Pruning Grape Vines.

Those who have to sell grape vines have no need to practice much pruning; the customer wants length of cane before all else, as this is the purchaser's gauge of value. Still, if all vines that are not sold at the close of the selling season are cut back it will result in better looking canes than in the case of those not pruned. Cut them down to near the ground.

When grapes are of a fruiting size they need care in pruning. It is the shoots made the previous season that will give fruit the coming one.

Left to itself a grape vine will soon be all leaves at the top and bare of them below. This is undesirable. When grown to a trellis, foliage is wanted from near the ground to the top. To obtain this needs good pruning. A good way to secure it is to cut down to near the ground every year one or more of the strong shoots. Strong new ones will take their places. These latter may make length above what the trellis requires, and if so they should be cut back to a desired length. Canes that bore fruit last year should be pruned. The side shoots on which the bunches were should be cut back, that only one or two eyes are left. These eyes will give shoots that will bear the bunches of fruit. Some rely altogether on this style of pruning; but besides that it is apt to leave the bottom of the trellises bare of foliage, the new cane from the bottom to the top insures fruit its whole length.

In the North the best time to prune is at the close of Winter, while the vine is still dormant.

China Tree, Pride of India.

Inquiries for the China tree, the *Melia Azederach*, sometimes come to nurserymen north of Washington, but few of them keep it, as it is not reliably hardy farther north than Baltimore, except along near the coast. It has lived out as far as Philadelphia, but never without some injury from the cold. It is much in demand in the South as a shade tree, generally under the name of the Texas umbrella tree, especially its variety, *umbraculifolia*, and it also makes a good shade tree on the Pacific Coast.

In Florida it is classed as one of the best deciduous shade trees, the variety *umbraculifolia* especially, as it holds its leaves longer than the type, and makes a denser head, of almost the exact shape of an umbrella.

It is not certain that this variety comes true from seed; presumably it does, as the seedsmen offer seeds of it, but its propagation is easily effected by cuttings.

The seeds are white, of the appearance of large peas and according to the Botanical Magazine they are used for the forming of rosaries by devout Catholics, for which purpose they are well suited, having a natural perforation through the center, hence the tree has been called bead tree, and *Arbor sancta*.

Idesia Polycarpa.

Of the *Idesia polycarpa* there are very few trees in cultivation in this country. It is from Japan, and unlike the greater number of the trees from that country, it is not hardy north of Philadelphia. In the more Southern States it would thrive well; and considering how handsome it is in its foliage and habit of growth it will become a popular tree as it is better known.

We are glad to be able to present a representation of the flowers of this rare tree, to show its habit of blooming. The small heads of flowers consist nearly altogether of yellow stamens. The display is not great, but it is interesting and pleasing, being so uncommon. The tree from which the spray of flowers came is in the grounds of Meehan's Nurseries, Germantown, Pa., and so far as we know it is the first of it to flower in these parts, though there are other fair-sized trees in the vicinity of Philadelphia.

Botanical works say of the fruit that it is orange colored and about the size of a pea. In this case, when the fruit was ripe, a tree containing it would be very ornamental. The tree bearing the blooms photographed has never produced fruit.

Japanese seedsmen offer seeds of this tree; and it can be increased by soft wood cuttings under glass as well as from seeds.

JOSEPH MEEHAN.

Plant Notes.

ANTHURIUMS.—There are occasions when it becomes almost a necessity for florists to make use of something out of the ordinary run of things, either when the work is to be done directly by themselves or by some one for whom material is grown. Among the stock capable of being worked into strikingly beautiful and brilliant decorations are anthuriums, by using the plants in bloom or the cut flowers. The two necessary conditions for success with anthuriums are heat and moisture that might equally apply to hundreds of other plants, but as these are the only conditions that make their cultivation out of the question with some growers, they are mentioned emphatically; every other requirement can be supplied without difficulty.

Anthuriums are propagated from seed and from cuttings of the rhizomes. In January the latter should be put into small pots containing chopped sphagnum moss and clean sand in about equal parts. When this is done and the pots placed in a closed case in the propagating bench, plunged in sand or moss over good bottom heat, they will soon start establishing themselves. In potting anthuriums in their flowering pots it is necessary that a liberal quantity of broken pots be placed in the bottom of the pots; for the main potting the material should consist of sphagnum moss and peat in equal proportions, making two-thirds of the whole, and the remaining portion, sand, rotted manure and the fiber of loam. The potting material should be coned or heaped up, not so much for the need of it to begin with, as the need of such a provision later when the plants will emit growth the roots of which will require material for sustenance. Apart from that it will be well to slightly cone the material in finishing potting. Anthuriums, as already noted, delight in heat and moisture and plenty of water at the roots during Spring and Summer, and although it is up to and including these periods that they require water in the largest quantity, they should never be allowed to become quite dry.

Seed of anthuriums should be sown in pots or pans nearly filled with sphagnum moss and sand, the surface portion finely sifted, over which the seeds should be sown and very lightly covered with fine sphagnum. Then the pots or pans are placed in a glass-covered part of the propagating bench. When the young seedlings appear they are very liable to damp; for that reason they should be put into very small pots or a number pricked off along the edges of 3½ or 4-inch pots or pans as soon as they are easily handled.

ADIANTUM FARLEYENSE is not only the most beautiful of all adiantums but it is also the most truly decorative of all ferns. In a certain sense this fern is hard to grow, but the difficulty is not so much in coming to an understanding of its needs as in fully realizing that these needs must be scrupulously attended to throughout the period of the plant's usefulness, otherwise failure will surely result no matter what efforts are put forth at intervals with the view of making up for past neglect.

There will now be numbers of this fern in the sand making roots and rapidly getting into condition for potting up; that operation should not be long delayed after it is ascertained that the young plants are in the condition mentioned. In potting the plants out of the sand it will be well to use a compost of leaf mold, sand and the fiber of loam in about equal proportions. Good drainage is absolutely essential at this and all other stages of growth of Adiantum Farleyense. After potting, the young plants will be less liable to a check if they are placed for some little time in a case slightly shaded, and in the event of it not being convenient to so dispose of them, they should be placed on a bed of moss on a bench where bottom heat will reach them. This

will keep moisture in their surroundings and also obviate the necessity of giving them more water than will be good for them.

GREVILLEA ROBUSTA is an exceedingly useful plant for florists; its graceful fernlike foliage makes it adaptable for purposes for which few other plants, with the exception of ferns, are suitable. It has also to commend it the ability to stand without any apparent ill effect in rooms and windows for a longer period than a great many other plants. In order to have nice serviceable stock during the Summer and right along through the season, seed should be sown very soon, and when the seedlings show the characteristics of the plant they should be put into the smallest size pots and after they are established in these, kept growing on in a moderately warm temperature and kept shifted as they require it. A high temperature and dry atmosphere will act injuriously to the young plants.

Grevillas are useful in sizes all the way from plants in 3-inch pots to those large enough for 6-inch pots. It is seldom that they are in shape for decoration after they have attained the latter size. Some make use of the old plants after they have cut them well back, but the ease with which more serviceable stock can in a short time be raised from seed does not seem to warrant keeping old stunted-looking specimens around.

CRASSULAS.—When crassulas are used for bedding much in same way as echeverias and, like the latter, taken and put in boxes for the Winter (crassulas will not stand as low a temperature as echeverias), the tops should now be taken off and placed quite closely together in shallow boxes filled with sandy loam, or sand alone, where they will root in a few weeks. In Spring these will be splendid plants for outdoor work. If it is necessary to increase still further the stock, the old plants from which the tops had been taken may be induced to grow and make new growths that will before long be fit to be taken off and rooted in the same way as those previously taken.

St. Louis.

News Notes.

We had with us the past week Adolph Goldenberg, representing Ralph M. Ward & Company, New York, calling on the growers in interest of bulbs and nursery stock.

Kuehn says he looks for a heavy demand for roses and carnations and especially for American Beauty; advance orders for Christmas were heavy. At Augermuller's a great lot of extra fine cut poinsettias were seen, for which the demand has been heavy, as it has been for roses and carnations. Berning had an extra supply of choice stock in everything for the holidays.

W. C. Smith and Company were long on California violets, carnations and bulbous stock; they had an extra heavy demand the past week for violets.

Julius E. Schray of the firm of Wm. Schray and Sons has the sympathy of the trade. Mrs. Schray died early Monday morning after a short illness. The funeral was held on Christmas day.

The Florists' Club members should not forget that the first meeting in the new year will take place January 9 in the Burlington building. President Young says that the officers have something in store that will interest the members greatly and hopes that they will respond in good round numbers to the secretary's call.

ST. PATRICK.

THE GROWERS' OPPORTUNITY

Rooted cuttings of all softwooded plants are in demand at this time by florists who do not propagate their own stock. Growers making a specialty of the rooted cutting business will find an advertisement placed in **THE FLORISTS' EXCHANGE** a very profitable investment.

FERNS

MY SPECIALTY

150,000 assorted ferns for jardinières, excellent stock, in 15 of the best market varieties, including *Cytisium Falcatum*, *Aspidium Faussemense*, *Pteris Wimsettii* and *Mayii*, in good proportion, from 2½ in. pots, \$3.00 per 100; \$25.00 per 1000; 500 at 1000 rate.

CENTER PLANTS (Exact Size)

Kentia Belmoreana, 2½ in., \$1.30 per doz., \$10.00 per 100.
Assorted Ferns, 3 in., \$6.00 per 100, \$55.00 per 1000; 4 in., \$12.00 per 100, \$115.00 per 1000.
Adiantum Cuneatum, fine stock, 2½ in., \$3.50 per 100, \$30.00 per 1000; 3 in., \$6.00 per 100, \$55.00 per 1000; 4 in., \$12.00 per 100, \$115.00 per 1000.
Adiantum Farleyense, 4 in., \$4.75 per doz., \$35.00 per 100; 5 in., \$8.50 per doz., \$65.00 per 100, 6 in., \$12.00 per doz., \$40.00 per 100.
Adiantum Rhodophyllum, 4 in., \$2.50 per doz., \$20.00 per 100; 5 in., \$5.50 per doz., \$40.00 per 100.
Adiantum Gracillimum, 2½ in., \$3.50 per 100, \$30.00 per 1000.
Adiantum Regium, 4 in., \$3.00 per doz., \$22.00 per 100; 5 in., \$6.00 per doz., \$45.00 per 100.
Cibotium Schiedei, 4 in., \$3.50 per doz., \$25.00 per 100.
Nephrolepis Scottii, 6 in., \$7.00 per doz., \$50.00 per 100; 8 in., \$15.00 per doz., worth the double.
Elegantissima and Piersoni, 5 in., \$5.50 per doz.
Fern Spores, gathered from my own stock, guaranteed fresh, 1907 crop, good, commercial varieties, 30c. per trade pkt.; \$3.00 per dozen.

J. F. ANDERSON, Short Hills, N. J.

LATANIAS

Fine strong plants, 2 in. \$3.00 per 100, \$25.00 per 1000; 3 in. \$6.00 per 100, \$50.00 per 1000; 4 in. \$15.00 per 100.
KENTIAS, *Belmoreana* and *Forsteriana*, 4 in. 25c., 35c.; 5 in. 50c., 75c.; 6 in. \$1.25, \$1.50; large plants, \$2.00 to \$35.00 each.
PHOENIX, large, from \$2.00 to \$40.00 each.
PANDANUS Urtilis, strong 2 in. \$3.50 per 100; \$30.00 per 1000.
AZALEAS INDICA, fine plants, 35c. to \$2.00 each.

FERNS

Boston and Piersoni, 4 in. 15c., 6 in. 25c., 6 in. 50c., 7 in. 75c.
Whitmanii, 4 in. 25c., 6 in. 50c., 6 in. 75c. to \$1.00; 7 in. \$1.50 to \$2.00, 8 in. \$2.50, \$3.00, \$3.50.
 Small FERNS for dishes in A1 shape, \$3.00 per 100, \$25.00 per 1000.

JOHN BADER, Mount Troy, ALLEGHENY, PA.

FERNS

Adiantum Croweanum

3-in. pots, \$12.50 per 100, \$100 per 1000.

Adiantum Cuneatum

4-in. pots, \$1.80 per doz., \$15.00 per 100.

Asparagus Plumosus Nanus

2½ in. pots, \$3.50 per 100, \$30.00 per 1000.
 3-in. pots, \$6.00 per 100, \$55.00 per 1000.
 4-in. pots, \$10.00 per 100.

Asparagus Sprengeri

2½ in. pots, \$3.50 per 100, \$30.00 per 1000;
 3 in. pots, \$6.00 per 100, \$55.00 per 1000.

A. N. PIERSON - CROMWELL, CONN.

FERNS

Piersoni, 4 in., 5 in. and 6 in. pots, 10c., 20c. and 35c.
Asparagus Plumosus, 3 in., 30c.
Sprengeri, 3 in., 20c.

J.S. Bloom, - Riegelsville, Pa.

FERNS, FERNS, FERNS

Fine stock of assorted Ferns in best market varieties from 2½ in. pots, at \$3.00 per 100 plants, or \$25.00 per 1000.
Cibotium Schiedei from 4 in. pots, at \$30.00 per 100 plants.

ERANK N. ESKESEN, Main Street, Madison, N. J.

THE WEEK'S WORK

Timme's Timely Teachings.

Pansies.

We must not neglect our pansies in frames. There is little danger through neglect to have them sufficiently well protected against cold. Every grower of bedding stock knows the value of pansies and this knowledge prompts him to leave nothing undone to keep them from shivering. This again, in many instances, has led to grave mistakes being made in the matter of Winter protection for pansies. Frequently the frames are banked and covered up altogether too heavily, sometimes with heat generating fresh manure, and all this too before Winter has fairly set in. That is why the plants want seeing to, to be protected against protection, as it were, the kind that is not only needless but harmful.

Pansies are by no means so frail and tender as some people seem to think. They will do far better without a too heavy covering during Winter and should never be entirely deprived of air and moisture. If allowed to go into the Winter with their roots dry, as is the case after a rainless Fall, unless often watered by the grower, closed sashes and top covering will only add to their plight, hindering nature in coming to their rescue by finally supplying the needed want in the form of rain or snow. Thousands of pansies are thus lost every Winter and untold numbers again in the Spring by reason of too much coddling and covering previous to being exposed to belated hard frosts in the Spring, always ruinous to enfeebled constitution, soft and flabby growth.

While these Fall sown and frame wintered pansies under reasonably good care prove excellent stock for the early sales, it is well to provide a no less profitable second lot for May and June planting by sowing now. Starting in trays with the best of seeds in moderately warm quarters will, with timely transplanting, plenty of light, air and moisture, result in fine plants for an early transfer into outdoor frames.

Bedding Geraniums.

Next to pansies in point of importance come zonal geraniums. Or should I have placed these first? I am undecided as to which of the two is entitled to priority of rank among bedding plants proper. It is enough to know that either of these all-time favorites can be had in fine condition and in abundant supply with ordinarily good care, and just as easily can be made to turn out mediocre and low grade stock by slight and inattention on the part of the grower. Geraniums yet in crowded quarters should now be given a thorough overhauling, beginning at one end of a bench and

coming to a finish at the other, having in readiness additional room and soil for repotting. In this manner none of the plants escapes scrutiny, is cleaned, transplanted if root-bound, cut back at the proper joint or merely pinched in as its condition may point out to be the proper way toward making it a sturdy, well-branched market plant. If this is followed by a resetting, with plenty of room allowed for unhampered spread of growth and free circulation of air between the plants, the grower may feel easy in the assurance of having completed a job, exceedingly well paid for at a time coming.

If it can possibly be managed to attend to the cutting back of geraniums a few weeks before or after transplanting, a better break is usually secured. Wood too much hardened by delay in stunning terminal growth or by having allowed the plants to dry out too often, is disinclined to make a good all around break, and young stock for the sake of securing low branched, shapely plants should, therefore, be pinched back in time, whether cuttings for further propagation are gained thereby or not. The time has come when it pays better to aim at excellence in stock rather than at great increase in the number of plants.

Winter-Flowering Geraniums.

Some time ago I read of geraniums as being desirable stock for the general trade in greenhouse flowering plants. I was greatly pleased to see them thus spoken of and fully agree with the writer in all he said. It is seldom that geraniums are considered otherwise than good for bedding purposes during the Summer. With this end alone in view most growers concentrate all their energies in an effort to raise enormous quantities of the half dozen varieties relied upon as being best for the purpose, and to having the stock ready for this particular line of trade when the season opens up, which means flowering geraniums in May.

It is strange that growers who look upon their home trade as their most reliable source of income, who for this reason must work toward ever ready supply in greenhouse potted plants of various kinds, should not take advantage of what has been done for them by tireless originators of new geraniums, of varieties especially adapted for greenhouse pot culture and the trade in greenhouse flowering plants.

Among introductions of recent years—great numbers of them, a dazzling array of brilliancy and beauty—many could be found surpassing in point of attractiveness anything now placed before buyers of flowering potted plants. They possess all the qualities which go to make them profitable to handle by the florist. They are in bloom at all seasons, if rightly managed, are of easy treatment as house plants, never bothered by insects or disease and therefore fast sellers at all times. Not all of them as listed are perfect in every respect, it is true, nor are the very best in singles and doubles from the various types also good hedders while they may be the finest for pot-culture indoors. It is best to try a limited number of the newer kinds every year; only in this way is it possible for every grower to be well supplied eventually with varieties best suiting his own fancy and particular trade.

Calceolarias.

Where herbaceous calceolarias are grown to perfection their great value as market plants in early Spring never fails to induce growers, who have never before raised them, to try their hand also in the production of stock so interestingly attractive and seemingly anything but difficult to rear. And, indeed, the difficulties experienced in their culture are not so great as to stand in the way of their being more extensively raised than seems to be the case. There is never any trouble in disposing of all the good stock produced, but to produce it, I admit, may not be entirely free of difficulty to those not in a position to give the plants the required care.

THE TRADE ONLY—When Writing Please Mention
 THE FLORISTS' EXCHANGE.

December 28, 1907

The two most and, in fact, only critical periods in the culture of herbaceous calceolarias are right before the little seedlings are large enough for the first transplanting, when through carelessness in watering or some other cause they easily yield to the common damping off, and then again, at this season of the year when the difficult problem of where best to keep them confronts the grower. It is easy to advise keeping them in an airy, well-lighted house, in a temperature merely a few degrees above the freezing point and never any higher than forty degrees; it is not as easy to find a place of that description. In nine establishments out of every ten a house so nicely gauged as to be strictly frost-proof and yet never showing a thermometer reading above the forty mark has not been deemed necessary to provide, though such a glass structure would be found to be most serviceable in connection with a greenhouse concern given over to the culture of many kinds of stock. At this season and until the sun's heat makes itself felt more markedly it is necessary to keep calceolarias—and cinerarias, too—as near as possible to the glass of the coolest house available, safe from frost, of course. If not excited into spindly growth by the combination of a too great heat, lack of light and short days, and if kept clean of aphids the chances for success are good.

Begonias.

This is a propitious time for the propagation of nearly all kinds of begonias. A good assortment of flowering begonias should at all seasons form a conspicuous part of the retail grower's stock-in-trade. Young, vigorous plants in medium sized pots sell fastest; old ones soon become too large, some too bare-limbed and unsightly to deserve being dealt with as anything else but material for rejuvenation and increase of salable stock. This observation is meant to be taken in good faith by those who grow plants for profit, yet litter their places of business with all sorts of profit-eating old subjects, not having the heart to make away with them.

Small plants with four or five finely colored leaves are likewise the best selling and most profitable size in rex begonias. Well-ripened leaves of the older specimens in pots of undesirable size should be unstintingly used for propagation. Cut up in pieces, or merely hacking the midrib and side veins on the underside of the leaf with a sharp knife and placing the leaf or pieces thereof on the surface of a warm propagating bed, held in place by a thin sprinkling of sand over the top, results in a great number of little plants breaking through the old leaf in a very short time. When large enough and having a sufficiency of roots, they are lifted, freed of the raggy remnant of the old leaf still adhering, potted up and grown on in a warm house and over some mild bottom heat, should this be available right after every transplanting.

A sowing of seeds now made of any of the best varieties of Begonia semperflorens is sure to amount to stock worth being well supplied with when the demand for the dwarf kinds of bedding material must be met in the Spring. The seeds need no covering other than paper placed over the trays until verdant life shows. If sown thinly, no pricking off into other trays is necessary previous to being transplanted into little pots. Bottom heat at starting and tolerably warm quarters afterward for the potted seedlings will make them the right kind of stock.

Begonia Gloire de Lorraine.

Early propagation by leaves results in finer plants of Begonia Gloire de Lorraine than what may be expected by rooting side growths later on. Strong stemmed, healthy leaves, cut so that a considerably long piece of the leaf-stalk remains on the leaf—about three-quarters of an inch in length—as the part to be inserted in the sand or cocoanut fiber or whatever medium the grower has found to be the best for the purpose, soon root in a temperature of 70 degrees with a few degrees higher in the sand, if this and the atmosphere are kept moderately moist. To avoid either ex-

cess, a drying out of the bed through forgetfulness or keeping bed and air altogether too wet, is what needs watching, for both prove fatal to the cuttings, more surely than would an occasional drop in temperature.

From around the leaf, after this has formed roots, several small plants will push forth. As long as there appears little danger to be apprehended from decay putting in its deadly work, it is safe to leave the new growths in the sand until of appreciable size, when they are taken off and made to form their own roots separately, either by again dibbling them in the warm sand or by potting them up and affording a warm stand and closely held atmosphere until rooted in the pots. Up to this point it will take about five weeks from the time the leaves are put in the sand, and the grower from now on has little difficulty in keeping his plants on the forward move.

To this end the temperature need not be as high as employed in the rooting, though for best results it should never fall below 60 degrees. Nor should a bench too far from the glass be chosen for this kind of begonia or the repotting be delayed too long after the roots are capable of holding the ball firmly. The soil used should be light and porous, intermixed with a reasonably good portion of sandy leaf mold, the pots of the shallow kind, well drained, from the 4-inch size up, never using a pot larger than is absolutely necessary or making the soil too solid in potting or too soggedly wet in watering.

Zanzibar Balsams.

Impatiens Sultana is well known by all florists and is, unless exceedingly well grown, nothing to be greatly admired either as a bedding or greenhouse pot plant. All that can be said in its favor is, that it is probably the freest flowering plant under cultivation, never out of bloom any day in the year. But all florists are not so familiar with the newer kinds of this class of impatiens, all of them better than the one so well known, and all of them too good to remain unnoticed. The latest acquisition is Impatiens Holstii, with larger flowers, produced quite freely during the entire Summer season and being of a deeper red than those put forth in such profusion by Impatiens Sultana. Its growth also is more compact and for this reason it is easily made into a splendid pot plant, one nobody need hesitate to commend as the surest of ever-flowering house plants, as it also has proven itself to be a fine thing when massed in outdoor borders, not requiring any special soil or care.

A packet of seeds of either of the above will give the grower a large number of plants, not always uniformly true as to habit or color, but since they begin to flower when yet quite small, this difficulty is readily overcome by rooting cuttings taken from any part of a plant and at any time, which all grow as easily as coleus.

A good set of plants, flowering in all shades of red, maroon and pink, may thus be obtained by making a sowing of seeds now from a packet of hybrid impatiens. Any of the dwarf, compact plants with flowers of large size and rich salmon shade of color is worthy of being multiplied to the utmost extent. Any well-grown plant of these, or a bed of them in the Summer, presents a novel and beautiful sight. The impatiens is not hardy and seeds need bottom heat when started now.

FRED. W. TIMME.

FELTHOUSE'S GERANIUMS

None better, if as good. The following varieties, in 2 1/2 in. pots, with or without soil, \$18.00 per 1000.

Beaute Poilevine, S. A. Null, La Favorite, John Doyle, Richard Breit, Ricard, Bruni, General Grant, M. Canovas, Jean Viaud, Pasteur, Landy and several others.

FUCHIAS, rooted cuttings, \$1.00 per 100; 2 1/2 in. pots, \$3.00 per 100.

HELIOTROPE, rooted cuttings, \$1.00 per 100; 2 1/2 in. pots, \$3.00 per 100.

SALVIA BONFIRE, rooted cuttings, \$1.00 per 100; 2 1/2 in. pots, \$2.00 per 100.

COLEUS, rooted cuttings, 60c. per 100; \$5.00 per 1000.

ROSE GERANIUMS, 2 1/2 in. pots, \$20.00 per 1000.

AGERATUM, Siolla Gurney, 60c. per 100 R. C.; 2 1/2 in. pots, \$1.00 per 100. Cash With order.

J. E. FELTHOUSE, Schenectady, N. Y.

Always in Demand

ARAUCARIA ROBUSTA COMPACTA and GLAUCA

JUST LOOK! An ARAUCARIA ROBUSTA COMPACTA OR EXCELSA GLAUCA, worth a ten dollar bill, perfect shape and color, 6-7 in. pots, 6-year-old, 4-5-6 tiers, 23 to 40 in. in height, the same in width, only \$3.00; 6-7 in. pots, 6-year-old, 4-5-6 tiers, 25 to 28 in. high, \$2.00 and \$2.50; 6-7 in. pots, 5-year-old, 3-4 tiers, 18 to 25 in. high, \$1.50 to \$1.75. **Excelsa**, 6-7 in. pots, 5-6 tiers, 25 to 30 in. high, \$1.50; 6 in. pots, 5-year-old, 5 tiers, 22 to 25 in. high, \$1.00 to \$1.25; 6 in. pots, 4-5 tiers, 4-5-year-old, 18-20-22 in. high, 75c.; 2-year-old, 2-3 tiers, nice little plants, 6-8 in. high, 40c.

NETHROLEPIS, such as **Whitmani** and **Scottii**, also **Boston** and **Pieroni** Ferns, all pot grown (not bench grown). Have them by the thousand, in all sizes, from 4 in. up to 8 in. pots.

WHITMANI, larger than 8 in. pot, planted in 7 in. pots, made up in June, three plants in a 7 in. pot, now as large as a bushel basket, price, \$1.25 to \$1.50 per pot; middle size, 75c.; very heavy specimens, \$1.00 per pot.

PIERONI FERNS 4 in., 25c.; 5-5 1/2-6 in. pots, 35c.-40c.-50c.

PIERIS WILSONI, 5 1/2 in. pots, very handsome, much admired ferns, 20c.

Please mention if plants are to be shipped with or without pots. All goods must travel at purchaser's risk. Cash with order, please.

Copy must reach this office by 12 noon Wednesday to secure insertion in issue of following Saturday.

Orders from unknown parties must be accompanied with cash or satisfactory references.

The Year 1907.

The year 1907, the closing days of which are now upon us, will be one long remembered by the American nation, particularly by the horticultural trade and allied industries. The weather in the early part of the year was most erratic, frosts extending far into May and the first half of June. This condition necessitated many replantings and a great deal of care to tide over tender plants. However, it is gratifying to state that, as a whole, the crops have been fairly good. Then, in October, came the financial panic, something that has not been witnessed in this country for over a decade, but which it is safe to say is happily now passing.

The Business Outlook.

The stringent money condition affected every line of trade, including our own, but from a summary of the views of the most prominent men in the varied industries throughout the country such as steel and iron, machinery, tools and hardware, textile, etc., published by "American Industries," and which are now before us, the consensus of opinion indicated by the various reports secured by that periodical is that the country is still sound and the prospects for future business most excellent. Of the trades included in that report, those coming nearest to us, such as the agricultural implement trade, are indeed very optimistic.

Cyrus H. McCormick, president of the International Harvester Company, states: "The indications for foreign and domestic trade for the coming season are quite favorable. The company's collections for the past three months have been unusually good, and through all the present stringency they have not fallen off as much as would reasonably have been expected. The wealth and standing of the average farmer is to-day better than ever before."

R. Kilburn Oritt, president of the Clipper Lawn Mower Company of Dixon, Ill., states: "We do not notice the financial disturbances. We are turning down quite a lot of heavy trade which we cannot handle. The sun never shines brighter than at the present time, and all that is needed to make a banner year is an early Spring."

The opinions of the various gentlemen, leaders

in the different lines of industry, go far to convince us that there is really no great cause for alarm or discouragement concerning the outlook of trade in general.

The Easter business of the past year was a very satisfactory one, and as has ruled for several years, it was again a plant Easter, although the trade done in cut flowers as well as a most gratifying one. Decoration Day and Thanksgiving Day business was also of a most satisfactory character; and, as we go to press, the indications are that the immediate Christmas trade, although somewhat curtailed, has not fallen off to any alarming extent.

New Plants.

During the year advancement has been made in the line of securing new plants. The following registered by the S. A. F. O. H. will give an idea as to the new things obtained: Chrysanthemum Golden Dome (Macrae); several varieties of the Winter-flowering sweet peas (Zvolanek); in addition to these, the new varieties of Spencer sweet peas being introduced by W. Atlee Burpee & Company must be included. In roses there have been registered White Killarney (The Waban Rose Conservatories); Newport Fairy (Julius Roehrs Company); and Posey. Coquina, Cinderella, Delight, Evangeline and Paradise (M. H. Walsh). Mrs. Potter Palmer (Poehlmann Brothers Company); Mrs. Marshall Field (Reinberg); Mrs. Jardine (Scott & Son); Rhea Reid and Princess (E. G. Hill Company), and one or two very promising seedlings from John Cook must likewise be named as indicative of the progress made in the obtaining of new roses. The varieties exhibited at the show of the American Rose Society held at Washington this year which obtained certificates were: Queen Beatrice (Kramer); Wyndmoor (Myers & Samtman); Rhea Reid (E. G. Hill Company); Paradise, La Fiamma, Delight and Juanita (Walsh).

In carnations the varieties registered by the American Carnation Society have been as follows: Climax, an improvement on Enchantress (Wanoka Greenhouses); Cardinal, Aristocrat and Afterglow (Witterstaetter); Sensation (Cockcroft); Juanita (Fillow); Andrew Carnegie (Snow); Defiance and Sincerity (Rudd); The Lloyd (Jahn), and White Helen Gould (Hider).

The varieties certificated by the society at its Toronto meeting this year were: Afterglow (Witterstaetter), scoring 87 points; Pink Seedling No. 32 (Riemels), 86 points; 99 Bay State (Roper), 85 points; Toreador (Weber & Sons Company), 86 points. There are several other new carnations now being placed on the market, and, doubtless, their merits will be estimated when exhibited before the Carnation Society at its meeting in January next at Washington, D. C. The high standard reached in carnation flowers makes it very difficult, indeed, for a new-comer to secure an entrance into the ranks of first-class varieties.

Our chrysanthemum growers continue to make good progress, and the year 1907 probably saw as good quality in this flower as has ever yet been obtained. The varieties certificated by the various committees of the Chrysanthemum Society of America were: On September 7, Golden Glow (Smith & Son); October 12, A. McKendry (Totty); October 19, Mary Donellan (Totty); October 26, Virginia Poehlmann (Poehlmann Brothers Company); Pacific Supreme (Smith & Son); No. 9 (Marshall); Mrs. Frances P. D. Fell (Surman); Commandant Mathieu (E. G. Hill Company); November 2, Grace Witney (Witney); November 4, Mrs. Giraud Foster (Smiri); November 6, W. H. Moir (Totty); Lynnwood Hall (Kleinheinz); November 23, No. 74-5-06 (Smith & Son).

Work of Societies.

The various national organizations devoted to the advancement of floriculture and horticulture have held very successful meetings during the year. The American Seed Trade Association met in New York City in June, and discussed many important matters. Mr. George S. Green, Chicago, was elected president for the year 1908. Among subjects that have occupied the attention of the seed trade during the year have been an attempted change in the method of distribution of free seeds by the Government, seventy-five projects for this being submitted by Dr. B. T. Galloway, Chief of the Bureau of Plant Industry, none of which proved acceptable to our law-makers, the old practice of distribution having been continued. An effort has been made to obtain a modification of the seed adulteration law, and gratifying progress along this line has resulted. The Government reports show that the value of the seeds exported from the United States in 1906 was \$8,912,662, the value of seeds imported in the same period amounting to \$5,388,043. A new experiment station has been established by the Government outside of

Norfolk, Va., which, it is expected, will be of great assistance to the market gardening interests in that locality. A fire in the Government seed shop at Washington created an extra demand for seeds for free distribution to the amount of \$50,000, the appropriation for which is now under consideration by Congress. The dinner given by W. Atlee Burpee of Philadelphia to Postmaster-General Meyer, when parcels post matters formed the theme of the post-prandial speakers was an important event, and progress along parcels post lines is looked for as a result of that gathering.

The American Association of Nurserymen met at Detroit, and, as usual, accomplished good work. Mr. J. W. Hill of Des Moines, Ia., was elected president for the forthcoming year. Considerable interest has been manifested in forestry matters throughout the country, and this has created a demand for tree seeds and seedlings. A general feeling has prevailed that better prices for stock should be obtained, and efforts along this line have been making. The total exports of nursery stock during the year 1906 amounted to \$242,056; the imports for the same period, \$1,617,622. The only important failure in the nursery business so far as our records show has been that of the Peters' Nursery Company of Ohio. An item of general interest to this branch of the business has been the dissolution of the long-established firm of Parsons & Sons Company of Flushing, N. Y.

A Congress of Horticulture was held at the Jamestown Exposition, proving a most interesting affair. The status of the various branches at the present time was set forth by the different speakers.

The American Association of Park Superintendents held its annual meeting at Toronto, Ont., and elected Professor J. F. Cowell president for 1908. A conference of general interest was held in New York on October 1 under the auspices of the Horticultural Society of New York, the subject under immediate discussion being "Plant Hardiness and Acclimatization."

The Society of American Florists met at Philadelphia in August, and accomplished considerable good work, particularly in the line of advocating the teaching of horticulture in the public schools. At this meeting also great attention was given to the subject of developing trade in stocks needed for the embellishment of home grounds. The society goes to Niagara Falls, N. Y., in 1908 under the presidency of Frank H. Traendly of New York.

The American Rose Society met at Washington as already stated, and great interest was taken in its proceedings. The delegates had the distinction and honor of having been presented on this occasion to President Roosevelt at the White House. The Rose Society goes to Chicago next year, and already much interest is being taken in that gathering. An effort is making by the society to have a Summer show of roses in New York City next year, and the nurserymen are to be invited to extend their co-operation to make the display of outdoor flowers representative of the rose cult of the United States.

The American Carnation Society, as previously mentioned, met at Toronto this year. A notable feature of the meeting was constituted by the various papers from growers abroad, showing the great interest taken in the American varieties in those sections. The next meeting of the organization will be held in Washington, D. C., on January 23 to 30 in conjunction with the American Breeders' Association, which this year held a successful gathering at Toledo, O. The president of the Carnation Society for 1908 is Fred Lemon of Richmond, Ind.

The American Peony Society continues its good work in an endeavor to straighten out the nomenclature of the peony and otherwise, and an important publication by the society was issued the past year showing a check list of peonies, which was reviewed at length in our columns at the time of its issuance. The society goes again to Cornell in 1908 under the presidency of C. W. Ward.

The New England Dahlia Society is making progress along its special line, and has shown commendable activity in the publication of "The Dahlia News," a monthly periodical devoted to the work of the organization and to dahlia matters in general.

The Illinois State Florists' Association was successful in securing an appropriation for the purpose of carrying on greenhouse work at the State University, which will be of much help to floriculture in general.

The Society of Southern Florists, a new organization, had its first meeting at New Orleans, and the outcome augurs well for the future success of this body.

The Canadian Horticultural Society held its meeting at London, Ont., which was characterized by the very practical nature of the papers read and discussed. This society meets next year at Niagara Falls at the same time as the S. A. F. O. H., when, it

is expected, an interchange of courtesies by both organizations will take place.

The different florists' clubs continue their progressive and helpful work, and new additions have been made to the list of these useful bodies throughout the past year.

The Death Roll.

Not in many years has it been our sad duty to record such a lengthy death list as we are called upon to do for 1907. Among the more prominent and well-known florists who have passed away were Edgar Sanders, W. W. Edgar, Phil. J. Hauswirth, Nathan Smith, T. W. Guy, Amasa Kennicott, Flint Kennicott, V. H. Hallock, Julius F. Kretschmar, William Charlton, Elijah W. Wood, James Mallon, C. F. W. Gentemann, Lawrence Hehl, John Nicol, Henry P. Weber, George J. Reuter, Thos. J. Johnston, Hugh Chesney and Robert Faulk. The seed trade has lost such well-known members as D. M. Ferry, Otto Schwill and Z. De Forest Ely. The nursery trade mourns the loss of Thomas H. Douglas, Arthur Bryant, John C. Teas, Charles Patrick Barry, S. W. Lewis and W. Judson Smith. Other men well known in the trade who have gone from among us in 1907 were James Braik, Samuel Henshaw, O. B. Hadwen, George Vair, James Draper and W. F. Stone. The scientific world has lost eminent supporters in L. M. Underwood and George E. Davenport. Our trans-Atlantic friends have sustained great losses in the calling away of Dr. Masters and James H. Veitch. Truly, the list is a long one.

Horticultural Literature.

Among the publications devoted to horticultural topics issued during the year were the following: The Dahlia Manual (Wilmore); Lawns and How to Make Them (Barron); Peony Manual, revised edition (Harrison); Book of Water Gardening (Bisset); Bean Culture (Sevey); Tomato Culture (Tracy); Celery Culture (Beattie); Mendelism (Punnett); Plant Breeding (DeVries); Daffodils, Narcissus, and How to Grow Them (Kirby); How to Lay Out Suburban Home Grounds (Kellaway); Perpetual Flowering Carnation (Allwood); Water Lilies and How to Grow Them (Conard and Hus); and Insects Injurious to Vegetables (Chittenden).

Interesting Topics Discussed.

Quite a number of interesting topics have engrossed the attention of the craft in the year now closing. Among the most important of these was the subject of credit, and the result of this discussion, we take it, has manifested itself in the combinations effected by the plant growers and the wholesale florists around New York, also among the wholesale florists of Philadelphia, for the better regulation of credits—movements which cannot otherwise be regarded than steps in the right direction. The only important failures in the florist trade recorded for the year have been those of the Templin Company of Calla, O., and the Graham Company of Philadelphia.

The Society of American Florists was successful in obtaining through its hearing before the Interstate Commerce Commission at Washington a reduction of the exorbitant express rates in previous operation between New Jersey and Pennsylvania points and New York, a decision which has had a very beneficial influence throughout the whole country. Other matters which have been discussed were the mixing of carnation pollen, uniform plant names, new creations in sweet peas, the renaming of American carnations in England, sports, the origin of Gladiolus America, registration of plants, deception in advertising, status of the private gardener and suggestions to appoint bureaus of censorship in connection with trade literature published in the daily newspapers and magazines.

There have been considerable additions made to greenhouse plants the past year, and it has been noticeable that greater interest has been taken by the trade in the matter of concrete material in the construction of greenhouses and benches.

In closing this incomplete summary of the year's doings, we congratulate the industries represented by this paper on the amount of business done under the most trying circumstances, on the general stability of the firms engaged therein, and would again state that all indications point to a continuance in 1908 of the prosperity which, fortunately, has characterized to a satisfactory degree the year now passing away.

We would add that The Florists' Exchange will continue to do all in its power to help forward every movement tending to the advancement and betterment of its clients, whom we sincerely thank for the gratifying patronage which has been extended to us all these years. We hope to merit a continuance of these favors, and wish for one and all a Happy and Prosperous year in 1908.

Annual Review of New York Cut Flower Market.

In attempting to give a brief review of the cut flower business in New York City during the year 1907, it is rather difficult to look at the problem with any pleasurable feeling, owing to the very unsatisfactory conditions that have prevailed during the months of November and December. It goes without saying that the business conditions of the last two months have been the worst that have been felt for a great many years; at the same time, taking the whole year of 1907 into consideration, it has not, perhaps, been such a bad one after all.

In the beginning of the year there was a fairly good demand for all commercial flowers, though the crops of roses did not seem to be as heavy as had been expected, considering the increase in the area of glass during the previous Summer months; but those growers who were fortunate enough to cut regularly, certainly did not have much ground for complaint, so far as the values received for their stock went. The varieties of roses principally used in this market this year were American Beauty, Bride, Bridesmaid, a moderate supply of Mme. Abel Chatenay. Richmond chiefly for red; Ivory for white had been planted rather extensively in some districts and Killarney to quite an extent, though that rose has not flowered as freely as was expected of it. Uncle John was grown in limited numbers; a few Perles des Jardins and Franz Deegen for yellow, though not many of either kind, and one or two novelties. The varieties Liberty, Queen of Edgley, Meteor and Golden Gate did not seem to cut much figure this year.

A feature of the business in the early part of the year was the cut flowers of gardenias. There was a good demand for these, and growers who were fortunate enough to have a supply reaped good prices. Violets did not come up to the expectations of the growers, and it would seem that the time of abnormally high prices for these flowers has passed, and we find them doing much worse here at the latter part of the year than they did even at the beginning. It was thought at one time that, with the increased shipments from our violet districts to the Chicago market, the supply would be lessened sufficiently here so that better values could be maintained, but evidently the supply sent to that distant market has not as yet had any beneficial effect upon the prices that growers can obtain in this city.

By the latter part of January the crops of Bride and Bridesmaid roses went off with a good many growers, and really good flowers were very scarce, which helped to keep prices firm, not only in the case of roses, but in other lines as well.

Carnations did very well, indeed, from the beginning of the year right on to the middle of February, when a slight break in prices occurred, affecting not only carnations, but roses, violets and other flowers. It was in the first week of March, however, that flowers began to get real cheap, and it was not until the near approach of Easter that they picked up again.

For the Easter trade, compared with some other years, values were not so high, but a splendid business was done all around. There was a tremendous crop of every commercial flower almost, and a good satisfactory clean-up was effected along all cut flower lines. Immediately after Easter the market fell away, however, to quite an extent, and, with the exception of a short spurt lasting for a day or two now and then, business was rather unsatisfactory right through the season.

It was noticeable during the Spring months the local-grown bulbous flowers were at a great disadvantage, owing to the immense shipments that arrived from the South, and, in view of the fact that this competition is increasing year by year, it does not seem a profitable investment to force bulbs for this market after the middle of March. We might say in reference to the bulbous cut flowers that neither tulips, hyacinths nor narcissi did so well as they usually do, probably on account of their being forced in too great quantities. With limited supplies it would seem that a fairly good price can be obtained in this market through the first three months of the year, but after that time the stock does not bring satisfactory returns.

In June, when the peony crops began to come in, we had a period of hot weather that seemed to demoralize all trade for the time being, and peonies consequently did not do nearly so well, as far as realizing good prices is concerned, as had been the rule for several years previous. During the period peonies were in the market every other commercial flower seemed too plentiful, and prices went to pieces all around.

The gladiolus period this year, starting the latter part of June, and lasting until frost, was marked by extreme changes in values. At times the flowers would bring, in the early part of the season, an ab-

normally high price, and within a week values would be away down—cheaper than ever before.

The latter part of July asters began to arrive, but their season this year was anything but profitable. The weather had been extremely unfavorable to this crop, and very few really good asters reached the city during the entire season compared with what usually arrive here during August and September.

It was a noticeable fact, too, that we had no break in the seasons of either roses or carnations. There was never a time when American Beauty or Bride and Bridesmaid could not be had, nor when carnations could not be procured. During the month of August, however, some of the prices received would hardly seem to warrant the cutting and consigning of the flowers. In September a little better feeling seemed to prevail in the business, and it looked as though we were to have an early season.

Chrysanthemums began to arrive during the latter part of September, and by the first week in October, prices all around were increased slightly, and violets and carnations of fancy grades began to come in regularly. With the beginning of November, however, business fell off considerably, and, unfortunately for the chrysanthemums, they did not bring near the prices they usually do, although we do not think they were grown in such large numbers as they have been in other years. Prices of all other flowers since the beginning of November were away below those usually obtained, and this condition continued right up to within a few days of Christmas; in fact, to make a comparison with December 14, 1906, roses of all kinds were then bringing about double what they realized this year.

To give an idea of what varieties of chrysanthemums were in vogue this year, it might be well to mention the varieties seen in the largest numbers; these were as follows: White—Polly Rose, Clemeline Touset, Mrs. Henry Robinson, Timothy Eaton, Alice Byron, Ivory and Beatrice May; pink—Glory of the Pacific, Dr. Enguehard, William Duckman, Lady Harriott, Maud Dean and Pink Ivory; yellow—Monrovia, Merstham Yellow, Robert Halliday, Major Bonnaffon, October Sunshine, Henry Hurrell, Cheltoni and Goldmine; red—Intensity and John Shrimpton; bronze—Kate Broomhead and Rustique.

In carnations Enchantress seems to take the lead in light pink, being grown in the largest numbers, though the varieties Welcome and Winsor will cut a large figure in this shade of pink another season. Mrs. Thomas W. Lawson seems to be losing favor, and is not planted nearly so extensively as in previous years. Genevieve Lord, also, is a variety that seems to be losing ground. Victory, Robert Craig and Beacon are the leaders in scarlet. Mrs. M. A. Patten appears to be the only variegated carnation grown in quantity, while among the whites, White Lawson, White Enchantress, White Perfection, The Queen, Lieutenant Peary and Boston Market are among the leaders.

Throughout the year there has been almost uninterruptedly a supply of orchids, particularly cattleyas. Winter-flowering sweet peas do not seem to have brought the prices of other years, owing to the fact that there have been too many cultivated. The supplies in the early part of the year were at times simply enormous. Lilies have been in supply during every week of the year, and while at times they have brought fairly good prices, it is a question whether the flowers grown from cold storage bulbs realize enough to cover the cost of production, as growers are free to declare that the average number of blooms per bulb from bulbs that have been kept in cold storage is much below that of the bulbs that have not been so treated. Lily of the valley has been in supply all the year round, and most of the time it has been too plentiful for the demand, consequently has had to be sold at prices that did not seem commensurate with the quality of the flowers.

During the Spring months there was a plentiful supply of snapdragon, which only at times brought fairly good prices. Mignonette, as a cut flower during the Winter season, seems to be losing favor, and the same remark will also apply to poinsettias. We believe the poor demand for the latter during the holiday time, however, is due more to the fact that retail dealers are enabled to supply artificial representations of the poinsettia which cost them less money and seem to fill the bill with most of their customers.

The plant growers and dealers had a very good season during the early part of the year, but in the latter part—say from the beginning of the Winter season—trade with them has not been equal to expectations. Growers of cut green material, such as smilax, asparagus and maidenhair fern, have had a fairly good year, but there is some reason to believe that the market for asparagus will be affected to a large extent during the coming year by the immense crops shipped here from the South.

AMONG THE GROWERS

Weiland & Risch, Chicago, Ill.

Passing to the northward of High Ridge, a section wherein within a radius of two miles there is a larger glass surface than in any similar area in the United States and through which the northern boundary line of the City of Chicago passes, one enters the Municipality of Evanston, widely noted for its horticultural products and within the limits growing establishments, one of the largest and one of the most consequential in line of products as placed on the market at the Wabash avenue headquarters being that of Weiland & Risch, who operate 250,000 feet of glass on Asbury-Warren and Oakton streets, with city salesrooms in the Atlas building at 59 Wabash avenue, Chicago.

The proprietors are descendants of horticulturists and agriculturists, and inherit a fondness for this line of work; but it was not until about nine years ago that their interests were consolidated and

At the salesroom a large commission business is transacted, a number of the friends and neighbors of the members of the concern consigning their entire product, which in several cases is very large, and thus the house is kept in full supply of all seasonable stock. Violets, both local and Eastern, are made a specialty also.

A recent visit to the houses proved conclusively that careful treatment was constantly administered, and also that "The Irish Beauty," as grown here is all the good things bordering on perfection which the members of this house have claimed for it since its introduction.

WILLIAM K. WOOD.

Peter Murray, Fairhaven, Mass.

Peter Murray, as almost everybody knows, is the man who raised the Winsor carnation, and even although then in business on his own account he had not made the start on such lines as a visit to his greenhouses now shows. Until quite recently Mr. Murray rented from Mr. Winsor, his former employer, the greenhouses on the estate. This arrangement, though to some extent answering the purposes at the time, was certain before long to prove unsatisfying to a man of Mr. Murray's energy and boundless ambition. The splendid commencement made in the erection of two up-to-date carnation houses and a commodious dwelling adjoin-

H. A. Jahn, New Bedford, Mass.

The establishment of H. A. Jahn is in almost every particular different from that of Mr. Murray, the only point of resemblance being that here as in the other place good carnations are grown; and while recognizing that fact I could not but feel that if the greenhouses here were more up-to-date and resembling those at the Fairhaven establishment the product would surely be ever so much better. Mr. Jahn has raised numerous seedling carnations and among them there are, it is understood, several of more than passing merit. There is one in particular which he expects a great deal of, and to see what it can do here under rather unfavorable conditions would seem to make it plain that under different conditions it would surely be a money-maker. The name of the carnation referred to is Lloyd. It is the only white grown here in large numbers. It is a free grower, throwing large flowers, which are produced abundantly. The color is a good clear white; the stems were good and stiff even although the plants seemed to be planted rather closely, and the work of tying and disbudding a little neglected—all of which goes to indicate what might be expected of this variety under proper conditions.

Mr. Jahn is now beginning the propagation of this variety with the view of putting it on the market in the Spring. The houses here are old and the glass is so small, with so much wood in the construction, that it is really wonderful how well carnations do in them. If Mr. Jahn's hopes are fully realized in the sales of Lloyd plants, a modern house or two of large dimensions and up-to-date construction will in the near future take the place of the old ones. In order to give his whole time to carnation growing, he has given up his retail store in the city.

D. M.

Kromitsche & Junge, Secaucus, N. J.

Anticipating the long continuance of a heavy demand for orchids, the firm of Kromitsche & Junge, Secaucus, N. J., growers of chrysanthemums, adiantum, asparagus, and other florists' stock, have made a very substantial start in the growing of orchids, and their establishment is now destined to figure largely in the supply of orchids contributed to the New York market. At present their output is confined wholly to cattleyas, and their houses show conclusively what strides may be made in the business in a comparatively short time.

Two years ago they started with a 150-foot house of Cattleya Trianae, 2,500 plants in all, establishing them from newly imported stock. During the second year of establishment over 11,000 flowers were cut from this house. In the course of the season now on it is conservatively estimated that the house will furnish a cut running from 15,000 to 20,000 flowers. With the opening of December there was a mass of bloom to be seen and there was ample assurance that the holiday crop would be very abundant. Among the plants noticed in bloom was one bearing 41 flowers, the plant itself being anything but remarkable in point of size, and established with the rest, its two seasons' growth quite apparent.

About six months ago the firm stocked three additional 150-foot houses with newly imported plants, and they now present a splendid appearance, already yielding many flowers. The varieties planted in the newly stocked houses are Cattleya labiata, C. Mendelii, C. Mossiae, C. Trianae, and C. Schrodereae, all productive of a plentiful supply of flowers when they are most in demand.

PUBLICATIONS RECEIVED.

HORTICULTURAL DIRECTORY AND YEAR BOOK for 1908.—Publishers The Journal of Horticulture, London, Eng.—The information contained in this useful publication has been brought down to date. Among other things are provided a list of plants certificated by the Royal Horticultural and London Floricultural societies from October, 1906, to September, 1907; lists of nurserymen and florists in the United Kingdom and Ireland, also the principal trade concerns on the Continent of Europe, lists of estates and of the gardeners in charge, the principal horticultural and floricultural organizations, etc.

GARDEN AND FARM ALMANAC, 1908.—Publishers, Doubleday, Page & Company, New York. Price 25 cents.

This is a most useful document, being, as the publishers state, "a real almanac and reference book for the home, farm and garden." Some of its principal features are special planting time tables for flowers and vegetables, rules for foretelling the weather, simple remedies for the diseases of farm animals, information for builders, best varieties of fruits, home-mixed fertilizers, how to use concrete, spray mixtures, etc. The almanac is illustrated, and is well worth the price asked for it.

Interior View of Large Greenhouse of Florex Gardens, North Wales, Pa.

(See Page 220, Issue of August 17th last for Particulars). Erected by King Construction Co.

the present concern was established, Messrs. Weiland and Risch, senior, taking charge of the cultural work at the greenhouses with John Tate as foreman, and John P. Risch managing the salesroom and shipping department in the city.

The plant is located about nine miles from the market and is readily accessible from the city by electric or steam cars, and shipments may be made from the houses to the salesroom conveniently and as frequently as desired.

Roses and carnations in the most popular varieties are the specialties to which the energy of this concern is devoted it may be said almost exclusively, and in this connection might be stated the fact that this house was the first in the West to enter into the cultivation of the Killarney rose, which they did quite extensively two years ago on the strength of printed descriptions and hearsay evidence, never having seen a specimen of the bloom. The results have more than vindicated their judgment, as the variety has proved to be one of the most profitable features of the concern's business, and the new range of nine houses erected last Summer is devoted exclusively to this favorite.

ing is ample proof of Mr. Murray's possession of both energy and ambition. When along with these there is present every evidence of a thorough understanding of the business on hand, given a continuation of perfect health, with which he is at present unmistakably blessed, there need be no fear of ultimate success.

That the raiser of Winsor is a strong believer in it, the fact that his planting of carnations is composed almost entirely of that variety is proof enough; and if other growers of this carnation have plants in such condition and producing such flowers as are seen on this place, they too must be fully satisfied with its merits. Mr. Murray ships all his flowers to Welch Brothers of Boston; the only trouble between them is that there are not enough to meet the demand.

In addition to carnations Mr. Murray grows large quantities of other stock. His lilies looked especially promising. I noticed that he is a believer in planting the lilies at first into small pots, shifting them later into their flowering pots. The sturdy yet luxuriant growth seems to prove that there is nothing wrong with that method, whatever there may be in favor of it. A large batch of Gloire de Lorraine begonias looked quite thrifty, and taken all through the stock and everything else on this place indicate a successful business career for the owner.

How to Photograph Flowers.

This subject naturally divides itself into two parts, cut flowers and growing flowers. In either case a long-focus camera and isochromatic plates are necessary. Any ordinarily good lens will answer, great speed not being possible for the reason that considerable depth of focus is indispensable, and therefore a small diaphragm has to be used.

Treatment of the Subjects.

Cut flowers offer wonderful opportunities for beautiful pictures, the scope for arrangement and lighting being very great. It is the lack of rigidity in blossoms after they are cut that offers one of the greatest difficulties in this work. There seems to be an almost continuous movement on the part of some flowers; either they expand or close, or else they droop or quiver. Some varieties must be cut overnight and kept either in water or in a damp box in a cool place until two or three hours before you wish to make the photographs, when they should be put in water and in bright light; if possible, arrange just as they are to be in the picture, so that further handling will be unnecessary. Flowers which have a very short blooming period can seldom be kept overnight. It is better to take a vase to the garden and put the flowers in it directly they are cut, but do not keep them in the sun longer than is necessary. Photograph in a bright light, and have all windows closed during the exposure, and do not walk about the room or the flowers will shake. Every precaution should be taken to keep flies away, for they have a knack of settling on a flower the moment the lens is uncovered. On hot days keep a large, thoroughly wet cloth spread near the flowers. A piece of lead ribbon S-shaped will be found useful in holding stiff-stemmed flowers in position. The lead is pinched against the stem and is placed in a shallow tray of water. If a formal arrangement is desired, pin the stems to a board; if they are long enough to reach the water, so much the better, otherwise wrap them in wet absorbent cotton. Very delicate flowers should be laid on a piece of glass and photographed from above, with the camera pointing downward, or by means of a prism attached to the lens. This latter method allows the camera to be used in a horizontal position while the prism points toward the flowers.

The Plates to Use.

As already stated isochromatic plates must be used, if good results are expected. Remember that ordinary plates reproduce yellow, orange and red very much too dark, green rather too dark, and blue and violet much too light. A bright lemon-colored flower with a fairly dark blue center would be shown in the photograph as a very dark flower with a light center, i. e., completely reversing the original order; while if the slow isochromatic plate is used, a fairly truthful rendering of the colors would re-

sult. When blue and yellow are found together, it is generally best to use a pale yellow ray filter or color screen. White flowers with dark foliage need the isochromatic plate; white flowers with red or yellow markings need, in addition, the ray filter. Never use a ray filter except with the isochromatic plates, and do not be afraid to give a full exposure, for, if under-exposed, they give wretched results. Be sure also of your darkroom light; let it be very subdued and keep the plate screened until it is pretty nearly developed.

The Best Backgrounds.

The best backgrounds to use are those which show no texture, and even they should be at some distance from the flower. The ordinary opaque window shades make very good backgrounds, and have the merit of convenience and cheapness. If abso-

Cattleya Trianae—41 Blooms

Growers, Kromitsche & Junge, Secaucus, N. J.

Intely clear black is wanted, there is nothing better than black velvet. White paper gives a very good white, but it must not be placed too far from the subject, and backed or non-halation plates should be used. They are in fact advisable for all flower work if the expense does not have to be too carefully considered.

Outdoor Work.

For out-of-door flower photography, the question of weather is all-important. The slightest wind makes the work impossible. Owing to the smallness of the diaphragm necessary to secure the desirable depth of focus, the exposure has to be so long that the flowers will show motion if there is the slightest wind. The early morning or late afternoon offers the best opportunity, not only because there is usually less wind at those times, but also because the low sun gives long shadows which greatly enhance the beauty of the picture. Bright, cloudy days are very often more satisfactory than clear sunlight.

How to Focus.

In arranging the camera be sure that you focus on the near flowers rather than on those in the distance. A sharp, middle distance and blurred foreground make an eminently unsatisfactory picture. For low growing flowers it is well to place the camera very near the ground, sometimes within a foot or so. Occasionally it will be found effective to photograph with the light in front of the camera, especially when the flowers are cup-shaped. Be careful, however, that the sun does not shine directly on the lens. A back light is very seldom effective, but it is almost necessary for dark red flowers, which if in shadow appear nearly black in the picture.—A. Radelyffe Dugmore in Country Life in America.

Lunaria Biennis for Christmas Work.

Among the novelties in florists' hands this Christmas was a supply of *Lunaria biennis*, the plant known in Europe as "honesty." This plant is a biennial, bearing flowers of a lilac color, in Spring, and in Europe, where it is well known, it is much esteemed for its beauty. Succeeding the flowers, which are large and handsome, come the silicles of seeds. These are almost round, flat, and of a beautiful silvery color when ripe, and are usually borne in great clusters, in terminal racemes. It is because of their resemblance to the moon in both shape and appearance that the plant's generic name, *Lunaria*, has been given it.

It is the dried racemes of seed pods (silicles) that give them value to florists. As they are seen here they are in lengths of about two feet, which is almost the height the plant reaches; and it appears the heads are pressed flat in some way, after gathering, as they appear flattened as sold here.

Used in vases, as dried grasses, everlasting flowers and similar dried materials are, they last all Winter; and they form a desirable acquisition.

In addition to its name "honesty" it is called satin flower, the latter designation an appropriate one for it, because of the satiny appearance of the silicles. It has not been conspicuous in Philadelphia heretofore that the writer is aware of. H. H. Battles was using a good deal of it this Christmas, Pennock-Meehan Company being the importers; and it seemed to be quite popular.

This plant could be grown here very well. Seeds sown now would give flowers the coming season in all probability, but if not sown till Spring it would be a year before the flowers came.

Probably, as with other plants that could be raised here, the European growers could produce them at less expense than we could.

JOSEPH MEEHAN.

AZALEA STAR OF SOMERGEN is a novelty pictured by colored plate in a recent issue of *La Tribune Horticole*. It is described as a cross effected in 1904 between the varieties Hector Kikx and Simon Mardner; the color a deep red lightly shaded with purple. Its flowering season is toward the first of March. The azalea will be shown for the first time at the Quinquennial Exposition in Ghent, Belgium, in April of next year by the originator, August Haerens of Somergen.

Cattleyas as Grown by Kromitsche & Junge, Secaucus, N. J.

DIRECTORY OF RELIABLE RETAIL HOUSES

The retail florist firms advertising under this heading will accept and fill orders for flowers and floral designs forwarded them by mail, telegraph or telephone, the usual commission of 25 per cent. being allowed.

\$25.00, payable quarterly in advance, will entitle the advertiser to a four-line card, under this heading, for one year, 52 insertions. For every line additional to four, \$5.00 will be charged. Four lines will average 32 words: each additional line, 9 words. Each advertiser receives one copy, free, of our Florists' Telegraph Code.

New York.

YOUNG & NUGENT, 42 West 28th St. We are in the theatre district and also have exceptional facilities for delivering flowers on outgoing steamers. Wire us your orders; they will receive prompt and careful attention.

MYER, 611 Madison Ave. My facilities for delivering flowers for any and all occasions are unexcelled. Can give prompt service to steamer and theatre trade. Telegraphic orders solicited. Telephone, 5297 Plaza.

Brooklyn, N. Y.

ROBERT G. WILSON, Fulton Street and Greene Avenue. Deliveries anywhere in Brooklyn, New York, New Jersey and Long Island. Trade orders well cared for from all parts of the country, and delivered at Theatre, Hotel, Steamer or Residence. Telephones: Prospect 2840 and 4065.

Kansas City, Mo.

SAMUEL MURRAY, 1017 Broadway. I will deliver orders for flowers in Kansas City and vicinity promptly. A first-class stock of seasonable varieties of flowers always on hand. Wire me your orders.

Detroit, Mich.

JOHN BREITMEYER'S SONS, Broadway and Gratiot Avenue. We cover all Michigan points and large sections of Ohio, Indiana and Canada. Retail orders placed with us will receive careful attention.

Denver, Colo.

THE PARK FLORAL CO., 1706 Broadway, J. A. Valentine, Prsnt. Orders by wire or mail carefully filled; usual discounts allowed. Colorado, Utah, Western Nebraska and Wyoming points reached by express.

Cincinnati, O.

HARDESTY & CO., 150 East Fourth, sell the best grade of flowers grown. Retail orders from distant points for delivery in Cincinnati or surrounding territory will receive prompt attention. Telegraph us.

Dayton, O.

W. G. MATTHEWS, FLORIST, 16 West Third Street. Flowers in any arrangement for all occasions for Dayton and vicinity. Personal attention given to all orders. Long distance telephones.

Dallas, Texas.

LANG, THE FLORIST, the largest flower store in the South. Floral designs and all flowers in season; personal supervision and prompt service in Oklahoma, Texas, Louisiana. Mail and telegraphic orders solicited.

Louisville, Ky.

JACOB SCHULZ, 644 4th Avenue. Personal attention given to out-of-town orders for Louisville and surrounding territory. Have a choice line of seasonable flowers always in stock; delivery facilities perfect.

Indianapolis, Ind.

BERTERMANN BROS. CO. Our facilities for executing orders in an efficient manner are unexcelled. Our shipping territory includes the surrounding states. High grade flowers; expert workmanship.

Albany, N. Y.

EYRES, 11 North Pearl Street, cut flowers or floral designs delivered to any part of Albany and vicinity on telegraphic order. Personal attention given and satisfaction guaranteed.

Chicago, Ill.

HAUSWIRTH, The Auditorium Florist, 232 Michigan Avenue. The quality of our work is of National repute, and we are prepared to execute commissions in first-class style in Chicago and its environs.

A. B. Howard.

Arthur B. Howard, florist, Belchertown, Mass., died at his home there on Friday, December 20, 1907. Mr. Howard was born in Belchertown June 1, 1833, and had lived there all his life. He was a man of untiring energy and perseverance, a pomologist and horticulturist and an enthusiast in everything pertaining to flowers or fruit. He gave a good deal of attention to petunias and raised several new varieties of merit. Mr. Howard will be sadly missed

The Late George Vair

in the community of which he was an active member. Two children, Everett Clapp and Naomi, survive. Mrs. Howard died eight years ago.

James W. C. Dell.

James William Colebrook Dell, aged 64 years, died on December 17, 1907, at the Allegheny (Pa.) General Hospital of typhoid pneumonia. Mr. Dell was born in England and came to this country when a young man. He had been living in Pittsburgh for 30 years, being a prominent florist. For years he was manager for John R. & A. Murdoch, florists, but later engaged in business for himself. Of late years he had been with the firm of H. L. Blind & Brother, of the South Side. Mr. Dell was a member of Triumph Circle, No. 101, Protected Home Circle. Arthur C. Dell, manager of the Haugh & Keenan Transfer and Storage Company, is a son.

George Vair.

George Vair, the best known old-time gardener in Canada, died at his home in Toronto on Tuesday, December 10, just as he came home from work. He had not been ailing at all, and as he was returning from the Normal School Gardens, of which he had charge, and got off the car, he fell to the ground; he was taken to his home and died in about fifteen minutes thereafter.

Mr. Vair was gardener to Sir David McPherson at Chestnut Park for about thirty years, keeping up that estate to a very high standard. His knowledge of the profession was very wide, he being well posted in all branches of gardening. He held many public offices during his life. For years Mr. Vair was president of the Toronto Electoral District Society, president of the Horticultural Society and of the Gardeners and Florists' Association. He was also a prominent Mason. He had many friends in the United States and in Canada. Mr. Vair loved his profession and always said he hoped to die in harness. He will be greatly missed, but his example as a first-class gardener will be an inspiration to those he leaves behind.

T. M.

William H. Brown.

William H. Brown, aged 65, a well-known nursery dealer of the North Side, Pittsburg, Pa., died suddenly Saturday, December 21, 1907, at his home, 2654 Norwood avenue. He was taken sick only a short time before while on a trolley car.

Mr. Brown was born in Pitcairn, but had resided on the North Side the greater part of his life. At the outbreak of the Civil War he enlisted in the Fifth Pennsylvania heavy artillery. He was a member of Col. John B. Clark Post, No. 162, G. A. R., and the Eighth United Presbyterian church, North Side. A widow and one son survive him.

W. W. Edgar.

As reported briefly in last week's issue, W. W. Edgar, one of the best known florists in the vicinity of Boston, Mass., died on Wednesday afternoon, December 18, 1907, after a long illness, which, the last six weeks, had confined him to bed.

Mr. Edgar, who was of a kind and genial disposition, will be greatly missed by a host of friends not only in Boston but all over the country. He was born in Neston, Cheshire, England, on April 28, 1843, and received his practical training in several English gardening establishments. He worked for some time in the Dickson nurseries at Chester.

Mr. Edgar came to America in 1867, first finding employment on the Pratt estate, Watertown, which was one of the finest places at that time. He subsequently had charge of Governor Claflin's estate at Newtonville for several years, and later had charge of the Powers establishment at South Framingham, Mass. He next took hold of the Dee place in Mount Auburn, which he laid out.

Twenty-three years ago Mr. Edgar started a florist establishment of his own at Waverley, Mass., and by hard work successfully built it up so that it now comprises about 75,000 feet of glass. He made a specialty of plant growing for many years, and his fine specimens were always leaders in the Boston holiday trade. He was the first commercial grower to take hold of Begonia Gloire de Lorraine in this country, importing the plants from England in 1898.

Mr. Edgar took an active interest in all horticultural matters. He was a member of the S. A. F. O. H., and until within the last few years regularly attended all the meetings. He belonged to the American Rose Society, was a member of the Massachusetts Horticultural Society and the Gardeners and Florists' Club of Boston, taking great interest in the latter and annually inviting the members to visit his places at Waverley and Waltham. He was a director of the Boston Co-operative Flower Growers' Association and an associate mem-

New
Carnation

DEFIANCE

Brilliant
Scarlet

There are seven reasons why you should grow DEFIANCE and they are:

- 1st. It is by far the best color ever seen in a scarlet Carnation; it is the true velvety scarlet and not red; it will average 3 inches in diameter throughout the season.
- 2nd. It is unexcelled for productiveness by any Carnation in commerce to-day.
- 3rd. It is a clean and upright grower, producing an abundance of high grade flowers without any special treatment.
- 4th. It is in perfect health, and not subject to rust or any other disease, which is very prevalent among scarlet varieties.
- 5th. It is of perfect form; blooms are very symmetrical, center nicely built up and very full, but not so as to appear crowded; stems are very stiff and wiry, holding the flowers perfectly erect.
- 6th. It is a scarlet for the entire season; it comes into crop in October and continues through the entire season; it does not lose its color in bright sunlight, in fact, it improves in bright sun when other reds fade.
- 7th. It is the only scarlet to-day, and by growing DEFIANCE you will be satisfied, as it has no faults, is full of vigor and will do the work where other scarlets fail.

Strong, well-rooted cuttings, every one guaranteed, \$12.00 per 100, \$100.00 per 1,000

Usual Discount on large orders

January Delivery as Yet

JENSEN & DEKEMA,
No. 674 W. FOSTER AVE., CHICAGO.

W. N. RUDD,
MORGAN PARK, ILL.

(108) **Asters.**—I want to put in a lot of asters next Summer. Which is preferable, sowing seed under glass and setting out young plants, or sowing the seed directly outdoors where the plants are to flower? Is there a good tried variety earlier than Queen of the Market?

Penna. H. D. M.

—Sow the aster seed under glass in early March; transplant the young plants once before finally planting in the field. Consult the catalogues of those seedsmen who specialize in aster seed, and do not rely upon one variety alone for the full crop.

I am now booking orders for January delivery on rooted cuttings of the following:

Grand Varieties of CARNATIONS

Defiance, scarlet; Afterglow, rosy cerise; Andrew Carnegie, scarlet, \$12.00 per 100; \$100.00 per 1000.

White Enchantress, Winsor, Beacon, Aristocrat, \$6.00 per 100; \$50.00 per 1000.

White Perfection, Rose Pink Enchantress, \$3.00 per 100; \$25.00 per 1000.

A. F. LONGREN, Des Plaines, Ill.

CARNATIONS

Rooted Cuttings

All leading varieties, for delivery after January 1, 1908. Fine Stock.

SMITH & GANNETT, - Geneva, N. Y.

Aristocrat	6.00	50.00
Beacon	6.00	50.00

December 15th or later delivery.

JENSEN & DEKEMA, 674 W. Foster Av., CHICAGO, ILL.

THE NEW CARNATION

AFTERGLOW

Bright Rosy Cerise Pink

The highest scored seedling at the Toronto Meeting of the A. C. S.; winner of the Craig Cup at Philadelphia, for best seedling; and has scored 91 points at quite a number of prominent cities. It is a very healthy and vigorous grower, early and continuous bloomer, and the predictions are that it will take the place of Lawson. Afterglow has been grown for the past season—and is doing universally well—by the undersigned, by whom it is offered. Orders now booked to be filled in rotation, for well grown, well rooted cuttings at \$2.00 per dozen; \$12.00 per 100; \$100.00 per 1,000.

Place orders early for December delivery.

VICTORIA

NEW SEEDLING, crossed by Lawson and Harry Fenn, the color of Lawson and the long stem of Harry Fenn; it is more prolific than either. Lawson is past. Victoria is better than Lawson ever was, and gave us last Winter from 20 to 35 per cent. more blooms each month. It is very healthy and a nice grower. I have two houses of it, and it is a sight to see the buds and blooms. It brings more money in the market than Lawson. Read below what J. A. Budlong & Sons Company of Auburn, R. I., say of it. They are growing it this Winter. J. A. Budlong & Sons Company are one of the largest market gardeners in New England, also the largest rose and carnation growers in Rhode Island.

December 10, 1907.

Mr. J. H. Cushing, Quindnick, R. I.
Dear Sir: We have 1175 plants of your new seedling Victoria carnation which we planted in house the last of July. They

have made fine plants and we think now will produce as many flowers, if not more, than any carnation we ever grew. The stems are stiff and good length. The flower is also a good keeper.

We have sold these flowers in several instances to some of our best trade in Boston, who thought they were a long-stemmed Lawson.

Up to date, we have cut 4768 flowers from the 1175 plants, and there are as many buds in sight to-day as there have been any time since we started to cut. In other words, the cut has been very uniform and looks as if it would continue so throughout the Winter.

We do not think that you will make any mistake by putting this carnation on the market.

Yours truly,
THE J. A. BUDLONG & SONS CO.

Price of Victoria rooted cuttings, \$75.00 per 1000; \$8.00 per 100; 250 at 1000 rate.

WESTFIELD, N. Y.

Rooted cuttings of all soft-wooded plants are in demand at this time by florists who do not propagate their own stock. Growers making a specialty of the rooted cutting business will find an advertisement placed in THE FLORISTS' EXCHANGE a very profitable investment.

HARDY PLANT NOTES

Dianthus Napoleon III. and Others.

What is a comparatively new plant, or when does a new plant grow old? Certainly, neither novelty, age, distinctive merit, showy usefulness nor any other attributable characteristic seems to have aged the subject of these notes—Dianthus Napoleon III. In the issue of The Florists' Exchange, February 16, 1907, I read with much astonishment the statement of Fred. W. Timme, wherein he refers to this useful and admirable subject, Dianthus Napoleon III. as "a comparatively new variety." The writer of these notes has known this plant since his boyhood days, or for more than 35 years. My father used to grow it in his cottage garden, and at that time it was plentiful and common among the gardeners around my native heath, Yorkshire, and was passed around by slip or cuttings from cottager to cottager who, as a rule, found no difficulty whatever in rooting it under a bell glass. The same method has been employed in this country; and, I think, from observation and from what others have told me, that this has been the chief reason why distribution of this dianthus has not been more general. Many of the cottagers, not having bell glasses, took four and sometimes five small lights of glass and with them made a temporary glass case in the border under which to root the cuttings. Three or four of these lights were pushed into the thoroughly prepared soil. If the soil was of a sandy or loose friable nature, it was simply spaded up, thoroughly pulverized and then made firm; or if it was of a stiff, retentive nature, sand was added and thoroughly mixed with it until deemed sufficiently fine to admit of the cuttings being firmly inserted. Good drainage, of course, was always a first consideration. The glass inserted into the ground formed a square around the cuttings, while another pane was put on the top of these as a cap. Sometimes two lights would be tilted thus over the cuttings, and two more would be placed at each end. In this way many choice, valuable cuttings were raised. Air was admitted to the cuttings under these improvised glass shades or hand lights as exigencies demanded, according to the weather and the discretionary acquired skill or wisdom of the operator. Excessive moisture on the glass at any period was removed; and it was really wonderful the success that those men had, for they seldom saw their plants except during the latter part of the afternoons and evenings. Water in this case was given sparingly but attentively as occasion demanded. On being first inserted, the cuttings were thoroughly watered, afterward excess was carefully avoided.

Cuttings were taken at almost any season of the year, provided, of course,

they were not too soft, and it was a general practice to take them with a little heel or part of the stem adhering to the base of the shoot. The knife was only used to prevent the parent plant being too badly mutilated in stripping the cuttings from the stem. The cuttings were then slightly dressed, being careful always to leave the union or joint of the cutting unimpaired on the heel or part stem of the parent plant.

It must be remembered that our subject is what is termed a "mule pink," or a cross between two species; consequently it bears no seed. At least I have never known or heard of its bearing seed, hence it must be reproduced from divisions or cuttings, if for no other purpose than to obtain it true to color.

As we have not the English climatic conditions, nor do we desire this slow method of reproduction, we must, therefore, resort to quicker and more specific methods of increasing it. Heat and excessive moisture are the two chief factors against the ordinary methods of propagating this class of pinks, but when successfully propagated and properly cared for, I think the plants grow much more rapidly here than in England. Fall propagation I have found the best and safest method of increasing my stock. The wood may be taken from plants in the open any time during the Fall months, and I prefer pulling the plants apart and taking all cuttings as far as possible with a small heel on them, in much the same manner as hardy pinks are treated, trimming back the foliage fully one-half, then inserting the cuttings into good, clear sand in boxes or pans, according to stock in hand or number wanted. If only small quantities are required, pans or pots may be used, if larger numbers, then clean, well-drained boxes, about three inches deep, using about one inch of small sifted cinders in the bottom for drainage. Firmly insert the cuttings, after which place them in a cool greenhouse, and if the temperature does not run up to more than 40 degrees, so much the better. Thoroughly water on first inserting the cuttings, afterward only as occasion demands. Never let them get into a soaked condition, as nothing is more fatal to them. The tops, when the wood is well ripened, will many times undoubtedly turn brown and dry, but if proper care has been given as regards watering, air and temperature, nearly all will grow. When the sun begins to acquire power, informing us that the days of Spring are drawing nigh, the cuttings will begin to take on new life, too, and will soon show it by sending up new shoots and new foliage, at the same time sending down bunches of white roots into the sand in such masses that more attention will be demanded. They will then soon be ready for potting up, which must be attended to without delay. Close observation will

OUR READERS' VIEWS

Criticism of Critics.

Editor Florists' Exchange:

Little need be said on what "Job" states; neither he nor any other of your correspondents prove any "filching" from the columns of The Florists' Exchange. I asked for proof of this insinuation. It is repeated in a round-about fashion by one correspondent; but after wading through a page of color criticisms I find none forthcoming. If "Common Sense" (syn. "Luke A. Round") can produce none, what weight can be given any of his other statements?

The box of *Crataegus crus-galli* berries came duly to hand; they were so begrimed with smoke as to be hardly distinguishable, having evidently been grown very near a big city; they were certainly a bright red after the sooty covering was removed. Very likely some of the dark berries referred to would have been a much more cheery color if grown in a purer atmosphere, such as we have in North Easton, Mass.

I have not Messrs. Meehan's catalogue to refer to, but hope he will in the next edition emphasize the fact that *Crataegus crus-galli* is "a very dull red." I have been unable to come across any catalogue which gives it such a description, and hope Mr. Meehan, feeling as he does, that this *crataegus* "is the least worthy of all in that respect," will at least let prospective purchasers know of its shortcomings.

There is much truth in Mr. Corfield's remark that soil conditions have much to do with color in fruits. The farther north they can be grown, also, the higher is the color. Apples grown in Canada are far more brilliant than any produced in New England, and apples here will outclass Pennsylvania ones in this respect.

W. N. CRAIG,
North Easton, Mass.

REVIEW OF THE MARKET

NEW YORK.—On Tuesday morning, the day before Christmas, the weather was all that could be desired, being an agreeable change from what we had during Monday, when it rained nearly all day. The supplies of all cut flowers were ample for what calls there were, though it was believed that roses were not going to be plentiful—that is, outside of American Beauty—and prices were pushed up accordingly. American Beauty roses seemed to be in fairly good supply, and nothing over \$1 was asked for specials, so far as we could find out, and they had to be perfect in both stem and flower to command that figure; anything that was not strictly up to grade went at 75c. The best Bride, Bridesmaid, Killarney and Mme. Abel Chateau roses were held at 25c., and from that the price graded down to 6c. for good number 2.

Carnations were more plentiful than they have been in a long time, consequently values did not hold as firm as was at first expected. Asking prices in the early morning for really top grades were 10c. and 12c. for red; 10c. and 8c. for pink; 8c. and 6c. for white. These figures, of course, apply to first-class flowers only; lower prices were the rule for lots of inferior stock that came in.

Paper White narcissus were very plentiful, and no advance over last week's figures was asked. Lily of the valley was in good supply, and while sometimes 5c. was asked for special grade flowers, stock equally as good was sold at 4c., which seemed to be the ruling figure for these flowers. Cattleyas were very plentiful, and my attempt to run up prices was simply out of the question; there was probably never before such a supply of cattleyas in this market for Christmas. C. Percivaliana could be obtained in quantities at \$20 per 100, with others running from 50c. to 60c. each.

Violets were extremely plentiful, and while some specials were offered at \$1.25 per 100, good, ordinary blooms ranged from 75c. to \$1. Gardenias were in abundance, and sold at anywhere from \$3 to \$9 per 100.

A few chrysanthemums were to be had, though they did not bring any higher prices than were obtainable a week ago. Roman hyacinths were plentiful. A limited supply of snapdragon was in the market. Sweet peas and marguerites did not seem to be as plentiful this year as is usual at Christmas. Cut poinsettias were in ample supply, but it cannot be said that they sold at all satisfactorily.

The Christmas Trade.—After an all night struggle the wholesalers found that by daylight on Christmas morning, business had been much better than was anticipated, and a good general clean up in many lines had been effected. While in some places the supply of American Beauty was above the ordinary, other dealers were shorter than usual, and it is safe to say that there were not so many flowers of this rose in the market as was the case last year. Tuesday's prices were maintained throughout, and the quantity of American Beauty left over was infinitesimal. Bridesmaid, Killarney, and Mme. Abel Chateau roses cleared out in nice order, and while here and there were seen flowers that should have been sent in many days before, it was plainly apparent that there was not so much pickling of stock as has been the rule in former years. Prices for these roses ranged from 25c. each down to \$6 per 100, for the fresh clean stock. Richmond went well at from 30c. each down. Bride did not clean up so well as the colored varieties, but that of course is always expected at this holiday.

Carnations went in a manner that was a surprise to all; the prices of the previous day were held to and a general good clearance was made.

Gardenias of the best grades sold out well; short stemmed stock was left over. Cattleyas were too numerous for fancy prices to be realized, but large numbers were disposed of at prices ranging from \$20 to \$50 per 100.

A few violets were left over—not surprising seeing that over one million blooms came into the city on Tuesday. Prices did not change materially from those of the day before; \$1 per hundred was the top figure for those hunched in fifties, while for specials, \$1.25 was about the limit.

While stock of all kinds, such as Roman hyacinths, narcissus, and stevia,

went at but ordinary figures and there was too much of it in the market to make a satisfactory clean-up.

Taking the business all round, it was eminently satisfactory; prices held up much better than was expected, and many growers will no doubt be agreeably surprised when the returns are all in.

The wisdom of keeping American Beauty roses at the dollar mark, and Bride and Bridesmaid within the 25c. mark no doubt helped the cut flower trade in a marked degree. Every class of retail dealer could come in on the best goods, and they did not fail to take advantage of the opportunity. All in all, the Christmas trade of 1907 was most satisfactory. May 1908 bring us all a Happy New Year.

CHICAGO.—Christmas of 1907 has departed into history to join its predecessors of which, from most points of view in the florist business, it was a replica. The usual uncertainty as to supply and demand was perhaps more evident than has been the case in late years. While prospects of supply were very favorable a short time since, the weather for the past two weeks has been most unpropitious, an occasional glimpse of the sun being about all that has been vouchsafed to the anxious grower. And the question of demand, beyond the fact that everything is invariably taken up at Christmas, has been an uncertain one. It is undeniable that owing presumably to the financial situation the retailer was placed in a deep quandary as the usual advance orders were not forthcoming. The general feeling of unrest and the fact that the requisite circulating medium of purchase power is still on the short side seems the only excuse for the prevailing sentiment which developed into a fact and lost untold numbers of orders to the expectant retailers.

The preparatory features which were in evidence last week showed as the most important point the entire exhaust of the holly supply, so that by Saturday the small lots that were available wholesaled at \$9 per case and in some instances it is reported that higher offers were refused, but probably the goods were not on hand. But on Monday it was only necessary to put up a five dollar bill to get a case of holly, though, it must be admitted, few berries went with the leaves.

Cut flowers, which have been very much out of sight, have been held back consequently unavailable, are now in every store in quantity beyond possible sales at advertised prices.

The price changed twice from high to low this (Monday) afternoon on carnations, while roses are holding their own only on select lines and warranted orders.

Carnations were standing in the wholesale houses in the afternoon, many in bright colors, and though they were held at a high price, there were no buyers to force the seller.

W. K. WOOD.

ST. LOUIS.—The Christmas rush is upon us and indications are that everything will be bright for the holidays, though the past week business was not satisfactory. Quite a lot of funeral work was reported. From the West End florists the report comes that social work for receptions, dinners, and weddings is rather slow. The sale of made-up plants is very active; those who make a specialty of these have taken a great many advance orders for them. The advance sales for holiday greens are very satisfactory. The demand for holly is large; this commodity is very scarce; the commission men are asking as high as \$14 per case, the sales being expected to exceed those of all previous years. Among the plants for Christmas much in favor are poinsettias, azaleas and Begonia Gloire de Lorraine.

As to cut flowers it is yet a question as to the supply, but the indications are that everything will be scarce and high priced. The wholesalers say values will run about as follows. American Beauty, choice long, \$12 per dozen; \$8 to \$10 for next choice, \$2 to \$3 for shorts. Small roses, such as Richmond, Killarney, Bride and Bridesmaid, special, \$12 to \$15 per 100; \$8 to \$10 for next choice, and \$5 to \$6 for shorts. All of these flowers will be in limited supply.

Carnations, extra quality, will run to \$8 per 100; \$5 to \$6 for next choice, and

\$4 per 100 for common. These will be in plenty, but in great demand, enough orders having already been placed to consume the supply.

Bulbous stock will be in plenty at usual prices. California violets will go as high as \$2 per 100; doubles about the same. These will be scarce and more orders have been placed now than the supply will meet. Greens of all kinds will be in good supply with no advance in prices. ST. PATRICK.

INDIANAPOLIS.—The uncertainty of the volume of business to be transacted this week makes it a difficult problem for the buyer. Firms in other lines of trade report a favorable holiday patronage and it should be the same with the florists. Numerous holiday decorations are booked, but they are not as extensive as in former years. Funeral work has enabled the storemen to keep much high priced material from going to waste.

Flowers are not plentiful, but the high values quoted in the larger Western cities have not and probably will not be realized; \$12 per hundred for carnations at wholesale does not permit of a wide margin for the retailer who is averse to offering them to his customers at \$2.50 to \$3 a dozen. Nearly all the local cut has been disposed of at \$5 to \$6 a hundred.

Roses are not so high priced as last season; fancy Bridesmaid, Bride and Golden Gate bring \$10 to \$12.50 per hundred. Richmond and Killarney are now popular at \$10 to \$20 a hundred.

An extra choice lot of plants is ready for the market at prices prevailing in former seasons. Large hampers and baskets will not be made up in such numbers for this season, as it is reasoned that medium priced goods will fare better.

Violets from the surrounding towns combined with the local crop will no doubt be sufficient at \$1 to \$2 per hundred; \$4 per hundred is the retail holiday price for them.

The green goods business has been booming of late; thousands of yards of laurel have been furnished. Wild smilax and holly, also mistletoe, have sold exceptionally well. Holly has advanced to \$8 a case; first class material is not available even at that figure.

Tomlinson Hall market reports a good business in the various departments. Many of the growers are not in attendance, as it is possible to wholesale their entire production in advance. I. B.

BOSTON.—We are right in the midst of the Christmas rush and everything has been moving fairly well. Plants have sold well so far; azaleas are much in demand at from 75c. up to \$5. Begonia Gloire de Lorraine are very fine this year and have sold well, prices ranging from 75c. upward. Ardisias have been good, going at from \$1 to \$3. Ferns have sold well, especially Whitman, at from 50c. upward. Bulbous stock in pans has been in fair demand at from 35c. upward. Other plants, like poinsettias, rubbers, palms, etc., have had a fairly good call.

Cut roses have stood well up, averaging in prices much the same as last year. Bride and Bridesmaid brought from \$6 to \$25; Liberty and Richmond from \$8 to \$50, and American Beauty up to \$100 for the best grades. A few extra fancies of Richmond, Killarney, etc., have realized better prices than those quoted.

Carnations sell fairly well except white; the general prices are from \$4 to \$8, but some extra fancies are quoted at \$12. Lily of the valley has a good call at \$2 to \$4; lilies, \$2 per dozen; mignonette, 50c. per dozen, though some extra fancy bring more. Narcissi realize \$1.50 and \$2. Stevia has sold well at 25c. a bunch. Violets are much in demand at \$1 and \$1.50.

There has been a heavy trade in all cut evergreens; holly has sold exceptionally well and the trade in all kinds of wreaths has been brisk. J. W. D.

PHILADELPHIA.—The market was very unsettled; even on the 20th there was a difference of from \$5 to \$10 per 100 in the quotations of the wholesale houses. The stores that did not place orders for their supply ahead were the best off, as prices dropped and toward Tuesday night no reasonable offer was refused. Some growers tried to get \$12 per dozen for American Beauty roses, but most of this stock was sold at \$8, \$9 and \$10 per dozen, while on Christmas eve \$24 and \$30 per 100 was accepted. Some teas sold at \$30 per 100; these were exceptional flowers, general stock bringing from \$10 to \$15 per 100. For carnations \$16 and \$18 per 100

was asked for fancy stock, but very good flowers were obtainable at from \$6 to \$10 per 100.

Cattleyas were plentiful and sold at \$50 per 100. Violets were over abundant, being offered at 75c. per 100 Tuesday night.

The market was not in favor of the grower by any means, and stock was plentiful enough to allow of deliberate selection. DAVID RUST.

KALAMAZOO, MICH.—Prospects for the Christmas trade are good. The retail stores have stocked up well with pot plants, holly, and other seasonable goods, and report orders coming in satisfactorily considering the times. Holly so far has turned out of good quality and wreaths are selling well at 25c. upward. Some well flowered azaleas are also shown at \$2.50 to \$3.50 and an abundance of other pot plants at from 25c. to \$5. Stocks of cut flowers are rather short. American Beauty are quoted at from \$2 to \$12 per dozen and although a few dozen specials have been booked at \$20 the bulk will sell at \$5 to \$6. Some extra good poinsettias are being disposed of at \$8 per dozen, while others sell down to \$3. Tea roses range from \$1 to \$3.50 per dozen; carnations, 50c. to \$1.50; violets, 75c. and \$1 per bunch of 25; lily of the valley, 75c. per dozen; Roman hyacinths and narcissus, 75c.; lilies and callas, 25c. each.

Van Bochove had a huge cut of good poinsettias which sold well. The Central Nursery Company also had some good orders booked and a good line of pot plants, etc.

The weather up to now has been most favorable for growth of stock, and deliveries are made without extra packing. Enough snow has fallen to make sleighing, and a more cheerful tone is taken in regard to financial affairs.

Wishing yourself and readers a Merry and Prosperous Christmas is the message from the trade in Kalamazoo. S. B.

KANSAS CITY, MO.—An attempt to fix a wage scale for the Western Association of Nurserymen at its recent meeting failed. J. H. Skinner of Ottawa, Kan., proposed that the association resolve to pay common laborers only \$1.25 a day. Immediately there was a warm discussion. J. W. Hill of Des Moines, Ia., and C. G. Ferguson of St. Joseph protested. The association decided to allow the labor question to remain unsettled.

E. P. Bernardin of Parsons, Kan., was elected president of the society; E. S. Welch, Shenandoah, Ia., vice-president, and A. J. Holman, Leavenworth, Kan., secretary and treasurer. F. H. Stannard, Ottawa, Kan.; W. P. Stark, Louisiana, Mo.; R. J. Dagley, New Haven, Mo.; J. W. Hill, Des Moines, Ia., and A. J. Brown, Geneva, Neb., were elected directors.

FIRMS WHO ARE BUILDING

MT. HOLLY, N. J.—J. Wardwell Platt is erecting a new greenhouse on Ridgeway street.

MISHAWAKA, IND.—Mark Blackschmidt of South Bend has purchased three acres of ground here on which he expects to erect a modern greenhouse plant next Summer.

ATCHISON, KAN.—Edward Snell is building a big addition to his greenhouse, on South Sixth street.

BOISE, IDAHO.—The Boise Floral Company has leased the store formerly occupied by the I. X. L. grocery store, on Main street.

Washington, D. C.
Trade Notes.
After a prolonged cloudy spell, Old Sol came to relieve the situation on Thursday and worked full time each day thereafter, thus greatly helping Christmas stock. Business activity began in earnest on Saturday; the day being fine, many orders were booked.

Every florist's establishment is decorated in appropriate manner, with the Christmas colors. The usual number of paper bells are in evidence on all sides and still meet with public favor; there are also poinsettias tied with large bows and a goodly lot of azaleas, more of the latter than usual. The demand for good holly and evergreens is up to the usual standard. The country folk realizing this, came in multitudes with wagon loads of cheap wreaths, berries, etc., which sold rapidly. Their local supply of good holly seems to have become somewhat exhausted and the best is to be had from regular dealers.

Many of the store windows are marvels of beauty and artistic decoration, and in some instances every available foot of space, both inside and outside, is filled with dainty and attractive plant offerings, trees, etc.

Cut flowers are plentiful, except roses, which are off crop, American Beauty excepted; some good flowers of the latter are to be had.

Prices range about 25 per cent. lower than usual at Christmas. There are prospects of a most satisfactory holiday trade.

JAS. L. CARBERY.

Detroit.

Trade Notes.

Our florists are too busy booking Christmas orders to make history and news is therefore at a high premium. We are very well provided with poinsettias, roses and violets, but we will have a shortage of carnations. Orders are coming in freely.

The Detroit Florists' Club's last regular meeting was very well attended and the subject of holding an exhibition next February thoroughly discussed. A proposition was made to hold Fall and Spring shows. Finally it was decided that President Scribner appoint a committee of six to weigh those propositions and arguments and report at the next meeting.

FRANK DANZER.

of the most devoted and ablest workers for its advancement.

With him the common good was always first; he was ever ready to sacrifice his own interests to work for the interests of all. If he had a fault, it was that in his generosity he sometimes sacrificed himself too much.

For time and ability given freely in aid of their common welfare, the florists of Chicago and of the whole country are indebted to him more than can ever be repaid.

As an acknowledgement of this debt, as a tribute to his character and as a token of the grief we feel at his sad death, these resolutions shall be engrossed and presented to his family.

J. C. VAUGHAN,
WILLIS N. RUDD,
FRANK F. BENTHEY,
 Committee.

It appears to be an unusually favorable time to purchase glass for present or even future use.

William Lubliner of Lubliner & Trinz is entitled to the credit of the fine decoration which appeared in their Randolph street windows for the holidays.

J. E. Jensen among numerous orders received on Saturday last for rooted cuttings of Defiance carnations mentions two from England in both of which cases the purchasers mentioned having seen the advertisement and description of the flower in the issue of The Florists' Exchange of the 23d ultimo.

Lacy Young of the Deamud Young Fern Company reached town on Wednesday of last week expecting to remain until Spring. He reports a very successful season in the northern Michigan woods and that as there was no snow to break the ferns a larger crop of better quality than ever before has been secured.

Charles S. Stewart, with his other efficient qualifications as a salesman, has been delving into chemistry to the extent of producing the most beautiful dyes in yellow, pink, and green not only in the shade but in action, as it requires but a few minutes under his treatment to produce the desired colors.

Mrs. P. J. Hauswirth and her son Edward J. are continuing the business of her late husband at the Auditorium Annex in which they had both been important factors for many years. The usual holiday banquets at the most prominent hotel in Chicago have kept them and their assistants very busy and everything points to a continued successful business.

S. M. Michaels opened last week the unoccupied store at 48 and 50 Wabash avenue, for the sale of Christmas greens.

Manager George Asmus of the Schiller stores states that in addition to the holiday rush they have been worked very nearly to the limit for some time with an unusual influx of funeral orders.

The Chicago Rose Company in addition to a very satisfactory cut from its greenhouses reports a record-breaking business in wire designs.

Max Ringier says it is a boy and the holidays for Max are doubly happy.

Now begin to make your plans for Easter Sunday, April 19 next.

A number of prospective holly buyers, who were waiting for the tall end drop of previous years, refusing the first of last week to pay \$4 and \$5 per case, had none of this favorite Christmas green for their customers, or, if it had been ordered, were compelled to purchase at losing prices.

H. N. Bruns was confined to bed the first of the week.

With an elegant crop of Killarney and Miss Kate Moulton roses, carnations enough to fill all demands N. J. Wietor states that the business of Wietor Brothers could not have been more satisfactory to all parties concerned, figuring about 20 per cent. over that of last year.

Charles Balluff left Wednesday night accompanied by Mrs. Balluff for the northern Wisconsin woods on his annual anti-Christmas hunting trip.

Eaton's Flower Shop has joined the automobile club of the city florists, their runabout being seen at the market headquarters every day.

The Week's News.

Among the many beautiful and interesting exhibits in the Randolph street windows of Vaughan's Seed Store is included the ear of corn grown by L. B. Clore of Franklin, Ind., which sold at auction at the recent corn show for \$250.

Ed. Bentley is holding his own among the bowlers; a few evenings ago he ran thirty-three frames without a break and averaged 197 for six games for the evening.

Tulips though rather short have made their appearance in limited quantities.

Though not yet presented to the club the committee appointed at the last meeting has prepared the following resolution on the death of P. J. Hauswirth:

Resolved, by the Chicago Florists' Club;

In the death of Philip J. Hauswirth every florist in Chicago has lost a loyal friend and horticulture has lost one

THE FLORISTS' EXCHANGE

2 Duane St., New York

J. W. D.

Peter Reinberg though well sup-
plied was among the many dealers
short on red stock though all orders
were filled where customers had
placed their requirements in advance.

In addition to advertised stock
Charles W. McKellar carried a fine
line of plants, including cyclamen,
poinsettias and peppers.

John Kruchten was cleaned out be-
fore the holiday, having disposed of
all available stock and placed it in his
customers' hands.

Judging from general satisfactory
results and the amount of manetti
stock which is arriving in the Western
section, it appears only a question of
time when own root roses will be a
thing of the past here. The J. A.
Budlong concern, the pioneer in this
line of venture, is so well satisfied and
results so successful that it is now the
exclusive system followed by Foreman
Dunn.

Harry Rowe, expressing the feeling
of the downtown retailers said, "I
am perfectly satisfied. The total re-
ceipts are not up to last year's, but
the customers are more pleased, as
they got more for their money."

Sinner Brothers state that their
business is much larger than last
year's, but owing chiefly to the super-
ior crops of this season over last.

Math. Evert was offering chrys-
anthemums last Monday in the Flower
Market at from \$1 to \$4 per dozen.
It seems the chrysanthemum must
be considered a Christmas article, as
Wietor, Winterson, Hunt, Poehlmann
and others were well supplied.

W. K. WOOD.

New Orleans.

News Notes.

A fire occurred in the seed
warehouse of the Jos. A. Schindler Seed
Company, seedsmen and florists, on
Sunday morning, December 15, and
damage was done by fire and water
amounting to several thousand dol-
lars. The firm had its large stock of
imported porcelain and artificial
wreaths stored in this building as
well as valuable stock procured for
the holidays; fortunately the fire did
not reach the main store, so it caused
no interruption to business.

Last year there was a shortage of
Christmas trees in this city, but such
conditions do not exist this year, as
the trees are to be seen in such abun-
dant that they are being peddled
around the streets.

A. Alost, Gentilly avenue, was for-
tunate in having two houses of chrys-
anthemums in for the holidays, the
varieties consisting principally of Mrs.
Henry Robinson and H. Cannell.
This may seem strange as both of
these are early varieties, but Mr. Alost
finds from many late struck cuttings
these sorts come in just in time for
Christmas.

Well grown Gloire de Lorraine he-
gonias and poinsettias, callas, etc.,
were much in evidence for the holi-
days, but azaleas were rather scarce.

There was a good attendance at the
meeting of the Horticultural Society
on the night of December 19.

LEBANON, TENN.—The Banner
recently gave an illustrated write-up
of the establishment of the Lebanon
Floral Company. The plant consists
of three houses in charge of C. J. Axel-
son, whose wife is the floral designer
of the concern. The men who com-
pose the company are W. H. Ander-
son, R. C. Weir and Jeff Castleman.

WESTERLY, R. I.—S. J. Reuter &
Son are planning the taking down of
their old range of houses in the
Spring and replacing it with six mod-
ern houses, each 185 x 35 feet. The
A. T. Stearns Lumber Company, Bos-
ton, has the contract for supplying
the material and is already at work
getting it out at the firm's mills

News Notes.

Considerable building will likely be done in this vicinity in the near future, many growers taking advantage of the low price of glass at present prevailing. Among those who have already started in this work are W. R. Morris, Wellesley, a rose house, 100 x 30 feet; Adam Foster, North Woburn, two houses, each 300 x 35 feet; W. H. Allen, Arlington, a vegetable house, 365 x 45 feet; J. W. Minott, Portland, one house 150 x 40 feet; and F. E. Palmer, one house 150 x 32 feet. The A. T. Stearns Lumber Company has the contracts for makes a specialty of greenhouse lum-supplying materials for all the foregoing. This firm makes a specialty of greenhouse lumber and is well known as a dealer in high grade ypress.

H. H. Barrows & Son have had a splendid sale of Nephrolepis Whitmani recently and are all sold out of large pot plants at present.

The Waban Rose Conservatories had extra fine Killarney roses for the Christmas trade and also kept their end up with American Beauty and Richmond.

The committee at work on the getting up of a flower show by the two cut flower markets reports very favorable prospects of a good exhibition to be held about the end of January. The schedule will be ready for publication in a few days.

H. M. Robinson & Company report a very heavy trade in all kinds of Christmas greens as well as in cut flowers.

W. H. Elliott had some extra high grade Richmond and Killarney roses and did a large business in asparagus, of which he makes a specialty.

The following committee on resolutions on the death of W. W. Edgar has been appointed by President Westwood of the Gardeners and Florists' Club: Edward Hatch, W. J. Stewart and P. Welch.

J. A. Cartwright, salesman for the Waban Rose Conservatories, is, we are glad to note, able to attend to his duties after being confined to his home for several days with the grippe.

Welch Brothers have had a very successful holiday trade both in plants, evergreens and cut flowers.

Pelree Brothers as usual did a large trade in azaleas and sold out all they had at satisfactory figures.

Albert Roper of Tewksbury has a lot of extra fine fancy flowers of his new striped carnation for which he is receiving top notch prices.

The following prizes have been awarded by the committee on gardens of the Massachusetts Horticultural Society: The H. H. Hunsnewell Triennial premium to the Morton F. Plant Estate, Groton, Conn.; Thomas W. Head, gardener; special prize for best kept estate of from one to three acres to the Hon. J. R. Leeson, Newton Center, Jas. Cartwright, gardener; first prize for the best vegetable garden, non-commercial, of 20,000 feet, to Frank P. Briggs, Ayer, Mass.; first prize for the best peony garden to Dr. Minot, Milton; special honorable mention to General Stephen M. Weld for his Dedham estate; and silver medal to James Garthly, gardener to Mr. H. H. Rogers, Fairhaven, for skilful cultivation of chrysanthemums.

Numerous other entries were made for some of these prizes, especially that offered for vegetable gardens, but the committee did not feel justified in making awards to any of the others on account of the general littered up and unkempt condition in which they found the gardens.

The first exhibition of the year of the Massachusetts Horticultural Society will be held January 25 and will include primulas, cinerarias, carnations, etc. Schedules may be obtained from the secretary, W. P. Rich, 300 Massachusetts avenue, Boston.

Thomas H. Westwood, president, and W. E. Fisher, ex-secretary of the Gardeners and Florists' Club, are confined to their homes with la grippe.

William Sim is having good success with his new violet Boston and will introduce it the coming Spring. He had a fine cut of sweet peas for the holiday trade.

THE WHILLDIN POTTERY COMPANY THE LARGEST MANUFACTURERS OF STANDARD FLOWER POTS

PHILADELPHIA, PA. LONG ISLAND CITY, N. Y. JERSEY CITY, N. J.

Funeral of W. W. Edgar.

The funeral of W. W. Edgar was held in All Saints' Episcopal Church, Belmont, on Saturday afternoon last at two o'clock, the building being filled with the many friends of the deceased. A large delegation of growers, both private and commercial, attended. There were many fine floral emblems; besides those from the relatives and immediate friends, designs came from the various organizations to which Mr. Edgar belonged. The Gardeners and Florists' Club sent its regular design—a bunch of roses on three cypress leaves. The pall-bearers were Michael H. Norton, Thomas Cox, Thomas Roland, Patrick Welch, Alexander Montgomery, William J. Stewart, Joseph Fuller and F. R. Mathieson. The interment was in the family burial plot in Belmont Cemetery. J. W. D.

Philadelphia.

The Christmas Trade.

The Christmas business in this city has been a very peculiar one. Many stores report that they have not done as much as last year in number of orders, but prices of flowers were lower, therefore the retail stores made more profit. As usual a very large number of plants were sold, both singly and in made-up baskets. Azaleas went very well, but most stores kept shy on large plants, those retailing at from \$1.50 to \$6 selling very readily. Above that figure they went slowly. Poinsettias, both as single plants and made-up in pans and baskets, sold very well. Begonia Gloire de Lorraine also went well in some stores, but others did not push them. Dracaena terminalis in made-up pans with a few ferns was in demand. Cyclamen also were quick sellers; those from the Robert Craig Company were well flowered. There has been a large number of the various Boston ferns sold; those in 6 and 8-inch pans going quickly. Abies Nordmanniana in all sizes up to \$15 retail went early; there were also some good sales in boxwood plants.

The Christmas tree men did not fare so well this year; large numbers of trees were left over, and some cars were not unloaded.

The decorators had a busy week. J. J. Habermehl's Sons had a large ball decoration on Thursday for Mr. James W. Paul, Jr., president of the Pennsylvania Horticultural Society; this was the most elaborate affair of this season. The general design was an Italian garden scene, with balconies, electric fountain and grottoes. The color of all flowers was pink; 1,000 of Wyndmoor, Myers & Samtman's new rose, were used besides quantities of other flowers. The William Graham Company had decorations and large dinner table work at the Union League University Club, Merion and Germantown Cricket Clubs, also the Christmas decoration at the Stock Exchange.

HAND & CO THE NORTH SIDE RESULT

of our Steel Eave Plate is what we want you to know. When we say this eave plate of ours clears itself from snow and ice, we are talking particularly about the north side of the house.

This photograph of the north side of this 40 foot Iron Frame House of Mr. Jeff. Doremus, at Madison, N. J., was taken last winter at four o'clock on an afternoon when the mercury was hanging around the below zero mark. *The eave is cleared of ice.*

But don't think the Steel Eave Plate is for the Iron Frame House only; we use it in our Half-Iron Construction, and are ready to sell you ten or ten hundred feet of it with the roof bar brackets bolted to it. Get the price—and get it now.

Manufacturers of Heating and Ventilating Apparatus

New York.

News of the Week.

Some very pretty window effects were seen this week among the retailers, and here and there were observed some things that, to our mind, have no place in a florist store, and could just as well have been omitted. Artificial flowers are excellent attractions and can be used to great advantage by milliners and dry-goods merchants, but they add no beauty to natural flowers and plants.

Thomas Young, Jr., at his Fifth avenue store, near Forty-second street, had a window of Calanthe Veitchii, Begonia Gloire de Lorraine and violets that made one of the most impressive exhibits on the avenue. Wadley & Smythe had a very tastefully arranged window in which the principal features were white lilac, cyclamen, marguerites and azaleas. Thorley's Fifth avenue store made massive showings in solid colors. One window was a mass of Erica melanthera plants in gilt pot covers. The plants were perfect specimens, and the contrast afforded by the gilded pot covers was at once attractive and effective. Another window of this store was composed wholly of ardisias, each plant being adorned with a broad red ribbon, making, if anything, the more charming window of the two. Alex. McConnell made special features of choice plants and many fine specimens of camellias, oranges, azaleas and cyclamen were displayed. Made-up baskets are always a feature here, and much decorative stock, such as crotons, marantas, sansevieras, etc., were noticeable in the combinations used to make up the baskets and hampers of plants for holiday gifts.

At Fleischman's one of the windows was arranged for a solid white effect, to obtain which boxes, about 20 inches long and 12 inches wide, having panels of plaster cast models of the human form on the sides and filled with masses of cut gardenias, were used, and were decidedly attractive. Large specimens of Ficus pandurata were also a feature here.

A Winter scene was the subject portrayed in one of the large windows of George M. Stumpp's store at Fifth avenue and Fifty-eighth street. A clever manipulation of cotton wool and liquid white coloring matter gave the foliage used a very wintry appearance, touches of color being added by brilliant poinsettias. Myer, at Fifty-eighth street and Madison avenue, showed many tastefully arranged hampers of both flowering and foliage plants. Azaleas, cyclamen, primulas, poinsettias, ardisias were all used in large quantities.

A. Warrendorf had a very artistic arrangement of plants trimmed with ribbon, some very fine specimen azaleas, cyclamen, ardisias and poinsettias being included in the collection. J. H. Small & Sons showed cattleya plants covered with blossoms, which gave a very rich effect to their elaborate display at the Broadway store.

A judgment for the amount of \$59 has been secured against the H. E.

Jaeger Company, Inc., retail florists, by John Young, wholesale florist, 51 West Twenty-eighth street.

His many friends will be sorry to hear of the sad Christmas that came to the home of William H. Gunther, wholesale florist, whose wife died in childbirth on Tuesday evening, December 24, at their home, 323 West Fifty-sixth street.

Funeral services were held at the residence on Thursday evening, the interment being on Friday in Woodlawn Cemetery.

Cincinnati.

Trade Notes.

The past week has been dismal so far as old Sol was concerned; consequently, a shortening up and deterioration of stock. Bridesmaid roses have been poor in color. Uride have held up better, and seem to have more vitality. Of carnations we are getting some daily, but they are opening slowly.

To-day (Saturday, December 21) is the first day that the express companies have been really busy; this is one of the things that tend to show the pulse of trade. I believe the florists will have a fairly good Christmas business; in fact, trade with the craft is not so bad, but collections are.

Julius Baer has an ideal Santa Claus snow scene in his window; it shows a full-sized deer attached to a sleigh with Kris Kringle seated therein. The scene represents a wood of pines with Santa and his deer just on the edge of the clearing. The whole decoration is very clever and a credit to the artist. All of the other retail windows of the florists are very pretty.

Mistletoe never was finer, and holly never poorer in this market than this season. Boxwood and leucothoe sprays are seen made into wreaths with artificial poinsettias or red immortelles worked in, and they are much prettier than the holly. Prices on all cut flowers will be maintained as quoted, with not one-quarter enough stock to go around. A report from Richmond, Ind., one of our flower centers, states that they will not cut one-half as much as last year, and this report seems to hold good all over the country, except Chicago.

It is the desire of Secretary Hays of the American Breeders' Association to know how many will attend the meeting of the American Carnation Society, at Washington on January 28-30, 1908, from the state of Ohio. All from Ohio who intend going, whether members or prospective members, will oblige by notifying at once E. G. Gillett, 133 East Third street, Cincinnati, Ohio.

I wish all a very Merry Christmas and a Happy New Year. E. G. G.

GLEN COVE, N. Y.—The Nassau County Horticultural Society has elected new officers as follows: President Adolph Jaenicke, of Floral Park; vice-president, S. J. Trepass, of Glen Cove; secretary, W. S. Rennie, of Locust Valley; treasurer, Henry Matz, of Glen Cove; corresponding secretary, V. Kurz, of Glen Cove. Executive Committee, A. Mackenzie, G. Wilson, John P. Johnston, Felix Mense, C. Bertanzel and A. Westlin.

THE NEW DUNNING BOILER

You can regulate the heat in any part of your establishment, and keep an even temperature at any degree all through the season. It gives more perfect service, with less fuel, than any other boiler that was ever used

IN GREENHOUSES.

Vertical fire surfaces—no nooks or crevices for soot. Inside boiler surface perfectly smooth—no lodgment of used sediment or scale. Water can be drained off to last drop. Burns hard coal, soft coal, or wood. Used by U. S. Government.

NEW YORK CENTRAL IRON WORKS COMPANY
GENEVA, NEW YORK

Davenport, Ia.

The Tri-City Florists' Association has selected the following as its list of subjects for discussion during the year 1908:

January.—General discussion of heating and building greenhouses.

February.—Propagation of Easter stock, such as lilies, hydrangeas, lilac, azaleas, etc.

March.—How, when and what are the best varieties of bedding plants for Spring sales?

April.—Planting of shrubs and hardy plants, also the best and most useful varieties.

May.—What are the most profitable and salable plants and cut flowers for Decoration Day?

June.—Soils: How to prepare the best soil for roses, carnations, violets, chrysanthemums and general bedding plants, lilies and lily of the valley pips.

July.—The ladies' month: preparing of floral work and what are the best out-of-door plants to grow for funeral work.

August.—How to handle cold-storage September.—When to plant bulbs for early and late flowering, and what are the best varieties for that purpose.

October.—Poinsettias. Best varieties of azaleas for Christmas. Are geraniums profitable for Christmas?

November.—Outdoor planting of bulbs, and what are the best varieties for show beds?

December.—Propagation of roses, carnations, bedding plants, also sowing of seeds.

Canajoharie, N. Y.

Joseph Trandt of this place recently added another greenhouse to his already extensive range. Mr. Trandt does both a wholesale and retail business. He makes a specialty of Begonia Gloire de Lorraine and has been very successful with it. Previous to coming to Canajoharie Mr. Trandt was with Thomas Roland of Nahant, Mass. J. M.

AMES, IA.—Miss Lydia Olsan, daughter of F. J. Olsan, the greenhouse man, left for Chicago recently, where she will spend a week, after which she will go to Philadelphia and be united in marriage to A. J. Model, of Pottsville, Pa., where they will make their home.

NEW ORLEANS, LA.—A lady member of the Audubon Park Association of this city has suggested that the commission should establish a school of horticulture at the park. The ladies on the Board were asked to look into the question and submit a plan for carrying it into effect.

GIBLIN & CO., Utica, N. Y.

STRANGE, ISN'T IT, THAT SOME GROWERS GO RIGHT ON USING WOOD PURLINS AND POSTS, AND FAIL TO SEE THAT A HOUSE NOT TIED TOGETHER RIGIDLY BY IRON FITTINGS IS CONSTANTLY RAISING HAVOC WITH THE GLAZING BY LOOSENING THE PUTTY AND BREAKING THE GLASS.

So much for the house with the shakes! These very same men see the strong points, the absolute sense of our Interchangeable Split Column Fittings; they acknowledge that the Giant Arch which these fittings make, is a tremendous strengthening to the whole house—and still just because years ago they put up a house without a Giant Arch or Pipe Purlins, that still stands, they'll try it again. Look here, friend, that was THEN, this is NOW. You can't meet competition with any old shade trap these days. You've got to get all the iron that is practical in a house, for it's the only way to cut down the shade, and give the house rigidity.

IF YOU DON'T CUT DOWN THE SHADE, YOUR COMPETITOR CAN CUT DOWN YOUR PROFITS. GET ALL THE INFORMATION YOU CAN ON THESE FITTINGS OF OURS. GET OUR PRICES. FIND OUT WHAT THE L. & B. HALF-IRON HOUSE IS.

We make every part of a greenhouse but the glass.
 We sell any part.
